## EXECUTIVE SUMMARY

### HODAC

A thorough and complete statistical analysis has been compiled, disseminated, and analyzed comparing the first six months of data for the periods of July 1, 2006 – December 31, 2006 and January 1, 2007 – June 30, 2007. This data has been compiled from actual calls received into the Helpline Georgia Call Center and logged into the database. Data was received in a 'raw' or untouched state where a series of statistical cleaning and repairing operations were performed. If pertinent data was missing from specific calls, that call was deleted from the entire database to allow for a relevant and pertinent database to analyze from. Type 1 and Type 2 statistical errors were avoided at all costs.

Data was received in two 'blocks' of six month intervals for FY06, spanning July 1, 2006 – December 31, 2006 and January 1, 2007 – June 30, 2007, with calls totaling 7,417 for the 1st six month period and 6,022 calls for the second six month period. The two six-month periods were then totaled for the entire year reporting period for a total of 13,439 calls. Each test performed was completed individually on each dataset so as not to risk tainting each of the datasets. Certain specific state, regional, and county information was deemed important to obtain from the datasets to compare. The information gleaned from these tests will create a situation where caller behaviors, habits, and utilizations can be determined. Seasonal behavior can be identified when comparing the datasets of each of the three years of reporting. This knowledge has great implications for further marketing of the Helpline Georgia program, as well as pinpointing important areas within the state and cultural sub-sects of society that may require specialized assistance.

The following information was cultivated from the three sets of data obtained:

### METHODOLOGY

#### 1. DEMOGRAPHICAL

- i. **Gender**- Tests performed at both the State and Regional Levels for high level Gender call behaviors.
- ii. **Ethnicity** - Performed at both the State and Regional Level
- iii. **Employment** – Status tests performed at both the State and Regional Level
- iv. **Age Range** - State and Regional high level data was obtained

#### 2. CALLER USAGE (General, high level information)

- i. Total State, Regional, and County caller usage habits were obtained.

#### 3. NEEDS

This section is extremely detailed and comprehensive. Need data was cultivated for the following for each of the six month periods:

- i. **Multiple Needs** – These are callers who utilize the service for more than one reason. ALL ‘reasons’ or ‘needs’ were calculated for each caller, resulting in a figure much higher than the actual number of callers. This captures all the reasons they call the service. This high level data was captured for State and Regional levels.
- ii. **Top Fifteen Needs** – These represent the top 15 reason people are utilizing Helpline Georgia. This was compared for each 6-month period of each year and was calculated for both State and Regional levels.
- iii. **Complete List** – This is a complete State level list of the needs callers inquired about when they called the service.
- iv. **Substance Abuse** - This area was calculated at the State and Regional Level.

#### **4. SPECIFIC FOCUS AREAS – ALCOHOL, CRACK, METHAMPHETAMINES & PRESCRIPTION DRUGS**

- i. **Demographical** – State Level data for each focus area, for each reporting period including:
  - a. **Gender**
  - b. **Ethnicity**
  - c. **Employment Status**
  - d. **Age Range**
- ii. **Caller Usage** – State Level, Regional and County Level.

## COMPANY PROFILE AND HISTORY

HODAC, Inc. began as The Houston Drug Action Council in 1970, shortly following the Atlanta International Rock Festival, also known as the Byron Rock Festival, which was held in neighboring Peach County. The Rock Festival brought to light the need for a drug intervention program in the county. Some concerned citizens started to look at the problem of rising drug use and teen pregnancies in Houston County. By 1973, The Houston Drug Action Council was incorporated and the staff size had tripled.

