| Service Description                                                             | A therapeutic intervention or counseling service shown to be successful with identified populations, diagnoses and service needs, provided by a qualified clinician. Techniques employed involve the principles, methods and procedures of counseling that assist the person in identifying and resolving personal, social, vocational, intrapersonal and interpersonal concerns. Individual counseling may include face-to-face in or out-of-clinic time with family members as long as the individual is present for part of the session and the focus is on the individual. Services are directed toward achievement of specific goals defined by the individual and specified in the Individualized Recovery Plan. These services address goals/issues such as promoting recovery, and the restoration, development, enhancement or maintenance of:<br>Illness and medication self-management knowledge and skills (e.g., symptom management, behavioral management, relapse prevention skills, knowledge of medications and side effects, and motivational/skill development in taking medication as prescribed);<br>Problem solving and cognitive skills;<br>Healthy coping mechanisms; |                                                                                                                  |                                 |       |    |           |                                                                                 |                                     |                                                  |    |           |

## Individual Counseling

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          | <p>Adaptive behaviors and skills;<br/>Interpersonal skills; <b>and</b><br/>Knowledge regarding mental health conditions, substance use disorders and other relevant topics that assist in meeting the individual's or the support system's needs.<br/>Best/evidence-based practice modalities may include (as clinically appropriate): Motivational Interviewing/Enhancement, Cognitive Behavioral Therapy, Behavioral Modification, Behavioral Management, Rational Behavioral Therapy, Dialectical Behavioral Therapy, and others as appropriate to the individual and clinical issues to be addressed.</p>                                                                   |
| Admission Criteria       | <p>Individual must have a mental health condition/substance use disorder diagnosis that is at least destabilizing (markedly interferes with the ability to carry out activities of daily living or places others in danger) or distressing (causes mental anguish or suffering); <b>and</b><br/>The individual's level of functioning does not preclude the provision of services in an outpatient milieu.</p>                                                                                                                                                                                                                                                                  |
| Continuing Stay Criteria | <p>Individual continues to meet admission criteria; <b>and</b>.<br/>Individual demonstrates documented progress relative to goals identified in the Individualized Recovery Plan, but recovery goals have not yet been achieved.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Discharge Criteria       | <p>Adequate continuing care plan has been established; <b>and one or more of the following:</b><br/>Goals of the Individualized Recovery Plan have been substantially met; <b>or</b><br/>Individual requests discharge and individual is not in imminent danger of harm to self or others; <b>or</b><br/>Transfer to another service is warranted by change in individual's condition; <b>or</b><br/>Individual requires a service approach that supports less or more intensive need.</p>                                                                                                                                                                                      |
| Service Exclusions       | <p>ACT and Crisis Stabilization Unit services.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Clinical Exclusions      | <p>Severity of behavioral health impairment precludes provision of services.<br/>Severity of cognitive impairment precludes provision of services in this level of care.<br/>There is a lack of social support systems such that a more intensive level of service is needed.<br/>Individuals with the following conditions are excluded from admission unless there is clearly documented evidence of a psychiatric condition overlaying the diagnosis: Developmental Disability, Autism, Neurocognitive Disorder and Traumatic Brain Injury.</p>                                                                                                                              |
| Required Components      | <p>The recovery orientation, modality and goals must be specified and agreed upon by the individual.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Clinical Operations      | <p>Practitioners and supervisors of those providing this service are expected to maintain knowledge and skills regarding current research trends in best/evidence-based counseling practices.<br/>90833 and 90836 are utilized with E/M CPT Codes as an add-on for psychotherapy and may not be billed individually.</p>                                                                                                                                                                                                                                                                                                                                                        |
| Service Accessibility    | <ol style="list-style-type: none"> <li>1. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</li> <li>2. Additionally, telemedicine may be utilized for 90833 and 90836 when the service is combined with CPT E&amp;M codes and delivered by a medical practitioner (Level U1 and U2).</li> </ol> |

## Individual Counseling

| Service Description        | <p>Interactive Complexity is not a direct service but functions as a modifier to Psychiatric Treatment, Diagnostic Assessment, Individual Therapy, and Group Counseling. This modifier is used when:</p> <ol style="list-style-type: none"> <li>Communication with the individual participant/s is complicated perhaps related to, e.g., high anxiety, high reactivity, repeated questions, or disagreement and therefore delivery of care is challenging.</li> <li>Caregiver emotions/behaviors complicate the implementation of the IRP.</li> <li>Evidence/disclosure of a sentinel event and mandated report to a third party (e.g., abuse or neglect with report to state agency) with initiation of discussion of the sentinel event and/or report with the individual and supporters.</li> <li>Use of play equipment, physical devices, interpreter or translator to overcome significant language barriers (when individual served is not fluent in same language as practitioner, or when the individual has not developed or has lost expressive/receptive communication skills necessary for interactive participation in the intervention).</li> </ol> |       |       |       |       |       |        |                                                                                        |       |       |       |       |       |        |
| Admission Criteria         | These elements are defined in the specific companion service to which this modifier is anchored to in reporting/claims submission.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |       |       |       |       |       |        |                                                                                        |       |       |       |       |       |        |
| Continuing Stay Criteria   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |       |       |       |       |       |        |                                                                                        |       |       |       |       |       |        |
| Discharge Criteria         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |       |       |       |       |       |        |                                                                                        |       |       |       |       |       |        |
| Clinical Exclusions        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |       |       |       |       |       |        |                                                                                        |       |       |       |       |       |        |
| Documentation Requirements | <ol style="list-style-type: none"> <li>When this code is submitted, there must be:</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |       |       |       |       |       |        |                                                                                        |       |       |       |       |       |        |

## Interactive Complexity

|                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Service Description                                                                                                  | As reimbursed through this service, medication administration includes the act of introducing a drug (any chemical substance that, when absorbed into the body of a living organism, alters normal bodily function) into the body of another person by any number of routes including, but not limited to the following: oral, nasal, inhalant, intramuscular injection, intravenous, topical, suppository or intraocular. Medication administration requires a written service order for Medication Administration and a written order for the medication and the administration of the medication that complies with guidelines in Part II, Section 1, Subsection 6—Medication of the Provider Manual. The order for and administration of medication must be completed by members of the medical staff pursuant to the Medical Practice Act of 2009, Subsection 43-34-23 Delegation of Authority to Nurse and Physician Assistant and must be administered by licensed or credentialed* medical personnel under the supervision of a physician or registered nurse in accordance with O.C.G.A.<br><br>The service must include:<br>1. An assessment by the licensed/credentialed medical personnel administering the medication of the individual's physical/psychological/behavioral status in order to make recommendations regarding whether to continue medication and/or its means of administration, and whether to refer the individual to the physician for medication review.<br>2. Education to the individual, by appropriate licensed medical personnel, on the proper administration and monitoring of prescribed medication in accordance with the individual's recovery plan. |       |       |       |       |       |          |                                                                                                 |                                                     |       |       |       |       |          |

## Medication Administration

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Admission Criteria       | <ol style="list-style-type: none"> <li>1. Individual presents symptoms that are likely to respond to pharmacological interventions; <b>and</b></li> <li>2. Individual has been prescribed medications as a part of the treatment array; <b>and</b></li> <li>3. Individual/family/responsible caregiver is unable to self-administer/administer prescribed medication because: <ol style="list-style-type: none"> <li>a. Although the individual is willing to take the prescribed medication, it is in an injectable form and must be administered by licensed medical personnel; <b>or</b></li> <li>b. Although individual is willing to take the prescribed medication, it is a Class A controlled substance which must be stored and dispensed by medical staff in accordance with state law; <b>or</b></li> <li>c. Administration by licensed/credentialed medical personnel is necessary because an assessment of the individual's physical, psychological and behavioral status is required in order to make a determination regarding whether to continue the medication and/or its means of administration and/or whether to refer the individual to the physician for a medication review.</li> <li>d. Due to the family/caregiver's lack of capacity there is no responsible party to manage/supervise self-administration of medication (refer individual /family for CSI and/or Family or Group Training in order to teach these skills).</li> </ol> </li> </ol>                                                                                                                                                 |
| Continuing Stay Criteria | Individual continues to meet admission criteria.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Discharge Criteria       | <ol style="list-style-type: none"> <li>1. Individual no longer needs medication; or</li> <li>2. Individual is able to self-administer medication; <b>and</b></li> <li>3. | Service Exclusions       | <ol style="list-style-type: none"> <li>1. Does not include medication given as part of an Ambulatory Detoxification protocol. Medication administered as part of this protocol is billed as Ambulatory Detoxification.</li> <li>2. Must not be billed in the same day as Nursing Assessment.</li> <li>3. Must not be billed while enrolled in ACT except if this Medication Administration service is utilized only for the administration of methadone (for Medicaid recipients).</li> <li>4. May not be billed in conjunction with Intensive Day Treatment (Partial Hospitalization).</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Clinical Exclusions      | This service does <b>not</b> cover supervision of self-administration of medications. Self-administration of medications can be done by anyone physically and mentally capable of taking or administering medications to himself/herself. Youth and adults with mental health issues, or developmental disabilities are very often capable of self-administration of medications even if supervision by others is needed in order to adequately or safely manage self-administration of medication and other activities of daily living.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Required Components      | <ol style="list-style-type: none"> <li>1. There must be a written service order for Medication Administration and a written order for the medication and the administration of the medication that complies with guidelines in Part II, Section 1, Subsection 6 - Medication of the Provider Manual. The order for and administration of medication must be completed by members of the medical staff pursuant to the Medical Practice Act of 2009, Subsection 43-34-23 Delegation of Authority to Nurse and Physician Assistant. The order must be in the individual's chart. Telephone/verbal orders are acceptable provided they are signed by an appropriate member of the medical staff in accordance with DBHDD requirements.</li> <li>2. Documentation must support that the individual is being trained in the risks and benefits of the medications being administered and that symptoms are being monitored by the staff member administering the medication.</li> <li>3. Documentation must support the medical necessity of administration by licensed/credentialed medical personnel rather than by the individual, family or caregiver.</li> <li>4. Documentation must support that the individual is being trained in the principle of self-administration of medication or that the individual is physically or mentally unable to self-administer. This documentation will be subject to scrutiny by the Administrative Services Organization in reauthorizing services in this category.</li> <li>5. This service does <b>not</b> include the supervision of self-administration of medication.</li> </ol> |
| Staffing Requirements    | Qualified Medication Aides working in a Community Living Arrangement (CLA) may administer medication only in a CLA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

## Medication Administration

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Clinical Operations              | <ol style="list-style-type: none"> <li>1. Medication administration may not be billed for the provision of single or multiple doses of medication that an individual has the ability to self-administer, either independently or with supervision by a caregiver, either in a clinic or a community setting. In a group home/CCI setting, for example, medications may be managed by the house parents or residential care staff and kept locked up for safety reasons. Staff may hand out medication to the residents but this does not constitute administration of medication for the purposes of this definition and, like other watchful oversight and monitoring functions, are not reimbursable treatment services.</li> <li>2. If individual/family requires training in skills needed in order to learn to manage his/her own medications and their safe self-administration and/or supervision of self-administration, this skills training service can be provided via the PSR-I, AD Support Services, or Family/Group Training services in accordance with the person's individualized recovery/resiliency plan.</li> </ol> |
| Billing & Reporting Requirements | If a Medicaid claim for this service denies for a Procedure-to-Procedure edit, a modifier (59) can be added to the claim and resubmitted to the MMIS for payment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Additional Medicaid Requirements | As in all other settings, the daily maximum within a CSU for Medication Administration is 1 unit/day.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Service Description                                                                                        | This service requires face-to-face contact with the individual to monitor, evaluate, assess, and/or carry out a physician's orders regarding the physical and/or psychological problems of the individual. It includes:<br>1. Providing nursing assessments and interventions to observe, monitor and care for the physical, nutritional, behavioral health and related psychosocial issues, problems or crises manifested in the course of an individual's treatment;<br>2. Assessing and monitoring individual's response to medication(s) to determine the need to continue medication and/or to determine the need to refer the individual for a medication review;<br>3. Assessing and monitoring an individual's medical and other health issues that are either directly related to the mental health or substance use disorder, or to the treatment of the disorder (e.g. diabetes, cardiac and/or blood pressure issues, substance withdrawal symptoms, weight gain and fluid retention, seizures, etc.);<br>4. Consulting with the individual and individual-identified family and significant other(s) about medical, nutritional and other health issues related to the individual's mental health conditions or substance use disorders;<br>5. Educating the individual and any identified family about potential medication side effects (especially those which may adversely affect health such as weight gain or loss, blood pressure changes, cardiac abnormalities, development of diabetes or seizures, etc.);<br>6. Consulting with the individual and the individual-identified family and significant other(s) about the various aspects of informed consent (when prescribing occurs);<br>7. Training for self-administration of medication;<br>8. Venipuncture required to monitor and assess mental health conditions, substance use disorders or directly related conditions, and to monitor side effects of psychotropic medications, as ordered by as ordered by an appropriate member of the medical staff; <b>and</b><br>9. Providing assessment, testing, and referral for infectious diseases. |       |    |    |  |          |                                                                                 |                                                  |    |    |          |
| Admission Criteria                                                                                         | 1. Individual presents with symptoms that are likely to respond to medical/nursing interventions; <b>or</b><br>2. Individual has been prescribed medications as a part of the treatment array or has a confounding medical condition.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |       |    |    |  |          |                                                                                 |                                                  |    |    |          |
| Continuing Stay Criteria                                                                                   | 1. Individual continues to demonstrate symptoms that are likely to respond to or are responding to medical interventions; <b>or</b><br>2. Individual exhibits acute disabling conditions of sufficient severity to bring about a significant impairment in day-to-day functioning; <b>or</b><br>3. Individual demonstrates progress relative to goals identified in the Individualized Recovery Plan, but recovery goals have not yet been achieved.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |       |    |    |  |          |                                                                                 |                                                  |    |    |          |
| Discharge Criteria                                                                                         | 1. An adequate continuing care plan has been established; <b>and one or more of the following:</b><br>2. Individual no longer demonstrates symptoms that are likely to respond to or are responding to medical/nursing interventions; <b>or</b><br>3. Goals of the Individualized Recovery Plan have been substantially met; <b>or</b><br>4. Individual requests discharge and individual is not in imminent danger of harm to self or others.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |       |    |    |  |          |                                                                                 |                                                  |    |    |          |

| Required Components                                                                                        | 1. Nutritional assessments indicated by an individual's confounding health issues may be billed under this code (96150, 96151). No more than 8 units specific to nutritional assessments can be billed for an individual within a year. This specific assessment must be provided by a Registered Nurse or by a Licensed Dietician.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |       |    |    |  |          |                                                                                 |                                                  |    |    |          |

## Nursing Assessment and Health Services

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Service Description      | Pharmacy and Lab Services include operating or purchasing services to order, package, and distribute prescription medications. It includes provision of assistance to individuals to access indigent medication programs, sample medication programs and payment for necessary medications when no other funding source is available. This service provides for appropriate lab work, such as drug screens and medication levels to be performed. This service is to ensure that necessary medication and lab services are not withheld or delayed to individuals based on inability to pay. |
| Admission Criteria       | Individual has been assessed by a prescribing professional to need a psychotropic, anti-cholinergic, substance use disorder-specific, or anti-convulsant (as related to behavioral health issue) medication and/or lab work required for persons entering services, and/or monitoring medication levels.                                                                                                                                                                                                                                                                                     |
| Continuing Stay Criteria | Individual continues to meet the admission criteria as determined by the prescribing professional.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Discharge Criteria       | <ol style="list-style-type: none"> <li>Individual no longer demonstrates symptoms that are likely to respond to or are responding to pharmacologic interventions; <b>or</b></li> <li>Individual requests discharge and individual is not imminently dangerous or under court order for this intervention.</li> </ol>                                                                                                                                                                                                                                                                         |
| Required Components      | <ol style="list-style-type: none"> <li>Service must be provided by a licensed pharmacy or through contract with a licensed pharmacy.</li> <li>Agency must participate in any pharmaceutical rebate programs or pharmacy assistance programs that promote individual access in obtaining medication.</li> <li>Providers shall assist individuals who have an inability to pay for medications in accessing the local Division of Family &amp; Children Services or the Social Security Administration to explore options for Medicaid eligibility.</li> </ol>                                 |

| Service Description      |                 | <p>The provision of specialized medical and/or psychiatric services that include, but are not limited to:</p> <ul style="list-style-type: none"><li>a. Psychotherapeutic services with medical evaluation and management including evaluation and assessment of physiological phenomena (including co-morbidity between behavioral and physical health care issues);</li><li>b. Assessment and monitoring of an individual's status in relation to treatment with medication;</li><li>c. Assessment of the appropriateness of initiating or continuing services.</li></ul> <p>Individuals must receive appropriate medical interventions as prescribed and provided by appropriate members of the medical staff pursuant to the Medical Practice Act of 2009, Subsection 43-34-23 Delegation of Authority to Nurse and Physician Assistant that shall support the individualized goals of recovery as identified by the individual and their Individualized Recovery Plan (within the parameters of the person’s informed consent).</p> <p>Note: For the purposes of this manual, Psychiatric Treatment is sometimes referred to as “physician assessment” or “physician assessment and care.”</p> |       |    |    |        |                                                                                 |                                                  |    |    |        |
| Admission Criteria       |                 | <p>1. Individual is determined to be in need of psychotherapy services and has confounding medical issues which interact with behavioral health diagnosis, requiring medical oversight; <b>or</b></p> <p>2. Individual has been prescribed medications as a part of the treatment array.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |       |    |    |        |                                                                                 |                                                  |    |    |        |
| Continuing Stay Criteria |                 | <p>1. Individual continues to meet the admission criteria; <b>or</b></p> <p>2. Individual exhibits acute disabling conditions of sufficient severity to bring about a significant impairment in day-to-day functioning; <b>or</b></p> <p>3. Individual continues to present symptoms that are likely to respond to pharmacological interventions; <b>or</b></p> <p>4. Individual continues to demonstrate symptoms that are likely to respond or are responding to medical interventions; <b>or</b></p> <p>5. Individual continues to require management of pharmacological treatment in order to maintain symptom remission.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |       |    |    |        |                                                                                 |                                                  |    |    |        |

## Psychiatric Treatment

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Clinical Exclusions              | Services defined as a part of ACT.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Required Components              | When providing psychiatric services to individuals who are deaf, deaf-blind, and/or hard of hearing, psychiatrists shall demonstrate training, supervision, or consultation with a qualified professional as approved by DBHDD Office of Deaf Services.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Clinical Operations              | <ol style="list-style-type: none"> <li>1. In accordance with recovery philosophy, it is expected that individuals will be treated as full partners in the treatment regimen/services planned and received. As such, it is expected that practitioners will fully discuss treatment options with individuals and allow for individual choice when possible. Discussion of treatment options should include a full disclosure of the pros and cons of each option (e.g., full disclosure of medication/treatment regimen potential side effects, potential adverse reactions - including potential adverse reaction from not taking medication as prescribed and expected benefits). If such full discussion/disclosure is not possible or advisable according to the clinical judgment of the practitioner, this should be documented in the individual's chart (including the specific information that was not discussed and a compelling rationale for lack of discussion/disclosure).</li> <li>2. Assistive tools, technologies, worksheets, etc. can be used by the served individual to facilitate communication about treatment, symptoms, improvements, etc. with the treating practitioner. If this work falls into the scope of Interactive Complexity, it is noted in accordance with that definition.</li> <li>3. This service may be provided with Individual Counseling codes 90833 and 90836, but the two services must be separately identifiable.</li> <li>4. For purposes of this definition, a "new patient" is an individual who has not received an E/M code service from that agency within the past three (3) years. If an individual has engaged with the agency and has seen a non-physician for a BH Assessment, they are still considered a "new patient" until after the first E/M service is completed.</li> </ol> |
| Service Accessibility            | To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Additional Medicaid Requirements | <ol style="list-style-type: none"> <li>1. The daily maximum within a CSU for E/M is 1 unit/day.</li> <li>2. Even if a physician also has his/her own Medicaid number, the physician providing behavioral health treatment and care through this code should bill via the approved provider agency's Medicaid number through the Medicaid Category of Service (COS) 440.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Billing & Reporting Requirements | <ol style="list-style-type: none"> <li>1. Within this service group, a second unit with a U1 modifier may be used in the event that a Telemedicine Psychiatric Treatment unit is provided and it indicates a need for a face-to-face assessment (e.g. 99213GTU1 is billed and it is clinically indicated that a face-to-face by an on-site physician needs to immediately follow based upon clinical indicators during the first intervention, then 99213U1, can also be billed in the same day).</li> <li>2. Within this service group, there is an allowance for when a U2 practitioner conducts an intervention and, because of clinical indicators presenting during this intervention, a U1 practitioner needs to provide another unit due to the concern of the U2 supervisee (e.g., Physician's Assistant provides and bills 90805U2U6 and because of concerns, requests U1 intervention following his/her billing of U2 intervention). The use of this practice should be rare and will be subject to additional utilization review scrutiny.</li> <li>3. These E/M codes are based upon Time (even though recent CPT guidance allows the option of using <b>either</b> Medical Decision Making <b>or</b> Time). The Georgia Medicaid State Plan is priced on time increments and therefore time will remain the basis of justification for the selection of codes above for the near term.</li> <li>4. If a Medicaid claim for this service denies for a Procedure-to-Procedure edit, a modifier (25) can be added to the claim and resubmitted to the MMIS for payment.</li> </ol>                                                                                                                                                                                                                                                   |

## Psychiatric Treatment

5. Despite recent CPT guidance, this service may not be billed for all time spent on an individual's case in a single day (i.e., pre- and post-appointment work that is not direct individual assessment and/or care), because this indirect time is already included in the service rate.

## Psychological Testing: Psychological Testing – Psycho-diagnostic assessment of emotionality, intellectual abilities, personality and psycho-pathology

| Transaction Code                                                                                                                                                                                                                                                                                                                                                        | Code Detail                                                                     | Code  | Mod 1 | Mod 2 | Mod 3 | Mod 4 | Rate      | Code Detail                                                                     | Code  | Mod 1 | Mod 2 | Mod 3 | Mod 4 | Rate      |

| Service Description                                                                                                                                   | <p>Psychological testing consists of a face-to-face assessment of emotional functioning, personality, cognitive functioning (e.g., thinking, attention, memory) or intellectual abilities using an objective and standardized tool that has uniform procedures for administration and scoring and utilizes normative data upon which interpretation of results is based.</p> <p>Psychological tests are only administered and interpreted by those who are properly trained in their selection and application. The practitioner administering the test ensures that the testing environment does not interfere with the performance of the examinee and ensures that the environment affords adequate protections of privacy and confidentiality.</p> <p>This service covers both the face-to-face administration of the test instrument(s) by a qualified examiner as well as the time spent by a psychologist or physician (with the proper education and training) interpreting the test results and preparing a written report in accordance with CPT procedural guidance.</p> |       |    |    |  |                |                                                                                 |                                                  |    |    |  |          |

## Psychological Testing: Psychological Testing – Psycho-diagnostic assessment of emotionality, intellectual abilities, personality and psycho-pathology

4. If a Medicaid claim for this service denies for a Procedure-to-Procedure edit, a modifier (59) can be added to the claim and resubmitted to the MMIS for payment.
5. When Telemedicine technology is utilized for the provision of this service in accordance with the allowance in the Service Accessibility section of this definition, the code cited in the Code Detail above with the appropriate GT modifier shall be utilized in documentation and claims submission.

## Psychosocial Rehabilitation - Individual

| Service Description         | Psychosocial Rehabilitation-Individual (PSR-I) services consist of rehabilitative skills building, the personal development of environmental and recovery supports considered essential in improving a person's functioning, learning skills to promote the person's self-access to necessary services and in creating environments that promote recovery and support the emotional and functional improvement of the individual. The service activities of Psychosocial Rehabilitation-Individual include:<br>1. Providing skills support in the person's self-articulation of personal goals and objectives;<br>2. Assisting the person in the development of skills to self-manage or prevent crisis situations;<br>3. Individualized interventions in living, learning, working, other social environments, which shall have as objectives:<br>a. Identification, with the person, of strengths which may aid him/her in achieving recovery, as well as barriers that impede the development of skills necessary for functioning in work, with peers, and with family/friends;<br>b. Supporting skills development to build natural supports (including support/assistance with defining what wellness means to the person in order to assist them with recovery-based goal setting and attainment);<br>c. Assistance in the development of interpersonal, community coping and functional skills (which may include adaptation to home, adaptation to work, adaptation to healthy social environments, learning/practicing skills such as personal financial management, medication self-monitoring, symptom self-monitoring, etc.);<br>d. Assistance in the acquisition of skills for the person to self-recognize emotional triggers and to self-manage behaviors related to the behavioral health issue;<br>e. Assistance with personal development, work performance, and functioning in social and family environments through teaching skills/strategies to ameliorate the effect of behavioral health symptoms;<br>f. Assistance in enhancing social and coping skills that ameliorate life stresses resulting from the person's mental health condition/substance use disorder;<br>g. Assist the person in his/her skills in gaining access to necessary rehabilitative, medical, social and other services and supports;<br>h. Assistance to the person and other supporting natural resources with illness understanding and self-management (including medication self-monitoring); and<br>i. Identification, with the individual and named natural supporters, of risk indicators related to substance use disorder relapse, and the development of skills and strategies to prevent relapse. |       |       |       |       |       |          |                                                                                 |                                                  |       |       |       |       |          |

## Psychosocial Rehabilitation - Individual

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

|                          | This service is provided in order to promote stability and build towards functioning in the person's daily environment. Stability is measured by a decreased number of hospitalizations, by decreased frequency and duration of crisis episodes and by increased and/or stable participation in community/work activities. Supports based on the person's needs are used to promote recovery while understanding the effects of the mental health conditions and/or substance use disorders, and to promote functioning.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Admission Criteria       | <ol style="list-style-type: none"> <li>1. Individuals with one of the following: A mental health condition, a co-occurring substance use disorder and mental health condition, or a co-occurring mental health condition and developmental disability, <b>and one or more of the following:</b></li> <li>2. Individual may need assistance with developing, maintaining, or enhancing social supports or other community coping skills; <b>or</b></li> <li>3. Individual may need assistance with daily living skills including coordination to gain access to necessary rehabilitative and medical services.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Continuing Stay Criteria | <ol style="list-style-type: none"> <li>1. Individual continues to meet admission criteria; <b>and</b></li> <li>2. | Required Components      | <ol style="list-style-type: none"> <li>1. Psychosocial Rehabilitation-Individual services must include a variety of interventions in order to assist the individual in developing: <ol style="list-style-type: none"> <li>a. Symptom self-monitoring and self-management of symptoms.</li> <li>b. Strategies and supportive interventions for avoiding out-of-community treatment for adults and building stronger knowledge of the adult's strengths and limitations.</li> <li>c. Relapse prevention strategies and plans.</li> </ol> </li> <li>2. Psychosocial Rehabilitation-Individual services focus on building and maintaining a therapeutic relationship with the individual and facilitating treatment and recovery goals.</li> <li>3. Contact must be made with the individual receiving PSR-I services a minimum of twice each month.</li> <li>4. In the absence of the required monthly face-to-face contact <b>and</b> if at least two unsuccessful attempts to make face-to-face contact have been tried and documented, the provider may bill for a maximum of two telephone contacts in that specified month.</li> <li>5. There may be instances where a person has an order and authorization to receive PSR-Group in addition to PSR-I. When the person is in attendance at the PSR-Group program and a staff provides support to the served individual on a one-to-one basis, the PSR Specialty provider may bill this PSR-I code. In this specific circumstance, the PSR group program shall not count for that time within in its hourly claims submission. There must be a PSR-I note which is individualized and indicates the one-to-one nature of the intervention.</li> <li>6. When the primary focus of PSR-I is for medication maintenance, the following allowances apply: <ol style="list-style-type: none"> <li>a. These individuals are not counted in the offsite service requirement or the individual-to-staff ratio; and</li> <li>b. These individuals are not counted in the monthly face-to-face contact requirement; however, face-to-face contact is required every 3 months and monthly calls are an allowed billable service.</li> </ol> </li> </ol> |
| Staffing Requirements    | PSR-I practitioners may have the recommended individual-to-staff ratio of 30 individuals per staff member and must maintain a maximum ratio of 50 individuals per staff member. Individuals who receive only medication maintenance are not counted in the staff ratio calculation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Clinical Operations      | <ol style="list-style-type: none"> <li>1. The organization must have a Psychosocial Rehabilitation-Individual Organizational Plan that addresses the following: <ol style="list-style-type: none"> <li>a. Description of the particular rehabilitation, recovery and natural support development models utilized, types of intervention practiced, and typical daily schedule for staff;</li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## Psychosocial Rehabilitation - Individual

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <ul style="list-style-type: none"> <li>b. Description of the staffing pattern and how staff are deployed to assure that the required staff-to-individual ratios are maintained, including how unplanned staff absences, illnesses, or emergencies are accommodated, case mix, access, etc.;</li> <li>c. Description of the hours of operations as related to access and availability to the individuals served;</li> <li>d. Description of how the plan for services is modified or adjusted to meet the needs specified in every Individualized Recovery Plan; and</li> <li>e. If the service is offered through an agency which provides PSR-Group, then there is a description of how the agency has protocols and accountability procedures to assure that there is no duplication of billing when the person is being supported through the group model.</li> </ul> <p>2. Utilization (frequency and intensity) of PSR-I should be directly related to the functional elements in the assessment. In addition, when clinical/functional needs are great, there should be complementary therapeutic services by licensed/credential professionals paired with the provision of PSR-I (individual, group, family, etc.).</p> |
| Service Accessibility            | <p>1. There must be documented evidence that service hours of operation include evening, weekend, and holiday hours.</p> <p>2. "Medication Maintenance Track," individuals who require more than 4 contacts per quarter for two consecutive quarters (as based upon need) are expected to be re-evaluated for enhanced access to PSR-I. The designation of PSR-I "medication maintenance track" should be lifted and exceptions stated above are no longer allowed.</p> <p>3. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</p>                                                                                                                                                                                                                                                                                                              |
| Billing & Reporting Requirements | <p>1. Unsuccessful attempts to make contact with the individual are not billable.</p> <p>2. When Telemedicine technology is utilized for the provision of this service in accordance with the allowance in the Service Accessibility section of this definition, the code cited in the Code Detail above with the appropriate GT modifier shall be utilized in documentation and claims submission.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Service Description      | Individuals access this service when it has been determined through an assessment that the individual has mental health or substance use disorder concerns. The Individualized Recovery Plan (IRP) results from the Diagnostic and Behavioral Health Assessments and is required within the first 30 days of service, with ongoing plans completed as demanded by individual need and/or by service policy. |       |       |       |       |       |          |                                                                                 |                                                  |       |       |       |       |          |

## Service Plan Development

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|                          | <p>Information from a comprehensive assessment should ultimately be used to develop with the individual an IRP that supports recovery and is based on goals identified by the individual. Friends, family and other natural supports may be included at the discretion and direction of the individual for whom services/supports are being planned. Also, as indicated, medical, nursing, peer support, community support, nutritional staff, etc. should provide information from records, and various multi-disciplinary assessments for the development of the IRP.</p> <p>The cornerstone component of the IRP involves a discussion with the individual regarding what recovery means to him/her personally (e.g., getting/keeping a job, having more friends/improved relationships, improvement of behavioral health symptoms, etc.), and the development of goals (i.e. outcomes) and objectives that are defined by and meaningful to the individual based upon his/her articulation of their recovery hopes. Concurrent with the development of the IRP, the individual should be offered the opportunity to develop an Advanced Directive for behavioral healthcare with the individual guiding the process through the free expression of their wishes and through his/her assessment of the components developed for the Advanced Directive as being realistic for him/her.</p> <p>The entire process should involve the individual as a full partner and should focus on service and recovery goals/outcomes as identified by the individual.</p> <p>Recovery planning shall set forth the course of care by:</p> <ol style="list-style-type: none"> <li>1. Prioritizing problems and needs;</li> <li>2. Stating goals which will honor achievement of stated hopes, choice, preferences and desired outcomes of the individual;</li> <li>3. Assuring goals/objectives are related to the assessment;</li> <li>4. Defining goals/objectives that are individualized, specific, and measurable with achievable timeframes;</li> <li>5. Defining discharge criteria and desired changes in levels of functioning and quality of life to objectively measure progress;</li> <li>6. Transition planning at onset of service delivery;</li> <li>7. Selecting services and interventions of the right duration, intensity, and frequency to best accomplish these objectives;</li> <li>8. Assuring there is a goal/objective that is consistent with the service intent; <b>and</b></li> <li>9. Identifying qualified staff who are responsible and designated for the provision of services.</li> </ol> |
| Admission Criteria       | <ol style="list-style-type: none"> <li>1. A known or suspected mental health condition or substance use disorder; <b>and</b></li> <li>2. Initial screening/intake information indicates a need for additional undetermined supports and recovery/resiliency planning; <b>and</b></li> <li>3. Individual meets DBHDD eligibility.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Continuing Stay Criteria | The individual's situation/functioning has changed in such a way that previous assessments are outdated.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Discharge Criteria       | Each intervention is intended to be a discrete time-limited service that modifies treatment/support goals or is indicated due to change in condition/disorder.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Service Exclusions       | Assertive Community Treatment                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Required Components      | <ol style="list-style-type: none"> <li>1. The service plan must include elements articulated in the Documentation Guideline chapter in this Provider Manual.</li> <li>2. As indicated, medical, nursing, peer, school, nutritional, etc. staff can provide information from the individual, records, and various multi-disciplinary resources needed to complete the service plan. Time spent gathering this information may be billed as long as the detailed documentation justifies the time and need for capturing said information.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Clinical Operations      | <ol style="list-style-type: none"> <li>1. The individual (and any other individual-identified natural supports) should actively participate in planning processes.</li> <li>2. The Individualized Recovery Plan should be directed by the individual's personal recovery goals as defined by that individual.</li> <li>3. Advanced Directive/Crisis Planning shall be directed by the individual served and their needs/wishes to the extent possible and clinically appropriate. Plans should not contain elements/components that are not agreeable to, meaningful for, or realistic for the person and that the person is, therefore, not likely to follow through with.</li> <li>4. Guidelines for recovery/resiliency planning are contained in the DBHDD Requirements for Community Providers in this Provider Manual.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Service Plan Development

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | 5. Individualized Recovery Plans (or portions of the plan) must be reassessed as needed, in accordance with changing needs, circumstances, and responses of the individual (see content regarding the IRP in Part II of this manual). For any change in medical, behavioral, cognitive, and/or physical status that potentially impacts goals, objectives and/or interventions in the plan, or that would necessitate the addition of new goals, objectives and/or interventions, Service Plan Development would be used to support the individual in revisiting their goals and objectives. |
| Service Accessibility            | To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.                                                                                                                                                             |
| Billing & Reporting Requirements | When Telemedicine technology is utilized for the provision of this service in accordance with the allowance in the Service Accessibility section of this definition, the code cited in the Code Detail above with the appropriate GT modifier shall be utilized in documentation and claims submission.                                                                                                                                                                                                                                                                                      |
| Additional Medicaid Requirements | The daily maximum within a CSU for combined Behavioral Health Assessment and Service Plan Development is 24 units/day.                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Documentation Requirements       | <ol style="list-style-type: none"> <li>1. The initial authorization/IRP and each subsequent authorization/IRP must be completed within the time-period specified by DBHDD.</li> <li>2. Every record must contain an IRP in accordance with these Service Guidelines and with the DBHDD Requirements contained in this Provider Manual.</li> </ol>                                                                                                                                                                                                                                            |

| Service Description | An Addiction Recovery Support Center offers a set of non-clinical, peer-led activities that engage, educate and support individuals and families successfully to make life changes necessary to establish, maintain and enhance recovery (health and wellness) from substance use disorders. The recovery activities are community-based services for individuals with a substance use disorder; and consist of activities that promote recovery, self-determination, self-advocacy, well-being, and independence. Activities are individualized, recovery-focused, and based on a relationship that supports a person's ability to promote their own recovery. Activities include social support, linkage to and coordinating among other service providers, eliminating barriers to independence and continued recovery. Activities may occur in the center or in other locations in the community. |       |       |       |       |       |      |                |                   |       |       |       |       |      |
|                     | Addiction Recovery Support Services are holistic in nature, support people with moving beyond their substance use disorder and toward a life of self-directed recovery. During scheduled hours, Addiction Recovery Support Services may include but are not limited to the following support topics which may occur at a physical location or in the community:<br><div><div>1.</div><div>Promote self-directed recovery by assisting an individual.</div><div>2.</div><div>Promote trauma informed care and diversity competence, encourage self-direction, and advocate for informed choice.</div><div>3.</div><div>Ongoing exploration of recovery needs;</div></div>                                                                                                                                                                                                                              |       |       |       |       |       |      |                |                   |       |       |       |       |      |

## Addiction Recovery Support Center – Services

15. Attending and participating in recovery planning team; or,
16. Assisting individuals in the development of empowerment skills through self-advocacy and activities that mitigate discrimination and inspire hope.

