

MATCH Referral Workflow

- **The goal of the MATCH referral pathway is to ensure “no wrong door” to access MATCH services.**
- All MATCH referrals are channeled through the State MATCH Clinical Team to the DBHDD MATCH Director
- Clinical Team members directly share information on eligible referrals with other Clinical Team members whose agency is currently connected to or serving the child/youth being referred.
- Which specific referral pathway that is best suited for a given youth is decided upon at the local level via conversations among the various providers that are working with the child/youth.