HODAC's priority has always been helping children who are having problems in their homes who are abused, delinquent, dealing with pregnancy or drug use. Since that time, HODAC's programs have increased as needs were identified in the community. Programs such as: Gateway Cottage, a transitional shelter for women with children who are coming out of drug and alcohol treatment facilities; Student and Family Prevention Services, working with high risk kids in dealing with an array of problems such as conflict resolution and anger management; Helpline Georgia, a statewide toll-free hotline providing information and referrals for crime victims, gambling addiction, drug and alcohol abuse and domestic violence; Teen Pregnancy Prevention Program and Teen Headquarters, designed to assist teens with prevention of pregnancy, risks involved in having children, and alternative activities to reduce the number of juvenile crimes and pregnancies; and HODAC's Victim Resource Center, offering comprehensive services to crime victims and violence prevention education to the community.

The Houston Drug Action Council, Inc. officially changed its name in 1999 to HODAC, Inc.

## CALLER HISTORY

### REGION 1 – CALLER BREAKDOWN BY COUNTY

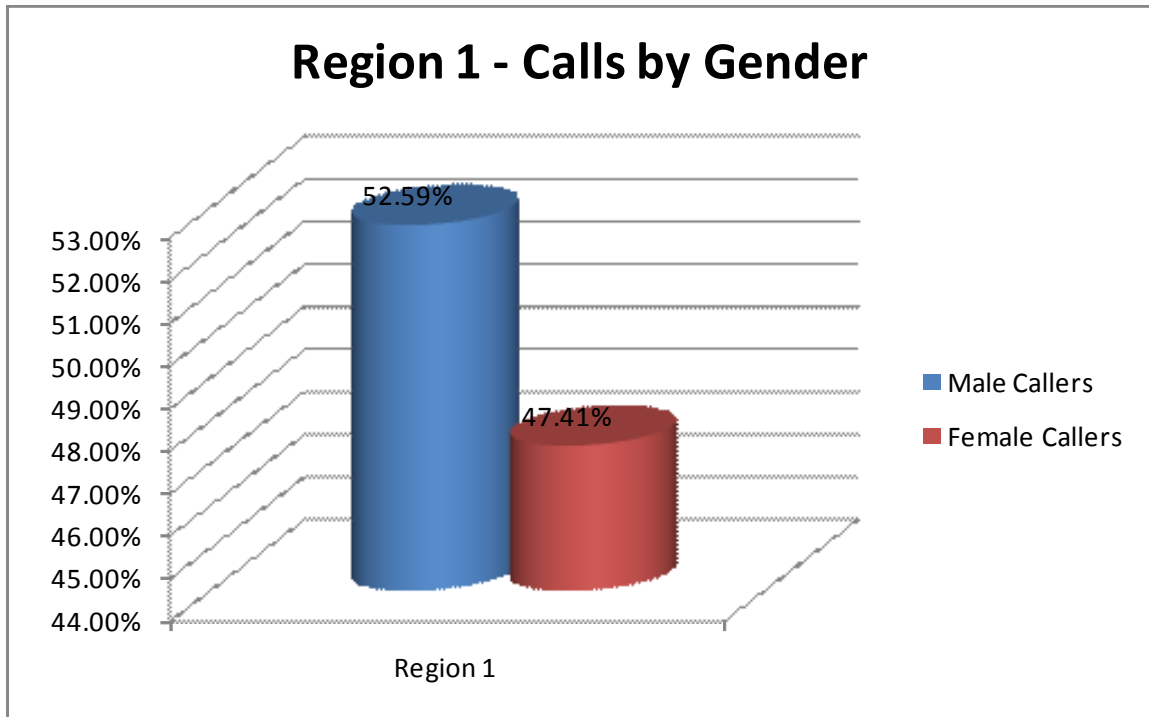

<i>Region 1 Callers by County</i>		
<b>COUNTY</b>	<b>COUNT</b>	<b>% Calls</b>
<b>COUNTY</b>	<b>FY07</b>

19-59	1483	92.63%
60+	53	3.31%
<b>TOTAL</b>	<b>1601</b>	<b>100.00%</b>

## NEEDS

### NEEDS DISCUSSION

Caller Needs are represented in the HODAC Iris data collection system with 244 separate and individual needs. These needs are divided into both individual needs and categories. Needs were broken down into 6 separate main categories. 95% of all calls received at the Helpline can be categorized within one of the following six Main Categorical headings for Region 1.