### Non-Clinical Services/Activities

ARSCs provide services/activities that are unique to their specific communities. Therefore, not all ARSCs will provide the same activities, nor will they provide them in the same manner. Below is a list of categories of Addiction Recovery Support Services and other activities that may be provided by each ARSC:

1. **Individual or Group Peer Check-Ins:** This can include individual or group use of recovery capital scale sheets, outcome rating scales/relationship rating scales, or other assessments to assess recovery progress. May also take the form of telephone, text, and email assertive outreach.
2. **Employment Services:** This can include any activity or event that is being provided to increase the likelihood that someone in recovery will be employed.
3. **Social Support Activities:** This includes but is not limited to prosocial and other recreational activities such as hikes, group exercises, game nights, movie showings, yoga, social outings, etc.
4. **Educational Services:** This section includes any service offered to support the educational development of someone in recovery in scholastic achievement, such as GED Classes, tutoring, applying for student financial aid for college, applying to college, etc.
5. **Family Support Services:** This includes any service specifically targeted towards families of someone in or seeking recovery. Peers may also participate in this programming with or without their family present.
6. **Housing Supports:** Any service that provides, or increases the likelihood of someone in recovery finding, safe living conditions.
7. **Transportation Supports:** Any service that assists individuals in or seeking recovery with transportation to/from supports offered by the ARSC or to other resources, facilities, agencies, or businesses in the community.
8. **Artistic Recovery Support:** This can include any activity or instruction provided around music, theatre, art, etc. as a supportive outlet for an individual's recovery and empowerment.
9. **Volunteering Service:** This can be used to track a peer's involvement in volunteering their time to support activities or events conducted by the ARSC. Volunteering and giving back are key theme's in supporting an individual's continued recovery from substance use disorder.
10. **Recovery Oriented Training/Education:** This includes an individual's participation in trainings provided by the ARSC such as Recovery Messaging Training, Science of Addiction Recovery (SOAR), Recovery Oriented Systems of Care (ROSC), Mental Health First Aid, and other trainings surrounding recovery.

| Admission Criteria       | <p>Adults ages 18 or older must meet the following criteria:</p> <ol style="list-style-type: none"> <li>1. The individual desires to enter or maintain his/her recovery by reducing the recreational use of alcohol or other drugs, reduce participation in illegal activity, improve health and wellness, increase participation in healthy social supports.</li> <li>2. The individual does not need to meet the diagnostic criteria for a Substance Use Disorder as defined in the most recent DSM for the purpose of medical necessity but must have a self-reported history of SUD.</li> <li>3. The individual requests support of an alcohol and drug free environment.</li> <li>4. The individual can be using Medication Assisted Treatment/Recovery as part of their recovery process and can't be excluded.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Continuing Stay Criteria | The individual continues to attend and participate.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Discharge Criteria       | <ol style="list-style-type: none"> <li>1. The individual indicates a desire to leave the support;</li> <li>2. The individual fails to follow the guidelines of the ARSC.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Service Exclusions       | <ol style="list-style-type: none"> <li>1. The individual exhibits behavior dangerous to staff, self, or others.</li> <li>2. ARSC staff do not provide clinical services.</li> <li>3. Drug Abuse Treatment Education Program colocation is prohibited.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Required Components      | <ol style="list-style-type: none"> <li>1. Have a primary goal of enhancing the quantity and quality of support available to individuals seeking recovery from substance use disorders;</li> <li>2. Be grounded in three core principles: a recovery vision, authenticity of voice, and accountability to the recovery community;</li> <li>3. Promote the strategies of public awareness and education, personal empowerment, and peer based- and other recovery support services.</li> <li>4. Must have policies and procedures on how to assist individuals who attend activities while actively intoxicated (use of peer support, connection to services if individual is willing, etc.).</li> <li>5. Must be able to provide referrals to other levels of treatment and support for individuals in or seeking recovery.</li> <li>6. Must have an advisory board that meets the following requirements: (1) All members are local to the community, (2) More than 50% identify as being in recovery from SUD, (3) must have official board meetings once per month, (4) Must have programmatic decision-making power.</li> <li>7. Be responsive to the needs of individuals participating in services and be based on local community needs as identified by the individuals participating in the service.</li> <li>8. An individual that only comes to the ARSC to attend an AA, NA, or other anonymous fellowship meeting can, but is not required to, provide identifiable information for tracking purposes.</li> </ol> |
| Staffing Requirements    | <ol style="list-style-type: none"> <li>1. An Addiction Recovery Support Center has a full-time Director of day to day operations who is an active CPS-AD.</li> <li>2. Director of day to day operations attends monthly learning collaboratives convened by Georgia Council on Substance Abuse.</li> <li>3. The number of remaining staff are defined in contracts but are required to be specially trained CPS-AD who have participated in targeted areas of training such as Intentional Peer Support, Science of Addiction and Recovery, CPR/First Aid, P-COMS, and All-Recovery Groups.</li> <li>4. With department approval, an individual with lived experience may be hired as staff with the performance expectation that the CPS-AD credential will be achieved within the first twelve (12) months of hire.</li> <li>5. With department approval, inactive CPS-AD may be employed by the Addiction Recovery Support Center with the expectation of achieving "active" status within first twelve (12) months of hire.</li> <li>6. Additional staff may be allowed if approved by DBHDD and needed to support the operations of the center.</li> <li>7. All staff without CPS-AD designation must participate in a recovery principles orientation, made up of key components of the CPS-AD training, upon hire.</li> </ol>                                                                                                                                                                                          |

## Addiction Recovery Support Center – Services

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Service Accessibility            | <ol style="list-style-type: none"> <li>1. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service and their families. See <a href="#">Part II, Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</li> <li>2. The ARSC is open a minimum of 40 hours per week and is required to have hours consistent with community need.</li> <li>3. An updated weekly schedule that includes hours of operation, groups, and activities should be posted in plain sight for participants and visitors.</li> <li>4. Addiction Recovery Support Services are available at any point during the open hours.</li> <li>5. Recovery activities are offered throughout the day in the center and periodically outside the center, in the community.</li> <li>6. The individual can utilize this service as support while participating in other treatment services.</li> </ol> |
| Documentation Requirements       | <ol style="list-style-type: none"> <li>1. Any individual that signs in during the hours of operation will be considered supported as a participant for the day.</li> <li>2. A list of activities that an individual participates in will be tracked.</li> <li>3. Sign-in sheets and daily activity attendance will be maintained by the ARSC.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Billing & Reporting Requirements | <ol style="list-style-type: none"> <li>1. Visitors that do not meet admission criteria are not to be included in ASO submissions.</li> <li>2. Must provide DBHDD with an annual calculation of in-kind support (volunteer time, facility donation, etc.) or fiscal donations through fundraising efforts or community collaborations.</li> <li>3. Must have a system in place to track unduplicated individuals served for each month.</li> <li>4. Each month the provider must submit a monthly invoice, programmatic report, and advisory board meeting minutes to DBHDD to determine utilization.</li> <li>5. Daily encounter/claims will be submitted on a daily basis for any Individuals registered through the ASO.</li> <li>6. Place of Service Code 99 will be used for all claims/encounter submissions to the ASO.</li> </ol>                                                                                                                                                                                                                                                                                                                |

| Service Description      | <p>This service provides structured activities (in an agency or community-based setting) which promote recovery, self-advocacy, relationship enhancement, self-awareness and values, and self-directed care. Individuals served are introduced to the reality that there are many different pathways to recovery and each individual determines his or her own way. Supports are recovery oriented. This occurs when individuals share the goal of long-term recovery. Individuals served are encouraged to initiate and lead group activities and each participant identifies his/her own individual goals for recovery. Activities must promote self-directed recovery by honoring the many pathways to recovery, by tapping into each participant’s strengths and by helping each to recognize his/her “recovery capital”, the reality that each individual has internal and external resources that they can draw upon to keep them well.</p> <p>Interventions are approached from a lived experience perspective but also are based upon the Science of Addiction Recovery framework. Supportive interactions include motivational interviewing, recovery planning, resource utilization, strengths identification and development, support in considering theories of change, building recovery empowerment and self-efficacy. There is also advocacy support with the individual to have recovery dialogues with their identified natural and formal supporters.</p> |       |       |       |       |       |          |                                                                |                                                  |       |       |       |       |          |

## AD Peer Support Program

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

Transfer to another service/level is more clinically appropriate.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Service Exclusions       | Crisis Stabilization Unit (however, those utilizing transitional beds within a Crisis Stabilization Unit may access this service).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Clinical Exclusions      | Individuals diagnosed with a mental health condition that have no co-occurring substance use disorder.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Required Components      | <ol style="list-style-type: none"> <li>1. AD Peer Support Program services may operate as a program within a Tier 1 or Tier 2 provider, an Intensive Outpatient Provider (IOP) specialty provider, a WTRS provider or an established peer program.</li> <li>2. AD Peer Support Program services must be operated for no less than 3 days a week, no less than 12 hours/week, no less than 4 hours per day, typically during day, evening and weekend hours. Any agency may offer additional hours on additional days in addition to these minimum requirements (up to the daily max).</li> <li>3. Individuals participating in the service at any given time must have the opportunity to participate in and make decisions about the activities that are conducted or services offered within the AD Peer Support Program, and about the schedule of those activities and services, as well as other operational issues.</li> <li>4. The AD Peer Support Program should operate as an integral part of the agency's scope of services.</li> <li>5. When needed and in collaboration with a participant, the Program Leader may call multidisciplinary team meetings regarding that individual's needs and desires, and a Certified Peer Specialist Addictive Diseases (CPS-AD) providing services for and with an individual must be allowed to participate in multidisciplinary team meetings.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                    |
| Staffing Requirements    | <ol style="list-style-type: none"> <li>1. The individual leading and managing the day-to-day operations of the program must be a CPS-AD.</li> <li>2. The AD Peer Support Program shall be supervised by an independently licensed practitioner or one (1) of the following addiction credentials: MAC, CAADC, GCADC-II or -III, or CAC-II.</li> <li>3. CPS-AD Program Leader is dedicated to the service at least 20 hours per week.</li> <li>4. The Program Leader and other CPS-Ads AD Peer Support Recovery program may be shared with other programs as long as the Program Leader is present at least 50% of the hours the Peer Recovery program is in operation, and as long as the Program leader and the CPS-AD are available as required for supervision and clinical operations, and as long as they are not counted in individual to staff ratios for 2 different programs operating at the same time.</li> <li>5. Services must be provided and/or activities led by staff who are CPS-ADs or other individuals under the supervision of a CPS-AD. A specific activity may be led by someone who is not a consumer but is a guest invited by peer leadership.</li> <li>6. The maximum face-to-face ratio cannot be more than 15 individuals to 1 CPS-AD direct service/program staff, based on the average daily attendance in the past three (3) months of individuals in the program.</li> <li>7. All CPS-ADs providing this support must have an understanding of recovery principles as defined by the Substance Abuse Mental Health Services Administration and the Recovery Bill of Rights published by Faces and Voices of Recovery, Inc. and must possess the skills and abilities to assist other individuals in their own recovery processes.</li> </ol> |

## AD Peer Support Program

### Clinical Operations

1. This service must operate at an established site approved to bill Medicaid for services. However, individuals or group activities may take place offsite in natural community settings as appropriate for the individualized Recovery Plan (IRP) developed by each individual with assistance from the program staff.
2. Individuals receiving AD Peer Support Program services must demonstrate or express a need for recovery assistance.
3. Individuals entering AD Peer Support Program services must have a qualifying diagnosis present in the medical record prior to the initiation of formal clinical services. The diagnosis must be given by persons identified in O.C.G.A. Practice Acts as qualified to provide a diagnosis.
4. This service may operate in the same building as other day services; however, there must be a distinct separation between services in staffing, program description, and physical space during the hours the Peer Recovery program is in operation except as noted above.
5. Adequate space, equipment, furnishings, supplies, and other resources must be provided in order to effectively provide services and so that the program environment is clean and in good repair. Space, equipment, furnishings, supplies transportation, and other resources for individual use within the Peer Recovery program must not be substantially different from space provided for other uses for similar numbers of individuals.
6. Staff of the AD Peer Support Program must be treated as equal to any other staff of the facility or organization and must be provided equivalent opportunities for training (both mandated and offered) and pay and benefits competitive and comparable to the state's peer workforce and based on experience and skill level.
7. When this service is used in conjunction with Psychosocial Rehabilitation or ACT, documentation must demonstrate careful planning to maximize the effectiveness of this service as well as appropriate reduction in service amounts. Utilization of this service in conjunction with these services is subject to review by the Administrative Services Organization.
8. Each individual must be provided the opportunity for peer assistance in the form of recovery coaches and allies and community networking to achieve stated goals.
9. AD Peer Support Programs must offer a range of recovery activities developed and led by consumers, with the recognition of and respect for the fact that there are many pathways to recovery.
10. The program must have an AD Peer Support Program *Organizational Plan* addressing the following:
  - a. A Recovery Bill of Rights as developed and promoted by Faces and Voices of Recovery, Inc. This philosophy must be actively incorporated into all services and activities and:
    - i. View each individual as the driver of his/her recovery process.
    - ii. Promote the value of self-help, peer support, and personal empowerment to foster recovery.
    - iii. Promote information about the science of addiction, recovery.
    - iv. Promote peer-to-peer training of individual skills, community resources, group and individual advocacy and the concept of "giving back".
    - v. Promote the concepts of employment and education to foster self-determination and career advancement.
    - vi. Support each individual to embrace SAMHSA's *Recovery Principles* and to utilize community resources and education regarding health, wellness and support from peers to replace the need for clinical treatment services.
    - vii. Support each individual to fully participate in communities of their choosing in the environment most supportive of their recovery and that promotes housing of his/her choice and to build and support recovery connections and supports within his/her own community.
    - viii. Actively seek ongoing input into program and service content so as to meet each individual's needs and goals and fosters the recovery process.
  - b. A description of the particular consumer empowerment models utilized, types of activities offered, and typical daily activities and schedule. If offered, meals must be described as an adjunctive peer relation building activity rather than as a central activity.
  - c. A description of the staffing pattern plans for staff who have or will have CPS-AD and appropriate addiction counselor credentials, and how staff are deployed to assure that the required staff-to-individual ratios are maintained, including how unplanned staff absences, illnesses, and emergencies are accommodated.
  - d. A description of how peer practitioners within the agency are given opportunities to meet with or otherwise receive support from other peers (including CPS-AD) both within and outside the agency.
  - e. A description of how individuals are encouraged and supported to seek Georgia certification as CPS-AD through participation in training opportunities and peer or other counseling regarding anxiety following certification.

## AD Peer Support Program

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

A description of how individual requests for discharge and change in service or service intensity are handled.</li> </ul> <p>11. Assistive tools, technologies, worksheets, (e.g. SOAR; Recovery Check-Ins; Motivational Interviewing; Cultural Competence, Stigma &amp; Labeling etc.) can be used by the Peer Recovery staff to work with the served individual to improve his/her communication about treatment, symptoms, improvements, etc. with treating behavior health and medical practitioners.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Service Accessibility          | <p>To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Documentation Requirements     | <ol style="list-style-type: none"> <li>1. Providers must document services in accordance with the specifications for documentation requirements specified in Part II, Section III of the Provider Manual.</li> <li>2. The provider has several alternatives for documenting progress notes:             <ol style="list-style-type: none"> <li>a. Weekly progress notes must document the individual's progress relative to functioning and skills related to the person-centered goals identified in his/her IRP. This progress note aligns the weekly Peer Support-Group activities reported against the stated interventions on the individualized recovery plan, and documents progress toward goals. This progress note may be written by any practitioner who provided services over the course of that week; or</li> <li>b. If the agency's progress note protocol demands a detailed daily note which documents the progress above, this daily detail note can suffice to demonstrate functioning, skills, and progress related to goals and related to the content of the group intervention; or</li> <li>c. If the agency's progress note protocol demands a detailed hourly note which documents the progress above, this daily detail note can suffice to demonstrate functioning, skills, and progress related to goals and related to the content of the group intervention.</li> </ol> </li> <li>3. While billed in increments, the Peer Support Program service is a program model. Daily time in/time out is tracked for while the person is present in the program, but due to time/in out not being required for each intervention, the time in/out may not correlate with the units billed as the time in/out will include breaks taken during the course of the program. However, the units noted on the log should be consistent with the units billed and, if noted, on the weekly progress note. If the units documented are not consistent, the most conservative number of units will be utilized and may result in a billing discrepancy.</li> <li>4. Rounding is applied to the person's cumulative hours/day at the Peer program (excluding non-programmatic time). The provider shall follow the guidance in the rounding policy included in this Provider Manual, and, specific to this service, the person served must have participated in at least 50% of the hour in order to bill for one unit of this service. For instance, if an individual participates in the program from 9-1:15 excluding a 30-minute break for lunch, his/her participating hours are 3.75 hours. The rounding policy is applied to the .75 hour and the units billed for that day are 4 units. Practitioner type must still be addressed and so that 4 units must be adequately assigned to either a U4 or U5 practitioner type as reflected in the log for that day's activities.</li> </ol> |

## AD Peer Support Program

5. A provider shall only record units in which the individual was actively engaged in services. Meals and breaks must not be included in the reporting of units of service delivered. Should an individual leave the program or receive other services during the range of documented time in/time out for Peer Support Program hours, the absence should be documented on the log.

### AD Peer Support Services – Individual

| Service Description      | This service provides interventions (in an agency or community-based setting) which promote recovery, self-advocacy, relationship enhancement, self-awareness and values, and self-directed care. Individuals served are introduced to the reality that there are many different pathways to recovery and each individual determines his or her own way. Supports are recovery-oriented and occur when individuals share the goal of long-term recovery. Each participant identifies his/her own individual goals for recovery. Interventions must promote self-directed recovery by honoring the many pathways to recovery, by tapping into each participant's strengths and by helping each to recognize his/her "recovery capital", the reality that each individual has internal and external resources that they can draw upon to keep them well. Interventions are approached from a lived experience perspective but also are based upon the Science of Addiction Recovery framework. Supportive interactions include motivational interviewing, recovery planning, resource utilization, strengths identification and development, support in considering theories of change, building recovery empowerment and self-efficacy. There is also advocacy support with the individual to have recovery dialogues with their identified natural and formal supporters. |       |       |       |       |       |          |                                                                                 |                                                  |       |       |       |       |          |
| Admission Criteria       | 1. Individual must have a substance use disorder; and <b>one or more of the following</b> :<br>a. Individual needs peer-based recovery support for the acquisition of skills needed to engage in and maintain recovery; or<br>b. Individual needs assistance to develop self-advocacy skills to achieve decreased dependency on formalized treatment systems; or<br>c. Individual needs assistance and support to prepare for a successful work experience; or<br>d. Individual needs peer modeling to increased responsibilities for his /her own recovery.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |       |       |       |       |       |          |                                                                                 |                                                  |       |       |       |       |          |
| Continuing Stay Criteria | 1. Individual continues to meet admission criteria; <b>and</b><br>2. Progress notes document progress relative to goals identified in the Individualized Recover Plan, but treatment/recovery goals have not yet been achieved.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |       |       |       |       |       |          |                                                                                 |                                                  |       |       |       |       |          |
| Discharge Criteria       | 1. An adequate continuing care plan has been established; <b>and one or more of the following</b> :<br>2. Goals of the Individualized Recovery Plan have been substantially met; <b>or</b><br>3. Individual served/family requests discharge; <b>or</b><br>4. Transfer to another service/level is more clinically appropriate.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |       |       |       |       |       |          |                                                                                 |                                                  |       |       |       |       |          |
| Service Exclusions       | Crisis Stabilization Unit (however, those utilizing transitional beds within a Crisis Stabilization Unit may access this service).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |       |       |       |       |       |          |                                                                                 |                                                  |       |       |       |       |          |
| Clinical Exclusions      | Individuals diagnosed with a mental health condition in the absence of a co-occurring substance use disorder.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |       |       |       |       |       |          |                                                                                 |                                                  |       |       |       |       |          |

|                                  | <ul style="list-style-type: none"> <li>vii. Support each individual to fully participate in communities of their choosing in the environment most supportive of their recovery and that promotes housing of his/her choice and to build and support recovery connections and supports within his/her own community.</li> <li>viii. Actively seek ongoing input into program and service content so as to meet each individual's needs and goals and fosters the recovery process.</li> <li>b. A description of the particular consumer empowerment models utilized, types of activities offered, and typical daily activities and schedule. If offered, meals must be described as an adjunctive peer relation building activity rather than as a central activity.</li> <li>c. A description of the staffing pattern plans for staff who have or will have CPS and appropriate credentials, and how staff are deployed to assure that the required staff-to-individual ratios are maintained, including how unplanned staff absences, illnesses, and emergencies are accommodated.</li> <li>d. A description of how CPS-ADs within the agency are given opportunities to meet with or otherwise receive support from other peers both within and outside the agency.</li> <li>e. A description of how individuals are encouraged and supported to seek Georgia certification as CPS-AD through participation in training opportunities and peer or other counseling regarding anxiety following certification.</li> <li>f. A description of test-taking skills and strategies, assistance with study skills. Information about training and testing opportunities, opportunities to hear from and interact with peers who are already certified, additional opportunities for peer staff to participate in clinical team meetings at the request of a participant, and the procedure for the Program Leader to request a team meeting.</li> <li>g. A description of the hours of operation, the staff assigned, and the types of services and activities provided for and by individuals served, as well as for families, parents, and /or guardians.</li> <li>h. A description of the program's decision-making processes, including how participants' direct decision-making about both individual and program-wide activities and about key policies and dispute resolution processes.</li> <li>i. A description of how individuals participating in the service at any given time are given the opportunity to participate in and make decisions about the activities that are conducted or services offered within the Peer Recovery program, about the schedule of those activities and services, and other operational issues.</li> <li>j. A description of the materials, supplies, transportation, and other resources available for individuals participating in the Peer Recovery services.</li> <li>k. A description of the governing body and /or advisory structures indicating how this body/structure meets requirements for peer leadership and cultural diversity.</li> <li>l. A description of how the plan for services and activities is modified or adjusted to meet the needs specified in IRP.</li> <li>m. A description of how individual requests for discharge and change in service or service intensity are handled; and</li> <li>n. Assistive tools, technologies, worksheets, (e.g., SOAR; Recovery Check-Ins; Motivational Interviewing; Cultural Competence, Stigma &amp; Labeling etc.) can be used by the Peer Recovery staff to work with the served individual to improve his/her communication about treatment, symptoms, improvements, etc. with treating behavioral health and medical practitioners.</li> </ul> |
| Service Accessibility            | To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Documentation Requirements       | Providers must document services in accordance with the specifications for documentation requirements in Part II, Section III of the Provider Manual.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Billing & Reporting Requirements | When Telemedicine technology is utilized for the provision of this service in accordance with the allowance in the Service Accessibility section of this definition, the code cited in the Code Detail above with the appropriate GT modifier shall be utilized in documentation and claims submission.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Service Description                                     | This service is the medical monitoring of the physical process of withdrawal from alcohol or other drugs in an outpatient setting for those individuals with an appropriate level of readiness for behavioral change and level of community/social support. It is indicated when the individual experiences physiological dysfunction during withdrawal, but life or significant bodily functions are not threatened.<br><br>This service must reflect ASAM (American Society of Addiction Medication) Levels 1-WM (Ambulatory Without Extended On-Site Monitoring) and 2-WM (Ambulatory with Extended Onsite Monitoring) and focuses on rapid stabilization and entry into the appropriate level of care/treatment based upon the ASAM guidelines placement criteria. These services may be provided in traditional Outpatient, Intensive Outpatient, Day Treatment, Intensive Day Treatment or other ambulatory settings.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |       |       |       |       |       |          |                                 |                                                  |       |       |       |       |          |
| Admission Criteria                                      | Individual has a substance use disorder (ASAM PPC-2, Dimension-1) that is incapacitating, destabilizing or distressing. If the severity is incapacitating, there must be sufficient optimization in other dimensions of the individual's life to provide for safe withdrawal management in an outpatient setting, and individual meets the following three criteria:<br><br>1. Individual is experiencing signs and symptoms of withdrawal, or there is evidence (based on history of substance intake, age, gender, previous withdrawal history, present symptoms, physical condition, and/or emotional/behavioral condition) that withdrawal is imminent; and the individual is assessed to be at minimal (Level 1-WM) to moderate (Level 2-WM) risk of severe withdrawal syndrome outside the program setting and can safely be managed at this service level; and<br><br>2. Individual has no incapacitating physical or psychiatric complications that would preclude ambulatory detoxification services; and<br><br>3. Individual is assessed as likely to complete needed withdrawal management and to enter into continued treatment or self-help recovery as evidenced by:<br><br>a. Individual or support persons clearly understand and are able to follow instructions for care; and<br><br>b. Individual has adequate understanding of and expressed interest to enter into ambulatory detoxification services; or<br><br>c. Individual has adequate support services to ensure commitment to completion of withdrawal management and entry into ongoing treatment or recovery; or<br><br>d. Individual evidences a willingness to accept recommendations for treatment once withdrawal has been managed. |       |       |       |       |       |          |                                 |                                                  |       |       |       |       |          |
| Continuing Stay Criteria                                | Individual's withdrawal signs and symptoms are not sufficiently resolved so that the individual can participate in self-directed recovery or ongoing treatment without the need for further medical or withdrawal management monitoring.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |       |       |       |       |       |          |                                 |                                                  |       |       |       |       |          |
| Discharge Criteria                                      | 1. Adequate continuing care plan has been established; and one or more of the following:<br>2. Goals of the Individualized Recovery Plan have been substantially met; or<br>3. Individual/family requests discharge and individual is not imminently dangerous; or<br>4. Withdrawal signs and symptoms have failed to respond to treatment and have intensified (as confirmed by higher scores on CIWA-Ar or other comparable standardized scoring system) such that transfer to a more intensive level of withdrawal management service is indicated; or<br>5. Individual has been unable to complete Level 1-WM/2-WM despite an adequate trial.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |       |       |       |       |       |          |                                 |                                                  |       |       |       |       |          |
| Service Exclusions                                      | ACT, Nursing and Medication Administration (Medication administered as a part of Ambulatory Detoxification is not billed separately as Medication Administration).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |       |       |       |       |       |          |                                 |                                                  |       |       |       |       |          |

## Ambulatory Substance Abuse Detoxification

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Clinical Exclusions   | <ol style="list-style-type: none"> <li>1. Substance Use Disorder has incapacitated the individual in all aspects of daily living, there is resistance to treatment as in ASAM Dimension 4, relapse potential is high (Dimension 5), and the recovery environment is poor (Dimension 6).</li> <li>2. Concomitant medical condition and/or other behavioral health issues warrant inpatient/residential treatment.</li> <li>3. This service code does not cover withdrawal management treatment for cannabis, amphetamines, cocaine, hallucinogens and phencyclines.</li> </ol>                                                                                                                                      |
| Required Components   | <ol style="list-style-type: none"> <li>1. This service must be licensed by DCH/HFR under the Rules and Regulations for Drug Abuse Treatment Programs, 290-4-2.</li> <li>2. There must be a written service order for Ambulatory Detoxification and must be completed by members of the medical staff pursuant to the Medical Practice Act of 2009, Subsection 43-34-23 Delegation of Authority to Nurse and Physician Assistant and in the individual's record is required to initiate ambulatory detoxification services. Verbal orders or those initiated by other appropriate members of the medical staff are acceptable provided the physician signs them within 24 hours or the next working day.</li> </ol> |
| Clinical Operations   | <ol style="list-style-type: none"> <li>1. The severity of the individual's symptoms, level of supports needed, and the authorization of appropriate medical staff for the service will determine the setting, as well as the amount of nursing and physician supervision necessary during the withdrawal process. The individual may or may not require medication, and 24-hour nursing services are not required. However, there is a contingency plan for "after hours" concerns/emergencies.</li> <li>2. In order for this service to have best practice impact, the Individualized Recovery/Resiliency Plan should consider group and individual counseling and training to fully support recovery.</li> </ol> |
| Service Accessibility | To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.                                                                                                                                                                                                                                                                                   |

| Service Description | <p>ACT is an Evidence Based Practice that is person-centered, recovery-oriented, and a highly intensive community-based service for individuals who have serious and persistent mental illness. The individual's mental health condition has significantly impaired his or her functioning in the community. ACT provides a variety of interventions twenty-four (24) hours, seven days a week. The service utilizes a multidisciplinary mental health team from the fields of psychiatry nursing, psychology, social work, substance use disorders, and vocational rehabilitation; additionally, a Certified Peer Specialist is an active member of the ACT Team providing assistance with the development of natural supports, promoting socialization, and the strengthening of community living skills. The ACT Team works as one organizational unit providing community-based interventions that are rehabilitative, intensive, integrated, and stage specific. Services emphasize social inclusiveness though relationship building and the active involvement in assisting individuals to achieve a stable and structured lifestyle. The service providers must develop programmatic goals that clearly articulate the use of best/evidence-based practices for ACT recipients using co-occurring and trauma-informed service delivery and support. Practitioners of this service are expected to maintain knowledge and skills according to the current research trends in best/evidence-based practices. ACT is a unique treatment model in which the majority of mental health services are directly provided internally by the ACT program in the recipient's natural environment. ACT services are individually tailored with each individual to address his/her preferences and identified goals, which are the basis of the Individualized Recovery Plan (IRP). Based on the needs of the individual, services may include (in addition to those services provided by other systems):</p> <ol style="list-style-type: none"><li>1. Assistance to facilitate the individual's active participation in the development of the IRP;</li><li>2. Psycho educational and instrumental support to individuals and their identified family;</li><li>3. Crisis planning, Wellness Recovery Action Plan (WRAP), assessment, support and intervention;</li><li>4. Psychiatric assessment and care; nursing assessment and care; psychosocial and functional assessment which includes identification of strengths, skills, resources and needs;</li><li>5. Curriculum-based group treatment;</li><li>6. Individualized interventions, which may include:<ol style="list-style-type: none"><li>a. Identification, with the individual, of barriers that impede the development of skills necessary for independent functioning in the community; as well as existing strengths which may aid the individual in recovery and goal achievement;</li><li>b. Support to facilitate recovery (including emotional/therapeutic support/assistance with defining what recovery means to the individual in order to assist individual with recovery-based goal setting and attainment);</li><li>c. Service and resource coordination to assist the individual with the acquisition and maintenance of recovery capital (i.e. gaining access to necessary internal and external rehabilitative, medical and other services) required for recovery initiation and self-maintenance;</li><li>d. Family counseling/training for individuals and their families (as related to the person's IRP);</li><li>e. Assistance to develop both mental health condition and physical health symptom monitoring and illness self-management skills in order to identify and minimize the negative effects of symptoms which interfere with the individual's daily living (may include medication administration and/or observation and assistance with self- medication motivation and skills) and to promote wellness;</li><li>f. Assistance with accessing entitlement benefits and financial management skill development;</li><li>g. Motivational assistance to develop and work on goals related to personal development and school or work performance;</li><li>h. Substance use disorder counseling and intervention (e.g. motivational interviewing, stage-based interventions, refusal skill development, cognitive behavioral therapy, psycho educational approaches, instrumental support such as helping individual relocate away from friends/neighbors who influence drug use, relapse prevention planning and techniques etc.);</li><li>i. Individualized, restorative one-to-one psychosocial rehabilitation and skill development, including assistance in the development of interpersonal/social and community coping and functional skills (i.e. adaptation/functioning in home, school and work environments);</li><li>j. Psychotherapeutic techniques involving the in-depth exploration and treatment of interpersonal and intrapersonal issues, including trauma issues; and</li></ol></li></ol> |       |    |    |  |                |                                                  |

## Assertive Community Treatment

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|                    | <ul style="list-style-type: none"> <li>k. Any necessary monitoring and follow-up to determine if the services accessed have adequately met the individual's needs; and</li> <li>l. Individuals receiving this intensive level of community support are expected to experience increased community tenure and decreased frequency and/or duration of hospitalization/crisis services. Through individualized, team-based supports, it is expected that individuals will achieve housing stability, decreased symptomatology (or a decrease in the debilitating effects of symptoms), improved social integration and functioning, and increased movement toward self-defined recovery.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Admission Criteria | <ol style="list-style-type: none"> <li>1. Individuals with serious and persistent mental health condition that seriously impairs the ability to live in the community. <b>Priority</b> is given to people recently discharged from an institutional setting with schizophrenia, other psychotic disorders, or bipolar disorder, because these conditions more often cause long-term psychiatric disability;</li> </ol> <p style="text-align: center;"><b>AND</b></p> <ol style="list-style-type: none"> <li>2. Individuals with significant functional impairments as demonstrated by the need for assistance in 3 or more of the following areas which despite support from a caregiver or behavioral health staff continues to be an area that the individual cannot complete: <ul style="list-style-type: none"> <li>a. Maintaining personal hygiene;</li> <li>b. Meeting nutritional needs;</li> <li>c. Caring for personal business affairs;</li> <li>d. Obtaining medical, legal, and housing services;</li> <li>e. Recognizing and avoiding common dangers or hazards to self and possessions;</li> <li>f. Persistent or recurrent failure to perform daily living tasks except with significant support or assistance from others such as friends, family, or relatives;</li> <li>g. Employment at a self-sustaining level or inability to consistently carry out homemaker roles (e.g., household meal preparation, washing clothes, budgeting or childcare tasks and responsibilities);</li> <li>h. Maintaining a safe living situation (e.g., evicted from housing, or recent loss of housing, or imminent risk of loss of housing);</li> </ul> </li> </ol> <p style="text-align: center;"><b>AND</b></p> <ol style="list-style-type: none"> <li>3. Individuals with <b>two or more of the following issues</b> that are indicators of continuous high-service needs (i.e. greater than 8 hours of service per month): <ul style="list-style-type: none"> <li>a. High use of acute psychiatric hospitals or crisis/emergency services including mobile, in-clinic, Psychiatric Residential Treatment Facility (PRTF) or crisis residential (e.g., 3 or more admissions in a year) or extended hospital or PRTF stay (60 days in the past year) or psychiatric emergency services.</li> <li>b. Persistent, recurrent, severe, or major symptoms that place the individual at risk of harm to self or others (e.g., command hallucinations, suicidal ideations or gestures, homicidal ideations or gestures, self-harm).</li> <li>c. Coexisting substance use disorder of significant duration (e.g., greater than 6 months) or co-diagnosis of substance abuse.</li> <li>d. High risk for or a recent history of criminal justice involvement related to mental health condition (e.g., arrest and incarceration).</li> <li>e. Chronically homeless (e.g., 1 extended episode of homelessness for a year, or 4 episodes of homelessness within 3 years).</li> <li>f. Residing in an inpatient bed (i.e., state hospital, community hospital, CSU) or in a supervised community residence, but clinically assessed to be able to live in a more independent living situation if intensive services are provided or requiring a residential or institutional placement if more intensive services are not available.</li> <li>g. Inability to participate in traditional clinic-based services (must provide evidence of multiple agency trials if this is the only requirement met on the list).</li> </ul> </li> </ol> <p style="text-align: center;"><b>AND</b></p> <ol style="list-style-type: none"> <li>4. Meets one or more of the criteria below:</li> </ol> |

## Assertive Community Treatment

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                          | <ul style="list-style-type: none"> <li>a. Individual is transitioning from a state forensic or adult mental health unit after an extended length of stay <u>and</u> the hospital's treatment team determines that due to the individual's history and/or potential risk if non-compliant with clinic-based community services a period of ACT is clinically necessary prior to transition to less intensive services;</li> <li>b. Within the last 180 days, the individual has been incarcerated 2 or more times related to a behavioral health condition; or</li> <li>c. Within the last 180 days, individual has been admitted to a psychiatric hospital or crisis stabilization unit 2 or more times.</li> <li>d. Past (within 180 days of admission) or current response to other traditional, community-based intensive behavioral health treatment has shown minimal effectiveness/unsuccessful treatment (e.g. Psychosocial Rehabilitation, ICM, etc.). The individual has been unsuccessfully treated in the traditional mental health service system at a level of greater than 8 hours of service per month. The recipient may have experienced chronic homelessness and/or criminal justice involvement; and may have had multiple and/or extended stays in state psychiatric/public hospitals. Admission documentation must include evidence to support this criterion.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Continuing Stay Criteria | <p>Individual meets two (2) or more of the requirements below:</p> <ul style="list-style-type: none"> <li>1. Individual has been admitted to an inpatient psychiatric hospital, received services from a temporary observation unit or crisis service center, and/or received in-person crisis intervention services from ACT or Mobile Crisis one or more times in the past six (6) months;</li> <li>2. Individual has had contact with Police/Criminal Justice System due to behavioral health problems in the past six (6) months;</li> <li>3. Individual has displayed inability to maintain stable housing in the community due to behavioral health problems (i.e. individual fails to maintain home with safe living conditions such as insect infestation, damaging property, etc.) during the past six (6) months;</li> <li>4. Individual continues to demonstrate significant functional impairment s and/or difficulty developing a natural support system which allows for consistent maintenance of medical, nutritional, financial, and legal responsibilities without incident in the past six (6) months. Examples include, but are not limited to: <ul style="list-style-type: none"> <li>a. <b>Natural Supports:</b> Inability to identify, engage, and maintain relationships with friends and/or family support;</li> <li>b. <b>Medical:</b> Unable to comply with medical recommendations which results in significant health risk (such as inability to identify the need for medical attention, refusal to engage with traditional healthcare systems for medical needs (e.g. PCP appointments, etc.), demonstrated inability to manage medication even with available supports, continued use of alcohol or illicit drugs despite adverse consequences;</li> <li>c. <b>Activities of Daily Living:</b> Inability to maintain personal hygiene. Persistent or recurrent failure to perform daily living tasks except with significant support or assistance from others such as friends, family, or relatives. Failure to recognize and avoid common dangers or hazards to self and possessions;</li> <li>d. <b>Nutritional/Financial:</b> Consistent pattern of misuse of benefits such as SNAP, TANF, WIC, etc. such as documented evidence of selling food benefits for money or drugs and creating the frequent condition of lack of nourishment;</li> <li>e. <b>Legal Responsibilities:</b> Inability to comprehend illegal and legal actions, consistent engagement of high-risk illegal behaviors, or failure to comply with mandated community supervision or court orders.</li> </ul> </li> <li>5. Individual has displayed persistent, recurrent, severe, or major symptoms that place him/her at risk of harm to self or others (e.g. command hallucinations, suicidal ideation or gestures, homicidal ideation or gestures, self-harm) in the past six (6) months.</li> <li>6. Documented efforts of attempts to transition an individual within the prior 6 months have resulted in unsuccessful engagement in traditional clinic-based behavioral health services and the subsequent need for ACT level intensity of services continues.</li> </ul> |
| Discharge Criteria       | <ul style="list-style-type: none"> <li>1. No individual should be considered for discharge prior to 45 days of consecutive outreach and documentation of attempted contacts (calls, visits to various locations, collateral/informal contacts etc.).</li> <li>2. An adequate continuing care plan has been established; <b>and one or more of the following:</b> <ul style="list-style-type: none"> <li>a. Individual no longer meets admission criteria; <b>or</b></li> <li>b. Goals of the Individualized Recovery Plan have been substantially met; <b>or</b></li> <li>c. Individual requests discharge and is not in imminent danger of harm to self or others; <b>or</b></li> <li>d. Transfer to another service/level of care is warranted by a change in individual's condition; <b>or</b></li> <li>e. Individual requires services not available in this level of care.</li> </ul> </li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Assertive Community Treatment

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Service Exclusions  | <ol style="list-style-type: none"> <li>1. ACT is a comprehensive team intervention and most services are excluded, with the exceptions of:               <ol style="list-style-type: none"> <li>a. Peer Supports;</li> <li>b. Residential Supports;</li> <li>c. Community Transition Planning (to be utilized as a person is transitioning to/from an inpatient setting, jail, or CSU);</li> <li>d. Group Training/Counseling (within parameters listed in Section A);</li> <li>e. Supported Employment;</li> <li>f. Psychosocial Rehabilitation - Group;</li> <li>g. SA Intensive Outpatient (If a substance use disorder is identified and documented as a clinical need unable to be met by the ACT team Substance Abuse counselor, and the individual's current treatment progress indicates that provision of ACT services alone, without an organized SA-program model, is not likely to result in the individual's ability to maintain sobriety ACT teams may assist the individual in accessing this service, but must ensure clinical coordination in order to avoid duplication of services. If ACT and SAIOP are provided by the same agency, the agency may update the existing authorization to include group services to be utilized by the SAIOP program;</li> <li>h. Group therapy is not a service exclusion when the needs of an individual exceed that which can be provided by the ACT team, the individual may participate in SA group treatment provided by a Tier 1 or Tier 2 provider or SA-IOP provider upon documentation of the demonstrated need.</li> <li>i. Specialized evidence-based practices are not service exclusions (excluded) when the needs of an individual exceed that which can be provided by the ACT team (e.g. specialized treatment for PTSD, eating disorders, personality disorders, and/or other specific clinical specialized treatment needs). In this case, the Individual's recovery plan (IRP) must reflect the necessity for participation in such services along with medical record documentation of the unique need and resulting collaboration between service providers to ensure coordination towards goals and to prevent any duplication of services/effort; and</li> <li>j. High Utilization Management.</li> <li>k. Some limited non-intensive Outpatient (NIO) services as required by the AOT Service Guideline for individuals enrolled in AOT.</li> </ol> </li> <li>2. On an individual basis, up to eight (8) weeks of some services may be provided to ACT consumers to facilitate a smooth transition from ACT to these other community services. A transition plan must be adequately documented in the IRP and clinical record. These services are:               <ol style="list-style-type: none"> <li>a. Case Management/Intensive Case Management.</li> <li>b. Psychosocial Rehabilitation Individual/Group.</li> <li>c. AD Support Services.</li> <li>d. Behavioral Health Assessment.</li> <li>e. Service Plan Development.</li> <li>f. Diagnostic Assessment.</li> <li>g. Physician Assessment (specific to engagement only).</li> <li>h. Individual Counseling (specific to engagement only).</li> </ol> </li> <li>3. ACT recipients who also receive a DBHDD Residential Service may not receive ACT-provided skills training which is a part of the "residential" service. The ACT provider shall be in close coordination with the Residential provider such that there is no duplication of services supports/efforts.</li> <li>4. Those receiving Medicaid I/DD Waivers who meet the admission criteria above may be considered for this service as long as his/her waiver service plan is not so comprehensive in nature as to be duplicative to the ACT service scope.</li> <li>5. Individuals authorized for Housing Support services are exempt from the Case Management service exclusion that is included in the Service Definitions for Assertive Community Treatment (ACT), Intensive Case Management (ICM), and Community Support Team (CST) services. The Housing Support provider shall be in close coordination (as evidenced by documentation in the individual's EHR) with any applicable ACT, ICM, or CST provider such that there is no duplication of service supports/efforts.</li> </ol> |
| Clinical Exclusions | <ol style="list-style-type: none"> <li>1. Individuals with the following conditions are excluded from admission unless there is clearly documented evidence of a psychiatric condition/substance use disorder co-occurring with one of the following diagnoses: Developmental Disability, Autism, Neurocognitive Disorder, substance use disorder.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Assertive Community Treatment

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|                     | 2. Individuals may be excluded if there is evidence that they are unable to participate in the development of their Individual Recovery Plan as a result of significant impairment due to an I/DD diagnosis.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Required Components | <ol style="list-style-type: none"> <li>1. Assertive Community Treatment must include a comprehensive and integrated set of medical and psychosocial services provided in non-office settings 80% of the time by a mobile multidisciplinary team. The team must provide community support services interwoven with treatment and rehabilitative services and regularly scheduled team meetings which will be documented in the served individual's medical record.</li> <li>2. Ideally, and in accordance with the Dartmouth Assertive Community Treatment Scale (DACTS), the Treatment Team meeting must be held a minimum of 4 times a week with time dedicated to discussion of support to a specific individual, and documentation in the log of the Treatment Team Meetings as indicated in the Documentation Requirements section below. Each individual must be discussed, even if briefly, in each Treatment Team Meeting. The Treatment Team Meetings are to review the status of all individuals and the outcome of the most recent staff contacts, develop a master staff work schedule for the day's activities, and all ACT team members are expected to attend; exception of nonattendance can be made and documented by the Team Leader. The psychiatrist must participate at least one time/week in the ACT team meetings.</li> <li>3. Each ACT team will identify an Individual Treatment Team (ITT) for each enrolled ACT individual.</li> <li>4. Individuals will be provided assistance by the ACT team with gaining skills and resources necessary to obtain housing of the individual's choice, including completion of the housing need and choice survey (<a href="https://dbhddapps.dbhdd.ga.gov/NSH/">https://dbhddapps.dbhdd.ga.gov/NSH/</a>) upon admission and with the development of a housing goal, which will be minimally updated at each reauthorization.</li> <li>5. Services and interventions must be individually tailored to the needs, goals, preferences and assets of the individual with the goals of maximizing independence and recovery as defined by the individual.</li> <li>6. At least 80% of all service units must involve face-to-face contact (either in-person or via telemedicine) with individuals served; however, a minimum of one face-to-face contact per week must occur in-person (i.e. not via telemedicine). In-person face-to-face contacts should be more frequent than this if indicated by the individual's clinical presentation, life circumstances, or needs. Eighty percent (80%) or more of in-person face-to-face service units must be provided outside of program offices in locations that are comfortable and convenient for individuals (including the individual's home, based on individual need and preference and clinical appropriateness).</li> <li>7. During the course of ACT service delivery, the ACT Team will provide the intensity and frequency of service needed for each individual. ACT teams are expected to achieve fidelity with the DACTS Model. To achieve a score of "4" in the Frequency of Contact Measure within DACTS, ACT Teams must provide a median of <b>3-3.99</b> face-to-face contacts per week across a sample of agency's ACT individuals. This measure is calculated by determining the median of the average weekly face-to-face contacts of each individual in the sample. At least one of these monthly contacts must include symptom assessment/management and management of medications.</li> <li>8. During discharge transition, the number of face-to-face visits per week will be determined based on the person's mental health acuity with the expectation that these individuals participating in ACT transitioning must receive a minimum of 4 face-to-face contacts per month during the documented active transition period.</li> <li>9. Service may be delivered by a single team member to 2 ACT individuals at the same time if their goals are compatible, however, this cannot be a standard practice. Services cannot be offered to more than 2 individuals at a time (exception: Item A.8.).</li> <li>10. ACT recipients can receive limited Group Training/Counseling (up to 20 units/week) when a curriculum-based therapeutic group is offered such as Dialectical Behavioral Therapy (DBT), Motivational Enhancement, Integrative Dual Diagnosis Treatment (IDDT), etc. For this to be allowable, the ACT participants must have clinical needs and recovery goals that justify intervention by staff trained in the implementation of the specific curriculum-based therapy. <ol style="list-style-type: none"> <li>a. This group may be offered to no less than 3 individuals and no more than 10 ACT participants at one time.</li> <li>b. Only ACT enrolled individuals are permitted to attend these group services.</li> <li>c. Acceptable group practitioners are those on the ACT team who meet the practitioner levels as follows: <ol style="list-style-type: none"> <li>i. Practitioner Level 1: Physician/Psychiatrist.</li> <li>ii. Practitioner Level 2: Psychologist, CNS-PMH.</li> <li>iii. Practitioner Level 3: LCSW, LPC, LMFT, and RN. In addition, and only performing these functions related to the treatment of substance use disorders: MAC, CAADC, GCADC-II or -III, and CAC-II.</li> </ol> </li> </ol> </li> </ol> |

## Assertive Community Treatment

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | <ul style="list-style-type: none"> <li>iv. Practitioner Level 4: LMSW, APC, AMFT, and Psychologist/LCSW/LPC/LMFT's supervisee/trainee with at least a Bachelor's Degree in one of the helping professions such as social work, community counseling, counseling, psychology, or criminology, functioning within the scope of the practice acts of the state. In addition, and only performing these functions related to the treatment of substance use disorders: GCADC-I (with Bachelor's Degree), CAC-I (with Bachelor's Degree), or Certified Alcohol and Drug Counselor-Trainee (with Bachelor's Degree and under supervision).</li> <li>v. Practitioner Level 5: GCADC-I (without Bachelor's Degree), CAC-I (without Bachelor's Degree), or Certified Alcohol and Drug Counselor-Trainee (without Bachelor's Degree and under supervision) (practitioners at this level may only perform these functions related to treatment of substance use disorders).</li> <li>d. Ideally, 50% of individuals with co-occurring substance use disorders will participate in a substance abuse group at least once per month with their ACT provider. If there are 2 practitioners leading the group who are the same practitioner level (i.e. two U3 practitioners), then each may split the responsibility for documentation and singly sign a note. In this situation, there must be evidence in the note of who was the co-leader of that group to document the compliance expectations for two practitioners.</li> <li>e. If a group is facilitated by two practitioners who are not the same U-level (i.e. one is a U3 and one is a U4), then these co-leaders may split the responsibility for documenting group progress notes. If the lower-leveled practitioner writes the progress note, the upper level person's practitioner level can be billed if the higher practitioner-leveled person co-signs the note. If the higher-level practitioner writes the note, then he/she shall document the co-leaders participation and can solely sign that note.</li> </ul>                                                                                                                                                                                                         |
| Staffing Requirements | <ol style="list-style-type: none"> <li>1. Assertive Community Treatment Team members must include:             <ol style="list-style-type: none"> <li>a. (1 FT Employee required) A fulltime Team Leader who is the clinical and administrative supervisor of the team, and also functions as a practicing clinician on the team; this individual must have at least 2 years of documented experience working with adults with a SPMI and one of the following qualifications to be an "independently licensed practitioner." It is expected that the practicing ACT Team Leader provides direct services at least 10 hours per week with the remaining work hours encompassing team-focused activities. The Team Leader must be a FT employee and dedicated to only the ACT team.                 <ol style="list-style-type: none"> <li>i. Physician</li> <li>ii. Psychologist</li> <li>iii. Practice Acts.                 </li> </ol> </li> <li>b. (Variable: 2-1.0 FTE required) Depending on individual enrollment, a full or part time Psychiatrist who:                 <ol style="list-style-type: none"> <li>i. provides clinical and crisis services to all team consumers;</li> <li>ii. delivers services in the recipient's natural environment when the individual is unable or unwilling to access a traditional service setting (this allowance is only for psychiatrists. Also, adherence to the 80% of the entire team's services provided in non-office settings requirement above is still maintained);</li> <li>iii. works with the team leader to monitor each individual's clinical and medical status and response to treatment; and</li> </ol> </li> </ol> </li> </ol> |

## Assertive Community Treatment

- iv. directs psychopharmacologic and medical treatment (at a minimum, must provide monthly medication management for each individual);
- v. must provide a minimum of 14 hours per week of direct support to the ACT team/ACT consumers;
- vi. the psychiatrist must participate in at least one time/week in the ACT team meetings; and
- vii. The psychiatrist (including Physician Extender) to ACT individual ratio must not be greater than 1:100. Specifically:
  - With 1-50 consumers, the requirement for the ACT team is to employ a Psychiatrist/Physician Extender minimally .35-.5 FTE (14 hrs./wk-20 hrs./wk.) providing support to the team and;
  - With 51-65 consumers, the requirement for the ACT team is to employ a Psychiatrist/Physician Extender minimally .36-.65 FTE (14.4 hrs./wk-26 hrs./wk.) providing support to the team and;
  - With 66-75 consumers, the requirement for the ACT team is to employ a Psychiatrist/Physician Extender t minimally .47-.75 FTE (18.8 hrs./wk-30 hrs./wk.) providing support to the team; and
  - With 76-100 consumers, the requirement for the ACT team is to employ a Psychiatrist/Physician Extender minimally .54 FTE-1 FTE (21.6 hrs./wk-40 hrs./wk.) providing support to the team.
  - Teams utilizing a physician extender (APRN, NP, or PA) for part of the Psychiatrist time outlined above must maintain enough Psychiatrist time (not including physician extenders) to obtain a score of at least 3 on the DACTs on the Psychiatrist staffing item (.40FTE Psychiatrist per 100 consumers). The Psychiatrist's FTE and the physician extender's FTE combined would yield at least a 4 (.70 combined FTE per 100 consumers) on the DACTS. The physician extender's FTE that fulfills this requirement could not also be counted as fulfilling the FTE requirements for the RNs for the team (i.e. no portion of an FTE may be counted twice).
  - The ACT Team Psychiatrist would see each new admission to the ACT Team in a face-to-face appointment and would review each case with the physician extender on a monthly basis.
  - The physician extender would be expected to participate in ACT team meetings at least once per week as would the supervising Psychiatrist be expected to participate in an ACT team meeting at least once per week.
- c. (1-2 Fulltime Employee/s) RN/s who provide nursing services for all individuals, including health and psychiatric assessments, education on adherence to treatment, prevention of medical issues, rehabilitation, nutritional practices and works with the team to monitor each individual's overall physical health and wellness, clinical status and response to treatment
  - i. With 1-50 consumers, the requirement for the ACT team is to employ a Registered Nurse minimally .7-1 FTE (28 hrs./wk-40 hrs./wk.) providing support to the team;
  - ii. With 51-65 consumers, the requirement for the ACT team is to employ a Registered Nurse minimally .73 FTE-1.3 FTE (29.2 hrs./wk-52 hrs./wk.) providing support to the team;
  - iii. With 66- 75 consumers, the requirement for the ACT team is to employ a Registered Nurse(s) .93 FTE-1.5 FTE (37.2 hrs./wk-60 hrs./wk.) providing support to the team and; and
  - iv. With 76-100 consumers, the requirement for the ACT team is to employ a Registered Nurse (s) 1.3 FTE -2 FTE (52 hrs. /wk-80 hrs. /wk. providing support to the team.
- d. An addiction practitioner who holds a CAC-I (or other addiction certification equivalent or higher) and assesses the need for and provides and/or accesses substance use disorder treatment and supports for team consumers.
  - i. With 1-50 consumers, the requirement for the ACT team is to employ an addiction practitioner minimally .7-1 FTE (28 hrs./wk-40 hrs./wk.) providing support to the team; and
  - ii. With 51-65 consumers, the requirement for the ACT team is to employ an addiction practitioner minimally .73 FTE-1.3 FTE (29.2 hrs./wk-52 hrs./wk.) providing support to the team; and
  - iii. With 66- 75 consumers, the requirement for the ACT team is to employ an addiction practitioner .93 FTE-1.5 FTE (37.2 hrs./wk-60 hrs./wk.) providing support to the team; and

(1 FTE) One FTE Certified Peer Specialist (CPS-MH or CPS-AD) who is fully integrated into the team and promotes individual self-determination and decision-making and provides essential expertise and consultation to the entire team to promote a culture in which each individual's point of view and preferences are recognized, understood, respected and integrated into treatment, rehabilitation and community self-help activities. CPSs must be supervised by an independently licensed/credentialed practitioner on the team.</li> <li>g. (2 FTEs) Two paraprofessional mental health workers who provide rehabilitation and support services under the supervision of a Licensed Clinician. The sum of the FTE counts for the following two bullets must equal at least 2 FTEs. <ul style="list-style-type: none"> <li>i. (1 FTE) One of these staff must be a Vocational Specialist. A Vocational Specialist is a person with a minimum of one-year verifiable training and/or experience in vocational counseling.</li> <li>ii. (1 FTE) Other Paraprofessional.</li> </ul> </li> <li>2. It is critical that ACT team members build a sound relationship with and fully engage in supporting the served individuals. To that end, no more than 1/3 of the team can be "contracted"/1099 team members.</li> <li>3. The ACT team maintains a small consumer-to-clinician ratio, of no more than 10 individuals per staff member. This does not include the psychiatrist, program assistant/s, transportation staff, or administrative personnel. Staff-to-individual ratio takes into consideration evening and weekend hours, needs of special populations, and geographical areas to be served.</li> <li>4. Documentation must demonstrate that multiple members across disciplines from the ACT team are engaged in the support of individuals served by the team including direct and indirect service delivery for each intervention (excluding the addiction practitioner, if substance use disorders have been ruled out).</li> <li>5. At least one ACT RN must be employed by an ACT team. The RN works with a team at least 32 hours/week (up to 40 hours/week) and is a full-time employee of the agency (not a subcontractor/1099 employee).</li> </ul> |
| Clinical Operations | <ul style="list-style-type: none"> <li>1. Individuals receiving this service must have a qualifying diagnosis present in the medical record prior to the initiation of services.</li> <li>2. ACT Teams must incorporate assertive engagement techniques to identify, engage, and retain the most difficult to engage individuals which include using street outreach approaches and legal mechanisms such as outpatient commitment and collaboration with parole and probation officers.</li> <li>3. Because ACT-eligible individuals may be difficult to engage, the initial treatment/recovery plan for an individual may be more generic at the onset of treatment/support. It is expected that the IRP be individualized and recovery-oriented after the team becomes engaged with the individual and comes to know the individual. The allowance for "generic" content of the IRP shall not extend beyond three (3) months.</li> <li>4. Because many individuals served may have a mental health condition and co-occurring substance use disorder, the ACT team may not discontinue services to any individual based solely upon a relapse in his/her substance use disorder recovery.</li> <li>5. ACT is expected to actively and assertively participate in transitional planning via in person or, when in person participation is impractical, via teleconference meetings between stakeholders. The team is expected to coordinate care through a demonstrable plan for timely follow up on referrals to and from their service, making sure individuals are connected to resources to meet their needs in alignment with their preferences. The team is responsible for ensuring the individual has access to services and resources such as housing, pharmacy, benefits, a support network, etc. when being discharged from a psychiatric hospital; released from jail; or experiencing an episode of homelessness. ACT providers who are a Tier 1 or Tier 2+ Provider may use Community Transition Planning to establish a connection or reconnection to the individual and participate in discharge planning meetings while the individual is in a state operated hospital, crisis stabilization unit, jail/prison, or other community psychiatric hospital.</li> <li>6. Each ACT provider must have policies and procedures governing the provision of outreach services, including methods for protecting the safety of staff that engage in outreach activities.</li> <li>7. The organization must have established procedures/protocols for handling emergency and crisis situations that describe methods that shall be taken by the ACT team for supporting and responding to ACT enrolled individuals who require emergency psychiatric admission/hospitalization and/or crisis stabilization.</li> </ul>             |

## Assertive Community Treatment

- a. The ACT team is required to respond to the crisis needs of ACT enrolled individuals, both directly and via collaboration with Mobile Crisis Response Service (MCRS). ACT teams will receive a phone call from MCRS when a GCAL call has been received for ACT enrolled consumers in crisis. Upon receipt of the call, the ACT team must;
    - i. Respond to the MCRS call within 15 minutes of receipt; and
    - ii. Engage in discussion w/ MCRS regarding clinical and/or crisis needs and location of individual; and
    - iii. Agree upon appropriate intervention/response which shall be provided within 1 hour of completion of call, either in the form of ACT team responding in person, MCRS team responding in person or another agreed upon in-person response.
  - b. ACT teams are required to respond with face-to-face evaluation and/or intervention to at least 85% of all crisis calls coming through GCAL involving their respective ACT enrolled individuals over the course of fiscal year.
8. The organization must have an Assertive Community Treatment Organizational Plan that addresses the following descriptions:
  - a. Particular rehabilitation, recovery and resource coordination models utilized, types of intervention practiced, and typical daily schedule for staff.
  - b. Staffing pattern and how staff are deployed to assure that the required staff-to-individual ratios are maintained, including how unplanned staff absences, illnesses, and emergencies are accommodated.
  - c. Hours of operation, the staff assigned, and types of services provided to individuals, families, and/or guardians.
  - d. How the plan for services is modified or adjusted to meet the needs specified in the Individualized Recovery Plan.
  - e. Inter-team communication plan regarding individual support (e.g., e-mail, team staffings, staff safety plan such as check-in protocols etc.).
  - f. A physical health management plan.
  - g. How the organization will integrate individuals into the community including assisting individuals in preparing for employment.
  - h. How the organization (team) will respond to crisis for individuals served.
9. The ACT team is expected to work with informal support systems at least an average of 2 to 4 times a month with or without the individual present to provide support and skill training as necessary to assist the individual in his or her recovery. For individuals who have no identified informal supports, team members should document attempts to engage, identify, or build support networks at least 2 to 4 times per month. Informal supports are defined as persons who are not paid to support the individual (i.e., family, friends, neighbors, church members, etc.). Monthly maximum billing for informal support contacts without an individual being present shall not exceed 4 hours.
10. For the individuals which the ACT team supports, the ACT team must be involved in all hospital admissions and hospital discharges. The agency will be reviewed for fidelity by the standard that the ACT team will be involved with 95% of all hospital admissions and hospital discharges. This is evidenced by documentation in the clinical record.
11. The entire ACT team is responsible for completing the ACT Comprehensive Assessment for newly enrolled individuals. The ACT Comprehensive Assessment results from the information gathered and are used to establish immediate and longer-term service needs with each individual and to set goals and develop the first individualized recovery plan. Because of the complexity of the mental health condition and the need to build trust with the served individual, the comprehensive mental health, addiction, and functional assessments may take up to 60 days. Enrolled individuals will be re-assessed at 6-month intervals from date of completion of the comprehensive assessment. It is expected that when a person identifies and allows his/her natural supports to be partners in recovery that they will be fully involved in assessment activities and ACT team documentation will demonstrate this participation. The ACT Comprehensive Assessment shall (at a minimum) include:
  - a. Psychiatric History, Mental Status/Diagnosis.
  - b. Physical Health.
  - c. Substance Use assessment.
  - d. Education and Employment.
  - e. Social Development and Functioning.
  - f. Family Structure and Relationships.
12. Treatment and recovery support to the individual is provided in accordance with a Recovery Plan. Recovery planning shall be in accordance with the following:

|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <ol style="list-style-type: none"> <li>a. The Individual Treatment Team (ITT) is responsible for providing much of the individual's treatment, rehabilitation, and support services and is charged with the development and continued adaptation of the person's recovery plan (along with that person as an active participant). The ITT is a group or combination of three to five ACT staff members who together have a range of clinical and rehabilitation skills and expertise. The ITT members are assigned by the team leader to work collaboratively with an individual and his/her family and/or natural supports in the community by the time of the first recovery/resiliency planning meeting or thirty days after admission. The key members are the primary practitioner and at least one clinical or rehabilitation staff person who shares case coordination and service provision tasks for each individual. ITT members are assigned to take separate service roles with the individual as specified by the individual and the ITT in the IRP.</li> <li>b. The Recovery Plan Review is a thorough, written summary describing the individual's and the ITT's evaluation of the individual's progress/goal attainment, the effectiveness of the interventions, and satisfaction with services since the last person-centered IRP.</li> <li>c. The Recovery Planning Meeting is a regularly scheduled meeting conducted under the supervision of the team leader and the psychiatric prescriber. The purpose of these meetings is for the staff, as a team, and the individual and his/her family/natural supports, to thoroughly prepare for their work together. The group meets together to present and integrate the information collected through assessment in order to learn as much as possible about the individual's life, his/her experience with mental health condition, and the type and effectiveness of the past treatment they have received. The presentations and discussions at these meetings make it possible for all staff to be familiar with each individual and his/her goals and aspirations and for each individual to become familiar with each ITT staff person. The IRP shall be reevaluated and adjusted accordingly (at least quarterly) via the Recovery Planning Meeting prior to each reauthorization of service (Documentation is guided by the general requirements found in Part II, Section III. Documentation Requirements of this manual, and by the specific Documentation Requirements section for this service below).</li> </ol> <ol style="list-style-type: none"> <li>13. In order to maintain compliance with the DACTS fidelity model, each ACT team may enroll a maximum of 8 individual admissions per month. Allowing teams to meet and maintain the expectation of an active average daily census of at least 75 individuals.</li> <li>14. It is expected that 90% or more of the individuals have face to face contact with more than one staff member in a 2-week period.</li> </ol> |
| Service Accessibility            | <ol style="list-style-type: none"> <li>1. Services must be available by ACT Team staff skilled in crisis intervention 24 hours a day, 7 days a week with emergency response coverage, including psychiatric services. Answering devices/services/Georgia Crisis and Access Line do not meet the expectation of "emergency response".</li> <li>2. The team must be able to rapidly respond (in-person within 24 hours) to early signs of relapse and decompensation and must have the capability of providing multiple contacts daily to individuals in acute need.</li> <li>3. An ACT staff member must provide this on-call coverage.</li> <li>4. There must be documented evidence that service hours of operation include evening, weekend and holiday hours.</li> <li>5. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</li> <li>6. Telemedicine is not to be utilized as the primary means of delivery for ACT services. Telemedicine service delivery by the physician on the team should not exceed 50% of contacts. Further requirements/limitations regarding telemedicine service delivery by other team members are located in the Required Components section.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Billing & Reporting Requirements | <ol style="list-style-type: none"> <li>1. ACT teams are expected to submit all requisite information in order to establish eligibility for the initial authorization, and if an individual meets eligibility they receive a 12-month authorization for ACT services. During the first 12-months, consumers receive an automatic-authorization for the first 4 authorizations for ACT services. ACT teams are required to submit information that the ASO system references as a "reauthorization" every 90 days for collection of consumer outcome indicators. This data collection is captured from information submitted by ACT teams during initial and subsequent authorization periods. There is no clinical review taking place during this 90-day data collection process, the 90-day data collection-reauthorization meets the need of data collection only. At these intervals, the use of the term "reauthorization" is merely a data collection process and not a clinical review for eligibility every 90 days ACT teams are expected to submit all requisite information in order to establish continued eligibility for the concurrent review, this reauthorization review for medical necessity time frame is 180 days and begins after the initial 12 months of authorized services and occurs no less than every 6 months thereafter.</li> <li>2. All submissions for initial authorization must be entered into the ASO system within three days of establishing eligibility for ACT services.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

## Assertive Community Treatment

|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|                            | <ol style="list-style-type: none"> <li>3. ACT teams are expected to submit all initial authorizations for service and all 6-month concurrent authorizations in a timely manner. All continuing stay reauthorization must be submitted in advance of the expiration of the current authorization.</li> <li>4. All time spent between 2 or more team practitioners discussing a served individual must be reported as H0039HT. While this claim/encounter is reimbursed at \$0, it is imperative that the team document these encounters (see Documentation Requirements below) to demonstrate program integrity AND submit the claim/encounter for this so this service can be included in future rate setting.</li> <li>5. The following elements (at a minimum) shall be documented in the clinical record and shall be accessible to the DBHDD monthly as requested:             <ol style="list-style-type: none"> <li>a. Served individual's employment status;</li> <li>b. Served individual's residential status (including homelessness);</li> <li>c. Served individual's involvement with criminal justice system/s;</li> <li>d. Served individual's interactions with crisis support services (including acute psychiatric hospitals, emergency room visits, crisis stabilization program interactions, etc.).</li> </ol> </li> <li>6. ACT may <b>not</b> be provided in an Institution for Mental Diseases (IMD, e.g. state or private psychiatric hospital or crisis stabilization program with greater than 16 beds), jail, or prison system.</li> <li>7. The ACT team can provide and bill for Community Transition Planning as outlined in the Guideline for this service. This includes supporting individuals who are eligible for ACT and are transitioning from jail/prison.</li> <li>8. When group services are provided via an ACT team to an enrolled ACT-recipient, then the encounter shall be submitted as a part of the ACT type of care defined in the <b>Orientation to Services</b> section of Part I, Section 1 of this manual.</li> <li>9. Each ACT program shall provide monthly outcomes data as defined by the DBHDD.</li> <li>10. When telemedicine is used and the practitioner-specific coding allows the GT modifier (practitioner levels U1 and U2), that is the modifier which should be used. For all other practitioner levels (i.e. without a GT modifier), the POS 02 modifier should be used.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Documentation Requirements | <ol style="list-style-type: none"> <li>1. Providers must document services in accordance with the general requirements found in Part II, Section III: Documentation Requirements of this Provider Manual, as well as with the service-specific requirements delineated in this section below.</li> <li>2. All time spent between 2 or more team practitioners discussing a served individual must be documented in the medical record as H0039HT. While this claim/encounter is reimbursed at \$0, it is imperative that the team document these encounters to demonstrate program integrity AND submit the claim/encounter for this so this service can be included in future rate setting. HT documentation parameters include:             <ol style="list-style-type: none"> <li>a. If the staff interaction is specific to a single individual for 15 minutes, then the H0039HT code shall be billed to that individual (through claims or encounters).</li> <li>b. If the staff interaction is for multiple individuals served and is for a minimum single 15-minute unit and:                 <ol style="list-style-type: none"> <li>i. The majority of time is for a single individual served, then the claim/encounter shall be submitted attached to the individual's name who was the focus of this staffing conversation; or</li> <li>ii. The time is spent discussing multiple individuals (with no one individual being the focus of the time), then the team should create a rotation list (see below) in which a different individual would be selected for each of these staffing notes in order to submit claims and account for this staffing time; and</li> </ol> </li> <li>c. An agency is not required to document every staff-to-staff conversation in the individual's medical record; however, every attempt should be made to accurately document the time spent in staffing or case conferencing for individual consumers. The exceptions (which shall be documented in a medical record) are:                 <ol style="list-style-type: none"> <li>i. When the staffing conversation modifies an individual's IRP or intervention strategy; and</li> <li>ii. When observations are discussed that may lead to treatment or intervention changes, and/or that change the course of treatment.</li> </ol> </li> </ol> </li> <li>3. The ACT team must have documentation (e.g., notebook, binder, file, etc.) which contains all H0039HT staffing interactions (which shall become a document for audit purposes, and by which claims/encounters can be revoked-even though there are no funds attached). In addition to the requirements in item #2 of this section (above), a log of staff meetings must be documented as outlined in the Staffing Requirements section of this service guideline (above), item #2. The documentation notebook shall include:             <ol style="list-style-type: none"> <li>a. The team's protocol for submission of H0039HT encounters (how the team is accounting for the submissions of H0039HT in accordance with the above);</li> </ol> </li> </ol> |

## Assertive Community Treatment

- b. The protocol for staffing which occur ad hoc (e.g., team member is remote supporting an individual and calls a clinical supervisor for a consult on support, etc.);
  - c. Date of staffing;
  - d. Time start/end for the “staffing” interaction;
  - e. If a regular team meeting, names of team participants involved in staffing (signed/certified by the team leader or team lead designee in the absence of the team leader);
  - f. If ad hoc staffing note, names of the team participants involved (signed by any one of the team members who is participating);
  - g. Name all of individuals discussed/planned for during staffing; and
  - h. Minimal documentation of content of discussion specific to each individual (1-2 sentences is sufficient).
4. If the group location is documented in the note as a community-based setting (despite the absence of an “out-of-clinic” code for group reporting), then it will be counted for reviews/audits as an out-of-clinic service.
  5. All expectations set forth in this “Additional Service Components” section shall be documented in the record in a way which demonstrates compliance with the said items.
  6. ACT Treatment team meeting logs/staffing logs should be retained for a minimum of one (1) year, and in accordance with professional standards and the provider agency’s policy.

## Assisted Outpatient Treatment Program

| Service Description | <p>Assisted Outpatient Treatment (AOT) is the practice of providing court-ordered community-based mental health treatment under a civil commitment to individuals living with serious mental health condition if it is determined that they may be a danger to themselves or others.</p> <p>AOT facilitates engagement in treatment services and supports that may allow an individual to live independently in the community of their choice while living with a mental health diagnosis or co-occurring substance use disorder. It also helps providers focus their attention to work diligently to keep the enrolled individual engaged in effective treatment, and to support them in reaching their personal recovery goals.</p> <p>This Program is a time-limited, multi-faceted treatment model for adults who are court-ordered through a Probate Court petition to enroll in an Assisted Outpatient Treatment Program for required structure and support to achieve and sustain recovery from behavioral health conditions. These services enable individuals served to:</p> <ul style="list-style-type: none"><li>• Maintain residence in their community,</li><li>• Continue to work and go to school,</li><li>• Stay connected to friends and family life,</li><li>• Transition to voluntary treatment past court involvement.</li></ul> <p>All behavioral health services described in this manual are available to individuals in the AOT Program, subject to clinical necessity and the requirements of the particular service being considered. Intellectual and Developmental Disability services may also be available to individuals in the Program who have a co-occurring intellectual or developmental disability, subject to the eligibility requirements for those services.</p> |      |       |       |       |       |      |             |      |       |       |       |       |      |

## Assisted Outpatient Treatment Program

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Admission Criteria       | <p>An individual can be enrolled in the Assisted Outpatient Treatment Program if:</p> <ol style="list-style-type: none"> <li>1. A petition has been signed by a probate judge of the county of the individual's residence,<br/><b>AND</b></li> <li>2. AOT service is available in the county the individual resides:<br/><b>AND</b></li> <li>3. The individual meets the following criteria: <ol style="list-style-type: none"> <li>a. The person is 18 years of age or older; <b>and</b></li> <li>b. The person is suffering from a mental health or co-occurring substance use disorder which has been clinically documented by a health care provider licensed to practice in Georgia; <b>and</b></li> <li>c. There has been a clinical determination by a physician or psychologist that the person is unlikely to survive safely in the community without supervision; and</li> <li>d. The person has a history of lack of compliance with treatment for his or her mental health or co-occurring substance use disorder, in that at least one of the following is true: <ol style="list-style-type: none"> <li>i. The person's mental health or co-occurring substance use disorder has, at least twice within the previous 36 months, been a substantial factor in necessitating hospitalization or the receipt of services in a forensic or other mental health unit of a correctional facility, not including any period during which such person was hospitalized or incarcerated immediately preceding the filing of the petition; or</li> <li>ii. The person's mental health or co-occurring substance use disorder has resulted in one or more acts of serious and violent behavior toward himself or herself or others or threatens or attempts to cause serious physical injury to himself or herself or others within the preceding 48 months, not including any period in which such person was hospitalized or incarcerated immediately preceding the filing of the petition; <b>and</b></li> </ol> </li> <li>e. The person has been offered an opportunity to participate in a treatment plan by the department, a state mental health facility, a community service board, or a private provider under contract with the department and such person continues to fail to engage in treatment; <b>and</b></li> <li>f. The person's condition is substantially deteriorating; <b>and</b></li> <li>g. Participation in the assisted outpatient treatment program would be the least restrictive placement necessary to ensure such person's recovery and stability; <b>and</b></li> <li>h. In view of the person's treatment history and current behavior, such person is in need of assisted outpatient treatment in order to prevent a relapse or deterioration that would likely result in grave disability or serious harm to himself or herself or others; <b>and</b></li> <li>i. It is likely that the person may benefit from assisted outpatient treatment.</li> </ol> </li> </ol> |
| Continuing Stay Criteria | <p>An individual may remain in the AOT Program as long as:</p> <ol style="list-style-type: none"> <li>1. There is a current court-order from the probate court ordering them to remain enrolled; <b>and</b></li> <li>2. The individual's condition continues to meet the admission criteria; <b>and</b></li> <li>3. Progress notes document progress towards goals identified in the IRP (e.g., developing social networks and lifestyle changes, increasing educational, vocational, social and interpersonal skills, meeting court program requirements, and establishing a commitment to a recovery program), but overall goals have not yet been met; <b>and</b></li> <li>4. There is a reasonable expectation that the individual can achieve their IRP goals in the necessary reauthorization timeframe.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Discharge Criteria       | <p>An individual may be discharged from the AOT Program if:</p> <ol style="list-style-type: none"> <li>1. An adequate continuing care or discharge plan is established, <b>and</b></li> <li>2. Linkages are in place, <b>and</b></li> <li>3. The individual is no longer under court-order to be enrolled.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Service Exclusions       | <ol style="list-style-type: none"> <li>1. Individuals who are not under court-order from the probate court to be enrolled in the AOT Program are not eligible.</li> <li>2. When higher intensity services are utilized, documentation must indicate efforts to minimize duplication of services and effectively transition individuals to appropriate services of lower intensity when appropriate.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

## Assisted Outpatient Treatment Program

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Clinical Exclusions   | <ol style="list-style-type: none"> <li>1. Individuals who do not meet the eligibility requirements for each service for which admission is sought.</li> <li>2. Individuals with the following conditions are excluded from admission unless there is clearly documented evidence of a psychiatric condition co-occurring with one of the following diagnoses: Developmental Disability, Autism, Neurocognitive Disorder, Substance Use Disorder.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Required Components   | <ol style="list-style-type: none"> <li>1. While a court order may have been issued for this program, the provider must assess, determine, and complete an order for the unique services and supports needed by the individual, in keeping with standards set forth in Part II of this manual.</li> <li>2. The program incorporates information from a court ordered evaluation, provider assessments and the individual's personal goals into the treatment planning process and resulting IRP.</li> <li>3. While this is a court-ordered program, all aspects of programmatic and service delivery are subject to the stipulations set forth in the Service Definition for each service delivered, as well as to all requirements in Part II of this manual.</li> <li>4. The program must operate at a site approved to bill DBHDD/Medicaid for services. However, limited individual or group activities may take place off- site in natural community settings as is appropriate to each individual's recovery plan. Program must have in place appropriate accreditation and licenses for all established service sites.</li> <li>5. The program provides individual treatment compliance and status reports as needed prior to and during court staffing/judicial review meetings. Any decrease in engagement levels should be reported to identified court as soon as possible for court review (incidents to be reported to the court include but are not limited to missed appointments, inappropriate behavior toward staff or other participants, damage to property, non-compliance with provider policies).</li> <li>6. Provider will develop written agreements, partnerships, and memoranda of understanding (MOU) with key justice, mental health and substance use disorder treatment providers, recovery community advocates and support partners, consumer groups on an ongoing basis for the purpose of cooperative wrap around services and for developing sustainable activities.</li> <li>7. In cases where an individual is in an inpatient facility, prior to discharge from the facility, an AOT team member shall engage with the individual and explain the AOT process and program expectations. The individual must have a <b>written</b> document with the outpatient appointment date and time and the AOT program expectations (Participant Handbook) upon discharge.</li> <li>8. All individuals enrolled in the AOT Program shall receive a <i>Participant Handbook</i> and <i>Assisted Outpatient Treatment Enhancement Program Framework</i> upon enrollment to the AOT program.</li> <li>9. All participants and significant family members (caregivers) shall be given the opportunity and encouraged to complete the <i>AOT Participant/Family Satisfaction Survey</i> upon discharge from the AOT program.</li> <li>10. At a minimum, the entire AOT Team shall meet to discuss and status all individuals enrolled in the AOT Program. Other service providers from the agency or community may be invited to supply relevant information on the status of any individual enrolled.</li> </ol> |
| Staffing Requirements | <p>The AOT Team will maintain a maximum caseload of 25 participants to allow for frequent contact with the individual. The AOT team, working with the treating psychiatrist and other appropriate staff, monitors the individual's engagement in treatment and observes for behavior changes similar to previous behavior that preceded a psychiatric decompensation.</p> <p>Every AOT Team includes the following staff:</p> <ol style="list-style-type: none"> <li>1. Team Lead Clinician (1 FTE) Duties shall include, but not limited to: <ol style="list-style-type: none"> <li>a. Assisting the individual in identifying and resolving personal, social, vocational, intrapersonal, and interpersonal concerns.</li> <li>b. Providing services (or be responsible for the oversight of service provision) to address goals/issues such as promoting recovery, and the restoration, development, enhancement, or maintenance of: <ol style="list-style-type: none"> <li>i. Illness and medication self-management knowledge and skills (e.g., symptom management, behavioral management, relapse prevention skills, knowledge of medications and side effects, and motivational/skill development in taking medication as prescribed);</li> <li>ii. Problem solving and cognitive skills;</li> <li>iii. Healthy coping mechanisms;</li> <li>iv. Adaptive behaviors and skills;</li> </ol> </li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Assisted Outpatient Treatment Program

- v. Interpersonal skills; and
    - vi. Knowledge regarding mental health conditions, substance use disorders, and other relevant topics that assist in meeting the individual's or the support system's needs; and
    - vii. Use best/evidence-based practice modalities which may include (as clinically appropriate): Motivational Interviewing/Enhancement, Cognitive Behavioral Therapy, Behavioral Modification, Behavioral Management, Rational Behavioral Therapy, Dialectical Behavioral Therapy, and others as appropriate to the individual and clinical issues to be addressed.
  - c. Conducting a monthly IRP review and, with input from the Team, to determine progress made, barriers to success, and whether the individual continues to meet criteria for court-ordered treatment criteria. Findings should be submitted through the 30-Day Review report.
  - d. Submit reports and updates to the court, as requested, or presented at status hearings conducted by the probate judge.
  - e. Monitoring each AOT enrolled individual, and determine appropriate actions, when warranted.
  - f. Completing identified documentation in a timely manner.
2. Case Manager (1 FTE) The case manager monitors the individual's stability and ensures that care is provided in the least restrictive setting consistent with the individual's needs. Duties shall include, but not limited to:
- a. Engagement & Needs Identification: The case manager engages the individual in a recovery-based partnership that promotes personal responsibility and provides support, hope, and encouragement. The case manager assists the individual with developing a community-based support network to facilitate community integration and maintain housing stability. Through engagement, the case manager partners with the individual to identify and prioritize housing, service and resource needs to be included in the IRP.
  - b. Care Coordination: The case manager coordinates care activities and assists the individual as he/she moves between and among services and supports. Care coordination requires information sharing among the individual, his/her Tier 1 or Tier 2 provider, specialty provider(s), residential provider, primary care physician, and other identified supports in order to:
    - i. Ensure that the individual receives a full range of integrated services necessary to support a life in recovery that includes health, home, purpose, and community;
    - ii. Ensure that the individual has an adequate and current crisis plan;
    - iii. Reduce barriers to accessing services and resources;
    - iv. Minimize disruption, fragmentation, and gaps in service; and
    - v. Ensure all parties work collaboratively for the common benefit of the individual.
  - c. Referral & Linkage: The case manager assists the individual with referral and linkage to services and resources identified on the IRP including housing, social supports, family/natural supports, entitlements (SSI/SSDI, Food Stamps, VA), income, transportation, etc. Referral and linkage activities may include assisting the individual to:
    - i. Locate available resources;
    - ii. Make and keep appointments;
    - iii. Complete the application process; and
    - iv. Make transportation arrangements when needed.
  - d. Monitoring and Follow-Up: The case manager visits the individual in the community to jointly review progress made toward achievement of IRP goals and to seek input regarding his/her level of satisfaction with treatment and any recommendations for change. The case manager monitors and follows-up with the individual in order to:
    - i. Determine if services are provided in accordance with the IRP;
    - ii. Determine if services are adequately and effectively addressing the individual's needs;
    - iii. Determine the need for additional or alternative services related to the individual's changing needs or circumstances; and
    - iv. Notify the treatment team when monitoring indicates the need for IRP reassessment and update.