This allows the Helpline to determine which general areas people are calling about.

### MULTIPLE NEEDS

#### *State and Regional Levels*

Callers generally have more than one reason why they utilize Helpline Georgia. While they may inquire about only one issue, their calls often become larger and more encompassing, bleeding into other assistance areas. The average number of needs inquired about during any given call is calculated for State level data below for each of FY04, FY05, FY06 and FY07.

	<i>FY04</i>	<i>FY05</i>	<i>FY06</i>	<i>FY07</i>
<b>Avg # Needs per Call</b>	1.95	2.001	1.976	1.901

As you can see, the average number of needs per call inquired about remains virtually flat for each of FY04, FY05 and FY06, and FY07, hovering right at two needs per call.

Categorical Main needs attempt to pinpoint demographical data with regards to calling need inquiries. This assists the service to determine to what extent and configuration people are troubled when they utilize the service.

Of the 244 individual needs inquired about, the top 6 main need categories reported were as follows:

## REGIONAL NEEDS BREAKDOWN

### REGION 1

<b>Categorical Needs</b>	<b>FY07</b>	<b>%</b>
Substance Abuse / Addiction	1159	72.39%
Mental Health	44	2.75%
Criminal/Legal Reporting	118	7.37%
Abuse / Neglect	32	2.00%
General Information / Inquiries	143	8.93%
Medical / Health Inquiries	14	0.87%
<b>SUBTOTAL</b>	<b>1510</b>	<b>94.32%</b>
Multiple Categories (not fitting into categorical needs)	91	5.68%
<b>TOTAL</b>	<b>1601</b>	<b>100.00%</b>

### TOP 25 CALLER INQUIRIES

#### STATE LEVELS

The most frequent reasons people call into Helpline Georgia have been historically, and continue to be largely for drug and substance abuse issues. The type and utilization of the most 'common' drugs such as marijuana have seen slight declines in call inquiries, while Methamphetamines and Crack have increased in interest – even in largely rural areas. Most prevalent within the state and continually gaining ground, drug problems are permeating even the most rural areas with drugs that were, in the past, considered to be 'urban' or 'city' in nature only. Still, ease of production, using common, everyday items as well as the ability to produce smaller amounts in concealed areas have lent, in part, a easy way to get high with decreased risk. This again is not just Georgian behavior, but is truly becoming a national epidemic.

As stated during FY2006 final report, while established drugs continue to be inquired about, 'newer', drugs with devastating physical results are being inquired about in larger and larger numbers. Marijuana, Heroin, Cocaine and Alcohol, while still appearing on the 'Top 25' hit list, are declining slowly in call inquiries throughout the last four year reporting period.

Below is a listing for the top 25 needs or reasons for calling the helpline and a graphical view of the top 15 of these needs. Totaling all needs yields a volume of 25,551 needs that the 13,419 callers had. These values contain a caveat that callers can and do call in for multiple