## Assisted Outpatient Treatment Program

|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|                            | <p>3. Certified Peer Specialist (1 FTE): The Certified Peer Specialist provides interventions which promote socialization, recovery, wellness, self-advocacy, development of natural supports, and maintenance of community living skills. Duties shall include, but not limited to:</p> <ol style="list-style-type: none"> <li>Conduct activities between and among individuals who have common issues and needs, that are individual motivated, initiated and/or managed;</li> <li>Assist individuals in living as independently as possible;</li> <li>Promote self-directed recovery by exploring individual purpose beyond the identified mental health condition; and</li> <li>Explore possibilities of recovery by: <ol style="list-style-type: none"> <li>Tapping into individual strengths related to illness self-management (including developing skills and resources and using tools related to communicating recovery strengths, communicating health needs/concerns, self-monitoring progress);</li> <li>Emphasizing hope and wellness, by helping individuals develop and work toward achievement of specific personal recovery goals (which may include attaining meaningful employment if desired by the individual); and</li> <li>Assisting individuals with relapse prevention planning.</li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Clinical Operations        | <ol style="list-style-type: none"> <li>An individual may have a variable length of stay. The level of care and length of stay should be determined by individual's multiple assessments and progress toward meeting goals of the IRP. It is recommended that the individuals attend at a frequency appropriate to their level of need. Ongoing clinical assessment should be conducted to determine step down in level of care.</li> <li>Each individual should participate in setting individualized goals for themselves and in assessing their own skills and resources related to recovery. Goals are set by exploring strengths and needs in the individual's living, learning, social, and working environments. Implementation of services may take place individually or in groups.</li> <li>Each individual must be provided assistance in the development/acquisition of needed skills and resources necessary to achieve recovery and/or reduction in use of substances and maintenance of recovery.</li> <li>Court Status Meetings time may be billable as a collateral contact via Case Management with or without the person being present if the following are considered: <ol style="list-style-type: none"> <li>If the Court Status Meeting addresses multiple individuals being supported by the Assisted Outpatient Treatment Program, the only time which can be billed is the specific discussion and planning related to the individual being served;</li> <li>Court Status Meeting time and documentation must comply with the expectations set forth in the unique Case Management (CM) Service Definition (Assistance to the person and other identified recovery partners in the facilitation and coordination of the Individual Recovery Plan (IRP), identification, with the person, of strengths which may aid him/her in achieving and maintaining recovery from mental health challenges as well as barriers that impede the development of necessary skills, linkage and referral, monitoring and follow-up, etc.). For example, if this service is being billed via CM and the individual served is not participating, the intervention and billing would comply with the Required Components section of the CM service which allow 50% of billable contact to be non-face-to-face.</li> </ol> </li> </ol> |
| Service Accessibility      | <ol style="list-style-type: none"> <li>Service are available during the day and evening hours.</li> <li>Demographic information collected shall include a preliminary determination of hearing status to determine referral to the Office of Deaf Services.</li> <li>To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Documentation Requirements | <ol style="list-style-type: none"> <li>Entry of required data shall be entered monthly to monitor performance and outcomes as well and approve the amount requested via the monthly invoices.</li> <li>Every admission and assessment must be documented.</li> <li>Agency must adhere to documentation requirements set forth for each unique service delivered in accordance with Part 1 of this Manual.</li> <li>The program will document the following data for the required timelines in the Data Collection Worksheet found at the SharePoint site below: <a href="https://gets.sharepoint.com/:x/r/sites/DBHDDExtranet/JSU/ layouts/15/Doc.aspx?sourcedoc=%7B4A2DA5E0-AA84-4D4F-B4D2-12CC977C72F0%7D&amp;file=AOT%20Data%20Collection%20Worksheet%20-%20Provider%20Temp.xlsx&amp;action=default&amp;mobileredirect=true">https://gets.sharepoint.com/:x/r/sites/DBHDDExtranet/JSU/ layouts/15/Doc.aspx?sourcedoc=%7B4A2DA5E0-AA84-4D4F-B4D2-12CC977C72F0%7D&amp;file=AOT%20Data%20Collection%20Worksheet%20-%20Provider%20Temp.xlsx&amp;action=default&amp;mobileredirect=true</a> <ol style="list-style-type: none"> <li>AOT Participant Information (demographic data): Shall be completed within 30 days of enrollment for each participant.</li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## Assisted Outpatient Treatment Program

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Service Description                           | A short-term stay in a licensed and accredited community-based hospital for the stabilization of a psychiatric crisis. The service is of short duration and provides treatment for individuals experiencing an acute psychiatric crisis episode due to a new or recurring mental health condition, non-compliance with medications, or a combination of these causes. The intent of this service is to provide short-term recovery-oriented treatment and support that increases the functioning of persons with psychiatric disabilities. The service should include tailored interventions based upon the individual's unique needs as identified in their individualized recovery plan, but may also include routinely available interventions provided by a contractor's inpatient program milieu, as clinically indicated. Upon stabilization of the psychiatric crisis, the individual is connected to the appropriate level of care and transitioned back into the community. Specific desired outcomes of this service are: 1) Successful hospital to community transition, 2) Effective collaboration with community service providers and field offices, 3) Effective discharge planning, 4) Linkage and referral to community services, 5) Reduction in hospital readmissions. |       |       |       |       |       |                 |                      |               |       |       |       |       |      |

## Community Based Inpatient Psychiatric

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| Admission Criteria       | <p>For individuals defined as the target population for the DBHDD contract, the provider will accept referrals for admission solely from the bed inventory platform for review.</p> <p>Admissions are for an:</p> <ol style="list-style-type: none"> <li>1. Individual with a serious mental illness who presents a substantial risk or harm to himself/herself or others, as manifested by recent overt acts or recent expressed threats of major suicidal, homicidal or high-risk behaviors as a result of the mental illness which present a probability of physical injury to himself/herself or others; <b>OR</b></li> <li>2. Individual with a serious mental illness who is so unable to care for his/her own physical health and safety as to create an imminently life-endangering crisis.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Continuing Stay Criteria | <ol style="list-style-type: none"> <li>1. Individual meets the following: <ol style="list-style-type: none"> <li>a. Continues to meet admission criteria; and has been assessed to be at risk of major suicidal, homicidal or high-risk behaviors; <b>and</b></li> <li>b. Is assessed as requiring continued hospitalization beyond the initial authorization,</li> </ol> </li> <li>2. Providers delivering this service via state contracted funds (i.e. "state contracted beds") will continue to submit concurrent authorization requests based on clinical presentation and medical necessity criteria within the authorization period. The ASO's utilization management team will review all concurrent authorization requests to determine ongoing authorization of inpatient stay. If the individual clinically requires a state hospital level of care, the ASO will extend the current authorization for one business day and will instruct the provider to submit a transfer request to the state hospital within one business day. Failure to submit the transfer request to the bed inventory platform with all required supporting documentation within one business day will result in an administrative denial for future concurrent requests until a complete referral is submitted and acknowledged by the state hospital.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Discharge Criteria       | <p>At which point the risk and crisis are determined to no longer exist, the individual must be transferred to a lower level of care/discharged with an adequate continuing care plan. Absence of the risk and crisis must be accompanied by one or more of the following:</p> <ol style="list-style-type: none"> <li>1. Individual no longer meets admission and continued stay criteria; <b>or</b></li> <li>2. Individual requests discharge and individual is not imminently dangerous to self or others; <b>or</b></li> <li>3. Transfer to another service/level of care is warranted by change in the individual's condition; <b>or</b></li> <li>4. Individual requires services not available in this level of care.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Service Exclusions       | <p>This service may not be provided simultaneously with any other service in the DBHDD behavioral health service array excepting short-term access to services that provide continuity of care or support in planning for discharge from this service. Any individual with a substance use disorder or a substance-induced psychiatric disorder as their primary diagnosis should not be admitted for the purpose of detoxification.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Clinical Exclusions      | <p>Individuals with any of the following conditions are excluded from admission unless there is clearly documented evidence of a co-occurring acute psychiatric diagnosis: Autism, Developmental Disabilities, Neurocognitive Disorder, or Traumatic Brain Injury.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Required Components      | <p>Inpatient psychiatric hospitals provide an intense (Locus level VI) level of care in the DBHDD service continuum and must include the following:</p> <ol style="list-style-type: none"> <li>1. Care Environment - The facility must be capable of providing secure care, meaning that individuals may be contained within a locked environment, with capabilities for providing seclusion and/or restraint if necessary. It must be capable of providing involuntary care when required. The facility must provide adequate space, light, ventilation, and privacy. Food services and other personal care needs must be adequately provided.</li> <li>2. Clinical Services - An individualized recovery plan for each individual must be developed within 36 hours of his/her admission. Clinical services must be available 24 hours a day, seven days a week. Psychiatric, nursing, and medical services must be provided on site, at all times. Psychiatric/medical contact will be made on a daily basis. Treatment will be provided on a daily basis, to include individual, group and family therapy, as well as pharmacologic treatment, depending on the individual's needs. Provision of peer support services is a recognized evidence based best practice in behavioral health and is strongly recommended.</li> <li>3. Supportive Services - All necessities of living and well-being must be provided for individuals in psychiatric inpatient settings. Individuals are assisted and/or supported in participating in activities of daily living such as hygiene, grooming, and maintenance of their immediate environment.</li> <li>4. Discharge and Transition Planning - Expected average length of stay for individuals in this service shall not exceed five days. Psychiatric inpatient facilities must provide services to facilitate and support successful transition back into the community. At the time of admission, the coordination of discharge planning begins, in</li> </ol> |

## Community Based Inpatient Psychiatric

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <p>collaboration with the DBHDD contracted community behavioral health service provider in the individual's county of residence. The facility shall deliver care coordination, including linkage and referral, which must include:</p> <ol style="list-style-type: none"> <li>Coordination with community behavioral health providers including communication with current behavioral health provider (in accordance with HIPAA allowance for sharing of necessary PHI for the purpose of access to treatment);</li> <li>Initiating entitlement applications to facilitate access to benefits;</li> <li>Communicating with DBHDD contracted providers of behavioral health services in order to effectuate successful linkage to services and supports including housing;</li> <li>Referral to less intense level of care when clinically appropriate;</li> <li>Provision of seven (7) days of medication at the time of discharge using a normed formulary (such as the Medicaid Pharmacy formulary), which will increase the individual's access to these medications post-discharge.</li> <li>Facilities shall communicate with the DBHDD regional field office staff regarding: <ol style="list-style-type: none"> <li>Out-of-region placements and/or discharges;</li> <li>All homeless individuals admitted, within 24 hours of admission, in order to coordinate access to housing and avoid a shelter discharge.</li> </ol> </li> </ol> <p>5. Collaboration - In order to support the operation of this service as a component within the array of DBHDD adult mental health services, psychiatric inpatient facilities must participate in DBHDD regional community collaborative meetings for the region in which the facility operates, minimally on a quarterly basis.</p> |
| Staffing Requirements            | <p>The facility complies with staffing requirements as set forth by HFR in its "Specialty Hospital" licensing process Rule 111-8-40-.37, Psychiatric and Substance Abuse Services. Each treatment program is under the administrative leadership of a skilled behavioral health clinical staff and is staffed by at least one physician, registered and practical nurses, social workers, psychologists, and direct service staff. Staff members also are trained in the use of interventions and offer an array of therapeutic alternatives including; sensory modulation, art, music, craft, and recreation activities.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Billing & Reporting Requirements | <ol style="list-style-type: none"> <li>This service requires an initial authorization that can only be obtained through the bed inventory platform.</li> <li>Span billing may occur for this service, meaning the start and end date are not the same on a given service claim line). The span dates may cross months (start date and end date on a given service line may begin in one month and end in the next).</li> <li>If the initial authorization period expires and there is documentation that the individual meets medically necessary continuing stay criteria, the individual must be placed on the Transfer-to-a-State-Hospital referral list via the bed inventory platform process as a requirement for reimbursement of any additional authorized days. In the absence of this documentation, service may continue at the expense of the facility.</li> <li>Providers must submit a discharge summary into the Provider Connect/batch system within 48 hours of discharge and must discharge the individual's episode in the bed inventory platform.</li> <li>Submission of supporting documentation is required as part of all billing submissions (examples of supporting documentation include, but are not limited to: Nursing notes, MAR, physician notes, treatment plan, etc.).</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Service Description | <p>Community Support Team (CST) is an intensive behavioral health service for individuals with a severe and persistent mental illness living in rural areas of the State who are discharged from a state or private psychiatric hospital or Psychiatric Residential Treatment Facility (PRTF) after multiple or extended stays or from multiple discharges from crisis stabilization unit(s), or discharged from correctional facilities or other institutional settings, or those leaving institutions who are reluctant to engage in treatment. This service is provided in rural areas, where there is less demand for service, and/or in areas with professional workforce shortages. CST utilizes a mental health team led by a licensed clinician to support individuals in decreasing hospitalizations, incarcerations, emergency room visits, and crisis episodes and increasing community tenure/independent functioning; increasing time working or with social contacts; and increasing personal satisfaction and autonomy. Through active assistance and based on identified, individualized needs, the individual will be engaged in the recovery process.</p> <p>CST is a restorative/recovery focused intervention to assist individuals with:</p> <ol style="list-style-type: none"><li>1. Gaining access to necessary services;</li><li>2. Managing (including teaching skills to self-manage) their psychiatric and, if indicated, co-occurring substance use disorder and physical diseases;</li><li>3. Developing optimal independent community living skills;</li><li>4. Achieving a stable living arrangement (independently or supported); and</li><li>5. Setting and attaining individual-defined recovery goals.</li></ol> <p>CST elements and interventions (as medically necessary) include:</p> <ol style="list-style-type: none"><li>1. Comprehensive behavioral health assessment;</li><li>2. Nursing services;</li><li>3. Symptom assessment/management;</li><li>4. Medication management/monitoring;</li><li>5. Medication Administration;</li><li>6. Linkage to services and resources including rehabilitation/recovery services, medical services, wellness and nutrition supports, general entitlement benefits;</li><li>7. Care Coordination;</li><li>8. Individual Counseling; and</li><li>9. Psychosocial Rehabilitation-Individual for skills training including:<ol style="list-style-type: none"><li>a. Daily living skills training;</li><li>b. Illness self-management training;</li><li>c. Problem-solving, social, interpersonal, and communication skills training;</li></ol></li><li>10. Harm reduction strategies, relapse prevention skills training, and substance use disorder recovery support;</li><li>11. Development of personal support networks;</li><li>12. Crisis planning and, if necessary, crisis intervention services; and</li><li>13. Consultation and psycho-educational support for the individual and his/her family/natural supporters (if this family interaction is endorsed by the individual served).</li></ol> |       |    |    |    |  |          |                |                                                     |  |  |  |  |
| Admission Criteria  | <ol style="list-style-type: none"><li>1. Individual with a severe and persistent mental illness that seriously interferes with their ability to live in the community as evidenced by:<ol style="list-style-type: none"><li>a. Transitioning or recently discharged (i.e., within past 6 months) from an institutional setting (hospital, jail/prison, or PRTF) because of psychiatric issue; <b>or</b></li></ol></li></ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |       |    |    |    |  |          |                |                                                     |  |  |  |  |

| Service Exclusions  | <ol style="list-style-type: none"> <li>1. It is expected that the CST attempt to engage the individual in other rehabilitation and recovery-oriented services such as Housing Supports, Residential Services, group-oriented Peer Supports, group-oriented Psychosocial Rehabilitation, Supported Employment, etc.; however, ACT, Family Counseling, Family Training, Nursing Assessment, ICM and CM are Service Exclusions. Individuals may receive CST and one of these services for a limited period of time to facilitate a smooth transition.</li> <li>2. SA Intensive Outpatient Program (SAIOP) is generally excluded; however, if a substance use disorder is identified and documented as a clinical need, and the individual's current progress indicates that provision of CST services alone, without an organized SA program model, it is not likely to result in the individual's ability to maintain sobriety, CST may assist the individual in accessing the SAIOP service, but must ensure clinical coordination in order to avoid duplication of specific service interventions.</li> <li>3. Specialized evidence-based practices are not service exclusions (excluded) when the needs of an individual exceed that which can be provided by the CST team (e.g. specialized treatment for PTSD, eating disorders, personality disorders, and/or other specific clinical specialized treatment needs). In this case, the Individual's Recovery Plan (IRP) must reflect the necessity for participation in such services along with medical record documentation of the unique need and resulting collaboration between service providers to ensure coordination towards goals and to prevent any duplication of services/effort.</li> <li>4. Individuals authorized for Housing Support services are exempt from the Case Management service exclusion that is included in the Service Definitions for Assertive Community Treatment (ACT), Intensive Case Management (ICM), and Community Support Team (CST) services. The Housing Support provider shall be in close coordination (as evidenced by documentation in the individual's EHR) with any applicable ACT, ICM, or CST provider such that there is no duplication of service supports/efforts.</li> </ol>                                   |
| Clinical Exclusions | <ol style="list-style-type: none"> <li>1. Individuals with the following conditions are excluded from admission unless there is clearly documented evidence of psychiatric condition/substance use disorder co-occurring with one of the following diagnoses: intellectual/developmental disabilities, Autism, Neurocognitive Disorder, substance use disorder.</li> <li>2. Individuals may be excluded if there is evidence that they are unable to participate in the development of their Individual Recovery Plan as a result of significant impairment due to an I/DD diagnosis.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Required Components | <ol style="list-style-type: none"> <li>1. Team meetings must be held a minimum of once a week and time dedicated to discussion of support and service to individuals must be documented in the Treatment Team Meetings log. Each individual must be discussed, even if briefly, at least one time weekly. CST staff members are expected to attend Treatment Team Meetings.</li> <li>2. Services and interventions must be individually tailored to the needs, goals, preferences and assets of the individual with the goals of maximizing independence and recovery as defined by the individual.</li> <li>3. At least 60% of all service units must involve face-to-face (either in-person or via telemedicine) contact with individuals. The majority (51% or greater) of face-to-face service units must be provided outside of program offices in locations that are comfortable and convenient for individuals (including the individual's home, based on individual need and preference and clinical appropriateness).</li> <li>4. A minimum of four (4) face-to-face visits must be delivered <u>monthly</u> by the CST; however, a minimum of one face-to-face contact per month must occur in-person (i.e. not via telemedicine). In-person face-to-face contacts should be more frequent than this if indicated by the individual's clinical presentation, life circumstances, or needs. Additional contacts above the monthly minimum may be either face-to-face or telephone collateral contact depending on the individual's support needs and keeping to the expected 60% of units being face-to-face.</li> <li>5. CST is expected to retain a high percentage of enrolled individuals in services with few dropouts. In the event that the CST documents multiple attempts to locate and make contact with an individual and has demonstrated diligent search, after 45 days of unsuccessful attempts the individual may be discharged due to drop out.</li> <li>6. While the minimum percentage of contacts is stated above, individual clinical need is always to be met and may require a level of service higher than the established minimum criteria for contact. CST teams will provide the clinically required level of service in order to achieve and maintain desired outcomes.</li> </ol> |

## Community Support Team

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|                       | <p>7. Individuals will be provided assistance by the CST team with gaining skills and resources necessary to obtain housing of the individual's choice, including completion of the housing need and choice survey <a href="https://dbhddapps.dbhdd.ga.gov/NSH/">https://dbhddapps.dbhdd.ga.gov/NSH/</a> upon admission and with the development of a housing goal, which will be minimally updated at each reauthorization.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Staffing Requirements | <p>1. A CST shall have a minimum of 3.5 team members which must include:</p> <ul style="list-style-type: none"> <li>a. (1 FTE) A fulltime dedicated Team Leader ("Dedicated" means that the team leader works with only one team at least 32 hours and up to 40 hours/week) who is a licensed clinician (LPC, LCSW, LMFT) and provides clinical and administrative supervision of the team. This individual must have at least four (4) years of documented experience working with adults with a SPMI and is preferably certified/credentialed as a substance use disorder counselor (CAC-I equivalent or higher). The Team Leader is responsible for working with the team to monitor each individual's physical health, clinical status and response to treatment.</li> <li>b. (1 FTE) One fulltime or two half-time (.5 FTE) Certified Peer Specialist(s) (CPS-MH or CPS-AD) who is/are fully integrated into the team and promotes individual self-determination and decision-making and provides essential expertise and consultation to the entire team to promote a culture in which each individual's point of view and preferences are recognized, understood, respected and integrated into treatment, rehabilitation, medical, and community self-help activities.</li> <li>c. (.5 FTE) A half-time registered nurse (RN). This person will provide nursing care, health evaluation/reevaluation, and medication administration and will make referrals as medically necessary to psychiatric and other medical services. Registered nurses may be clinic based with provision of community-based/ in the home services as needed. Nursing face-to-face time with each individual served by the team is determined based on the IRP, physician assessment, and is delivered at a frequency that is clinically and/or medically indicated.</li> <li>d. (1 FTE) A fulltime paraprofessional level team member, minimally bachelor's level, preferably with a SUD counselor certification (CAC-I equivalent or higher).</li> </ul> <p>2. The CST maintains a small individual-to-staff ratio, with a minimum of 10 individuals served per full time staff member (10:1) and a maximum of 20 individuals served per staff member (20:1), yielding a 3-person team's minimum capacity of 30 and a team maximum capacity of 60. The Individual-to-staff ratio range should consider evening and weekend hours, needs of the target population, and geographical areas to be served.</p>                                                                                                                                               |
| Clinical Operations   | <p>1. CST must incorporate assertive engagement techniques to identify, locate, engage, and retain the most difficult to engage individuals who cycle in and out of intensive services. CST must demonstrate the implementation of well thought out engagement strategies to minimize discharges due to drop out including the use of street and shelter outreach approaches, legal mechanisms such as outpatient commitment (when clinically indicated), and collaboration with family, friends, parole and/or probation officers.</p> <p>2. CST is expected to gather assessment information from internal or external provider sources on existing individuals in order to identify the individual's strengths, needs, abilities, resources, and preferences. CST Team Lead may complete a comprehensive behavioral health assessment on new individuals as well as ongoing assessments to ensure meeting the individual's changing needs or circumstances. When a comprehensive behavioral health assessment is conducted by the CST Team Lead, it may be billed as CST (see Billing &amp; Reporting Requirements below).</p> <p>3. CST is expected to actively and assertively participate in transitional planning via in person or, when in person participation is impractical, via teleconference meetings between stakeholders. The team is expected to coordinate care through a demonstrable plan for timely follow up on referrals to and from their service, making sure individuals are connected to resources to meet their needs in alignment with their preferences. The team is responsible for ensuring the individual has access to services and resources such as housing, pharmacy, benefits, a support network, etc. when being discharged from a psychiatric hospital; released from jail; or experiencing an episode of homelessness. CST providers who are a Tier 1 or Tier 2+ Provider may use Community Transition Planning to establish a connection or reconnection to the individual and participate in discharge planning meetings while the individual is in a state operated hospital, crisis stabilization unit, jail/prison, or other community psychiatric hospital.</p> <p>4. Because CST-eligible individuals may be difficult to engage, the initial treatment/recovery plan for an individual may be more generic at the onset of treatment/support. It is expected that the IRP be individualized and recovery-oriented after the team becomes engaged with the individual and comes to know the individual. The allowance for "generic" content of the IRP shall not extend beyond 90 days.</p> |

## Community Support Team

5. Because of the complexity of the target population, it is expected that the individual served will receive ongoing physician assessment and treatment well as other recovery-supporting services. These services may be provided by Tier 1 or Tier 2 Provider agency or by an external agency. There shall be documentation during each Authorization Period to demonstrate the team's efforts at consulting and collaborating with the physician and other recovery-supporting services.
6. CST will assist all eligible individuals with the application process to obtain entitlement benefits including SSI/SSDI, Food Stamps, VA, Medicaid, etc. including making appointments, completing applications and related paperwork.
7. Because many individuals served may have a mental health condition and co-occurring substance use disorder, the CST team may not discontinue services to any individual based solely upon a relapse in his/her substance use disorder recovery.
8. CST must be designed to deliver services in various environments, such as homes, schools, homeless shelters, and street locations. The provider should keep in mind that individuals may prefer to meet staff at community locations other than their homes or other conspicuous locations (e.g. their place of employment or school), especially if staff drive a vehicle that is clearly marked as a state or agency vehicle, or if staff must identify themselves and their purpose to gain access to the individual in a way that may potentially embarrass the individual or breach the individual's privacy/confidentiality. Staff should be sensitive to and respectful of individuals' privacy/confidentiality rights and preferences in this regard to the greatest extent possible (e.g., if staff must meet with an individual during their work hours, mutually agree upon a meeting place nearby that is the least conspicuous from the individual's point of view).
9. The CST Crisis Plan must include a clear comprehensive approach for provision of 24/7 crisis response and emergency management of crisis situations that may occur after regular business hours, on weekends, and on holidays.
  - a. The Crisis Plan should demonstrate a supportive linkage and connection between the organization and CST.
  - b. A CST will ensure coordination with the Tier 1 or Tier 2 services provider or other clinical home service provider in all aspects of the IRP.
  - c. The CST is required to provide follow-up for all CST-enrolled individuals for whom notification is received of a GCAL interaction/referral.
10. The CST agency must have established procedures that support the individual in preventing admission into psychiatric hospitalization/crisis stabilization. There shall be evidence that these procedures are utilized in the support of the individual when a crisis situation occurs.
11. Using the information collected through assessments, the CST staff work in partnership with the individual's Tier 1 or Tier 2 provider, specialty provider, residential provider, primary care physician, and other identified supports to develop a Wellness Recovery Action Plan (WRAP) that meets the medical, behavioral, wellness, social, educational, vocational, co-occurring, housing, financial, and other service needs of the eligible individual.
12. The CST is expected to work with informal support systems (with or without the individual present) to provide support and skill training as necessary to assist the individual in their recovery. For individuals who have no identified informal supports, team members should document attempts to engage, identify, or build support networks. Informal supports are defined as persons who are not paid to support the individual (e.g., family, friends, neighbors, church members, etc.). The monthly maximum billing for informal support contacts without an individual present shall not exceed four (4) hours in any month.
13. The organization must have an CST Organizational Plan that addresses the following:
  - a. Particular rehabilitation, recovery and resource coordination models utilized, types of intervention practiced, and typical daily schedule for staff;
  - b. Organizational Chart, staffing pattern, and a description of how staff are deployed to assure that the required staff-to-consumer ratios are maintained; including how unplanned staff absences, illnesses, and emergencies are accommodated;
  - c. Hours of operation, the staff assigned, and types of services provided to individuals, families, and/or guardians;
  - d. How the plan for services is modified or adjusted to meet the needs specified in the Individualized Recovery Plan;
  - e. Mechanisms to assure the individual has access to methods of transportation that support their ability engage in treatment, rehabilitation, medical, daily living and community self-help activities. Transportation is not a reimbursed element of this service;
  - f. Intra-team communication plan regarding individual support (e.g., e-mail, team staffings, staff safety plan such as check-in protocols etc.);
  - g. The team's approach to monitoring an individual's medical and other health issues and to engaging with health entities to support health/wellness; and
  - h. How the organization will integrate individuals into the community including assisting individual in preparing for employment.

### Service Accessibility

1. Services must be available 24 hours a day, 7 days a week with emergency response coverage. On-call crisis coverage by CST staff is required for days on which CST services are not regularly scheduled. Answering devices/services do not meet the expectation of "emergency response."

|----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <ol style="list-style-type: none"> <li>The team must be able to rapidly respond (in-person within 24 hours) to early signs of relapse and decompensation and must have the capability of providing multiple contacts daily to individuals in acute need.</li> <li>There must be documented evidence that service hours of operation include evening, weekend and holiday hours.</li> <li>At the time of provider application, the DBHDD will determine, through its Provider Enrollment process, the current need for a CST team in a given area. Because this service is targeted to rural areas, services may only be provided in counties with less than 150,000 population (per most recent estimates from the U.S. Census Bureau). The provider of this service must operate their CST business from a county which is qualified, in keeping with this population criteria.</li> <li>To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Billing & Reporting Requirements | <ol style="list-style-type: none"> <li>While a comprehensive assessment is clinically recommended to be provided as an integral part of CST, the provision and billing of Behavioral Health Assessment is also allowed by a non-CST practitioner in certain circumstances (such as assessment by a specialty practitioner for trauma, substance use, etc.; person presents in crisis and requires immediate assessment, etc.).</li> <li>CST programs are expected to submit all requisite information in order to establish eligibility for the initial authorization, and if an individual meets eligibility they receive a 12-month authorization for CST services. During the first 12-months consumers receive an automatic-authorization for the first 4 authorizations for CST services. CST providers are required to submit information that the ASO references as a reauthorization every 90-days for collection of consumer outcome indicators. This data collection is captured from information submitted by CST programs during initial and subsequent authorization periods. There is no clinical review taking place during this 90-day data collection process-the 90-day data collection-reauthorization meets the need of data collection only. At these intervals, the use of the term "reauthorization" is merely a data collection process and not a clinical review for eligibility every 90 days. CST programs are expected to submit all requisite information in order to establish continued eligibility for the concurrent review for medical necessity (time frame is every 180 days and begins after the initial 12 months of authorized services).</li> <li>The CST staffing requirements are adjusted according to the rural service delivery area, and the rates that are paid are consistent with the practitioner level and location of service as with other out-of-clinic services.</li> <li>When Telemedicine technology is utilized for the provision of this service in accordance with the allowance in the Service Accessibility section of this definition, the code cited in the Code Detail above with the appropriate GT modifier shall be utilized in documentation and claims submission.</li> </ol> |

## Coordinated Specialty Care for First Episode Psychosis Program (CSC for FEP)

| Transaction Code                                                                | Code Detail                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Code | Mod 1 | Mod 2 | Mod 3 | Mod 4 | Rate | Code Detail | Code | Mod 1 | Mod 2 | Mod 3 | Mod 4 | Rate |

| Service Description                                                             | Coordinated Specialty Care for the First Episode Psychosis Program (CSC for FEP) is a team-based, time-limited, multi-faceted approach to treating youth and young adults, ages 16-30, experiencing first episode psychosis. The CSC for FEP model's guiding principles include early detection of psychosis; rapid access to specialty care; flexible, accessible, youth-friendly, and welcoming services; recovery-focused interventions; and respect for young adults striving for autonomy and independence. Component interventions include case management, psychotherapy, supported education and employment services, family education and support, and medication management. CSC for FEP emphasizes shared decision making as a means for addressing the unique needs, preferences, and recovery goals of the individuals served. Collaborative treatment planning in CSC for FEP is a respectful and effective means for establishing a positive therapeutic alliance and maintaining |      |       |       |       |       |      |             |      |       |       |       |       |      |

## Coordinated Specialty Care for First Episode Psychosis Program (CSC for FEP)

engagement with young people and their family members over time. CSC for FEP services are also highly coordinated with primary medical care, with a focus on optimizing overall mental and physical health. As such, the team is multidisciplinary, includes weekly integrated treatment team meetings, and spans the fields of psychiatry, nursing, counseling/psychology, social work, and career planning; additionally, Certified Peer Specialists on the team provide assistance with the development of natural supports, and promoting socialization and community integration. CSC for FEP team members are expected to maintain knowledge and skills according to the current research trends in best practices and evidence-based treatment, including the provision of trauma-informed, culturally competent care, and the use of effective engagement strategies for youth and young adults. The CSC for FEP model emphasizes flexibility, with services delivered in home, community, and youth-friendly and welcoming office settings depending on the participants' needs and preferences. Services are individually tailored to address participants' preferences and goals.

Based on the needs of the individual, the following services may be provided by qualified CSC for FEP team members and billed under the Non-intensive Outpatient Services Type of Care (see the Service Definition for each service listed below in this Provider Manual)\*:

1. Behavioral Health Assessment;
2. Diagnostic Assessment;
3. Service Plan Development;
4. Crisis Intervention;
5. Individual Counseling;
6. Group Counseling/Training;
7. Family Counseling/Training;
8. Case Management (Adult)
9. Psychosocial Rehabilitation-Individual (Adult)
10. Addictive Disease Support Services (Adult);
11. Community Support (C&A)
12. Peer Support-Individual (Adult MH/AD, C&A Parent/Youth);
13. Psychiatric Treatment;
14. Medication Administration;
15. Nursing Assessment and Health Services;
16. Pharmacy & Lab;
17. Psychological Testing
18. Community Transition Planning

\* **In addition to the billable DBHDD services named above**, the DBHDD provides ancillary funding through CSC for FEP provider contracts for education and employment support interventions/activities, which are integral to the CSC for FEP model; and for other non-billable activities as described in the paragraph below.

In delivering the services outlined above, individualized interventions of particular importance to the CSC for FEP model include the following:

1. Psychoeducation on first episode psychosis, treatment options, and recovery to participants and their families;
2. Crisis planning, support, and intervention;
3. Recovery-based goal setting;
4. Instrumental/skill-building support to participants and their families;
5. Service and resource coordination, including linkage to medical care;
6. Psychotherapy and skills training;
7. Family counseling, education, support, and skills training;

## Coordinated Specialty Care for First Episode Psychosis Program (CSC for FEP)

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          | <ol style="list-style-type: none"> <li>8. Substance use disorder counseling and interventions;</li> <li>9. Peer support; and</li> <li>10. Support for educational and employment endeavors.</li> </ol> <p>As an adjunct to direct service provision, CSC for FEP teams offer outreach and education activities/events within the community at large in order to identify individuals experiencing a first episode of psychosis, as well as to educate the community about behavioral health conditions, the CSC for FEP program, recovery principles and practice, and accessing the public behavioral health system. Outreach and education efforts are intended to establish a seamless community system of care for youth and young adults with first episode psychosis, and promote the sustainability of the program. The DBHDD provides funding to offset the costs for providers' time spent in these and other non-billable activities such as travel, meetings, trainings and conference attendance, community partner collaboration, and other related activities.</p> <p>It is anticipated that individuals participating in CSC for FEP will experience a reduction in psychiatric symptoms or the debilitating effects of these symptoms; will show improved educational, occupational, and social functioning; and will require less frequent hospitalization and use of crisis services over time. Most participants remain with CSC for FEP teams for an average of two years; however, all decisions regarding discharge of participants from CSC for FEP programs should be based on clinical considerations.</p> |
| Admission Criteria       | <ol style="list-style-type: none"> <li>1. The target population for Coordinated Specialty Care for First Episode Psychosis is youth and young adults aged 16 – 30 with non-organic psychotic disorders (e.g. schizophrenia, schizophreniform disorder, schizoaffective disorder, delusional disorder) or mood disorders with psychotic symptoms (e.g. bipolar disorder with psychotic symptoms; major depressive disorder with psychotic symptoms) who have had symptoms of psychosis for no longer than 24 months.</li> <li>2. The target population is not to be limited to insurance coverage or lack thereof: individuals who have any kind of third-party insurance, or no insurance, must be served by the provider.</li> <li>3. Youth and young adults who fall outside the target age range of 16 – 30, or who have had psychotic symptoms longer than 24 months, may be considered for enrollment in CSC for FEP services on a case-by-case basis, with prior approval from DBHDD.</li> <li>4. An individual does not need to have a diagnosis of a psychotic disorder to be evaluated for enrollment in CSC for FEP services. It is anticipated that for many youth and young adults referred to CSC for FEP teams, they will have had no previous mental health treatment and thus will not have received a diagnosis prior to their evaluation with the CSC for FEP team.</li> </ol>                                                                                                                                                                                                                                    |
| Continuing Stay Criteria | Individual demonstrates documented progress relative to goals identified in the Individualized Recovery Plan (IRP), but goals have not yet been achieved, and/or new service needs have been identified.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Discharge Criteria       | <p>An adequate continuing care plan has been established; and one or more of the following:</p> <ol style="list-style-type: none"> <li>1. Goals of the IRP have been substantially met;</li> <li>2. Individual/family requests discharge and individual is not in imminent danger of harm to self or others; or</li> <li>3. Transfer to another service is warranted by change in individual's condition and/or needs.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Service Exclusions       | <ol style="list-style-type: none"> <li>1. CSC for FEP is a comprehensive team intervention and most services are excluded, with the exceptions of: <ol style="list-style-type: none"> <li>a. Residential or Housing Supports (the CSC for FEP provider shall be in close coordination with the Residential/Housing Support provider such that there is no duplication of services supports/efforts);</li> <li>b. Substance Abuse Intensive Outpatient Program: If a substance use disorder is identified and documented as a clinical need unable to be met by the CSC for FEP team, and the individual's current treatment progress indicates that provision of CSC for FEP services alone, without an organized SUD program model, is not likely to result in the individual's ability to maintain sobriety, CSC for FEP teams may assist the individual in accessing this service, but must ensure clinical coordination in order to avoid duplication of services. If CSC for FEP and SAIOP are provided by the same agency, the agency may update the existing authorization to include group services to be utilized by the SAIOP program;</li> <li>c. The following are <b>not</b> service exclusions: <ol style="list-style-type: none"> <li>i. Individual Counseling and Group/Family Counseling/Training provided outside of the CSC for FEP program when the needs of an individual exceed that which can be provided by the CSC for FEP team. For example, the individual may participate in SA group treatment provided by a Tier 1, Tier 2,</li> </ol> </li> </ol> </li> </ol>                                        |

## Coordinated Specialty Care for First Episode Psychosis Program (CSC for FEP)

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                     | <p>or SA-IOP provider upon documentation of the demonstrated need;</p> <p>ii. Specialized evidence-based practices delivered outside the CSC for FEP program utilizing a treatment modality (e.g. Individual Counseling, Group Counseling, etc.) that would otherwise be provided by a CSC for FEP team member <i>when</i> the needs of an individual exceed that which can be provided by the CSC for FEP team (e.g. specialized treatment for PTSD, eating disorders, personality disorders, and/or other specific clinical specialized treatment needs). In this case, the individual's treatment plan must reflect the necessity for participation in such services along with medical record documentation of the unique need and resulting collaboration between service providers to ensure coordination towards goals and to prevent any duplication of services/effort.</p> <p>2. On an individual basis, up to eight (8) weeks of some services may be provided to CSC for FEP participants to facilitate a smooth transition from CSC for FEP to these other community services. A transition plan must be adequately documented in the treatment plan and clinical record. These services are:</p> <ol style="list-style-type: none"> <li>Case Management/Intensive Case Management.</li> <li>Psychosocial Rehabilitation-Individual/Program</li> <li>AD Support Services</li> <li>Behavioral Health Assessment</li> <li>Service Plan Development</li> <li>Diagnostic Assessment</li> <li>Physician Assessment</li> <li>Individual Counseling</li> <li>Peer Support</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                               |
| Clinical Exclusions | <ol style="list-style-type: none"> <li>Individuals with severe and profound intellectual/developmental disability are excluded because the severity of cognitive impairment precludes participation in services at this level of care.</li> <li>Individuals with mild or moderate intellectual/developmental disability are excluded unless there is an identified mental health condition that is the foremost consideration for this psychiatric intervention, and the individual is able to benefit from the cognitive behavioral-based program components.</li> <li>Individuals with medical conditions suspected to be causing the psychotic symptoms are excluded. [Examples: Neurological conditions including traumatic brain injury; brain tumor; endocrine, metabolic, or autoimmune disorders with central nervous system involvement.]</li> <li>Individuals whose psychotic symptoms are suspected to be caused by drug or alcohol intoxication or withdrawal are excluded.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Required Components | <ol style="list-style-type: none"> <li>CSC for FEP must include a comprehensive and integrated set of medical and psychosocial services provided in home, community, and office settings by a multidisciplinary team.</li> <li>The team must provide community-based supportive and recovery-oriented services interwoven with treatment services.</li> <li>Services and interventions must be individually tailored to the needs, goals, preferences, and strengths of the individual. During the course of CSC for FEP service delivery, the CSC for FEP team will provide the intensity and frequency of service needed for each individual based on individual need and preference.</li> <li>There is no requirement that every CSC for FEP participant works with every member of the team, as interventions should be tailored to the unique needs and preferences of each participant.</li> <li>The CSC for FEP team must maintain a small participant-to-clinician ratio, with an expected census of 30 participants at a point-in-time based on a team FTE of approximately 5.0.</li> <li>The CSC for FEP team is expected to retain a high percentage of enrolled individuals in services with few dropouts. In the event that the CSC for FEP program documents multiple attempts to locate and make contact with an individual and has demonstrated diligent search, after 90 days of unsuccessful attempts the individual may be discharged due to drop out.</li> <li>The CSC for FEP team must hold weekly team meetings. All CSC for FEP team members are required to attend the meetings. In the weekly team meeting, each individual must be discussed, even if only briefly. The purpose of the team meetings is to review the clinical status of all individuals in the CSC for FEP program and the outcome of the most recent staff contacts, individuals' progress toward their goals, barriers to progress toward goals, and strategies for eliminating these barriers.</li> </ol> |

## Coordinated Specialty Care for First Episode Psychosis Program (CSC for FEP)

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | <ol style="list-style-type: none"> <li>8. The CSC for FEP team must respond to phone calls from participants and family members 24-hours/365-days, and either directly provide or refer individuals/families to any appropriate crisis services.</li> <li>9. The CSC for FEP team should maintain a strong recovery orientation and commitment to hiring individuals with lived experience of a mental health condition.</li> <li>10. CSC for FEP providers must have established procedures/protocols for handling emergency and crisis situations that describe methods that shall be taken by the team in supporting and responding to CSC for FEP-enrolled individuals who require emergency psychiatric admission/hospitalization and/or crisis stabilization.</li> <li>11. CSC for FEP providers must have a Coordinated Specialty Care for First Episode Psychosis organizational plan that addresses the following: <ol style="list-style-type: none"> <li>a. Staffing pattern and how staff are deployed, including how unplanned staff absences, illnesses, and emergencies are accommodated;</li> <li>b. Hours of operation and typical daily schedule for staff;</li> <li>c. Inter-team communication (e.g., e-mail, team staffing, staff safety plan such as check-in protocols, etc.);</li> <li>d. How the team will respond to crises for individuals served (e.g., on-call rotation schedule and protocols, etc.);</li> <li>e. For the individuals whom the CSC for FEP team supports, the CSC for FEP team should be involved in all hospital admissions and hospital discharges whenever possible, and this involvement should be documented in the clinical record.</li> <li>f. Because of the often complex mental health conditions of CSC for FEP-referred individuals and the need to build trust with the referred individuals, comprehensive mental health, addiction, and functional assessments may take up to 60 days. The assessments shall include: Psychiatric History, Mental Status/Diagnosis, Physical Health, Substance Use, Education and Employment, Social Development and Functioning, and Family Structure and Relationships.</li> </ol> </li> <li>12. In addition to services provided to individuals enrolled in the program, the CSC for FEP team must provide outreach and education activities/events to the community at large regarding behavioral health conditions, first episode psychosis and the CSC for FEP program, recovery and wellness principles and practice, and information on how to access the public behavioral health system.</li> <li>13. CSC for FEP providers must have policies and procedures governing the provision of community outreach and education services, including methods for protecting the safety of staff who engage in these activities.</li> </ol> |
| Staffing Requirements | <ol style="list-style-type: none"> <li>1. Coordinated Specialty Care team members must include: <ol style="list-style-type: none"> <li>a. |                     | <ul style="list-style-type: none"> <li>i. Provides clinical and crisis services to all team participants;</li> <li>ii. Works with the team to monitor each individual's clinical and medical status and response to treatment;</li> <li>iii. Directs psychopharmacologic and medical treatment for CSC for FEP participants;</li> <li>iv. Participates in the CSC for FEP team meetings weekly.</li> </ul> <p>c. (Variable: .15 FTE based on CSC for FEP team census of 30 participants): <b>one Nurse (RN)</b> who:</p> <ul style="list-style-type: none"> <li>i. Provides nursing services for all participants, including health and assessments, education on treatment adherence, nutrition, exercise, smoking cessation, and other health and wellness-related topics as needed;</li> <li>ii. Works with the team to monitor each individual's overall physical health and wellness, clinical status and response to treatment; and</li> <li>iii. Participates in the CSC for FEP team meetings weekly.</li> </ul> <p>d. If the Team Lead is not a <b>licensed psychologist, LCSW, LPC, LMFT, LMSW, LAPC, or LAMFT</b>, there must be an additional 0.5 FTE team member who holds one of these licensed credentials or associate licensed credentials (note that associate-level clinicians must be under supervision in accordance with O.C.G.A. § 43-10A-11).</p> <p>e. (1 FTE required): One full-time <b>Case Manager</b> who provides concrete needs assistance to CSC for FEP participants and who participates in the CSC for FEP team meetings weekly. The Case Manager is supervised by the Team Lead.</p> <p>f. (1 FTE required): One full-time <b>Education and Employment Specialist</b> who provides support to CSC for FEP participants on their educational and vocational goals, and who participates in the CSC for FEP team meetings weekly. The Education and Employment Specialist is supervised by the Team Lead.</p> <p>g. (1 FTE required): One or two <b>Certified Peer Specialist or Certified Peer Specialist-Youth</b> who are fully integrated into the team and promote individual self-determination and decision-making and provide essential expertise and consultation to the entire team to promote a culture in which each participant's point of view and preferences are recognized, understood, respected and integrated into treatment and community integration activities. CPSs/CPS-Ys participate in the CSC for FEP team meetings weekly and are supervised by the Team Lead.</p> <p>h. (Variable: 0.5 FTE based on CSC for FEP team census of 30 participants): One <b>fully licensed or associate-level licensed clinician who specializes in family counseling, or a Certified Peer Specialist-Parent (CPS-P)</b> who provides education, support, and training to family members of CSC for FEP participants. This practitioner bills the Parent Peer Support service (if a CPS-P) or Family Counseling/Training otherwise. The provider is strongly encouraged to utilize the Parent Peer Support service if a CPS-P is available, to meet the recovery needs of the family. This team member participates in the CSC for FEP team meetings weekly and is supervised by the Team Lead.</p> |
| Clinical Operations | <ol style="list-style-type: none"> <li>1. Individuals receiving CSC for FEP do not need to have a qualifying diagnosis prior to the initial evaluation for eligibility for CSC for FEP enrollment. As stated above, it is anticipated that many youth and young adults referred to CSC for FEP teams will have had no previous mental health treatment and thus will not have received a diagnosis prior to their evaluation with the CSC for FEP team.</li> <li>2. Because CSC for FEP-eligible individuals may be difficult to engage, the initial treatment/recovery plan for an individual may be more generic at the onset of treatment/support. It is expected that the plan be individualized and recovery-oriented after the individual becomes engaged with the team.</li> <li>3. Because many individuals served may have co-occurring mental health and substance use disorders, the CSC for FEP team may not discontinue services to individuals based solely upon a relapse in their substance use disorder recovery.</li> <li>4. CSC for FEP teams are expected to participate actively and assertively in transitional planning for the individual, including: <ol style="list-style-type: none"> <li>a. Via in person or, when in-person participation is impractical or not possible, via telephonic or virtual meetings between stakeholders;</li> <li>b. The team is expected to coordinate care through a demonstrable plan for timely follow-up on referrals to and from their service, making sure individuals are connected to resources to meet their needs in alignment with their preferences.</li> <li>c. The team is responsible for ensuring the individual has access to services and resources such as housing, pharmacy, benefits, a support network, etc. when being discharged from a psychiatric hospital; released from jail; or experiencing an episode of homelessness.</li> <li>d. CSC for FEP teams may use the Community Transition Planning service to establish a connection or reconnection to the individual and participate in discharge planning meetings while the individual is in a state operated hospital, crisis stabilization unit/behavioral health crisis center, jail/prison, or other community psychiatric hospital.</li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Coordinated Specialty Care for First Episode Psychosis Program (CSC for FEP)

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  | <p>e. When the nature of transition planning meets the scope of definition for either ADSS, CM, CTP, or CSI, that service should be billed in accordance with the particular scope of service defined within this Manual.</p> <p>5. The CSC for FEP team is required to respond to the crisis needs of CSC for FEP-enrolled individuals, by either directly providing or referring individuals/families to any appropriate crisis services.</p> <p>6. Treatment and recovery support to the individuals served by the CSC for FEP team is provided in accordance with an individualized recovery plan, to be developed within 30 days of an individual's enrollment with the CSC for FEP team. Reviews of these plans should occur at least every six months and are thorough summaries describing the individual's and team's evaluation of the individual's progress/goal attainment, the effectiveness of the interventions provided, and the individual's satisfaction with services since the last plan review.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Service Accessibility            | <p>1. The CSC for FEP team must respond to phone calls from participants and family members 24-hours/365-days, and either directly provide or refer individuals/families to any appropriate crisis services. Answering devices/services/Georgia Crisis and Access Line do not meet the expectation; CSC for FEP team staff members must provide this phone coverage.</p> <p>2. The team must be able to rapidly respond to early signs of relapse and symptom recurrence and must have the capability of providing multiple contacts daily to individuals in acute need.</p> <p>3. There must be documented evidence that service hours of operation include evening, weekend and holiday hours.</p> <p>4. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</p>                                                                                                                                                                                                                                                                                                                                |
| Documentation Requirements       | <p>1. Each CSC for FEP program must provide monthly fidelity and outcomes data as defined by the DBHDD.</p> <p>2. The CSC for FEP must have documentation (e.g., notebook, binder, file, etc.) of treatment team meetings to include:</p> <ol style="list-style-type: none"> <li>Date, start time, and end time for the meeting;</li> <li>Names of team participants involved in staffing (signed/certified by the team leader or team lead designee in the absence of the team leader);</li> <li>Initials all of individuals discussed/planned for during staffing; and</li> <li>Minimal documentation of content of discussion specific to each individual (1-2 sentences is sufficient).</li> </ol> <p>3. CSC for FEP meeting logs should be retained for a minimum of one (1) year, and in accordance with professional standards and the provider agency's policy.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Billing & Reporting Requirements | <p>1. Providers must document services in accordance with the general requirements found in Part II, Section III: Documentation Requirements of this Provider Manual, as well as with the service-specific requirements delineated in this section below. Service provision, billing, and reporting must adhere to all DBHDD and Georgia Collaborative ASO requirements.</p> <p>2. Non-intensive Outpatient services that are identified in the Service Description section above should be authorized and billed in accordance with Part I, Section II of this manual via the Non-intensive Outpatient Services Type of Care. Each practitioner must follow the specific Service Definition requirements for each service they bill under the auspices of the CSC for FEP program.</p> <p>3. Education and employment support interventions should be billed/invoiced to the provider's DBHDD CSC for FEP contract.</p> <p>4. The CSC for FEP team can provide and bill for Community Transition Planning as outlined in the guidelines for this service. This includes supporting individuals who are eligible for CSC for FEP and are transitioning from jail/prison.</p> <p>5. Providers must submit a monthly programmatic and expenditure report and supporting documentation as needed to their designated DBHDD programmatic officer.</p> <p>6. Providers must maximize use of third-party payers (Medicaid, managed care organizations, private insurance, etc.).</p> |

| Service Description      | A Co-Responder Program is established through a partnership between a contracted provider and one or more law enforcement agencies and/or emergency medical services (EMS) entities to utilize the combined expertise of peace officers and behavioral health professionals on emergency calls involving behavioral health crises. The goals of the program are to de-escalate crisis situations and help link individuals with behavioral health concerns to appropriate services. A Co-responder Program consists of the following components:<br><ol style="list-style-type: none"><li>1. Co-responder Teams: A team established pursuant to a co-responder program, composed of at least one officer team member and one dedicated CSB direct-service practitioner.</li><li>2. Co-response Intervention: The Co-responder Team provides on-scene crisis de-escalation, screening and assessments, and referrals to ongoing treatment by the skilled staff named below.</li><li>3. Post-emergency Follow-up Services: The contracted provider covering the area where the crisis occurred will contact the individual within two business days following a behavioral health crisis.</li><li>4. Co-responder Protocol Committee: CSBs will establish a “Co-responder Protocol Committee” to work to increase the availability, efficiency, and effectiveness of community response to behavioral health crises. The Committee must consist of law enforcement agencies.</li></ol> |     |  |  |  |  |  |  |  |  |  |  |  |  |
| Admission Criteria       | Individuals experiencing a behavioral health crisis who are the subject of a communication-officer or public-safety dispatch interaction, and who could benefit from behavioral health (BH) services and supports within the community. The individual served does not have to be a current or past-enrolled recipient of DBHDD services or supports.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |     |  |  |  |  |  |  |  |  |  |  |  |  |
| Continuing Stay Criteria | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |     |  |  |  |  |  |  |  |  |  |  |  |  |

Post-crisis follow-up contact has been completed within 2 days of crisis contact; and</li><li>4. Recommendations for ongoing services, supports or linkages have been documented.</li></ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |     |  |  |  |  |  |  |  |  |  |  |  |  |
| Service Exclusions       | Individuals in the following settings are excluded from receiving Co-Responder Program Services; Crisis Stabilization Units (CSU), Behavioral Health Crisis Centers (BHCC), CRR-I, psychiatric hospital (state or private); Residential Detox; Emergency Departments (EDs), state prisons; youth detention center; regional youth detention center, and Psychiatric Residential Treatment Facilities (PRTFs).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |     |  |  |  |  |  |  |  |  |  |  |  |  |
| Clinical Exclusions      | <ol style="list-style-type: none"><li>1. All individuals receiving Co-responder Program services must present with indications of a behavioral health disorder, an Intellectual/Developmental Disability, and/or Substance Use Disorder.</li><li>2. Co-responder teams shall not respond to non-psychiatric medical emergencies.</li></ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |     |  |  |  |  |  |  |  |  |  |  |  |  |
| Required Components      | <ol style="list-style-type: none"><li>1. Which programmatic requirements herein are required is contingent on the availability of funding. Variation on any expectations shall be defined in a specific DBHDD contract.<ol style="list-style-type: none"><li>a. Specifically, all Community Service Boards (CSBs) must provide:<ol style="list-style-type: none"><li>i. Follow-up Contact; and</li><li>ii. Co-responder Protocol Committees.</li></ol></li><li>b. Additionally, contracted providers may provide:<ol style="list-style-type: none"><li>i. Co-responder Team/s; and</li><li>ii. Co-response Intervention.</li></ol></li></ol></li><li>2. Contracted providers implementing a Co-responder Program are required to have documented evidence of the partnership between the local law enforcement partner/s and the contracted provider establishing a co-responder program in their jurisdiction (e.g., co-signed plans, agreements, etc.). The agreement between the law enforcement agency/emergency medical services entity and the contracted provider should articulate, at minimum, the following:</li></ol>                                                                                                                                                                                                                                                                                                                                                     |     |  |  |  |  |  |  |  |  |  |  |  |  |

## Co-Responder Program

- a. If the Co-responder Program partnership is with a Law Enforcement Agency, the following are requirements:
  - i. The commitment by a law enforcement agency to designate one or more peace officers to participate as officer team members in a co-responder team model;
  - ii. Based on planned number of teams, the law enforcement agency's commitment to staff the required and named shifts for the co-responder team
  - iii. That when an emergency call involving an individual's behavioral health crisis is received by a communications officer or public safety agency, and a Mobile Crisis Response Service is not appropriate or available, the communications officer should be encouraged to notify the co-responder team in the jurisdiction where the emergency is located, if practicable, regardless of whether other peace officers are also dispatched;
  - iv. That the co-responder team will work collaboratively to de-escalate the situation; provided, however, that all final decisions shall be made by the officer team member, or by the officer's superiors.
  - v. That during a co-responder team's response to a call, the law enforcement officer remains "in charge of the scene"; and
  - vi. That the officer team member may consider input from the contracted provider team member in determining whether to refer an individual for behavioral health treatment or other community support, or to transport the individual for emergency evaluation in accordance with Code Section 37-3-42 or 37-7-42, rather than making an arrest; **OR**
- b. If the Co-responder Program partnership is with an Emergency Medical Services entity, the following are requirements:
  - i. Based on planned number of teams, the Emergency Medicaid Services entity's commitment to staff the required and named shifts for the co-responder team
  - ii. That when an emergency call involving an individual's behavioral health crisis is received by a communications officer or public safety agency, and a Mobile Crisis Response Service is not appropriate or available, the communications officer should be encouraged to notify the co-responder team in the jurisdiction where the emergency is located, if practicable, regardless of whether other peace officers are also dispatched;
  - iii. That the co-responder team will work collaboratively to de-escalate the situation; provided, however, that all final decisions shall be made by the EMT in charge of the deployment.
  - iv. That during a co-responder team's response to a call, the EMT responder remains "in charge of the scene."
- c. Co-responder Teams and Interventions provided by the contracted provider shall comply with the following (which will also be documented in the shared agreement):
  - i. The contracted providers will make available licensed and credentialed staff based on funding to support the co-responder teams designated shifts
  - ii. The co-responder licensed and/or credentialed staff may participate in-person or virtually via telemedicine or telephone.
  - iii. The contracted provider team member/s will provide:
    - 1. Brief Screening;
    - 2. Crisis behavioral health support/treatment;
    - 3. Referrals to and engagement with other medical and community supports;
    - 4. If licensed, and as appropriate, the contracted provider team member can issue a 1013/2013 to direct that an individual be taken to an emergency receiving facility for involuntary evaluation.
  - iv. When an emergency call involving an individual with a behavioral health crisis is received by a law enforcement agency and a co-responder team is dispatched, a contracted provider team member shall either be available to accompany the officer team member in-person, or shall be available for consultation via telephone or telemedicine during the emergency call response
  - v. Transport the individual for emergency evaluation in accordance with Code Section 37-3-42 or 37-7-42
    - 1. Transport conducted pursuant to this Code section shall occur in government-owned vehicles configured for safe transport based on the individual's condition; provided, however, that the officer team member may authorize alternative transportation by a medical transport company or otherwise if deemed safe to do so based on the individual's condition.
    - 2. In the event that the officer team member transports the individual for emergency evaluation in accordance with Code Section 37-3-42 or 37-7-42 to an emergency receiving facility which is a not a CSU, the officer shall notify the partnering contracted provider, prior to the release of the

## Co-Responder Program

|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | <p>individual, regarding whether or not the individual is admitted for treatment, to identify and facilitate any necessary follow-up services for such individual to prevent relapse.</p> <p>3. The Co-responder team will provide known documentation for the individual and contact information for the contracted provider for the emergency receiving facility to contact for clinical continuity at discharge.</p> <p>vi. If the individual does not reside in the service area for the partnering contracted provider, the Co-responder team will notify a CSB where the individual resides for follow-up care. The Co-responder team will provide documentation regarding the intervention to the corresponding CSB for promoting clinical continuity.</p> <p>3. Post-emergency Follow-up Services</p> <p>a. When a co-responder team responds to a behavioral health crisis, the assigned CSB for that service area where the crisis occurred shall contact the individual within two business days following the crisis.</p> <p>b. If the individual resides in another CSB's service area, the Co-responder teams shall communicate information about the individual to the appropriate community service board.</p> <p>c. The CSB who is providing the follow-up shall work to identify the types of services needed to support the individual's stability and to locate sources for those services, including peer support, housing, and job placement.</p> <p>d. If the individual was incarcerated, the CSB may make recommendations for inclusion in a jail release plan.</p> <p>e. Following the behavioral health crisis, the CSB must provide voluntary outpatient therapy and rehabilitative supports, as needed, to eligible individuals pursuant to Code Section 37-11-9.</p> <p>4. Co-responder Protocol Committee (for law enforcement agency partnership models only):</p> <p>a. The CSB will establish a co-responder protocol committee comprised of the law enforcement agencies in their service area. The co-responder protocol committee will work with law enforcement agencies to increase the availability, efficiency, and effectiveness of community responses to behavioral health crises, and to address issues arising from the work of co-responder teams. The co-responder protocol committee may include representatives of other agencies providing crisis responses and behavioral health care in the service area</p> <p>b. Whether or not an agency chooses to participate in a co-responder team, each law enforcement agency in the service area shall designate an officer to serve on the co-responder protocol committee.</p> <p>c. Law enforcement agencies shall designate one officer to serve as the primary point of contact for the CSB.</p> <p>5. A law enforcement agency that has not entered into a co-responder partnership with a CSB should be encouraged to designate one peace officer to serve as the primary point of contact with the CSB in their service area.</p> <p>6. A law enforcement agency should be encouraged to designate a peace officer who shall serve on the co-responder protocol committee <i>convened</i> by the CSB in their service area.</p> |
| Staffing Requirements | <p>1. The agency providing this service shall either be a CSB or another DBHDD-contracted provider for this service program.</p> <p>2. <b>The Co-Responder Team partnered with law enforcement agencies will:</b></p> <p>a. Be comprised of at least one officer team member and one CSB team member;</p> <p>b. Have designated, by the CSB partner, a sufficient number of practitioners to serve as co-response intervention members to partner with the law enforcement agencies located within the community service board's service area, with on-call availability at all times;</p> <p>c. Have allowance for the partnered CSB team member to be part of multiple co-responder teams;</p> <p>d. Designate CSB Team Member/s as co-responder partners:</p> <p>i. CSB Team Member/s must be licensed or certified in this state to provide counseling services, or to provide other support services to individuals and their families regarding a behavioral health disorder, and whose responsibilities include participation as a CSB team member on a co-responder team.</p> <p>ii. CSB team members shall receive training on the operations, policies, and procedures of the law enforcement agencies with which they partner.</p> <p>e. Have access to on-call supervision and consultation of fully licensed CSB Team Member/s which must be provided during the operational hours of the multiple co-responder teams. Supervising Licensed CSB Team members can provide clinical consultation either face-to-face, telehealth, or by telephone.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## Co-Responder Program

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Service Description | <p>Community Transition Peer Supports provide interventions that promote recovery, wellness, independence, self-advocacy, and the development of natural supports among individuals transitioning from inpatient to community-based service settings. The goal of the service is to foster a positive and intentionally mutual relationship between a Certified Peer Specialist (CPS) and an individual to support his/her transition to the community and in regaining control over his/her own life and recovery process.</p> <p>The service begins with a CPS engaging individuals who are currently in an inpatient setting via the use of recovery dialogues (for example, sharing their own recovery story, building hope and exploring possibilities for recovery, and/or tapping into strengths individuals possess which could be used to galvanize the recovery process), and gradually building mutually valued relationships with these individuals. Utilizing their unique lived experience, CPS role model the recovery journey, assist their peers in recognizing, understanding and relating their own recovery stories, support their peers in developing their own recovery goals and self-directed recovery processes, and promote a successful life of meaning and purpose in the community of each individual's choice. As the peer relationship progresses, the CPS supports individuals in preparing for their return to the community and continues to support them during and after discharge.</p> <p>In order to accomplish the goals of the service, supports such as the following are utilized:</p> <ul style="list-style-type: none"> <li>• Sharing one's own recovery story;</li> <li>• Promoting the individual's self-articulation of his/her own recovery story;</li> <li>• Demonstrating and modeling recovery principles, self-help strategies, coping techniques, and self-advocacy;</li> <li>• Supporting effective coping skills development;</li> <li>• Assisting individuals with: <ul style="list-style-type: none"> <li>a. the articulation of their personal goals;</li> <li>b. identifying personal strengths;</li> <li>c. identifying potential outcomes, opportunities, and challenges in accomplishing goals;</li> <li>d. providing support in meeting goals and objectives;</li> <li>e. if desired, the creation and ongoing maintenance of a personal Wellness Recovery Action Plan (WRAP);</li> <li>f. identifying and supporting participation in mutual self-help support groups;</li> <li>g. the development of problem-solving techniques;</li> <li>h. identifying and overcoming their fears (i.e., in preparation for hospital discharge);</li> <li>i. motivation and development of job-related skills;</li> <li>j. community resource linking and acquisition;</li> <li>k. establishing and/or maintaining natural support systems.</li> </ul> </li> </ul> <p>Due to the dual nature of the service setting (inpatient initially, then community-based as the individual transitions back to his/her own home and community), there are some interventions which are more germane to one setting or the other, and some interventions which are appropriate in both settings:</p> <p>For example, in the inpatient setting:</p> <ul style="list-style-type: none"> <li>• Establishment of an intentionally mutual relationship;</li> <li>• Assisting with discharge preparation through shared experience;</li> <li>• Assisting with community connections through the use of Day-Passes (both on-site and off-site);</li> <li>• Supporting the individual in setting and keeping goals relevant to the inpatient setting;</li> <li>• Facilitating or assisting with interactions related to community resource linkage, discharge planning, and recovery dialogues.</li> <li>• Interact with peers at the regional hospital's treatment/rehab mall;</li> </ul> |                |                   |

## Community Transition Peer Supports (Peer Mentor)

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Clinical Operations                | 1. The providing practitioner delivers all CTPS services under the auspices and supervision of the Georgia Mental Health Consumer Network.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Service Accessibility              | <ol style="list-style-type: none"> <li>1. Service should initially be provided in a DBHDD inpatient setting, then shift to the individual's home and community setting upon discharge (any community setting is appropriate for providing the service so long as the choice of setting is made by the individual receiving the service). For the purposes of this definition, the word "inpatient" is inclusive of DBHDD hospitals and other high acuity supports such as Crisis Stabilization Units (CSUs) and Psychiatric Residential Treatment Facilities (PRTFs).</li> <li>2. If the individual is still admitted to the inpatient setting but is utilizing a day-pass, service may be provided outside of the inpatient setting.</li> <li>3. Service may be provided by telephone (although 50% must be provided face to face, telephonic contacts are limited to 50%).</li> <li>4. A CPS may facilitate no more than one CTPS-related group per week in the inpatient setting.</li> <li>5. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</li> </ol> |
| Documentation Requirements         | 1. CPSs must comply with any data collection expectations in support of the program's implementation and evaluation strategy.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

| Service Description    | <p>The Crisis Respite Apartment (CRA) service provides an individual with a supported housing environment considered essential when assisting a person who has recently transitioned from or when preventing episodes of homelessness, incarceration, or admissions to a psychiatric inpatient facility, Behavioral Health Crisis Center (BHCC), Crisis Stabilization Unit (CSU), or 23-hour observation area. Programming consists of service interventions and supports to restore housing stability and further develop skills for independent living. The focus of interventions provided include: (1) Identification of Service Needs, (2) Referral and Linkage to necessary community services and resources including transportation assistance when needed, (3) Independent Living Skills Reinforcement and Coaching, and (4) Transition Planning/Coordination. This residential service will reflect individual choice and should be fully integrated in the community to promote the methods to achieve residential and community based social supports.</p> <p>The outcome expectations for individuals receiving this service include decreased hospitalizations, decreased incarcerations, decreased episodes of homelessness, increased housing stability, increased participation in employment activities, and increased community engagement.</p> <p><i>*Where indicated in contract, the service allows for an Enhanced CRA component. The enhanced CRA provides increased on-site supervision requirements and allows for longer lengths of stay for individuals admitted to the service.</i></p> |       |       |       |                |       |                   |

## Crisis Respite Apartments

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

Individuals with the following conditions are excluded from admission unless there is clearly documented evidence of a co-occurring psychiatric condition: Intellectual/Developmental Disabilities; and/or Autism; and/or Neurocognitive Disorder; and/or Traumatic Brain Injury.</li> <li>2. Individuals experiencing a medical crisis, or who require daily nursing or physician care.</li> <li>3. Individuals who are determined to be a danger to self or others.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Required Components | <ol style="list-style-type: none"> <li>1. Providers must have a Crisis Respite Service Program Description that addresses the following: <ol style="list-style-type: none"> <li>a. Description of the staffing pattern and how staff are deployed to assure that the required staff-to-individual ratios are maintained, including how unplanned staff absences, illnesses, or emergencies are accommodated, case mix, access, etc.;</li> <li>b. Description of the hours of operations as related to access and availability to the individuals served;</li> <li>c. Description of how the IRP is constructed, modified and/or adjusted to meet the needs of the individual and to facilitate broad natural and formal support participation; and</li> <li>d. Description of how Crisis Respite Service agency engages with other agencies who may serve the target population.</li> <li>e. Description of protocol to secure the individual's personal items including medications.</li> </ol> </li> <li>2. Crisis Respite services must be available daily, including evening and weekend hours, based on individual needs and preferences, with sufficient availability to meet contact requirements. <ol style="list-style-type: none"> <li>a. Visits at late hours are discouraged for privacy and safety.</li> <li>b. Premises should not be entered while individuals are sleeping overnight unless there is an immediate safety concern.</li> </ol> </li> <li>3. This service incorporates linkage to choices for housing which reflect individualized needs, preferences, as well as appropriate and available housing options.</li> <li>4. As a part of the planning for when an individual will move to housing of their own choice, the Housing Choice and Needs Evaluation: <a href="https://dbhddapps.dbhdd.ga.gov/NSH/">https://dbhddapps.dbhdd.ga.gov/NSH/</a> must be completed. The only exception to this expectation is when an individual chooses to opt out due to stable housing, personal choice, etc.</li> </ol> <p><b><u>Site Requirements</u></b></p> <ol style="list-style-type: none"> <li>5. The provider shall adhere to basic boarding expectations which include: <ol style="list-style-type: none"> <li>a. Provision of clean linens/towels,</li> <li>b. Provision of three (3) nutritious meals per day and nutritional snacks,</li> <li>c. Access to laundry facilities,</li> <li>d. Cleaning supplies, and</li> <li>e. Transportation assistance to access services and supports.</li> </ol> </li> <li>6. Individuals receiving SNAP benefits are not required to use their food stamps to meet the provider requirement of provision of three nutritious meals per day.</li> <li>7. Single person per room but if shared, bedroom must be gender specific with dividing partition or wing wall allowing for privacy. Bedrooms utilized for more than one person shall have a minimum of 60 sq. ft. per individual, a single room shall not be less than 100 sq. ft.</li> <li>8. Showering/bathing facility shall be provided, not requiring access through another individual's bedroom.</li> <li>9. To support privacy and confidentiality, programs shall not maintain administrative office space in individuals' living spaces.</li> <li>10. There will be no external signage to indicate the presence of a behavioral health service.</li> <li>11. The facility must comply with the Americans with Disabilities Act. Specifically, the facility must provide access to ground-level units that meet ADA criteria for individuals who have a physical disability. <ol style="list-style-type: none"> <li>a. Providers must ensure readiness to purchase and install accommodations for individuals who are deaf or hard of hearing who are to be served at the site.</li> </ol> </li> </ol> |

The provider may not mandate treatment, medication, or sobriety as a condition of access to or continued residence at a CRA. Individual needs and symptoms should be supported on an individualized basis.</li> <li>Each contact should involve interventions focused on the concepts below: <ol style="list-style-type: none"> <li><b>Identification of Service Needs:</b> Using a person-centered/recovery-based approach, staff will promote individual choice, personal responsibility, safety to self and others, and community stability/integration. Individuals enrolled in Crisis Respite Services must be assisted with the below activities within the first 72 hours of admission: <ol style="list-style-type: none"> <li>A Comprehensive Needs Assessment that includes: <ol style="list-style-type: none"> <li>Applying for and obtaining vital records such as birth certificate, social security card, and state identification card.</li> </ol> </li> </ol> </li> </ol> </li> </ol>                                                                                                                 |

## Crisis Respite Apartments

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | <ol style="list-style-type: none"> <li>2. Scheduling of an appointment with a Medicaid Eligibility Speciality (MES) for individuals without income and/or health insurance.</li> <li>3. Development of a crisis plan, or the revision of an existing crisis plan in partnership with existing behavioral health provider.</li> <li>4. Identification of natural supports (i.e. family, friends, and support groups) and ways to strengthen/utilize them while living in the community.</li> </ol> <p>ii. A Housing Goal that clearly states the desire of the individual, identifies available housing opportunities, resources, and supports (i.e. housing types, costs, and locations), and promotes opportunities for continued growth, independence, and community integration.</p> <ol style="list-style-type: none"> <li>b. <b>Referrals and Linkage:</b> Staff will assist individuals with referrals and linkage to services and resources in the community identified on the IRP including behavioral health and medical treatment services, benefit entitlements in addition to Medicaid, vocational/employment supports, and transportation. It is the expectation that all individuals enrolled in Crisis Respite services are linked to a behavioral health provider of their choosing that will facilitate crisis resolution while meeting treatment and medication needs during the brief respite period. Referrals to Core and Speciality Services such as Assertive Community Treatment (ACT), Community Support Team (CST), Intensive Case Management (ICM), Case Management (CMS), Supportive Employment (SE), and Psychosocial Rehabilitation (PSR) are highly encouraged when eligible.</li> <li>c. <b>Independent Living Skills Reinforcement and Coaching:</b> Crisis Respite Services will provide a minimum of two (2) hours weekly independent living skills reinforcement and coaching that strengthen concepts of choice, control, freedom, and equality. Topics for reinforcement and coaching can include but are not limited to self-articulation of personal goals and objectives, symptom identification and wellness management which includes strengthening of coping skills to self-manage or prevent crisis situations, identifying potential barriers to succeeding independently in the community, difficulties with self-administering medication, utilizing medical/behavioral health services, completing housing applications and associated search processes, financial management, laundry, housekeeping, and meal planning/preparation.</li> <li>d. <b>Transition Planning/Coordination:</b> As this service is short term in nature, staff will begin preparing individuals for transition immediately upon admission. Staff will ensure the individual receives a full range of integrated services necessary to support a life in his/her community. Staff will actively collaborate with other support services in the community for the common benefit of the individual to reduce barriers to accessing services and resources; as well as reducing gaps, disruptions, or fragmentation in support services which would place the individual at risk for becoming re-incarcerated, re-hospitalized, or homeless. Staff will develop a Primary and Secondary/Contingency Transition Plan that clearly identifies the steps needed to achieve the desired Housing Goal and address any barriers to transition.</li> </ol> <ol style="list-style-type: none"> <li>4. Enhanced CRA models require a minimum of three (3) face-to-face visits per day – morning, afternoon, and evening, with interventions focused on items described in item 1 above.</li> <li>5. Enhanced CRA models require four (4) hours weekly of independent living skills reinforcement and coaching.</li> <li>6. Any individual enrolled in this service for whom acute stabilization services are necessary (e.g. inpatient hospitalization, crisis stabilization unit, emergency department intervention, BHCC, etc.), the provider must conduct a clinical review of the individual's relevant clinical information (e.g. discharge plan/summary, risk assessments, treatment recommendations, etc.) and modify the individual's IRP as necessary, in accordance with Part II, Section III: Documentation Requirements of this manual, item # 5. Individualized Recovery/Resiliency Planning, sub-item E.</li> </ol> |
| Service Accessibility | <ol style="list-style-type: none"> <li>1. Crisis Respite is not an emergency receiving facility and shall not receive individuals under emergency conditions. Any individual who presents under emergency conditions (1013) should be directed to a local emergency receiving facility.</li> <li>2. Crisis Respite is not accessible to individuals by walk-ins. All individuals receiving Crisis Respite Services must come through a referring agency such as a Tier 1 or Tier 2 Provider, hospital, CSU, 23-hour observation area, emergency room, etc.</li> <li>3. Referrals must be accepted daily during agency hours of operation, minimally between the hours of 9 am and 5 pm. Providers should communicate an admission decision and move-in date within three (3) business days of receiving a referral. When vacancies exist, referrals and admissions must be accepted seven (7) days per week.</li> <li>4. Unless otherwise provided by DBHDD, each provider is responsible for establishing a system with priority referral sources (hospitals, CSUs, Crisis Service Centers, Temporary Observation units, emergency rooms, Mobile Crisis Team) through which the status of bed availability is accessible to referral sources 24 hours per day. This may be through a website or automated phone greeting.</li> <li>5. Each provider must have a defined standardized admission process which is shared with other referring agencies.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## Crisis Respite Apartments

|                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|                                    | 6. Providers of residential services and operators of a Crisis Respite Apartment must utilize referral management systems and associated processes as determined by DBHDD, in order to streamline access and ensure effective coordination of care.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Documentation Requirements         | <ol style="list-style-type: none"> <li>1. The organization must develop and maintain sufficient written documentation to support the Residential Service for which billing is made. This documentation, at a minimum, must confirm that the individual for whom billing is requested was a resident of the Residential Service on the date of service.</li> <li>2. Daily progress notes must be entered in the individual's record to enable the monitoring of the provision of required independent living skills reinforcement and coaching and support activities, recording the individual's progress toward IRP/recovery goals and response to interventions provided.</li> <li>3. Provider must ensure documented individualized housing search log, reflective of provision of active housing search assistance, locations (minimum 2 locations per week), applications submitted, denials and corresponding dates.</li> <li>4. Provider must complete the CRA Checklist and submit it with ASO authorization requests.</li> </ol> |
| Reporting and Billing Requirements | <ol style="list-style-type: none"> <li>1. All applicable ASO and DBHDD reporting requirements must be met.</li> <li>2. Span billing may occur for this service, meaning the start and end date are not the same on a given service claim line; however, spans cannot cross months (e.g. start date and end date must be within the same month).</li> <li>3. The provider must submit billing and reporting according to annual contract requirements.</li> <li>4. If the CRA provider is an enrolled Core/Specialty provider and are providing a service via an IRP, that may count toward contact expectations.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                               |
| Additional Medicaid Requirements   | Not a Medicaid-billable service.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Service Description   | A Crisis Service Center (CSC) provides short-term, 24/7, facility-based, walk-in psychiatric/substance related crisis evaluation and brief intervention services to support an individual who is experiencing an abrupt and substantial change in behavior noted by severe impairment of functioning typically associated with a precipitating situation or a marked increase in personal distress. These services also include screening and referral for appropriate outpatient services and community resources for those who are not in crisis but who are seeking access to behavioral health care. Interventions are provided by licensed and unlicensed behavioral health professionals, with supervision of the facility provided by a licensed professional and designed to prevent out of community treatment or hospitalization. Interventions used to de-escalate a crisis situation may include assessment of crisis; active listening and empathic responses to help relieve emotional distress; effective verbal and behavioral responses to warning signs of crisis related behavior; assistance to, and involvement/ participation of the individual (to the extent he/she is capable) in active problem solving, planning, and interventions; referral to appropriate levels of care for adults experiencing crisis situations which may include a crisis stabilization unit or other services deemed necessary to effectively manage the crisis; to mobilize natural support systems; and to arrange transportation when needed to access appropriate levels of care. |                |                                                                                                                       |       |       |       |      |
| Admission Criteria    | 1. Adult with a suspected or known mental health condition or substance use disorder; <b>AND</b><br>2. Expressing a need for behavioral healthcare services; <b>OR</b><br>3. Experiencing a severe situational crisis; <b>OR</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                |                                                                                                                       |       |       |       |      |