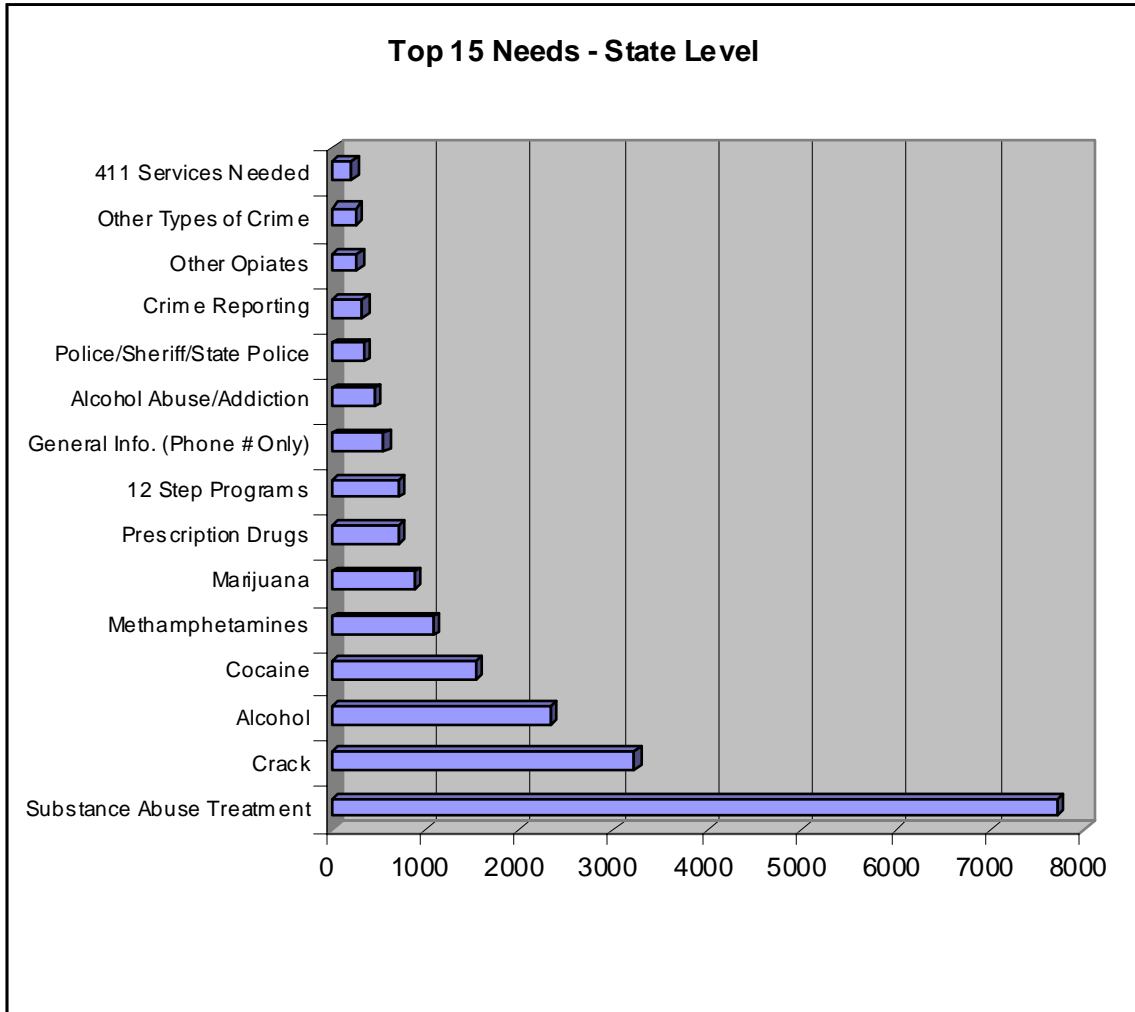

needs. The top five needs combine to 62.11% and the top 15 needs combine for 80.78% of the total needs of all callers. Including all needs up the top 25 brings the amount to 87.73%.

The Top 25 individual caller inquiries at the state level are as follows:

**State Level - 25 Top Call Needs**

	<b>Need</b>		
1	Substance Abuse Treatment	7702	34.36%
2	Crack	3224	14.38%
3	Alcohol	2313	10.32%
4	Cocaine	1544	6.89%
5	Methamphetamines	1086	4.84%
6	Marijuana	889	3.97%
7	Prescription Drugs	723	3.23%
8	12 Step Programs	704	3.14%
9	General Info. (Phone # Only)	562	2.51%
10	Alcohol Abuse/Addiction	475	2.12%

## SUBSTANCE ABUSE

### REGIONAL LEVEL

All 13,439 calls were analyzed to determine how many of these individual calls were related to Substance Abuse.

The following are the results for Region 1 –this test captures all calls that may have had any Substance Abuse reason for calling in regardless of the number of needs the caller expressed needing help with.

### ***SUBSTANCE ABUSE***

<b>Count</b>	<b>1002</b>
--------------	-------------

## SPECIFIC FOCUS AREAS

Specific Focus Areas were analyzed for the areas of Alcohol, Methamphetamines, Crack and Prescription Drugs for both the State level and for each region.

Substance abuse continues to be the most prevalent reason people utilize Helpline Georgia. It is important to investigate several areas of substance abuse to pinpoint emerging trends and/or potential problem areas.

The following specific focus areas are divided and represented by all regions to show a comparison for each region for FY2007.

## ALCOHOL

### STATE LEVEL RESULTS

The specific focus area of calls pertaining to Alcohol make up 20.70% of the total calls for FY07. Demographically viewing this category shows Males with 65.71%, Caucasians with 62.44% and the unemployed with 65.63% of calls. Regionally, region 3 contains 45.08% of calls and mirrors the call distribution for the entire state.

State level results for FY 2007 are as follows:

<b>GENDER</b>	Male	1828
	Female	954
	<b>TOTAL</b>	<b>2782</b>

<b>ETHNICITY</b>	Caucasian	1737
	African American	908
	American Indian	4
	Asian/Pac.Island	6
	Hispanic	122
	Multi-Ethnic	5
	<b>TOTAL</b>	<b>2782</b>

<b>EMPLOYMENT STATUS</b>	Employed full-time	680
	Unemployed	1823
	Student (not employed)	34
	Disabled	69
	Homemaker	17
	Illness	4
	Maternity	2
	Retired	21
	Employed part-time	113

	Veteran	1
	<b>TOTAL</b>	<b>2782</b>

<b>AGE RANGE</b>	Birth-5	0
	18-Jun	48
	19-59	2673
	60+	61
	<b>TOTAL</b>	<b>2782</b>

REGIONAL LEVEL

***Alcohol Calls Received - By Region***

<b>REGION</b>	1	341	12.26%
	2	402	14.45%
	3	1254	45.08%
	4	370	13.30%
	5	415	14.92%
	<b>TOTAL</b>	<b>2782</b>	<b>100.00%</b>

It is interesting to note that Region 1 has the lowest number and percentage of calls received into the Helpline regarding Alcohol.

CRACK

STATE LEVEL RESULTS

The specific focus area of calls pertaining to Crack make up 23.99% of the total calls for FY07. Demographically viewing this category shows Males with 62.34%, African Americans with 49.81% and the unemployed with 81.39% of calls. Regionally, region 3 contains 41.35% of calls and mirrors the call distribution for the entire state.

<b>AGE RANGE</b>	Birth-5	0
	18-Jun	52
	19-59	1031
	60+	3
	<b>TOTAL</b>	<b>1086</b>

REGIONAL LEVEL

***Methamphetamines Calls Received - By Region***

<b>REGION</b>	1	258	23.76%
	2	220	20.26%
	3	373	34.35%
	4	135	12.43%
	5	100	9.21%
	<i>TOTAL</i>	<b>1086</b>	100.00%

It is interesting to note that although Region 1 showed the lowest number of calls with regards to Crack and Alcohol inquiries, Region 1 was second only to Metropolitan Atlanta's Region 3 for Methamphetamines calls. This is significant, as Region 1, in the northern part of Georgia as historically been home to a large number of methamphetamine manufacturers.

## PRESCRIPTION DRUGS

### STATE LEVEL RESULTS

The specific focus area of calls pertaining to Prescription Drugs make up only 5.38% of the total calls for FY07. Demographically viewing this category shows Males and Females at an almost even split with 49.10% and 50.90% respectively. Caucasians make up 89.76% and the unemployed 68.46% of the calls. Regionally, the distribution is more even than the entire call base with region 3 containing 28.77% of calls. Region 5 is a close second with 22.68%. The remaining regions average 16.2%.