## Crisis Service Center

|                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

|                                    | <p>4. At risk of harm to self, others, and/or property. Risk may range from mild to imminent; <b>and at least one of the following</b>;</p> <ol style="list-style-type: none"> <li>Individual has insufficient or severely limited resources or skills necessary to cope with the immediate crisis; or</li> <li>Individual demonstrates lack of judgment and/or impulse control and/or cognitive/perceptual abilities which are necessary to cope with immediate crisis.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Continuing Stay Criteria           | Not applicable, as this service is intended to be a discrete time-limited service that stabilizes the individual and moves them to the appropriate level of care.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Discharge Criteria                 | Crisis situation is resolved and/or referral to appropriate service is provided.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Service Exclusions                 | No exclusions. However, if the individual is enrolled in ACT, it is the expectation that the ACT provider serves as the primary crisis response resource.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Clinical Exclusions                | <ol style="list-style-type: none"> <li>A stand-alone Crisis Service Center (not co-located with or within a facility that is a Behavioral Health Crisis Center (BHCC)) is not an emergency receiving facility and shall not receive individuals under emergency conditions. Any individual who presents under emergency conditions (1013/213/probate court order) to a stand-alone CSC must be directed to the nearest available emergency receiving facility.</li> <li>If a CSC operates as part of a Behavioral Health Crisis Center (BHCC), the CSC (or the associated Temp Observation or CSU service) must accept individuals referred under emergency conditions (1013/2013/probate court order) and perform a face-to-face evaluation in order to determine the most appropriate level of care.</li> <li>If after face-to-face assessment by licensed staff, if it is determined that the severity individual requires services at a different level of care, the CSC will make the necessary referrals and/or arrangements for transfer to an appropriate level of care.</li> </ol> |
| Required Components                | Crisis Service Center is a facility-based service which is operational 24 hours a day, 7 days a week, offering a safe environment for individuals receiving crisis assessments, stabilization, and referral services using licensed mental health professionals.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Staffing Requirements              | <ol style="list-style-type: none"> <li>At a minimum, staff must include: <ol style="list-style-type: none"> <li>A fully Licensed Behavioral Health Clinician on site at all times;</li> <li>A Certified Peer Specialist – coverage may be shared with the temporary observation unit;</li> <li>A Physician, APRN or PA to provide timely assessment, orders for presenting individuals, and temporary observation (coverage may be shared with a Crisis Service Center or Crisis Stabilization Unit as long as contract requirements for coverage by specific levels of professionals are met); and</li> <li>A Registered Nurse who is stationed in the Temporary Observation Unit may float to the Crisis Service Center to perform nursing assessments.</li> </ol> </li> <li>A DBHDD contract for this service may list additional staffing requirements. In the event of conflicting requirements, provider must adhere to the requirement that is most stringent.</li> </ol>                                                                                                            |

## Crisis Service Center

4. The Crisis Service Center should bill individual discrete services for DBHDD state-funded and Medicaid FFS service recipients. There is a Crisis Services Type of Care available for use by Crisis Service Centers (stand-alone and within a BHCC).
5. The individual services listed below may be billed up to the daily maximum listed for services provided in the Crisis Service Center. Billable services in the Crisis Service Center are as follows:

| Service                                                                                                           | Max Daily Units |
|-------------------------------------------------------------------------------------------------------------------|-----------------|
| Behavioral Health Assessment & Service Plan Development                                                           | 12              |
| Psychological Testing                                                                                             | 5               |
| Diagnostic Assessment                                                                                             | 2               |

| Continuing Stay Criteria | This service may be utilized at various points in the course of treatment and recovery; however, each intervention is intended to be a discrete time-limited service that stabilizes the individual. These time limits for continued stay are based upon the individual's specific needs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| Required Components      | <ol style="list-style-type: none"> <li>1. Crisis Stabilization Units (CSU) providing medically monitored short-term residential psychiatric stabilization and withdrawal management services shall be designated by DBHDD as both an emergency receiving facility and an evaluation facility and must be surveyed and licensed by the DBHDD.</li> <li>2. In addition to all service qualifications specified in this document, providers of this service must adhere to <a href="#">Behavioral Health Provider Certification and Operational Requirements for Certified Crisis Stabilization Units (CSUs), 01-325</a>.</li> <li>3. Individual referred to a CSU must be evaluated by a physician within 24 hours of the referral.</li> <li>4. All services provided within the CSU must be delivered under the direction of a physician. A physician must conduct an assessment of new admissions, address issues of care, and write orders as required.</li> <li>5. Crisis Stabilization Units (CSU) must use the bed inventory platform to indicate the presence and number of available beds (including each bed's gender specificity, if applicable). Providers should indicate both anticipated and presently available beds as soon as possible and begin reviewing referrals upon receipt.</li> <li>6. CSUs must review, accept, or decline every referral sent to the CSU.</li> <li>7. A physician-to-physician (to include APRN-to-APRN or Nurse-to-Nurse) consultation is required when requested by the referral source.</li> <li>8. Provision of seven (7) days of medication at the time of discharge using a normed formulary (such as the Medicaid Pharmacy formulary), which will increase the individual's access to these medications post-discharge.</li> </ol> |
| Staffing Requirements    | <ol style="list-style-type: none"> <li>1. Crisis Stabilization Unit (CSU) Services must be provided by a physician or a staff member under the supervision of a physician, practicing within the scope of State law.</li> <li>2. A CSU must employ a fulltime Nursing Administrator who is a Registered Nurse.</li> <li>3. A CSU must have a Registered Nurse present at the facility at all times.</li> <li>4. If the charge nurse is an APRN, then he/she may not simultaneously serve as the accessible physician during the same shift.</li> <li>5. Staff-to-individual served ratios must be established based on the stabilization needs of individuals being served and in accordance with rules and regulations.</li> <li>6. Functions performed by Physician Assistants, Nurse Practitioners, Clinical Nurse Specialists, Registered Nurses, and Licensed Practical Nurses must be performed within the scope of practice allowed by State law and Professional Practice Acts.</li> <li>7. CSUs are encouraged to employ a CPS as part of their regular staffing compliment, and utilize them in early engagement, orientation to services, skills building, WRAP development, discharge planning and aftercare follow-up.</li> <li>8. A CSU that functions as a component of a Behavioral Health Crisis Center (BHCC) must employ a full-time peer specialist (MH, CPS-AD) during the hours of 8:00 AM to 10:00 PM seven (7) days per week.</li> <li>9. In addition to all service qualifications specified in this document, providers of this service must adhere to <a href="#">CSU/BHCC: Program Description, 01-329</a>.</li> </ol>                                                                                                                                 |
| Clinical Operations      | <ol style="list-style-type: none"> <li>1. CSU must have documented operating agreements and referral mechanisms for psychiatric disorders, substance use disorders, and physical healthcare needs that are beyond the scope of the CSU and that require inpatient treatment. Operating agreements must delineate the type and level of service to be provided by</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Crisis Stabilization Unit (CSU) Services

- the private or public inpatient hospital or treatment facility. These agreements must specifically address the criteria and procedures for transferring an individual to a designated treatment facility when the CSU is unable to stabilize the individual.
2. CSUs must follow the seclusion and restraint procedures included in DBHDD's policy: [CSU: Use of Seclusion or Restraint in Crisis Stabilization Services, 01-351](#).
  3. The following restraint practices are prohibited:
    - a. The use of chemical restraint for any individual.
    - b. The combined use of seclusion and mechanical, and/or manual restraint.
    - c. Standing orders for seclusion or any form of restraint.
    - d. PRN orders for seclusion or any form of restraint.
    - e. Prone manual or mechanical restraints.
    - f. Transporting an individual in a prone position while being carried or moved.
    - g. Use of seclusion or restraint as a part of a Behavior Support Plan (BSP) or an Individual Recovery Plan (IRP).
    - h. The use of handcuffs for an individual not under the jurisdiction of the criminal justice system.
    - i. The use of medication as a chemical restraint.
  4. For individuals with co-occurring diagnoses including developmental disability/developmental disabilities, this service must target the symptoms, manifestations, and skills-development related to the identified behavioral health issue.
  5. Medication must be administered by licensed medical personnel under the supervision of a physician or registered nurse in accordance with O.C.G.A. CSUs must also follow the pharmacy and medication policies in accordance with [CSU: Pharmacy Services and Management of Medication, 01-334](#).
  6. Transition Status:
    - a. **Purpose:** Transition status is utilized for an individual on voluntary status who no longer meets clinical criteria for a crisis stabilization unit (CSU) but continues to have barriers to discharge that which are not clinical in nature.
    - b. **Process:** The individual is transferred by order of a physician from an adult or child/youth crisis bed but remains within the CSU on transition status and is in the active process of transition to the community. The designation of transition status is not limited to a specific bed but references the individual during his/her transitional status.
    - c. **Criteria:**
      1. Adult or child/youth presenting with a behavioral health need, having received treatment in a CSU, is stable, but requires additional resource coordination in order to support a successful discharge.
      2. The individual meets ready for discharge criteria, however, presents with psychosocial factors that do not support successful transition.
      3. Individuals presenting with clinical need post-detoxification for SUD residential treatment awaiting access to the appropriate level of care.
      4. A transition plan has been confirmed and the Individual is awaiting permanent or temporary housing, GHV, HCV, 811, CRA, CRR, SUD residential placement, DFCS placement (when indicated), awaiting court approval of placement, awaiting placement which could be impeded by forensic status, awaiting family support, residential treatment/detox or PRTF bed.
- \* transition status is not a replacement alternative for homelessness, this shall not apply to persons without an attainable housing plan/resource\*
- d. **Exclusions:** Individuals requiring further psychiatric stabilization shall not be authorized for transition status.
  - e. **Components:**
    1. Individuals on transition status are required to be engaged in clinically appropriate community behavioral health services and supports.
    2. Participation in identified services in the Discharge Plan such as non-intensive outpatient services, specialty services (ACT, Apex, CST, HUM, IC3, ICM/CM, IFI, peer, PSR, SE/SEEd, etc.) and/or SUD services, is expected based on consultation between the CSU clinical staff and outpatient clinical staff.
    3. Community-based services will be provided outside of the CSU setting.

| Billing & Reporting Requirements | <ol style="list-style-type: none"> <li>1. This service requires initial authorization that can only be obtained through the bed inventory platform.</li> <li>2. Providers must report information on all individuals served in CSUs no matter the funding source:</li> <li>3. The CSU shall submit prior authorization requests for all individuals served (state-funded, Medicaid funded, private pay, other third-party payer, etc.);</li> <li>4. The CSU shall submit per diem encounters (H0018 or H0018) for all individuals served (state-funded, Medicaid-funded, private pay, other third-party payer, etc.).</li> <li>5. Unlike all other DBHDD residential services, the start date of a CSU span encounter submission may be in one month and the end date may be in the next. The span of reporting must cover continuous days of service and the number of units must equal the days in the span.</li> <li>6. Providers must submit a discharge summary into the provider connect/batch system within 48 hours of CSU discharge and must discharge the individual's episode in the bed inventory platform.</li> <li>7. Transition Status: <ol style="list-style-type: none"> <li>a. After the initial and any subsequent re-authorizations for CSU expire, a CSU provider may submit a concurrent request for the purposes of extending the stay on transition status, along with justification for transition status need.</li> <li>b. Providers must designate either CSU bed use or transition bed use in the authorization request using the field titled "Presenting Concerns".</li> <li>c. Providers must designate either CSU bed use or transition bed use in encounter submissions through the presence or absence of the TB modifier. TB represents "Transition Bed."</li> <li>d. CSU staff should also designate the individual's status as "Transition Bed" on the bed inventory platform by changing the name of the bed.</li> <li>e. There is no reimbursement or allowance for encounters for the day of discharge.</li> <li>f. Upon discharging an individual from a transition bed, the provider shall submit a discharge record that includes the date being discharged to the ASO via Provider Connect, and must discharge the individual's episode in the bed inventory platform.</li> </ol> </li> </ol> |
| Documentation Requirements       | <ol style="list-style-type: none"> <li>1. Individuals receiving services within the CSU shall be reported as a per diem encounter based upon occupancy at 11:59PM. At 11:59PM, each individual reported must have a verifiable physician's order for CSU level of care [or order written by delegation of authority to nurse or physician assistant under protocol as specified in § 43-34-23]. Individuals entering and leaving the CSU on the same day (prior to 11:59PM) will not have a per diem encounter reported.</li> <li>2. For individuals transferred to transitional beds, the date of transfer must be documented in a progress note and filed in the individual's chart.</li> <li>3. In addition to documentation requirements set forth in Part II of this manual, the notes for the program must have documentation to support the per diem including admission/discharge time, shift notes, and specific consumer interactions.</li> <li>4. Daily engagement in community-based services must also be documented in progress notes for those occupying transitional beds.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Crisis Stabilization Unit (CSU) Services - Co-Occurring Intellectual & Developmental Disability (I/DD) Specialized Capacity

| Service Description                                                                                             | <p>This service is a short-term residential alternative to, and diversion from inpatient hospitalization for adults with a co-occurring behavioral health condition (i.e. a mental health condition and/or substance use disorder) and Intellectual/Developmental Disability (I/DD) who present with crisis-related psychiatric/substance use disorder symptoms and/or severe and challenging behaviors related to an I/DD. These symptoms and/or behaviors seriously and imminently compromise health, safety, baseline daily functioning, and/or ability to remain in the community. The main goals of this service are:</p> <ol style="list-style-type: none"><li>1. To provide medically monitored residential psychiatric and/or substance use disorder stabilization (e.g., substance withdrawal management services), and/or behavior stabilization (e.g. utilizing individualized applied behavior interventions and other behavior support services), in order to ameliorate the symptoms and/or challenging behaviors that place the individual or others at serious risk;</li><li>2. To increase communication skills and adaptive skills to help mitigate crisis-related challenging behaviors; and</li><li>3. To increase the caregiver's (if applicable) ability to support the individual in the community.</li></ol> <p>The CSU must perform crisis-related assessments of each individual served, as clinically indicated. At a minimum, these assessments must include a psychiatric and SUD-related assessment (including a Diagnostic Assessment), and a medical assessment. Additional assessments should be individualized and crisis-related, and may include but are not limited to: Functional behavior assessment, adaptive skills assessment, environmental/situational/needs assessment, etc.</p> <p>When indicated by current assessment(s), services may include:</p> <ol style="list-style-type: none"><li>1. Crisis-support and intervention;</li><li>2. Medically Monitored Residential Substance Withdrawal Management (at ASAM Level 3.7-WM);</li><li>3. Medication administration, management, and monitoring;</li><li>4. Psychiatric/Behavioral Health Treatment;</li><li>5. Applied Behavior Analysis (ABA) and other crisis-oriented behavior support interventions;</li><li>6. Nursing Assessment and Care;</li><li>7. Brief individual, group, and/or family counseling; and</li><li>8. Formal/natural support training in ABA and/or other behavior support interventions; and</li><li>9. Discharge planning and linkage to other services as needed, and follow-up.</li></ol> |       |       |       |       |       |                 |                                                                                                                 |                      |       |       |       |       |                 |

## Crisis Stabilization Unit (CSU) Services - Co-Occurring Intellectual & Developmental Disability (I/DD) Specialized Capacity

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          | <p>2. Individual is an adult who has a known or suspected condition/disorder in keeping with one or more of the following:</p> <ul style="list-style-type: none"> <li>a. Co-occurring mental health condition and intellectual/developmental disability; and/or</li> <li>b. Co-occurring Substance Use Disorder and Intellectual/Developmental Disability;</li> </ul> <p style="text-align: center;"><b>AND</b></p> <p>3. The individual is experiencing a severe crisis (situational, psychiatric, and/or substance use-related), which includes an increase in severe and challenging maladaptive behaviors, <u>and/or</u> a lack of sufficient adaptive skills to manage the crisis at the individual's current level of care/support; <b>and</b></p> <ul style="list-style-type: none"> <li>a. As a result of the crisis, the individual's safety and/or functioning have been significantly compromised <u>beyond</u> any safety/functional challenges that are typically present at the individual's non-crisis baseline, as evidenced by one or more of the following: <ul style="list-style-type: none"> <li>1. Significant impulsivity and/or physical aggression that is imminently life threatening or gravely endangering to self or others; or</li> <li>2. At least one recent episode of a severe maladaptive behavior. If continued, the nature and severity of the behavior would significantly compromise the individual's ability to safely remain in their home/community; or</li> <li>3. The individual either displays high acuity maladaptive behavior, or fails to display necessary adaptive skill, which impact the individual's ability to function in significant life domains: family, work, school, social, or activities of daily living. The impact on functioning seriously and imminently compromises the individual's ability to remain safely in the community, or to be supported at a lower level of care; <b>and</b></li> </ul> </li> <li>b. The individual requires crisis behavior intervention <b>and/or</b> an increased level of support/monitoring (such as a need for additional and/or specialized staff oversight) that cannot be achieved at a lower level of care, or within the standard behavioral health milieu of the Crisis Stabilization Unit.</li> </ul> |
| Continuing Stay Criteria | <ul style="list-style-type: none"> <li>1. Individual continues to meet admission criteria as defined above; <b>and</b></li> <li>2. If clinically indicated/applicable, a behavior support plan for the crisis-related maladaptive behavior has been created/updated and implemented, but the behavior has not stabilized to the extent that the individual can safely return to his or her home/community; <b>and</b></li> <li>3. A higher level of care is not indicated.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Discharge Criteria       | <ul style="list-style-type: none"> <li>1. Individual no longer meets admission criteria and an adequate discharge/continuing support/care plan has been established; <b>and</b></li> <li>2. Individual has achieved any applicable crisis-related behavior goals (or behaviors directly related to the crisis have returned to baseline), such that the individual can be safely supported at either a lower level of care or in his/her natural home/setting.</li> </ul> <p style="text-align: center;"><b>OR</b></p> <ul style="list-style-type: none"> <li>3. For voluntary admissions only, individual's legal guardian (if applicable) requests discharge;</li> </ul> <p style="text-align: center;"><b>OR</b></p> <ul style="list-style-type: none"> <li>4. Individual's crisis-related severe maladaptive behaviors and/or behavioral health symptoms have not stabilized within the crisis stabilization period, and individual must be transferred to a service offering a longer duration of intensive treatment or a higher level of care.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Service Exclusions       | <ul style="list-style-type: none"> <li>1. Opioid Maintenance Treatment.</li> <li>d. Crisis Services Type of Care</li> <li>e. Community Transition Planning.</li> </ul> </li> <li>2. All other Medicaid-reimbursable and DBHDD State-Funded Intellectual and Developmental Disability services are excluded, with the exceptions of Support Coordination, Intensive Support Coordination, Fiscal Intermediary services, Waiver Supplemental Services, and training of formal and natural supports regarding the behavior support plan (if applicable).</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Crisis Stabilization Unit (CSU) Services - Co-Occurring Intellectual & Developmental Disability (I/DD) Specialized Capacity

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Clinical Exclusions   | <ol style="list-style-type: none"> <li>1. Individual is not in crisis.</li> <li>2. Individual does not present a risk of harm to self or others or is able to care for his or her own physical health and safety.</li> <li>3. Severity of clinical issues precludes provision of services at this level of intensity. See <a href="#">CSU: Medical Evaluation Guidelines and Exclusion Criteria for Admission to Crisis Stabilization Units, 01-350</a>.</li> <li>4. <b>EXCEPTIONS:</b> While some of the following are exclusionary in accordance with standard CSU policy, the items below are <b>not</b> exclusionary criteria for this targeted service: <ol style="list-style-type: none"> <li>a. Medical Needs: <ol style="list-style-type: none"> <li>i. ADLs: Inability to independently perform ADLs, as defined below, is <b>not</b> an exclusion criterion for this service. An individual's dependence is defined as staff supervision, direction/prompts, and personal assistance. <ol style="list-style-type: none"> <li>1. Transferring: The extent of an individual's ability to move from one position to another.</li> <li>2. Feeding: The ability of an individual to feed oneself.</li> <li>3. Dressing: The ability to select appropriate clothes and put clothes on.</li> <li>4. Personal hygiene: The ability to bathe and groom oneself and to maintain dental hygiene, hair, and nail care.</li> <li>5. Continence: The ability to control bladder and bowel function.</li> <li>6. Toileting: The ability to get to and from the toilet, use it appropriately, and clean oneself.</li> </ol> </li> </ol> </li> <li>b. Sexual Risk: Presence or history of sexually inappropriate behavior of a non-aggressive (i.e., toward others) nature is <b>not</b> an exclusionary criterion for this service.</li> <li>c. Elopement Risk: Elopement behavior is <b>not</b> an exclusionary criterion for this service. Individual may have recent or historical episodes of elopement behaviors that have placed the individual at imminent risk to self or others.</li> <li>d. Physical characteristics alone (e.g., height, weight, etc.) do <b>not</b> preclude admission.</li> </ol> </li> </ol> |
| Required Components   | <ol style="list-style-type: none"> <li>1. Crisis Stabilization Units (CSU) providing medically monitored short-term residential psychiatric/behavioral stabilization and withdrawal management services shall be designated by DBHDD as both an emergency receiving facility and an evaluation facility and must be surveyed and licensed by the DBHDD.</li> <li>2. In addition to all service qualifications specified in this document, providers of this service must adhere to <a href="#">Behavioral Health Provider Certification and Operational Requirements for Certified Crisis Stabilization Units (CSUs), 01-325</a>.</li> <li>3. Individual referred to a CSU must be evaluated by a physician within 24 hours of the referral.</li> <li>4. All services provided within the CSU must be delivered under the direction of a physician. A physician must conduct an assessment of new admissions, address issues of care, and write orders as required.</li> <li>5. Crisis Stabilization Units (CSU) must use the bed inventory platform to indicate the presence and number of available beds (including each bed's gender specificity, if applicable). Providers should indicate both anticipated and presently available beds as soon as possible and begin reviewing referrals upon receipt.</li> <li>6. CSUs must review, accept, or decline every referral sent to the CSU.</li> <li>7. A physician-to-physician (to include APRN-to-APRN or Nurse-to-Nurse) consultation is required when requested by the referral source.</li> <li>8. Aftercare planning: The CSU must notify the appropriate DBHDD Field Office of an individual's admission within two (2) business days, particularly for individuals who may not have needed services, supports, or living arrangements post-discharge.</li> <li>9. Provision of seven (7) days of medication at the time of discharge using a normed formulary (such as the Medicaid Pharmacy formulary), which will increase the individual's access to these medications post-discharge.</li> </ol>                                                                                                                                                      |
| Staffing Requirements | <ol style="list-style-type: none"> <li>1. Crisis Stabilization Unit (CSU) Services must be provided by a physician or a staff member under the supervision of a physician, practicing within the scope of State law.</li> <li>2. A CSU must employ a full-time Nursing Administrator who is a Registered Nurse.</li> <li>3. A CSU must have a Registered Nurse present at the facility at all times.</li> <li>4. If the charge nurse is an APRN, then he/she may not simultaneously serve as the accessible physician during the same shift.</li> <li>5. Staff-to-individual served ratios must be established based on the stabilization needs of individuals being served and in accordance with rules and regulations.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

## Crisis Stabilization Unit (CSU) Services - Co-Occurring Intellectual & Developmental Disability (I/DD) Specialized Capacity

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                     | <ol style="list-style-type: none"> <li>6. Functions performed by Physician Assistants, Nurse Practitioners, Clinical Nurse Specialists, Registered Nurses, and Licensed Practical Nurses must be performed within the scope of practice allowed by State law and Professional Practice Acts.</li> <li>7. CSUs are encouraged to employ a CPS as part of their regular staffing compliment, and utilize them in early engagement, orientation to services, skills building, WRAP development, discharge planning and aftercare follow-up.</li> <li>8. A CSU that functions as a component of a Behavioral Health Crisis Center (BHCC) must employ a full-time peer specialist (MH, CPS-AD) during the hours of 8:00 AM to 10:00 PM seven (7) days per week.</li> <li>9. The Co-Occurring I/DD Specialized Capacity CSU must employ, at a minimum, one half-time-equivalent (FTE) Board Certified Behavior Analyst (BCBA) who serves as the lead for all Applied Behavior Analysis (ABA) aspects of treatment, and provides oversight to direct care staff engaged in ABA or other behavior support interventions. Functions performed by the BCBA may be partially provided via telemedicine, however, all functions must be performed within the scope of their practice and aligned with their professional standards.</li> <li>10. The Co-Occurring I/DD Specialized Capacity CSU must employ, at a minimum, one full-time-equivalent (FTE) Registered Behavior Technician (RBT) who is directly supervised by the BCBA, and who is responsible for the implementation Applied Behavior Analysis (ABA) aspects of treatment. Functions performed by the RBT must be performed within the scope of their practice and aligned with their professional standards. RBTs may be considered direct care staff for the required staffing ratios defined below.</li> <li>11. The Co-Occurring I/DD Specialized Capacity CSU must employ other direct care staff who hold credentials such as the Direct Service Professional (DSP) and/or other health service technician designations.</li> <li>12. The Co-Occurring I/DD Specialized Capacity CSU must maintain the minimum following staffing ratio for its Specialized Capacity beds: <ol style="list-style-type: none"> <li>a. 1-2 individuals served = One (1) direct care staff (as defined above) on all shifts (note: this is a <i>minimum</i>; a higher number of direct care staff should be used if acuity of individuals served indicates a safety need).</li> <li>b. 3-4 individuals served = Two (2) direct care staff (as defined above) on all shifts (note: this is a <i>minimum</i>; a higher number of direct care staff should be used if acuity of individuals served indicates a safety need).</li> <li>c. 5-6 individuals served = Three (3) direct care staff (as defined above) on all shifts (note: this is a <i>minimum</i>; a higher number of direct care staff should be used if acuity of individuals served indicates a safety need).</li> </ol> </li> </ol> |
| Clinical Operations | <ol style="list-style-type: none"> <li>1. CSU must have documented operating agreements and referral mechanisms for psychiatric disorders, substance use disorders, and physical healthcare needs that are beyond the scope of the CSU and that require inpatient treatment. Operating agreements must delineate the type and level of service to be provided by the private or public inpatient hospital or treatment facility. These agreements must specifically address the criteria and procedures for transferring an individual to a designated treatment facility when the CSU is unable to stabilize the individual.</li> <li>2. CSUs must follow the seclusion and restraint procedures included in the Department's policy: <a href="#">CSU: Use of Seclusion or Restraint in Crisis Stabilization Services, 01-351</a>.</li> <li>3. The following restraint practices are prohibited: <ol style="list-style-type: none"> <li>a. The use of chemical restraint for any individual.</li> <li>b. The combined use of seclusion and mechanical, and/or manual restraint.</li> <li>c. Standing orders for seclusion or any form of restraint.</li> <li>d. PRN orders for seclusion or any form of restraint.</li> <li>e. Prone manual or mechanical restraints.</li> <li>f. Transporting an individual in a prone position while being carried or moved.</li> <li>g. Use of seclusion or restraint as a part of a Behavior Support Plan (BSP) or an Individual Recovery Plan (IRP).</li> <li>h. The use of handcuffs for an individual not under the jurisdiction of the criminal justice system.</li> <li>i. The use of medication as a chemical restraint.</li> </ol> </li> <li>4. For individuals with co-occurring diagnoses including behavioral health and developmental disability/developmental disabilities, this service must target the crisis-related symptoms, behaviors, manifestations, and skills-development related to the identified issue.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Crisis Stabilization Unit (CSU) Services - Co-Occurring Intellectual & Developmental Disability (I/DD) Specialized Capacity

5. Individuals served in transitional beds may access an array of community-based services in preparation for their transition out of the CSU and are expected to engage in community-based services daily while in a transitional bed.
6. Medication must be administered by licensed medical personnel under the supervision of a physician or registered nurse in accordance with O.C.G.A. CSUs must also follow the pharmacy and medication policies in accordance with [CSU: Pharmacy Services and Management of Medication, 01-334](#).
7. Immediately upon admission, the CSU must implement its internal policies and procedures for managing crisis situations, based upon the individual's presenting behaviors and needs.
8. Within thirty-six (36) hours of admission, an individualized crisis plan must be developed (or updated, if one already exists) and implemented for each individual served by the CSU's clinical team.
  - a. Any needed behavior intervention component of this plan (i.e., ultimately resulting in a Positive Behavior Support Plan) should be added as soon as possible, but at a minimum, must be added in accordance with the timeframes and criteria listed in the Behavior Intervention Services item below.
  - b. CSU staff involved in the development and implementation of the individualized crisis plan should ensure ongoing consultation with the BCBA during the BCBA's assessment and planning processes to ensure continuity between the Positive Behavior Support Plan and other components of the crisis plan.
9. Behavior Intervention Services (only applicable to individuals with either a suspected presenting need for behavior intervention services at the time of admission, or who evidence a need at a later point during their stay):
  - a. As a component of the overarching individualized crisis plan, a BCBA must begin a functional behavior assessment of each individual within three (3) business days of admission, (or within three (3) business days of evidenced need; if this need was not identified at admission) to develop an individualized Positive Behavior Support Plan that addresses crisis-related behaviors.
  - b. If clinically indicated, an adaptive behavior assessment can be completed during the initial assessment by the appropriate credentialed provider. The CSU must use an established adaptive behavior assessment such as the Adaptive Behavior Assessment System, 3rd Ed. (ABAS-3), Vineland Adaptive Behavior Scales, 3rd Ed, etc.
  - c. In accordance with a needs assessment, CSU staff must work to identify any behavioral health and/or I/DD treatments and supports that will be needed post-discharge. When post-discharge behavior intervention services are indicated, the BCBA should assist in identifying and contacting an appropriate outpatient provider.
  - d. Positive Behavior Support Plans and behavior-change programs will be conceptually consistent with behavior analytic principles. Treatment implementation, fidelity, and progress monitoring will be informed by quantitative data collected on the individual's behaviors while admitted to the CSU.
  - e. Within seven (7) business days of admission (or within seven (7) business days of evidenced need; if this need was not identified at admission), a provisional Positive Behavior Support Plan must be developed (which is focused on the crisis-related behavior) and implemented.
  - f. Within ten (10) business days of admission (or within ten (10) business days of evidenced need; if this need was not identified at admission), a finalized Positive Behavior Support Plan must be fully implemented.
10. Training for natural and formal support persons (only applicable for individuals who receive behavior intervention services):
  - a. The staff of the CSU will provide training for the individual's natural and formal support persons.
  - b. The CSU will make accommodations to ensure that natural/formal support persons are able to participate in training regardless of their proximity in relation to the CSU.
  - c. This training shall, at a minimum, result in the following basic, introductory-level knowledge and competencies:
    - i. Knowledge regarding the individual's complete diagnoses;
    - ii. Knowledge regarding the positive behavior support plan developed on the unit;
    - iii. Knowledge and competence regarding how to respond to challenging behaviors;
    - iv. Knowledge and competence regarding how to prevent challenging behaviors;
    - v. Knowledge and competence regarding how to advocate for the individual's needs; and
    - vi. Knowledge and competence regarding how to respond and implement the crisis safety plan.

## Crisis Stabilization Unit (CSU) Services - Co-Occurring Intellectual & Developmental Disability (I/DD) Specialized Capacity

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Service Accessibility            | 1. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service, in accordance with <a href="#">CSU: Telemedicine Use, 01-354</a> and Part II, Section 1: Policies and Procedures, 1: Guiding Principles; B: Access to Individualized Services.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Additional Medicaid Requirements | 2. Crisis Stabilization Units with 16 beds or less may bill services to GAMMIS for Medicaid FFS recipients.<br>3. Medicaid claims for this service may <b>not</b> be billed for any service provided to Medicaid-eligible individuals in CSUs with greater than 16 beds.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Billing & Reporting Requirements | <p><b>NOTE: Type of Care Grid adjustments specific to length of stay are TBD.</b></p> <ol style="list-style-type: none"> <li>This service requires an initial authorization that can only be obtained through the bed inventory platform.</li> <li>The CSU shall submit prior authorization requests for all individuals served (state-funded, Medicaid funded, private pay, other third-party payer, etc.);</li> <li>The CSU shall submit per diem encounters (H0018 or H0018) for all individuals served (state-funded, Medicaid-funded, private pay, other third-party payer, etc.).</li> <li>Providers must designate either CSU bed use or transition bed use in encounter submissions through the presence or absence of the TB modifier. TB represents "Transition Bed."</li> <li>Unlike all other DBHDD residential services, the start date of a CSU span encounter submission may be in one month and the end date may be in the next. The span of reporting must cover continuous days of service and the number of units must equal the days in the span.</li> <li>Providers must submit a discharge summary into the provider connect/batch system within 48 hours of CSU discharge and must discharge the individual's episode in the bed inventory platform.</li> <li>For tracking purposes, and for these specialized capacity beds <u>only</u>, the CSU shall list the individual's I/DD diagnosis in the first position of the "Diagnosis" section within the Provider Connect Authorization.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Documentation Requirements       | <ol style="list-style-type: none"> <li>Individuals receiving services within the CSU shall be reported as a per diem encounter based upon occupancy at 11:59PM. At 11:59PM, each individual reported must have a verifiable physician's order for CSU level of care [or order written by delegation of authority to nurse or physician assistant under protocol as specified in § 43-34-23]. Individuals entering and leaving the CSU on the same day (prior to 11:59PM) will not have a per diem encounter reported.</li> <li>For individuals transferred to transitional beds, the date of transfer must be documented in a progress note and filed in the individual's chart.</li> <li>In addition to documentation requirements set forth in Part II of this manual, the notes for the program must have documentation to support the per diem including admission/discharge time, shift notes, and specific consumer interactions.</li> <li>Daily engagement in community-based services must also be documented in progress notes for those occupying transitional beds.</li> <li>All individuals must have an <b>individualized crisis intervention plan</b> which, for individuals needing crisis-related behavior intervention services, addresses the following elements: <ol style="list-style-type: none"> <li>In the overarching crisis plan: <ol style="list-style-type: none"> <li>Operational Definition of behaviors (if applicable);</li> <li>Description of situations in which the challenging behavior typically occurs (if applicable);</li> <li>Common warning signs and/or precursor behaviors that indicate a crisis is imminent (if applicable);</li> <li>Identification of staffing needed to carry out crisis curriculum procedures;</li> <li>Identification of equipment necessary;</li> <li>Contact information for additional staff that may be available for assistance;</li> <li>Specific crisis curriculum techniques to use for each challenging behavior;</li> <li>Protocols to access community-based crisis services to include the Georgia Crisis Response System, access emergency room care or law; enforcement, if the acute crisis presents a substantial risk of imminent harm to self and others must be included in the crisis intervention plan provided upon discharge; and</li> <li>Procedures for debriefing and documentation- A functionally appropriate debriefing should occur.</li> </ol> </li> <li>In the Positive Behavior Support Plan (PBSP) component of the crisis plan:</li> </ol> </li> </ol> |

## Crisis Stabilization Unit (CSU) Services - Co-Occurring Intellectual & Developmental Disability (I/DD) Specialized Capacity

- i. A PBSP provides the primary direction for/management of behavior intervention services in the CSU, and must therefore be included as a major and coordinated component of the overarching individualized crisis intervention plan, and can include the following standard elements:
  1. Background and Statement of Problem
  2. Relevant Medical History/Medical Necessity
  3. Functional Behavioral Assessment
  4. Reinforcer Identification
  5. Baseline Data
  6. Rationale for Current Plan and Procedures
  7. Behavioral Objectives/Behavior Goals
  8. Alterations to Interactions and the Environment
  9. Replacement Behavior Teaching & Skill Acquisition Training
  10. Reinforcement Procedures
  11. Strategies for Decreasing Inappropriate Behaviors
  12. Data Recording/Fidelity Monitoring
  13. Generalization, Maintenance, Fading Strategies
  14. Staff Training/Caregiver Training
  15. Program Monitoring
  16. Risks and Benefits
  17. Consent
  18. Data Collection Forms – Challenging, replacement behavior & skill acquisition
  19. Monitoring Forms/Fidelity Checklists
  20. Staff Training Records/Plan
- ii. For individuals who already have an active Positive Behavior Support Plan that was developed by another service provider, the CSU should use interventions from that existing Plan to inform the development of the interventions to be implemented during the crisis stabilization process.
6. For individuals needing crisis-related behavior intervention services, the CSU must have detailed documentation of the interventions that were identified in the Positive Behavior Support Plan, and that these were both attempted and exhausted before initiating more restrictive interventions.
7. For individuals needing crisis-related behavior intervention services, the CSU must maintain documentation of quantitative data, graphs and narrative analysis of behavior change programs, replacement behaviors, skill acquisition, and medication changes related to behavior intervention and the emanating crisis behaviors.
8. For individuals needing crisis-related behavior intervention services, the CSU must maintain documentation of fidelity monitoring regarding implementation of the Positive Behavior Support Plan and intervention competency training of staff and caregivers.

## Forensic Peer Mentor - Peer Support

### Service Description

Forensic Peer Mentor – Peer Support is a service intended to promote recovery and wellness, assist with community re-entry/integration efforts, and support a reduction in the likelihood of recidivism among judicially involved individuals with serious mental illnesses and/or co-occurring substance use disorders. Forensic Peer Mentors (FPMs) support individuals in preparing for a life free from judicial involvement, and provides ongoing support during and after release from judicial obligations.

The service is provided through partnership between participating judicial agencies, contracted providers of peer services, and the Georgia Department of Behavioral Health and Developmental Disabilities (DBHDD). The DBHDD contracts with providers of peer services, which employs Forensic Peer Mentors (FPM) to implement the service.

FPMs who deliver the service provide interventions that promote recovery, wellness, independence, self-advocacy, recidivism reduction strategies, and the development of natural supports among individuals involved in the judicial system. The goal of the service is to foster a positive and intentionally mutual relationship between a FPM and a judicially involved person with a behavioral health condition to resolve current, and prevent future involvement in the judicial system. In addition, the FPM assists individuals in regaining control over their own lives and recovery.

FPMs initiate and maintain relationships with associated judicial system agencies and team members to support peers in communicating progress, concerns, and any challenges or barriers to meeting judicial system requirements and expectations. FPMs attend facility/community trainings and staff meetings, as agreed to through collaboration with judicial agencies, and as outlined in MOU/MOA developed between judicial agency and provider of peer services.

The FPM initiates the service by using a person-centered engagement of peers who are currently involved in, or at increased risk of returning to, the judicial system. Through the use of their own recovery skills, and by initiating recovery dialogues (for example, sharing their own recovery story, exploring possibilities for recovery, building hope and recovery capital, and tapping into individuals' strengths), the FPM assists individuals in galvanizing the recovery process. FPMs utilize their unique lived experience to model the recovery journey; assist their peers in recognizing, understanding, and relating their own recovery stories; support their peers in the development of their own recovery goals and self-directed recovery processes; and promote a successful life of meaning and purpose in the community of each individual's choice.

In order to accomplish the goals of the service, the following trauma-informed, and culturally-competent recovery principles, self-help strategies, and self-advocacy supports are utilized:

- Exploring the need for:
  - a. Transitional supports/resources (housing, employment, financial, medical, mental health, transportation, food, clothing, state ID or driver's license, childcare, benefits, etc.);
  - b. Development of personal goals and articulating them;
  - c. Discovery of personal strengths and utilizing them to achieve goals;
  - d. Identification of potential outcomes, opportunities, and challenges/barriers in accomplishing goals;
  - e. Linkage to mutual self-help support groups and recovery-related social events, and encouraging participation;
  - f. Recognition of fears (i.e. in preparation for community re-entry, repairing relationships, living in recovery) and strategies for overcoming them;
  - g. Changes in thinking patterns and behaviors that put the individual at risk for further justice system involvement/recidivism; and
  - h. Exploration of individual, cultural, and faith-based connections, beliefs, and values.
- Development, supporting, and/or modeling of:
  - a. Problem-solving and healthy coping techniques;
  - b. Career/education motivation and related skills;

Individuals with the following conditions are excluded from admission unless there is clearly documented evidence of a co-occurring behavioral health condition: developmental disability, autism, neurocognitive disorder, or traumatic brain injury.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Required Components      | <ul style="list-style-type: none"> <li>1. FPM services are primarily provided in 1:1 CPS-F to person-served ratio and may additionally include FPM facilitated rehabilitative groups.</li> <li>2. Services should be person-centered and driven by the individual.</li> <li>3. Partnered-peer list ratio should be no more than 1:20.</li> <li>4. Peer Supports cannot operate in isolation from the rest of the programs within the facility or affiliated organization. The FPM shall be empowered to convene multidisciplinary team meetings regarding a participating individual's needs and desires, and the Forensic Peer Mentor must be allowed to participate as an equal practitioner partner with all staff in multidisciplinary team meetings. They also have the unique role as an advocate to the individual served, encouraging them to steer goals and objectives in Individualized Recovery Planning.</li> <li>5. Contact must be made with the individual receiving FPM services a <i>minimum</i> of twice each month. At least one of these contacts must be face-to-face and the second may be either face-to-face or telephone contact depending on the individual's support needs and documented preferences.</li> </ul> |
| Staffing Requirements    | <ul style="list-style-type: none"> <li>1. The providing practitioner is a Georgia-Certified Peer Specialist (CPS-MH or -AD), and has obtained additional certification as a Forensic Peer Mentor. <b>In addition, the following must be met:</b> <ul style="list-style-type: none"> <li>a. The practitioner must have, at time of hire, certification as a Georgia-Certified Peer Specialist (CPS-MH or -AD and</li> <li>b. At the discretion of the hiring provider, qualified CPS practitioners without the FPM-specific certification can be hired upon the condition of obtaining this certification within six (6) months of hire.</li> </ul> </li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

## Forensic Peer Mentor - Peer Support

|                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Service Description | <p>The Georgia Housing Voucher Program (GHVP) assists individuals in attaining safe and affordable housing. The GHVP supports community integration by providing immediate access to a housing subsidy. Supportive Housing includes integrated, permanent housing with tenancy rights, linked with flexible community-based services that are available to support individuals' behavioral health needs and promote stability in the community. The GHVP promotes housing as a foundation of recovery, active engagement, and person centeredness. The GHVP supports informed choice and is based on personal housing needs and preferences. The voucher is tenant-based, which allows individuals to choose an apartment location based on their needs. The program design does not mandate clinical services, however, participation in the GHVP will require engagement with supports that promote the individual's health, safety, and maintenance of housing stability.</p> <p>The program consists of:</p> <ol style="list-style-type: none"><li>1. The service participant;</li><li>2. Community-based service providers who provide one or more of the following:<ol style="list-style-type: none"><li>a. Bridge funding</li><li>b. "Wellness" case management interventions specific to GHVP participants</li><li>c. Housing supports (e.g., assistance with completing GHVP application/paperwork, identifying potential housing options, assisting with housing process, help with landlord communications, assistance with move-in process, providing support for housing stability needs, etc.); and</li></ol></li><li>3. The landlord/property owner.</li></ol> |       |       |       |       |       |             |                     |      |       |       |       |       |      |
| Admission Criteria  | DBHDD will solicit potential candidates for the GHVP from DBHDD state hospitals, crisis settings (e.g. BHCCs, CSUs, etc.), jails, prisons, hospital ERs, and the population of homeless individuals with mental health conditions. All individuals who meet the admission criteria are eligible. Selection will be based on current residential status, eligibility, availability of other housing placements or programs, income, the need for support services and the desired location's support service                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |       |       |       |       |       |             |                     |      |       |       |       |       |      |

## Georgia Housing Voucher Program

capacity, history of employment, criminal background, and daily living skill analysis. All selections are at the sole and absolute discretion of the DBHDD, and the DBHDD reserves the right to prioritize the target population based on need, budget considerations, or any other criteria established by DBHDD.

### 1. Criteria:

- a. The individual must be at least 18 years of age;
  - b. The individual, who is the Head of Household (HOH), must have a psychiatric diagnosis that qualifies as a Serious and Persistent Mental Illness (SPMI), as defined in [Georgia Department of Behavioral Health and Developmental Disabilities' Definition of Severe and Persistent Mental Illness, 01-121](#), and that has been verified in the past 12 months (individuals with a co-occurring SUD diagnosis or developmental disability are also eligible); **and**
  - c. The individual must meet at least one of the following:
    - i. Is currently experiencing homelessness, meaning an individual or family who lacks a fixed, regular, and adequate nighttime residence, such as those living in emergency shelters, transitional housing, or places not meant for habitation, or
    - ii. Is living in a DBHDD-funded residential program (e.g., CRR, transitional housing, CRA, CSU/BHCC, hotel/motel), and without such placement, would be at risk of experiencing homelessness, meaning that the household does not have sufficient resources or support networks immediately available to prevent them from moving to an emergency shelter or place not meant for habitation; or
    - iii. Is living in a HUD-funded temporary housing program and will be at risk of homelessness following the exhaustion of that resource. "At risk of homelessness" means the household does not have sufficient resources or support networks immediately available to prevent them from moving to an emergency shelter or place not meant for habitation, **and**
  - d. In addition, the individual must also meet at least one of the following:
    - i. Being served in a state psychiatric hospital (individuals currently receiving treatment in a DBHDD state hospital have automatic access to the GHVP upon referral submitted by a hospital social worker); and/or
    - ii. Frequently readmitted to state psychiatric hospitals and/or CSUs/BHCCs three or more times within 12 months; and/or
    - iii. Frequently seen in Emergency Rooms for psychiatric needs, three or more times within 12 months; and/or
    - iv. Chronically homeless (as defined by the Department of Housing and Urban Development - HUD); and/or
    - v. Currently being released from jail/prison (within the last 90 days); and/or
    - vi. Forensic status (as defined in [Initial Placement and Transfer of Individuals on Secure and Maximum Secure Units, 06-110](#));
  - e. For individuals living in a DBHDD residential program or facility, or in a HUD-funded temporary program, if the individual met one of the above eligibility criteria items 1.d. (ii-vi) prior to their admission, they can still be considered as meeting program eligibility.
2. At the sole discretion of the DBHDD, an individual who meets at least one of the criteria (1.d.i. through 1.d.vi) above, but not criterion 1.c.i. or 1.c.ii. above may still be considered for admission, depending upon voucher availability and the individual's circumstances.
  3. The DBHDD shall include any individual who satisfies the eligibility criteria above and who has a co-occurring condition, such as a substance use disorder and/or developmental disability.
  4. The individual must have the ability to live on their own with housing stability supports, as determined by the referring provider.
  5. Household income must not exceed 50% of Area Median Income (AMI), as determined by HUD for the household size in the county of preference.
  6. Prior admission to and discharge from GHVP does not mean people continue to be eligible for admission. If someone was discharged, they must reapply.

### Continuing Stay Criteria

1. Adherence to individual's lease agreement with the landlord/property owner.
2. Adherence to GHVP regulations and guidelines, including tenant responsibilities.
3. Ongoing participation in wellness case management or housing support services.
4. Ongoing and timely payment of the tenant portion of rent.
5. Household income may not exceed 50% AMI.

## Georgia Housing Voucher Program

| Discharge Criteria  | <p>Where possible, every effort should be taken by the Service Provider(s) to avoid loss of housing and the need for discharge from the program. Termination of a GHVP-subsidized lease means rental payments must stop but does not mean an individual must be discharged from the program. Individuals should continue to receive assistance with seeking new housing and remain eligible for Bridge Funding unless program discharge proves appropriate.</p> <p>Service Providers must follow any discharge protocol as determined by DBHDD.</p> <p>Individuals may be discharged from the GHVP for the below list of reasons:</p> <ol style="list-style-type: none"> <li>1. Individual no longer wishes to participate in the GHVP.</li> <li>2. Individual is no longer able to participate in the GHVP due to long-term incarceration or hospitalization longer than 90 days, or due to head of household death.</li> <li>3. Individual no longer meets expectations set forth in the Continuing Stay Criteria.</li> <li>4. Individual is transferred to another housing program that provides housing subsidy.</li> <li>5. Individual who is enrolled in GHVP becomes unhoused and is not able to secure new housing for a period of more than 120 days.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |              |                                          |           |     |            |     |            |     |            |     |            |      |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|------------------------------------------|-----------|-----|------------|-----|------------|-----|------------|-----|------------|------|
| Required Components | <ol style="list-style-type: none"> <li>1. Housing Need and Choice Survey, Unified Referral, &amp; Access to Affordable Housing               <ol style="list-style-type: none"> <li>a. This DBHDD housing need and choice tool is required with every referral package to the DBHDD Regional Field Office. The purpose of the tool is to provide the individual with information to make an informed choice and to document that there is a need for Supportive Housing.</li> <li>b. Providers wishing to make application for the GHVP on behalf of an individual must comply with the Unified Referral Process (URP) as outlined in <a href="#">Supported Housing Needs and Choice Survey, 01-120</a>.</li> <li>c. Former GHVP participants may reapply through the standard process if/when their GHVP voucher expires and no extension has been granted by the RFO .</li> <li>d. Individuals who are currently receiving treatment in a state hospital have automatic access to the GHVP upon referral submitted by the hospital social worker.</li> <li>e. The GHVP may collaborate with Public Housing Authorities (PHAs) for use of Housing Choice Voucher (formerly known as Section 8) resources. Upon renewal of the GHVP voucher, the partnering PHA will renew the voucher under the funds, policies, and procedures of that agency's Section 8 HCV program.</li> <li>f. All individuals initially provided with a GHVP voucher must accept the Housing Choice Voucher if offered and if eligible under that particular program.</li> <li>g. Current Service Provider or any subsequent provider of support services is expected to help enroll the individual on federal housing support programs for which the individual is eligible (i.e., HUD 811, Housing Choice Voucher Program).</li> </ol> </li> <li>2. Determination of the Unit Size for the Household Composition - The GHVP has established subsidy standards that determine the number of bedrooms needed for the household size and composition:               <p>The GHVP will use the following chart in determining the appropriate voucher for a household:</p> <table border="1" data-bbox="367 1133 1167 1382"> <thead> <tr> <th>Voucher Size</th><th>Persons in Household (Minimum – Maximum)</th></tr> </thead> <tbody> <tr> <td>1 Bedroom</td><td>1-2</td></tr> <tr> <td>2 Bedrooms</td><td>2-4</td></tr> <tr> <td>3 Bedrooms</td><td>3-6</td></tr> <tr> <td>4 Bedrooms</td><td>4-8</td></tr> <tr> <td>5 Bedrooms</td><td>6-10</td></tr> </tbody> </table> </li> </ol> | Voucher Size | Persons in Household (Minimum – Maximum) | 1 Bedroom | 1-2 | 2 Bedrooms | 2-4 | 3 Bedrooms | 3-6 | 4 Bedrooms | 4-8 | 5 Bedrooms | 6-10 |
| Voucher Size        | Persons in Household (Minimum – Maximum)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |              |                                          |           |     |            |     |            |     |            |     |            |      |

| 5 Bedrooms          | 6-10                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |              |                                          |           |     |            |     |            |     |            |     |            |      |

## Georgia Housing Voucher Program

- a. The Head of Household (HOH) must inform their Service Provider/DBHDD of the composition of the household. Prior approval for additional residents (beyond the HOH) must be approved by DBHDD.
- b. The HOH must promptly inform the Service Provider/DBHDD of any change in household composition in the GHVP-funded apartment. Other persons may not be added to the household without prior written approval of the landlord/property owner and the Service Provider/DBHDD.
- c. The GHVP does not determine who within a household will share a bedroom/sleeping room.
- d. The following requirements apply when determining the size of the unit:
  - i. The subsidy standards must provide for the smallest number of bedrooms needed to house the intended occupants without overcrowding (see table above);
  - ii. The subsidy standards must be consistent with space requirements under the housing quality standard;
  - iii. The subsidy standards must be applied consistently for all households of like size and composition;
  - iv. The subsidy standards are applied for the household composition at the time of admission into the program.
- e. Any live-in aide (must be approved by GHVP for medical reasons) must be counted in determining the household unit size;
- f. A household size consisting of a single individual must be either a zero-bedroom (i.e., a studio or efficiency unit) or one-bedroom unit. At the DBHDD's full and absolute discretion, approval may be granted for a two-bedroom unit that meets all requirements of the GHVP and that has a rental value less than or equal to the Maximum Rent of a one bedroom if there is a verified lack of one-bedroom rental unit inventory within the individual's desired county of residence.
- g. For households with more than one Head of Household (HOH), GHVP will assign separate bedrooms to individuals in the household under the following circumstances:
  - i. A single/unmarried head of household will be assigned a separate bedroom (married spouses will share a bedroom) from any other adults or children who are officially approved to reside in the home and who are included in the household size determination (including live-in aides);
  - ii. Two or more children (under age 18) of the same gender will be assigned a shared bedroom, which is separate from the head of household's bedroom;
  - iii. Two or more children (under age 18) of different genders will be assigned separate bedrooms from one another, and which are separate from the head of household's bedroom.
  - iv. Individuals who report as married must present their marriage license or otherwise sufficient evidence of marriage. GHVP does not accept common law marriage status for placement.
  - v. Households admitted with minor children, who have turned 18 are able to remain in the household based on: 1) active enrollment in school or 2) active employment, with a maximum age for both of these scenarios being 25 years old.
- h. In determining household size, the GHVP may grant an exception to its established subsidy standards if the GHVP determines that the exception is justified by the age, gender, health, handicap, relationship of family members, or other personal circumstances. Reasons may include but not limited to:
  - i. A need for an additional bedroom for medical equipment;
  - ii. A need for a separate bedroom for reasons related to a family members disability, medical, or health condition. The household's request for an exception to the subsidy standards must be in writing. The request must explain the need for justification for a larger family unit, and must include appropriate documentation. Requests based on health-related needs must be accompanied by verification from a licensed professional (e.g., doctor or other health professional). The household's continued need for an additional bedroom due to special medical needs must be re-verified at annual reexamination.
- i. In the interest of child welfare, households that include minors (anyone under 18 years of age) must provide legal documentation providing proof of the parental/familiar relationship prior to lease approval by the Regional Field Office, without exception.
- j. Households with children must have primary custody of children for the determination of household size.
- k. The GHVP-funded unit may only be used for residence by the DBHDD approved household members. The unit must be the family's only residence.
- l. The tenant may not sublease or let the unit.

## Georgia Housing Voucher Program

- m. The tenant may not assign or transfer the leased unit.
  - n. The tenant may not conduct any business activity in the GHVP-funded unit.
  - o. The tenant may not use the leased unit for illegal activities.
  - p. A household guest can remain in the unit no longer than 14 consecutive days or a total of 30 cumulative calendar days during any 12-month period. This is intended to prevent a guest from establishing legal residence at the property which can compromise the household's tenancy.
3. Income and Rent Determination
- a. Tenant Contribution
    - i. For initial leases, all individuals with financial means will be required to contribute 30% of their income toward their living expenses (tenant paid utilities, rent, and initial start-up expenses).
    - ii. If an individual has no income at the time of program entry, it is recommended the individual locate a unit that includes utilities.
    - iii. Individuals with zero income must meet the affordability threshold as determined on the GHV-5 rental calculation.
    - iv. Financial gifts/or contributions are not used to determine affordability of a unit, unless those contributions are coming from a community agency and/or church for long term supports.
    - v. Individuals with zero income, with the assistance of the provider, must submit a plan of action steps to achieve financial supports and income.
    - vi. For initial/new leases, households may not pay more than thirty-five percent (35%) of their household income toward rent and utilities.
    - vii. In no case, without prior DBHDD approval, will DBHDD allow the individual to pay more than 40% of their income toward rent and utilities.
    - viii. At lease renewal, individuals may pay as much as 40% of their income toward rent and utilities.
  - b. Individuals being referred to GHVP who report zero income must receive assessment for employment supports and should receive appropriate referral to employment resources and/or federal benefits such as SSI/SSDI through the SOAR program in tandem with their housing referral. Individuals housed with GHVP that continue to report no income must receive assistance with pursuing employment and benefit options.
  - c. Rent Determination
    - i. If approved for the GHVP, calculations to determine the tenant's portion of the rent will include any additional tenants' income.
    - ii. GHVP-5, Rent Determination Payment Standard Income Certification form must be used as part of the initial submission package.
    - iii. All household income must be included.
    - iv. All adult non-student and non-related members must contribute their pro-rated share of the rent before calculations are made for the GHVP covered individual.
  - d. Change in Tenant Income During the Lease Term
    - i. When the provider notifies DBHDD of a change in household income during the lease term, supporting income documentation must be provided.
    - ii. If the individual reports an increase or decrease in income, at least one of the following is required and must be submitted for verification:
      - 1. Check stubs,
      - 2. Letter from the employer, whether regarding a pay change or separation from employment.
      - 3. Letter from the Social Security Administration,
      - 4. Statement from the payor source.
    - iii. When a household reports a substantial or complete loss of income to the provider, the provider must support the household with a referral to employment resources and supports (e.g. Supported Employment, Georgia Vocational Rehabilitation Agency, etc.) and/or applicable benefits (e.g. SOAR referral to pursue SSI/SSDI, SNAP/EBT, TANF, etc.).
  - e. **Effective Date of Payment Change:** If a household that already has income has their household income increase more than 75%, an adjustment to the voucher payment amount is required mid-lease. To determine increase percentage, divide new income by old income amount, if greater than 1.75, an adjustment is required mid-lease.
    - i. If the income increase is less than 75%, adjustment to the voucher payment amount is required at the next regular renewal.

## Georgia Housing Voucher Program

- ii. If a household with no income starts receiving income of more than \$500, an adjustment to the voucher payment amount is required mid-lease. If less than \$500, adjustment to the voucher payment amount is required at the next regular renewal.
  - iii. In all cases, a redetermination of income and eligibility based on the current household income level must occur as part of each lease renewal process.
- 4. Service Provider Roles, Responsibilities and Conditions of Participation in the GHVP
  - a. All individuals newly enrolling, and currently enrolled in the GVHP are expected to engage in support services that promote community integration, coordination of desired services, and housing stability.
  - b. The Housing Support Program is intended to take on the majority of the below responsibilities to support the individual's housing success and reduce the burdens placed on community-based providers. In the absence of a Housing Support program provider, the referring agency remains responsible for the below activities. The introduction of a Housing Support provider does not negate or replace the importance of the community provider, which is most often serving as the household's primary clinical provider. Coordination of care and work toward achieving the household's housing goals is essential for this support system to work. DBHDD providers have a responsibility to collaborate proactively with each other around the coordination of care. This includes the sharing of important critical care documents and forms that are necessary for the Housing Support provider to enroll the individual into supports and to understand the type of ongoing non-clinical supports the household will need.
  - c. Each prospective tenant must have an Individualized Recovery Plan that documents the tenant's desire to live independently, the individual's support service needs, the Current Provider responsible for supporting their transition into the community and into housing, once approved for the voucher, it should include the Housing Support Program service provider responsible for on-going supports matched to their needs. Interagency coordination of care is an expectation and requirement for all agencies and future updates to the IRP should incorporate all DBHDD providers supporting the individual.
  - d. The current Service Provider is responsible for facilitating transition of a tenant from their current residential placement (e.g. hospitals, homelessness, correctional institutions, crisis stabilization units, and residential treatment settings) into an independent community rental unit with full tenancy rights.
  - e. The Provider must offer housing choice, which is central to the program. Providers will ensure that individuals are offered options consisting of multiple potential locations that meet program and rent standard guidelines. The Service Provider may use resources such as the <http://www.georgiahousingsearch.org> web site, [www.gosection8.com](http://www.gosection8.com); social media outlets, the HUD 811 apartment listing, and other resources that provide information on the availability of affordable housing units.
  - f. The current Service Provider will explain policies of the program including the requirement to accept other rental assistance programs if offered, reasons for disbarment from the program, and the role of choice in housing options and locations.
  - g. All individuals enrolled in the GHVP shall receive support for the following:
    - i. Screening and housing assessment for an individual's preferences and barriers;
    - ii. Developing an individual housing support plan: Identifying goals, addressing barriers, establishing approaches to meet their goals, including identifying available services/resources;
    - iii. Assisting with housing application, and search and move-in processes;
    - iv. Purchase of initial household furnishing, deposits, household goods for their one-time move-in needs;
    - v. Developing a housing support crisis plan;
    - vi. Safety and Wellness Checks
    - vii. Property Unit Inspections;
    - viii. Early intervention to mitigate factors impacting housing stability (e.g. late rent payment, lease violations, tenant/landlord or property owner conflicts);
    - ix. Education on roles, responsibilities, rights of tenant and landlord/property owner;
    - x. Coaching on relationship-building with landlords/property owners, managers, and neighbors, and assisting in dispute resolution;
    - xi. Linking with community resources to prevent eviction;
    - xii. Assisting individual with his/her housing recertification process;

## Georgia Housing Voucher Program

- xiii. Identification of properties that will accept the GHVP.
5. Bridge Funding
- a. Bridge Funds are available for one-time initial move-in expenses as well as some as-needed supports and in few cases, on a temporary but ongoing basis. Please refer to the Supportive Housing Help Center online at [GHVP.ZenDesk.com](https://www.gohvp.com/ZenDesk.com) for accurate Bridge Funding guidance.
  - b. In order to be reimbursed, the Service Provider must submit purchase receipts that correspond with allowable expenses on the Bridge Funding Request form, and the total of these receipts must equal the total amount stated on the Bridge Funding Request form.
  - c. Community providers may continue to claim the "Provider Fee" when they are the lead responsible agency for the individual's housing needs. When a Housing Support Program (HSP) contracted provider is leading this work, the community provider may not claim this fee. The Housing Support provider is never eligible to claim this reimbursement.
    - i. \$500 is approved for initial GHVP leases.
    - ii. \$500.00 is approved for GHVP Renewals.
    - iii. \$250 is approved for transfers to a new program.
  - d. **Household Start-Up Expenses:** A household budget up to \$3,000 is approved for each household. This includes fees associated with the leasing process (e.g. application fees, utility deposits), the purchase of household furniture, household goods (plateware, silverware), clothing, first month's groceries, etc. Receipts are required for claim submission.
  - e. Bridge Funding Payments for Federal Housing Assistance Programs
    - i. Bridge Funding will be permitted for individuals who are approved and determined eligible through the Unified Referral Process (URP) for federal housing assistance programs.
    - ii. For new individuals, a one-time initial move in expense is approved (as listed on the GHVP-3 Bridge Funding Request- HUD Federal Assistance Programs Only Form). \$3,000 is approved for new applicants (Up to \$2,500 for eligible expenses and \$500 provider fee).
    - iii. For GHVP Transfers to a federal housing assistance program, a one-time initial move in expense is approved (as listed on the GHVP-3 Bridge Funding Request- HUD Federal Assistance Programs Only Form). The Provider will receive a \$500.00 fee for completing the GHVP Transfer.
  - f. Total Bridge Funding requests exceeding the household's allotted or remaining budget must receive DBHDD pre-approval before expending the money on the tenant's behalf and must be supported with proposed estimates.
  - g. Bridge funding on a case-by-case basis may be (at the discretion of DBHDD) used for the following:
    - i. Abatement of bed bugs
    - ii. Economic hardship for a utility payment
    - iii. Moving expense when the landlord/property owner no longer accepts the GHVP and the tenant must move due to no fault of their own.
  - h. **Landlord Risk Mitigation / Eviction Prevention:** A budget of \$1,000 is available to each household to assist with the prevention of a potential eviction through the coverage of damages caused by the household, or to help with relocation when an eviction/displacement cannot be avoided. These funds can also be used to help cover outstanding fees/costs with the property to preserve the program's relationship with the property.
  - i. **Security Deposit:** A budget of up to \$2,500 is approved for the payment of a Security Deposit required by the property lease requirements. Security Deposits are to be paid back to the tenant by the property after the conclusion of the lease. Those funds should be utilized to cover any outstanding costs at the conclusion of the lease and to support the household with costs of relocation to another property. Providers assisting with relocation should support households with recovering these expenses and supporting their re-utilization.
  - j. **Temporary Shelter:** A budget of \$1,500 is approved for Temporary Shelter to provide individuals with short-term safe housing while they are still searching for housing or in the event they must temporarily relocate. This can include hotel/motel stays or a shelter bed setting. Receipts are required for claim submission.
  - k. **Landlord Administrative Fee:** Bridge Funding use is approved for a Landlord Administrative Fee to incentivize property participation in the program. Each household is approved for a total of \$1,500, with an allowance to offer the property an administrative fee of no more than \$750.

## Georgia Housing Voucher Program

- i. **Inspection Repair Costs:** A budget of \$1,000 is approved for the reimbursement of repairs needed at a property to support its ability to pass required Housing Quality Standards inspections. Repairs must be completed and unit must pass inspection before a formal receipt from the property can be reimbursed by the provider using Bridge Funding. Receipts are required for claim submission.
  - m. **Short-Term Utility Assistance:** A budget of \$2,500 is approved for deployment by Housing Support Program providers for the limited-time coverage of household utility expenses necessary for the maintenance of their housing. Providers must actively pursue the initiation of benefits or income. Receipts are required for claim submission.
    - i. The individual is expected to use their own financial resources (e.g. referral to SOAR and/or Supported Employment) to meet the needs of any subsequent costs associated with utilities. Neither the GHVP nor the Bridge program provides long-term financial support for on-going utility assistance. Short-term utility assistance is available via Housing Support providers.
6. Landlords/Property Owners and the Apartment Unit
  - a. The rent paid to landlords/property owners shall not exceed rent for a comparable, non-GHVP assisted unit in the same complex.
  - b. In order for a landlord/property owner to participate and to receive payments, the landlord/property owner must agree to:
    - i. Participate in direct deposit (EFT) payments through PaySpan. Landlords/property owners may sign up by contacting PaySpan customer service at 1-877-331-7154.
    - ii. Allow an Annual Housing Quality (HQS) Inspection of any unit for which the landlord/property owner is receiving payment.
    - iii. Provide IRS Form W-9 and one of the following IRS documents before a rental payment can be paid or a lease is signed under the GHVP:
      1. IRS Form 147C or IRS Form CP575A as verification of Tax ID number, or
      2. For a landlord/property owner that is not a commercial entity, the submission of a Social Security Card.
  - c. The tenant is fully responsible for all damages done to the unit. However, if applicable, Bridge Funding may be used to assist with damages to the unit caused by the tenant to preserve the landlord relationship. This is the purpose of the Landlord Risk Mitigation funds available for each household to prevent eviction and loss of property partnership with the program.
  - d. DBHDD will renew an individual's enrollment in the GHVP at its sole and absolute discretion. DBHDD is under no obligation to approve an automatic lease renewal.
7. GHVP Transfers, Portability, Disbarment, and Reapplication:
  - a. The GHVP is portable. Individual must communicate their desire to transfer to the Service Provider at least 90-days before the end of the current lease. The regional office will complete the Transfer Request Form and ensure the following:
    - i. Individual cannot be in arrears on rent and/or utilities;
    - ii. Individual must have clearance from the appropriate authority if individual is involved in any open investigations from a government agency and/or criminal proceedings (e.g., open child protection case, currently on probation/parole, current pending charges);
    - iii. Individual must have the ability to cover moving expenses (GHVP is not financially responsible and Bridge does not cover these expenses);
    - iv. Individual must have a minimum of six months of financial stability, with steady income and ability to manage household budget and expenses; and
    - v. Individual must be in compliance with their current lease.
  - b. Program Disbarment: DBHDD may at its sole and absolute discretion, disbar any individual from future participation in the GHVP if the household violates any of the program guidelines outlined in this policy or in documentation signed by the head of household.
  - c. Reapplication
    - i. Former GHVP participants may reapply, and if deemed eligible, may be approved for GHVP.

## Georgia Housing Voucher Program

8. Halting Rental Payments: Individuals may have their GHVP payments halted for the reasons outlined below. Halting payment occurs when an individual must leave their approved housing, meaning this also occurs in the process of changing housing locations. Halting payment does not necessarily mean that an individual has been discharged from the program.
  - a. Stopping of rental payments may occur under any of the following conditions:
    - i. Eviction by the landlord/property owner. Eviction does not guarantee discharge or disbarment from the program.
    - ii. It is determined that the tenant is no longer occupying the unit or has abandoned the unit.
    - iii. Tenant changes housing locations.
    - iv. Tenant is no longer enrolled in the GHVP or is in the process of being discharged.
  - b. The GHVP may continue to pay for a vacated unit due to a brief hospitalization or minor incarceration on a case-by-case basis, if approved by DBHDD program leadership.
  - c. Service Provider requirements related to tenant occupancy and payment termination:
    - i. If the Service Provider becomes aware that a tenant is no longer occupying the assigned unit, Service Provider will notify DBHDD and submit appropriate information within 48 hours.
    - ii. The current Service Provider and any subsequent provider primarily responsible for support services will be required to notify DBHDD if there is any change to the tenant's residency status.
    - iii. The Service Provider will notify the landlord/property owner that the Rental Assistance Payment will end.
9. Master Leasing Agreements (MLAs): Master Leasing Agreements (MLAs) can help create additional housing options for individuals with multiple housing barriers. GHVP allows MLAs in which there is a master lease contract between a Service Provider and a Landlord/Property Owner in order to lease apartment units under the name of the Service Provider and sublease the units directly to individuals in the GHVP.
  - a. Service Providers that wish to offer MLAs do not require a separate agreement with DBHDD and must adhere to the following requirements:
    - i. The sub-lease must be in the individual's name.
    - ii. The individual must maintain all tenancy rights.
    - iii. The tenant must maintain their right to privacy.
    - iv. The rental rate of the sublet unit charged to the tenant may not exceed the market rate of the unit as paid by the Service Provider.
    - v. No more than 20% of the units in a single building with at least 5 units may be GHVP-funded.
    - vi. The tenant remains responsible for their portion of the rent as well as any damages for which the tenant is responsible.
    - vii. DBHDD is not responsible for the cost of vacant units or any administrative costs associated with master leased units.
  - b. In order to ensure a GHVP recipient has the benefit of consumer housing choice, the Service Provider must also identify at least two additional housing options that are not part of an MLA involving the same Service Provider.
  - c. Service Providers must provide DBHDD with the lease document executed between the tenant and Service Provider as part of the normal GHVP documentation requirements, AND in addition must submit a copy of the executed agreement between the Service Provider and the landlord/property owner.
10. Provider Access to GHVP:
  - a. DBHDD may limit current Service Provider access to the GHVP at its sole and absolute discretion. Only those providers that currently are in good standing with DBHDD, that have a DBHDD contract or LOA for the provision of ACT, CST, ICM, CM, PATH, CRR, and/or that are designated as Core Tier 1 providers may submit referrals to DBHDD. DBHDD may further limit access from time to time to specific providers or a class of providers.
  - b. No Service Provider that is also a Shelter Plus Care Grantee will be allowed to refer an individual who is homeless to the GHVP unless the federal definition of "homeless" restricts the use of available Shelter Plus Care resources, or the Shelter Plus Care program is fully subscribed and with a wait list.
11. Fidelity Monitoring and Program Evaluation

## Georgia Housing Voucher Program

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Documentation Requirements       | <ol style="list-style-type: none"> <li>GHVP Forms and Descriptions <ol style="list-style-type: none"> <li>Current Service Providers must use the GHVP forms provided by the DBHDD's Office of Supportive Housing. Any outdated forms may not be accepted and may result in the loss of all or part of the provider fee.</li> <li>The latest GHVP required forms and documents can be found on the Supportive Housing Help Center online at GHVP.ZenDesk.com. Providers must also use this platform to submit inquiries for assistance and will need to create an account to access the system securely.</li> </ol> </li> <li>All Current Providers are required to use the Submission Checklist (for New Leases, Renewals, Terminations, Changes in Payments, etc.) and when submitting documents to DBHDD for GHVP payments. Service Providers should use the most current version of the GHVP Checklists which can be found online on the Supportive Housing Help Center (GHVP.Zendesk.com) <p>If the following documents are already on file, they are not required again for renewal:</p> <ul style="list-style-type: none"> <li>Picture ID for Head of Household</li> <li>Social Security Card or SSN Verification Letters for all household members</li> <li>Birth Certificate for all household members</li> </ul> </li> <li>It is vital for the GHVP program's sustainability that the authorization for an individual to receive services and supports under the Housing Support program is kept current. The following steps will ensure that all services to be delivered under the Housing Support program maintain a current authorization: <ol style="list-style-type: none"> <li>Individuals, at a minimum, must receive an annual Behavioral Health Assessment. This annual requirement can be completed by the individual's assigned Housing Support program provider or an alternative DBHDD behavioral health provider, such as the local Community Service Board.</li> <li>Individualized Recovery Plans must remain current (individuals must be seen by an applicable provider prior to the expiration of their current authorization). Need for housing support services should be reflected on the treatment plan and can be part of an overall treatment plan.</li> <li>These requirements do not negate individual choice, and providers must seek to honor individual choice as much as possible while ensuring the above requirements.</li> </ol> </li> </ol> |
| Billing & Reporting Requirements | <ol style="list-style-type: none"> <li>Service Providers may bill in accordance with the Service Guidelines as defined in the Behavioral Health Provider Manual for the service in which a GHVP individual is enrolled.</li> <li>Bridge Funding Reimbursement <ol style="list-style-type: none"> <li>Submitting Claims: <ol style="list-style-type: none"> <li>Providers should access the ASO ProviderConnect Portal to submit all bridge claims reimbursements.</li> <li>Providers should utilize the Bridge Funding Service Claims Submission Quick Reference Guide as a resource for entering claims reimbursements.</li> <li>ProviderConnect can be accessed by using this link: <a href="https://www.valueoptions.com/pc/eProvider/providerLogin.do?client=GACO">https://www.valueoptions.com/pc/eProvider/providerLogin.do?client=GACO</a>. <ol style="list-style-type: none"> <li>A User ID and Password is required and must be created by the agency's Super User.</li> </ol> </li> </ol> </li> <li>Claim Requirements <ol style="list-style-type: none"> <li>Bridge reimbursement requests must be submitted within 90 days of the expense and cannot be reimbursed if submitted later than 180 days.</li> <li>Claims must be submitted in accordance with programmatic Bridge Funding guidelines. The latest guidelines can be found online at GHVP.Zendesk.com.</li> </ol> </li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Georgia Housing Voucher Program

- iii. All claims must be submitted through the ProviderConnect direct claims entry process and cannot be submitted via batch because of the receipt requirement.
- c. Receipts
  - i. Receipts must be from a valid store, vendor, or business and must have the business name, date of payment, and amount paid.
  - ii. If the receipt is for fees paid to the Provider (e.g., Initial, Renewal fee, etc.) then an invoice style receipt will be sufficient on agency letterhead or other form with the agency name.
  - iii. If items on the receipt are not an approved reimbursable item, draw a line through the items.
  - iv. Ensure the amount on the claim matches the amount to be reimbursed from the receipt.
  - v. The Georgia Collaborative ASO's claims staff will review all submitted receipts.
- d. Payments
  - i. Claims are paid on a weekly basis. The Provider has the option to receive payments via ACH or paper check.
  - ii. All claims submitted and adjudicated by The Georgia Collaborative ASO's claims staff will be paid with Each Tuesday's check run.
  - iii. Any claims that have been paid and later it was identified that the expense was outside of the guidelines will require the claim to be reversed and payment recouped.

## Housing Support

| Service Description | The Housing Support program (HSP) represents a critical component of Permanent Supportive Housing as outlined in the Evidence Based Practices Toolkit from SAMHSA. In its fullness, this program is comprised of recovery supports to sustain permanent housing. In FY24, the parameters of the service were expanded to allow the provision of Housing Support services to individuals as they transition out of the state-funded Georgia Housing Voucher Program (GHVP) to federally-funded housing programs, inclusive of the Housing Choice Voucher and HUD 811 Program. HSP can also be extended to individuals who choose to pursue initial housing placement through a federal program instead of through GHVP on the basis of their belonging to the target population for GHVP. Transition to and utilization of federally funded housing resources provides the state with additional capacity to serve more individuals through GHVP with limited state resources. The targeted federal programs include the Housing Choice Voucher Program and the HUD 811 program. Access to housing supports may also be extended to additional supported housing projects at the sole discretion of DBHDD based on funding availability for those who meet GHVP criteria. All GHVP-enrolled individuals are required to engage in the Housing Support program in order to promote community integration, coordination of desired services, and long-term housing stability. The Housing Support program is a required element of the program for all individuals entering the Georgia Housing Voucher Program (GHVP) or renewing their lease under GHVP, as of April 1, 2022. In all cases, access to housing is not contingent upon the acceptance of clinical treatment services, in accordance with the Housing First philosophy and approach, which has been adopted by DBHDD, the Georgia Department of Community Affairs (DCA) - the state's housing authority, and the federal US Department of Housing and Urban Development (HUD). |      |       |       |       |       |      |             |      |       |       |       |       |      |

## Housing Support

The Housing Support program is comprised of multiple supports designed to assist individuals living in permanent supportive and/or subsidized housing in order to promote ongoing housing stability and provide a foundation for recovery. All individuals enrolled in the Housing Support program must receive the following types of support:

1. Assistance with housing search, leasing, and move-in processes;
2. Purchase of initial household furnishing, deposits, household goods for the one-time move-in needs;
3. Safety and wellness checks and housing safety inspections;
4. Developing a Housing Stability Support Plan as an adjunct to an individual's IRP;
5. Early intervention to mitigate factors impacting housing stability (e.g., late rent payment, lease violations, tenant/landlord or property owner conflicts);
6. Education on the roles, responsibilities, and rights of tenant(s) and the landlord/property owner; and
7. Assistance with the annual housing recertification and inspection process.
8. Assistance with application to public benefits (SSI/SSDI, SNAP, Medicaid, WIC, etc.) and/or linkage to employment support resources.
9. Assistance with application to federal housing resources and all processes related to successful transitions, when an individual is deemed appropriate for transition.

All individuals enrolled in the Housing Support program shall receive any of the following supports, according to their needs and preferences:

1. Completion of supportive housing referral and application processes;
2. Landlord engagement, recruitment, and enrollment;
3. Coaching on relationship-building with landlords/property owners, managers, and neighbors, and assisting in dispute resolution; and
4. Linking with community resources to prevent eviction.

This program is provided to adults living in permanent subsidized housing in order to promote housing stability, wellness, independence, recovery, and community integration. Housing stability is measured by ongoing housing and by decreased number of hospitalizations/ER visits/incarcerations, by decreased frequency and duration of crisis episodes, and by increased and/or stable participation in maintenance of personal housing stability and wellness. Supports based on the individuals' needs are used to promote resiliency while understanding the effects of SPMI and lived trauma. The Housing Support staff will serve as the first point of contact for landlords/property owners for any issues arising with an individual in supportive housing, and will provide linkage to community; general entitlements; and psychiatric, substance use disorder, medical services, crisis prevention, and intervention services.

The Housing Support program is comprised of a group of interventions including items 1-10 below as well as elements which are defined herein which are not billable via traditional rehabilitation codes. Supports are based on individual need and could include (but are not limited to) the coordination of DBHDD services with community services/supports and financial assistance to help offset the costs of an approved provider's staff time for non-billable activities such as travel, meeting and conference attendance, trainings, and other related activities.

Specific allowable DBHDD behavioral health services (see the Service Definition for each service listed below in this Provider Manual):

1. Case Management (CM)
2. MH and/or SUD Peer Supports (PS)
3. Psychosocial Rehabilitation – Individual (PSR-I)
4. Addictive Disease Support Services (ADSS)
5. Crisis Intervention
6. Community Residential Rehabilitation (CRR-IV)
7. Community Transition Planning (CTP)
8. Behavioral Health Assessment (BHA)

| Discharge Criteria       | <ol style="list-style-type: none"> <li>Individual no longer meets admission criteria.</li> <li>Individual cannot comply with basic contact requirements to complete necessary programmatic and paperwork requirements to remain enrolled in their subsidized housing program. Refusal to engage with support team is, on its own, not grounds for discharge unless it prevents the completion of required paperwork and processes. <ol style="list-style-type: none"> <li>There must be at least 4 documented unsuccessful attempts at making contact over the course of at least 60 days.</li> </ol> </li> <li>Individual chooses to leave the subsidized housing program. In this case, discharge from Housing Supports should only occur after obtaining documentation of their formal discharge from their housing subsidy program.</li> <li>Individual has to exit their current residence (not due to discharge) and is unable to obtain new housing within the program's allowable time limit. Support should continue to be rendered during this time to locate new housing.</li> </ol>                                                                                                                                                                                                             |
| Service Exclusions       | <ol style="list-style-type: none"> <li>Community Residential Rehabilitation Levels 1-3 are excluded unless individual has a voucher for subsidized housing and is seeking a transition out of a residential program into permanent housing.</li> <li>Addictive Disease Residential Programs are excluded, as supports are already a part of those programs and they typically do not serve individuals living with SPMI.</li> <li>Individuals authorized for Housing Support services are exempt from the Case Management service exclusion that is included in the Service Definitions for Assertive Community Treatment (ACT), Intensive Case Management (ICM), and Community Support Team (CST) services. The Housing Support provider shall be in close coordination (as evidenced by documentation in the individual's EHR) with any applicable ACT, ICM, or CST provider such that there is no duplication of service supports/efforts.</li> </ol>                                                                                                                                                                                                                                                                                                                                                    |
| Required Components      | <ol style="list-style-type: none"> <li>The Housing Support program must be provided through a team approach (as evidenced in documentation). It focuses on building and maintaining a positive relationship with the individual, facilitating needed independent living supports, and working toward recovery goals.</li> <li>The Housing Support program must include a variety of interventions in order to assist the individual in developing: <ol style="list-style-type: none"> <li>Recovery orientation and skills to work toward their personal recovery goals related to their ability to live independently.</li> <li>Illness self-monitoring and self-management of symptoms.</li> <li>Strategies and supportive interventions for developing positive relationships/avoiding conflicts with neighbors and property owner.</li> <li>Relapse prevention strategies and plans.</li> </ol> </li> <li>Required tasks include checking on and documenting the following on a monthly basis: <ol style="list-style-type: none"> <li>Individual wellness, need for additional supports or connection to other community resources;</li> <li>Household wellness, health and safety of the housing unit;</li> <li>Community integration and relationships with property/neighbors;</li> </ol> </li> </ol> |

## Housing Support

- d. Household financial stability.
- 4. Contact requirements for individuals receiving the Housing Support program:
  - a. New referrals should receive a first contact attempt within 2 business days.
  - b. Services must be provided at a time that accommodates individuals' needs, which may include during evenings, weekends, and holidays.
  - c. Contact must be made a minimum of once a week while an individual is searching for housing.
  - d. Once in subsidized housing, Housing Support teams must provide scheduled visits to an individual's home to provide supports and establish a relationship of trust.
    - i. Contact must be made a minimum of once a week during the first three months of being housed to ensure individuals remain stabilized,
  - e. After the first three months of being housed, then contact frequency may decline but must continue to be made a minimum of twice each month, one of which must be in the individual's residence and include items 3(a-d).
  - f. Half of Housing Support contacts must be face-to-face and the other half may be either face-to-face or telephone contact depending on the individual's support needs and documented preferences.
  - g. A staff person must be available 24/7 to respond to emergency calls.
  - h. Individuals who have established a documented and substantial level of stability and independence with managing their residence and personal health needs, as evidenced by no mental/physical health crisis events nor eviction-risk events in the last 6 months, may receive a reduced level of contact in the form of at least one face-to-face (in-person) visit monthly.
    - i. Individual preferences must still be taken into account. The service provider cannot reduce frequency if the individual wishes to maintain the baseline requirement of contact frequency outlined in 4(e).
    - ii. Individuals with this level of stability must receive assistance in determining eligibility and applying for a transition to the Housing Choice Voucher program, utilizing the preferential access granted to individuals belonging to the settlement target population.
- 5. Individuals being supported through Housing Supports who report zero income must receive assessment for employment supports and should receive appropriate referral to employment resources and/or federal benefits such as SSI/SSDI through the SOAR program in tandem with their housing referral. Individuals receiving housing supports who continue to report no income must receive assistance with pursuing employment and benefit options.
- 6. Households must receive assistance with establishing and maintaining household food security. This includes applying for mainstream food benefits, e.g. SNAP, WIC, and meeting recurring requirements to maintain those benefits, as well as understanding how to access and utilize local food bank programs (find information on <https://feedinggeorgia.org/>). Mainstream benefits in Georgia can be applied for and maintained through the Georgia Gateway portal (<https://gateway.ga.gov/>)
- 7. Households must receive assistance with applying to federal subsidy programs that reduce the cost of phone and internet access, such as the Lifeline Program(<https://www.lifelinesupport.org/>) or Assistance Connectivity Program(<https://www.affordableconnectivity.gov/>).
- 8. Provider must support eligible individuals with application and transition to federally funded Housing Choice Voucher (HCV) program with the use of the preferential access for individuals belonging to the settlement target population (i.e. GHVP eligibility criteria).
  - i. Individuals can utilize Bridge Funding to support a transition to HCV if needed and funds are available.
- 9. DBHDD services provided via the Housing Support service must adhere to all DBHDD Service Definition requirements for each service provided.

## Housing Support

| Staffing Requirements                                   | <div>1. Housing Support providers must meet the following staffing requirements:<div><div>a. Each program should have one (1) FTE Program Director dedicated to the program (licensed: LCSW, LPC, or LMFT); and</div><div>b. Each program should have at least one (1) FTE clinically licensed professional providing clinical support and oversight of care across the team’s caseload. This position may also be the Program Director/Manager, if appropriate, based on the agency’s average caseload size.</div><div>c. Each program must have at least one (1) FTE Housing Specialist/Case Manager (practitioners who can provide Case Management services as defined in the BH Provider Manual) who is responsible for providing all of the supports described herein.</div></div></div> <div>2. Peer Support is a critical component of recovery. Individuals being served by a Housing Support provider must have access to a CPS-MH that can provide Peer Support services. There must be documented engagement by the staff team with a CPS-MH. The hiring of Certified Peer Specialists or individuals who can earn their Certification within 12 months for any position shall be prioritized.</div> <div>3. Housing Support must maintain an average (i.e. across all Housing Support staff members) maximum ratio of 25 individuals per staff member; however, a ratio of 20 individuals per staff member is recommended.</div> <div>4. Provider must adhere to the Staffing Requirements section of the Service Definition for the specific DBHDD service being provided, as well as to all other staffing/professional requirements found elsewhere in the DBHDD’s Provider Manual for Community Based Behavioral Health Providers.</div>                                                 |                              |                             |                              |                                                         |                 |   |                         |                |   |                      |                  |    |                                  |                  |    |                                                  |                  |    |                                           |                  |    |

| Service Accessibility                                   | <div>To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</div>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                              |                             |                              |                                                         |                 |   |                         |                |   |                      |                  |    |                                  |                  |    |                                                  |                  |    |                                           |                  |    |
| Documentation Requirements                              | <div>1. There must be an individual record that includes documentation of supports described in this program guideline.</div> <div>2. Provider is required to complete a progress note for every housing support intervention on behalf of the individual that does not align with one of the eight services outlined above.</div> <div>3. Progress notes must adhere to the documentation requirements set forth in this manual.</div> <div>4. A monthly programmatic report is required that will aggregate any generalized activities conducted on behalf of individuals which do not align with the one of the services outlined above.</div> <div>5. Housing Support program staff must comply with any data collection expectations in support of the program’s implementation and evaluation strategy.</div> <div>6. The individual’s clinical record contains a Housing Stability Support Plan as an adjunct to the Individualized Recovery Plan, which is no more than12 months old and which is updated when there is a demand for change in said plan.</div> <div>7. Housing Support program providers are exempt from Part II, Section III. Documentation, 2. Assessment, sub-items A and B of this manual. This service is designed to support individuals who are being referred to the GHVP after having already received an assessment from a collaborating core/specialty provider. Therefore, the HSP provider is only required to obtain assessment content from external providers.</div> <div>8. Specific to an individual’s diagnosis, Housing Support program providers must collect the necessary clinical documentation from a collaborating core/specialty provider, as per the requirements in Part II, Section III. Documentation, 3. Diagnosis, item H. sub-item iii.</div> |                              |                             |                              |                                                         |                 |   |                         |                |   |                      |                  |    |                                  |                  |    |                                                  |                  |    |                                           |                  |    |
| Billing & Reporting Requirements                        | <div>1. The majority of interventions defined herein are billable through the codes named here (see also Part I, Section II Orientation to Service Authorization, FY2026 Behavioral Health Levels of Service table, GHV Housing Support Type of Care section):</div> <table><tr><th>Service</th><th>Maximum Authorization Units</th><th>Daily Maximum Billable Units</th></tr><tr><td>Behavioral Health Assessment &amp; Service Plan Development</td><td>32 for 6 months</td><td>8</td></tr><tr><td>Diagnostic Assessment *</td><td>2 for 6 months</td><td>2</td></tr><tr><td>Case Management (CM)</td><td>140 for 6 months</td><td>24</td></tr><tr><td>MH and/or SUD Peer Supports (PS)</td><td>520 for 6 months</td><td>48</td></tr><tr><td>Psychosocial Rehabilitation – Individual (PSR-I)</td><td>300 for 6 months</td><td>48</td></tr><tr><td>Addictive Disease Support Services (ADSS)</td><td>100 for 6 months</td><td>48</td></tr></table>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Service                      | Maximum Authorization Units | Daily Maximum Billable Units | Behavioral Health Assessment & Service Plan Development | 32 for 6 months | 8 | Diagnostic Assessment * | 2 for 6 months | 2 | Case Management (CM) | 140 for 6 months | 24 | MH and/or SUD Peer Supports (PS) | 520 for 6 months | 48 | Psychosocial Rehabilitation – Individual (PSR-I) | 300 for 6 months | 48 | Addictive Disease Support Services (ADSS) | 100 for 6 months | 48 |

| Addictive Disease Support Services (ADSS)               | 100 for 6 months                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 48                           |                             |                              |                                                         |                 |   |                         |                |   |                      |                  |    |                                  |                  |    |                                                  |                  |    |                                           |                  |    |

## Housing Support

|                                               |                 |    |
|-----------------------------------------------|-----------------|----|
| Crisis Intervention                           | 64 for 6 months | 16 |
| Community Residential Rehabilitation (CRR-IV) | 36 for 6 months | 8  |
| Community Transition Planning (CTP)           | 32 for 6 months | 24 |

\* Diagnostic Assessment should only be utilized when an individual is not already in Core services and clinical diagnosis documentation cannot be obtained from another provider.

- DBHDD service provision, billing, and reporting must adhere to all DBHDD and Georgia Collaborative ASO requirements.
- Provider must submit a monthly invoice, invoice justification/supporting documentation (as needed), and a programmatic report to their designated DBHDD contract manager.
- Providers are required to maximize utilization of alternative funding streams, including third party payers (e.g., Medicaid, private insurance, etc.), public targeted and competitive grants, and private foundation funds.
- Approved providers of this program may submit claims/encounters for the unbundled services listed in the table above, in accordance with individual need, and up to the daily maximum amount for each service. The overall Housing Support Program must follow the content of this Service Guideline, while any specific services delivered as part of the program but billed separately (i.e., those listed in the table above) must also comply with their specific service guidelines found elsewhere in this Manual.
- The billable activities of the Housing Support program do not include:
  - Transportation.
  - Food.
  - Expenses covered under Bridge Funding services.
  - Generalist engagements/interactions with landlords to build capacity, i.e., landlord interactions must be specific to an individual's IRP in order to be billable.
- At least 50% of HSP service units must be delivered face-to-face with the identified individual receiving the service and at least 80% of all face-to-face service units must be delivered in the individual's home over the authorization period (these units are specific to single individual records and are not aggregate across an agency/program or multiple payers).
- In the absence of the required monthly face-to-face contact and if at least two unsuccessful attempts to make face-to-face contact have been tried and documented, the provider may bill for a maximum of four telephone contacts in that specified month.
- Unsuccessful attempts to make contact with the individual are not billable.
- HSP staff must ensure they bill against the Housing Support authorization for services delivered by the Housing Support team.

## Intensive Case Management

| Unit Value                | 15 minutes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |       |    |    |    |  |          | Fund Source(s)                                                                  | CBHRS (Medicaid Rehab Option); DBHDD state funds |    |    |    |  |          |
| Service Description       | <p>Intensive Case Management consists of providing environmental supports and care coordination considered essential to assist a person with improving his/her functioning, gaining access to necessary services, and creating an environment that promotes recovery as identified in his/her Individual Recovery Plan (IRP). The focus of the interventions includes assisting the individual with: 1) developing natural supports to promote community integration; 2) identifying service needs; 3) referring and linking to services and resources identified through the service planning process; 4) coordinating services identified on the IRP to maximize service integration and minimize service gaps; and 5) ensuring continued adequacy of the IRP to meet his/her ongoing and changing needs.</p> <p>The performance outcome expectations for individuals receiving this service include decreased hospitalizations, decreased incarcerations, decreased episodes of homelessness, increased housing stability, increased participation in employment activities, and increased community engagement.</p> <p>Intensive Case Management shall consist of four (4) major components and cover multiple domains that impact one's overall wellness including medical, behavioral, wellness, social, educational, vocational, co-occurring, housing, financial, and other service needs of the individual:</p> <p><b><u>Engagement &amp; Needs Identification</u></b></p> <p>The case manager engages the individual in a recovery-based partnership that promotes personal responsibility, and provides support, hope and encouragement. The case manager assists the individual with developing a community-based support network to facilitate community integration and maintain housing stability. Through engagement, the case manager partners with the individual to identify and prioritize housing, service, and resource needs to be included in the IRP.</p> <p><b><u>Care Coordination</u></b></p> <p>The case manager coordinates care activities and assist the individual as he/she moves between and among services and supports. Case Coordination requires information sharing among the individual, his/her Tier 1 or Tier 2 provider, specialty provider(s), residential provider, primary care physician, and other identified supports in order to: 1) ensure the individual receives a full range of integrated services necessary to support a life in recovery including health, home, purpose, and community; 2) ensure the individual has an adequate and current crisis plan; 3)reduce barriers to accessing services and resources; 4) minimize disruption, fragmentation, and gaps in service; and 5) ensure all parties work collaboratively for the common benefit of the individual.</p> <p><b><u>Referral &amp; Linkage</u></b></p> <p>The case manager assists the individual with referral and linkage to services and resources identified on the IRP including housing, social supports, family/natural supports, entitlements (e.g., SSI/SSDI, Food Stamps, VA), income, transportation, etc. Referral and linkage activities may include assisting the individual to: 1) locate available resources; 2) make and keep appointments; 3) complete intake and application processes and 4) arrange transportation when needed.</p> <p><b><u>Monitoring &amp; Follow-Up</u></b></p> <p>The case manager visits the individual in the community to jointly review progress toward achievement of IRP goals and to seek input regarding his/her level of satisfaction with treatment and any recommendations for change. The case manager monitors and follows-up with the individual in order to: 1) determine if services are provided in accordance with the IRP; 2) determine if services are adequately and effectively addressing the individual's needs; 3) determine the need for additional or alternative services related to the individual's changing needs or circumstances; and 4) notify the treatment team when monitoring indicates the need for an IRP reassessment and update.</p> |       |    |    |    |  |          |                                                                                 |                                                  |    |    |    |  |          |

## Intensive Case Management

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| Admission Criteria       | <ol style="list-style-type: none"> <li>1. Individual must meet DBHDD eligibility criteria: <b>AND</b></li> <li>2. Individual has a severe and persistent mental illness that seriously interferes with their ability to live in the community and: <ol style="list-style-type: none"> <li>a. Transitioning or recently discharged (i.e., within past 6 months) from a psychiatric inpatient setting; or</li> <li>b. Frequently admitted to a psychiatric inpatient facility (i.e., 3 or more times within past 12 months) or crisis stabilization unit for psychiatric stabilization and/or treatment; or</li> <li>c. Chronically homeless (i.e., continuously homeless for a year or more, or 4 episodes of homelessness within past 3 years); or</li> <li>d. Recently released from jail or prison (i.e., within past 6 months); or</li> <li>e. Frequently seen in the emergency room (i.e., 3 or more times within past 12 months) for behavioral health needs; or</li> <li>f. Transitioning or have been recently discharged from Assertive Community Treatment services; <b>AND</b></li> </ol> </li> <li>3. Individual has significant functional impairments that interfere with integration in the community and <b>needs assistance in two (2) or more of the following areas</b> which, despite support from a care giver or behavioral health staff (i.e.CM, AD Support Services) continues to be an area that the individual cannot complete.<br/>Needs significant assistance to: <ol style="list-style-type: none"> <li>a. Navigate and self-manage necessary services;</li> <li>b. Maintain personal hygiene;</li> <li>c. Meet nutritional needs;</li> <li>d. Care for personal business affairs;</li> <li>e. Obtain or maintain medical, legal, and housing services;</li> <li>f. Recognize and avoid common dangers or hazards to self and possessions;</li> <li>g. Perform daily living tasks;</li> <li>h. Obtain or maintain employment at a self-sustaining level or consistently perform homemaker roles (e.g., household meal preparation, washing clothes, budgeting, or childcare tasks and responsibilities);</li> <li>i. Maintain a safe living situation (e.g., evicted from housing, or recent loss of housing, or imminent risk of loss of housing); <b>AND</b></li> </ol> </li> <li>4. Individual is engaged in their Recovery Plan but <b>needs assistance with one (1) or more of the following areas</b> as an indicator of demonstrated ownership and engagement with his/her own illness self-management: <ol style="list-style-type: none"> <li>a. Taking prescribed medications, or</li> <li>b. Following a crisis plan, or</li> <li>c. Maintaining community integration, or</li> <li>d. Keeping appointments with needed services which have resulted in the exhibition of specific behaviors that have led to two or more of the following within the past 18 months: <ol style="list-style-type: none"> <li>i.Hospitalization.</li> <li>ii.Incarceration.</li> <li>iii.Homelessness, or use of other crisis services (i.e., CSU, ER, etc.).</li> </ol> </li> </ol> </li> </ol> |
| Continuing Stay Criteria | <ol style="list-style-type: none"> <li>1. Individual continues to have a documented need for an ICM intervention at least four (4) times monthly.<br/><b>AND</b></li> <li>2. Individual continues to demonstrate significant functional impairment as demonstrated by the need for assistance in <b>2 or more</b> of the following areas which, despite support from a caregiver or behavioral health staff continues to be an area that the individual cannot complete. Needs significant assistance to: <ol style="list-style-type: none"> <li>a. Access, navigate and/or manage multiple necessary community services.</li> <li>b. Maintain personal hygiene.</li> <li>c. Meet nutritional needs.</li> <li>d. Care for personal business affairs.</li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Intensive Case Management

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|                       | in close coordination (as evidenced by documentation in the individual's EHR) with any applicable ACT, ICM, or CST provider such that there is no duplication of service supports/efforts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Clinical Exclusions   | <p>Individuals with the following conditions are excluded from admission <u>unless</u> there is clearly documented evidence of a psychiatric condition co-occurring with the diagnosis of:</p> <ol style="list-style-type: none"> <li>1. Intellectual/Developmental Disabilities; and/or</li> <li>2. Autism; and/or</li> <li>3. Neurocognitive Disorder; and/or</li> <li>4. Traumatic Brain Injury.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Required Components   | <ol style="list-style-type: none"> <li>1. The ICM service can only be provided by a Tier I or Tier II DBHDD contracted provider.</li> <li>2. Each provider must have policies and procedures related to referral including providing outreach to agencies who may serve the targeted population, including but not limited to psychiatric inpatient hospitals, Crisis Stabilization Units, jails, prisons, homeless shelters, etc.</li> <li>3. Demonstrate and maintain a time frame from receipt of referral to engagement into services with an individual of no more than 5 days.</li> <li>4. The organization must have policies and procedures for protecting the safety of staff that engage in these community-based service delivery activities.</li> <li>5. Individuals will be provided assistance with gaining skills and resources necessary to obtain housing of the individual's choice, including completion of the housing need and choice survey (<a href="https://dbhddapps.dbhdd.ga.gov/NSH/">https://dbhddapps.dbhdd.ga.gov/NSH/</a>) upon admission and with the development of a housing goal, which will be minimally updated at each reauthorization.</li> <li>6. Maintain face-to-face contact with individuals receiving Intensive Case Management services, providing a supportive and practical environment that promotes recovery and maintain adherence to the desired performance outcomes that have been established for individuals receiving ICM services. It is expected that frequency of face-to-face contact is increased when clinically indicated in order to achieve the performance outcomes, and the intensity of service is reflected in the individual's IRP.</li> <li>7. A minimum of <u>4</u> face-to-face visits must be delivered on a monthly basis to each consumer. Additional contacts may be either face-to-face or telephone collateral contact depending on the individual's support needs, 60% of total units must be face-to-face contacts with the individual.</li> <li>8. At least 50% of all face-to-face service units must be delivered in non-clinic/community-based settings (i.e., any place that is convenient for the individual such as a FQHC, place of employment, community space) over the authorization period (these units are specific to single individual records and are not aggregate across an agency/program or multiple payers).</li> <li>9. In the absence of monthly face-to-face contacts and if at least two unsuccessful attempts to make face-to-face contact have been tried and documented, the provider may bill for a maximum of <u>2</u> telephone contacts in that specified month (denoted by the UK modifier). This may occur for no more than <u>60</u> consecutive days.</li> <li>10. After <u>8</u> unsuccessful attempts at making face to face contact with an individual, the ICM and members of the treatment/support team will re-evaluate the standing IRP and utilization of services.</li> <li>11. ICM is expected to retain a high percentage of enrolled individuals in services with few dropouts. In the event that an ICM has documented multiple attempts to locate and make contact with an individual and has demonstrated diligent search, after <u>60</u> days of unsuccessful attempts the individual may be discharged due to drop out.</li> <li>12. Individuals for whom there is a written transition/discharge plan may receive a tapered benefit based upon individualized need as documented in that plan.</li> <li>13. Team meetings must be held a minimum of once a week and time dedicated to discussion of support and service to individuals must be documented in the Treatment Team Meetings Log. Each individual must be discussed, even if briefly, at least one time monthly. ICM staff members are expected to attend Treatment Team Meetings.</li> </ol> |
| Staffing Requirements | <ol style="list-style-type: none"> <li>1. The following practitioners may provide ICM services: <ol style="list-style-type: none"> <li>a. |                     | <ul style="list-style-type: none"> <li>c. Practitioner Level 3: LCSW, LPC, LMFT, RN, or when an individual served is diagnosed with a co-occurring mental health condition and substance use disorder: MAC, CAADC, GCADC-II or -III, or CAC-II (reimbursed at Level 4 rate).</li> <li>d. Practitioner Level 4: LMSW; LAPC; LAMFT; Psychologist/LCSW/LPC/LMFT's supervisee/trainee with at least a Bachelor's degree in one of the helping professions such as social work, community counseling, counseling, psychology, or criminology, functioning within the scope of the practice acts of the state; CPS, Paraprofessional, CPRP, or when an individual served is diagnosed with a co-occurring mental health condition and substance use disorder: GCADC-I (with Bachelor's Degree), CAC-I (with Bachelor's Degree), or Certified Alcohol and Drug Counselor-Trainee/Counselor in Training (with Bachelor's Degree and under supervision).</li> <li>e. Practitioner Level 5: CPS, Paraprofessional, CPRP, or when an individual served is diagnosed with a co-occurring mental health condition and substance use disorder: GCADC-I (without Bachelor's Degree), CAC-I (without Bachelor's Degree), or Certified Alcohol and Drug Counselor-Trainee/Counselor in Training (without Bachelor's Degree and under supervision of one of the licensed/credentialed professionals above).</li> </ul> <ol style="list-style-type: none"> <li>2. Each ICM provider shall have a minimum of 11 staff members which must include 1 full-time licensed supervisor and 10 full-time case managers. When provided by one of the practitioners cited below, must be under the documented supervision (organizational charts, supervisory notation, etc.) of one of the independently licensed/credentialed professionals above:             <ul style="list-style-type: none"> <li>a. Certified Peer Specialists</li> <li>b. Paraprofessional staff</li> <li>c. Certified Psychiatric Rehabilitation Professional</li> <li>d. Certified Addiction Counselor-I or GCADC-I</li> <li>e. Certified Alcohol and Drug Counselor-Trainee</li> </ul> </li> <li>3. Oversight of an intensive case manager is provided by an independently licensed practitioner.</li> <li>4. Staff to consumer ratio for ICM services shall be a maximum caseload of 1:20 quarterly in rural areas and 1:30 in urban areas. Minimum caseloads in rural areas are 1:15 and 1:25 in urban areas. These ratios reflect a maximum team capacity of 200 in rural areas and 300 in urban areas. Urban counties are delineated in the annual <b>Georgia County Guide with the term "Metropolitan County"</b>.</li> </ol>                                                                                                                                                                                     |
| Clinical Operations | <ol style="list-style-type: none"> <li>1. ICM may include (with the consent of the Adult) coordination with family and significant others and with other systems/supports (e.g., work, religious entities, corrections, aging agencies, etc.) when appropriate for treatment and recovery needs.</li> <li>2. ICM providers must have the ability to deliver services in various environments, such as homes, homeless shelters, or street locations. The provider should keep in mind that individuals may prefer to meet staff at a community location other than their homes or other conspicuous locations (e.g. their place of employment), especially if staff drive a vehicle that is clearly marked as a state or agency vehicle, or if staff must identify themselves and their purpose to gain access to the individual in a way that may potentially embarrass the individual or breach the individual's privacy/confidentiality. Staff should be sensitive to and respectful of individuals' privacy/confidentiality rights and preferences in this regard to the greatest extent possible (e.g., if staff must meet with an individual during their work time, if the individual wishes, mutually agree upon a meeting place nearby that is the least conspicuous from the individual's point of view).</li> <li>3. ICM must incorporate assertive engagement techniques to identify, locate, engage, and retain the most difficult to engage enrolled individuals who cycle in and out of intensive services. ICM must demonstrate the implementation of well thought out engagement strategies to minimize discharges due to drop out including the use of street and shelter outreach approaches and collateral contacts with family, friends, probation or parole officers.</li> <li>4. ICM is expected to actively and assertively participate in transition planning via in person or, when in person participation is impractical, via teleconference meetings between stakeholders. The team is expected to coordinate care through a demonstrable plan for timely follow up on referrals to and from their service, making sure individuals are connected to resources to meet their needs in alignment with their preferences. The team is responsible for ensuring the individual has access to services and resources such as housing, pharmacy, benefits, a support network, etc. when being discharged from a psychiatric hospital; released from jail; or experiencing an episode of homelessness. An ICM provider who is a Tier 1 or Tier 2+ Provider may use Community Transition Planning to establish a connection or reconnection to the individual and participate in discharge planning meetings while the individual is in a state operated or community psychiatric hospital, crisis stabilization unit, jail/prison.</li> </ol> |

## Intensive Case Management

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| Service Description                                                | Medication Assisted Treatment (MAT) provides specific interventions for reducing and/or eliminating the use of illicit opioids and other drugs of abuse; while developing the individuals social support network and necessary lifestyle changes; psychoeducational skills; pre-vocational skills leading to work activity by reducing substance use as a barrier to employment; social and interpersonal skills; improved family functioning; the understanding of substance use disorders; and the continued commitment to a recovery and maintenance program. MAT is a multi-faceted approach treatment service for adults who require structure and support to achieve and maintain recovery from Opioid Use Disorder. The following elements of this service model include: |      |       |       |       |       |      |

## Medication Assisted Treatment

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

Individual clearly understands and is able to follow instructions for care; and</li> <li>b. Individual has adequate understanding of and expressed interest to enter into medication assisted treatment services.</li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Continuing Stay Criteria | Individual continues to meet the criteria for admission.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Discharge Criteria       | When providing medication as part of a Medication Assisted Treatment model, discharge planning is not required unless the individual is leaving service due to a change of provider. For individuals who remain in service with their current provider, individualized transition planning is required and documented in the individualized recovery plan and progress notes, indicating the clinical phases of intensity of care demonstrated by the increase of take-home medication approved by the appropriate prescribing practitioner.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Service Exclusions       | <ol style="list-style-type: none"> <li>1. ## Medication Assisted Treatment

- d. **AD Support Services:**
  - i. Pre-vocational readiness and support;
  - ii. Service coordination and engagement unless provided through another service provider; and
  - iii. Linkage to health care.
- e. **Behavioral Health Assessment & Service Plan Development:**
  - i. Assessment and reassessment;
  - ii. Individualized recovery planning; and
  - iii. Service plan development.
- f. **Medication Administration & Opioid Maintenance:**
  - i. There must be a written service order for Medication Administration and a written order for the medication and the administration of the medication that complies with guidelines set forth herein Part II, Section 1, Subsection 6 - Medication.
  - ii. Documentation must support the medical necessity of administration by licensed/credentialed medical personnel rather than by the individual, family or caregiver;
  - iii. Documentation must support that the individual is being trained in the principle of self-administration of medication or that the individual is physically or mentally unable to self-administer. This documentation will be subject to scrutiny by the Administrative Service Organization in reauthorizing services in this category.
- g. **Physician Assessment:**
  - i. Complete and fully document physical exam;
  - ii. Physician assessment and care;
  - iii. Health screening.
- h. **Nursing Assessment:**

This service requires face-to-face contact (either in-person or via the use of telemedicine technology as clinically feasible and appropriate) with the individual to monitor, evaluate, assess, and/or carry out a physician's orders regarding the physical and/or psychological problems of the individual. It includes:

  - i. Providing nursing assessments and interventions to observe, monitor and care for the physical, nutritional, behavioral health and related psychosocial issues, problems or crises manifested in the course of an individual's treatment;
  - ii. Assessing and monitoring individual's response to medication(s) to determine the need to continue medication and/or to determine the need to refer the individual for a medication review;
  - iii. Assessing and monitoring an individual's medical and other health issues that are either directly related to the mental health condition or substance use disorder, or to the treatment of the disorder (e.g. diabetes, cardiac and/or blood pressure issues, substance withdrawal symptoms, weight gain and fluid retention, seizures, etc.);
  - iv. Consulting with the individual and individual-identified family and significant other(s) about medical, nutritional and other health issues related to the individual's mental health condition or substance use disorder;
  - v. Educating the individual and any identified family about potential medication side effects (especially those which may adversely affect health such as weight gain or loss, blood pressure changes, cardiac abnormalities, development of diabetes or seizures, etc.);
  - vi. Consulting with the individual and the individual-identified family and significant other(s) about the various aspects of informed consent (when prescribing occurs); and
  - vii. Training for self-administration of medication.
- 7. In addition to the above required activities within the program, the following must be offered as needed either within the program or through referral to/or affiliation with another agency or practitioner, and may be billed in addition to the billing for MAT:
  - a. AD Support Services– for housing, legal and other issues.

## Medication Assisted Treatment

- b. Individual counseling in exceptional circumstances for traumatic stress and other mental health conditions for which special skills or licenses are required.
8. The program must have a Medication Assisted Treatment Services Organizational Plan addressing the following:
- The philosophical model of the program and the expected outcomes for program participants (i.e., harm reduction, abstinence, beginning of or maintaining individually defined recovery, employment readiness, relapse prevention, stabilization and treatment of those with co-occurring disorders);
  - The schedule of activities and hours of operations;
  - Staffing patterns for the program;
  - The MAT Organizational Plan must address how the activities listed above will be offered and/or made available to those individuals who need them, including how that need will be determined;
  - How assessments will be conducted;
  - How staff will be trained in the administration of substance use disorder services and technologies;
  - How services for individuals with co-occurring disorders will be flexible and will include services and activities addressing both mental health and substance abuse issues of varying intensities and dosages based on, presenting the symptoms, problems, functioning, and capabilities of such individuals;
  - How individuals with co-occurring disorders who cannot be served in the regular program activities will be provided and/or referred for time-limited special integrated services that are co-occurring enhanced;
  - How services will be coordinated with the substance abuse array of services including assuring or arranging for appropriate referrals and transitions;
  - How the requirements in these service guidelines will be met;
  - How services for individuals with HIV will be conducted to ensure the privacy of individuals.

- Service Accessibility
- The program must be in operation at least 5 hours per day Monday- Friday and a minimum of 3 hours per day on Saturdays.
  - To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See [Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16](#) of this Provider Manual for definitions and requirements specific to the provision of telemedicine. Additionally, specific to service provision under the auspices of the MAT program, the following services may only be delivered via telemedicine, and not telephonically: Physician Assessment/Psychiatric Treatment, Medication Administration, Opioid Maintenance, supervised self-administration of medication, and Group Outpatient Services.

- Additional Medicaid Requirements
- Medication Assisted Treatment services are unbundled and billed incrementally per service. As mentioned above MAT allows providers to select all services that will be offered in a MAT setting. Billable services and daily limits within the MAT Package are as follows:

| Service                                                     | Initial Authorization Units (90 Days) | Concurrent Authorization Units (365 Days) | Daily Maximum Billable Units |
|-------------------------------------------------------------|---------------------------------------|-------------------------------------------|------------------------------|
| Behavioral Health Assessment & Service Planning Development | 24                                    | 150                                       | 12                           |
| Individual Outpatient Services                              | 12                                    | 96                                        | 1                            |
| AD Support Services                                         | 100                                   | 96                                        | 4                            |

|                                    | Interactive Complexity (as a modifier to Psychiatric Treatment, Diagnostic Assessment, Individual Counseling, and Group Counseling)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 24 | 96 | 4 |  |
| Reporting and Billing Requirements | <ol style="list-style-type: none"> <li>1. The maximum number of units that can be billed differs depending on the individual service. Please refer to the table below or in the Mental Health and Addictive Disease Orientation to Authorization Packages Section of this manual.</li> <li>2. Approved providers of this service may submit claims/encounters for the unbundled services listed in the package, up to the daily maximum amount for each service. Program expectations are that this model follows the content of this Service Guideline as well as the clearly defined service group elements.</li> <li>3. All applicable ASO and DBHDD reporting requirements must be met.</li> <li>4. The Opioid Maintenance code is used when there is the administration of methadone. Other federally approved MAT medications that are administered as part of the ordered IRP can be billed under the Medication Administration code (e.g. suboxone).</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |    |    |   |  |
| Documentation Requirements         | <ol style="list-style-type: none"> <li>1. Every admission and assessment must be documented.</li> <li>2. The complete and fully documented physical exam must be in the medical record; and</li> <li>3. Progress notes must include written daily documentation of important occurrences; level of functioning; acquisition of skills necessary for recovery; progress on goals identified in the IRP including acknowledgement of a substance use disorder, progress toward recovery and use/abuse reduction and/or abstinence; use of drug screening results by staff; and evaluation of service effectiveness.</li> <li>4. Daily attendance of each individual participating in the program must be documented showing the number of hours in attendance for billing purposes.</li> <li>5. This service may be offered in conjunction with ACT or CSU for a limited time to manage a short-term crisis or to plan for an appropriate clinical continuity plan.</li> <li>6. When this service is used in conjunction with ACT or Crisis Residential services, documentation must demonstrate careful planning to maximize the effectiveness of this service as well as an appropriate reduction in service amounts of the service to be discontinued. Utilization of MAT services in conjunction with these services is subject to review by the Administrative Services Organization.</li> <li>7. Individuals approved for this service must have a separate CID for DBHDD community services, which is a different ID number than that which is used by the DBHDD Central Registry.</li> </ol> |    |    |   |  |

| Service Description      | <p>A Medical-Psychiatric Unit (MPU) provides short-term inpatient psychiatric and medical treatment simultaneously in an integrated setting at an accredited facility. The unit has the capacity to address high acuity medical needs in tandem with psychiatric stabilization and/ or substance use detoxification services. The service is of short duration and provides medical and psychiatric treatment for individuals experiencing an acute psychiatric or substance use related crisis AND a medical illness that would require inpatient medical treatment. The intent of this service is to provide short-term, recovery-oriented, treatment and support that stabilizes the individual sufficiently to be discharged to community-based outpatient services. In addition, the service will stabilize the individual's medical needs to a degree that they can be managed with outpatient medical services. This service should include person-centered medical and psychiatric interventions based on current need and as identified in their individualized recovery plan, but might also include other routinely available interventions provided by the provider's inpatient program milieu, as clinically indicated. Upon stabilization of the medical and/or psychiatric crisis, the individual is connected and transitioned to the appropriate level of care and transitioned to the appropriate level of behavioral health and medical care in the community.</p> <p>Specific desired outcomes of this service are:</p> <ol style="list-style-type: none"> <li>1. Effective collaboration with community medical and behavioral health service providers and field offices;</li> <li>2. Successfully receive integrated whole health treatment concurrently;</li> <li>3. Effective discharge planning; Linkage and referral to community services;</li> <li>4. Appropriate post-discharge follow up; and</li> <li>5. Reduction in readmissions for medical and psychiatric needs.</li> </ol> |
| Target Population        | <p>The Medical-Psychiatric Unit will accept referrals for admission from the DBHDD, the ASO, and from any hospital, community provider, jail, community crisis service, or inpatient facility in Georgia. This program is intended only for adults who reside in Georgia or who experience a concurrent medical and behavioral health crisis while in Georgia.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Admission Criteria       | <ol style="list-style-type: none"> <li>1. The individual has an acute medical problem that requires hospitalization to stabilize the medical problem or individuals who cannot be served due to exclusionary criteria in CSUs or BHCCs;</li> </ol> <p style="text-align: center;"><b>AND</b></p> <ol style="list-style-type: none"> <li>2. The individual has an acute mental health condition and/or an individual experiencing a severe situational crisis due to a mental health condition, a substance use disorder; a co-occurring substance use disorder and mental health condition; a co-occurring mental health condition and intellectual/developmental disability; or a co-occurring substance use disorder and intellectual/developmental disability who presents a substantial risk of harm to self or others, as manifested by one or more of the following:             <ol style="list-style-type: none"> <li>a. Recent overt acts or recent expressed threats of major suicidal, homicidal or high-risk behaviors as a result of the mental health condition which present a probability of physical injury to himself/herself or others; and/or</li> <li>b. Demonstrates a serious inability to care for their own physical health and safety; and/or</li> <li>c. Individual has insufficient or severely limited resources or skills necessary to cope with the immediate crisis; and/or</li> <li>d. Individual demonstrates lack of judgment and/or impulse control and/or cognitive/perceptual abilities to manage the crisis;</li> </ol> </li> </ol> <p style="text-align: center;"><b>AND</b></p> <ol style="list-style-type: none"> <li>3. Treatment at a lower or alternate level of care has been attempted or given serious consideration.</li> </ol>                                                                                                                                                                                                                                 |
| Continuing Stay Criteria | <p>Individual meets the following:</p> <ol style="list-style-type: none"> <li>1. Continues to meet admission criteria; and</li> <li>2. Is assessed as requiring continued medical and behavioral health hospitalization beyond the initial authorization.</li> </ol> <p>This service is intended to be a discrete time-limited service that stabilizes the medical and behavioral health crisis.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Medical-Psychiatric Inpatient Unit

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|---------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Discharge Criteria  | <p>At which point the acuity, risk and crisis are determined to have been stabilized, the individual must be transferred to a lower level of care/discharged with an adequate continuing care plan.</p> <p>For discharge, acuity, risk and crisis have been stabilized and must be accompanied by one or more of the following:</p> <ol style="list-style-type: none"> <li>1. Individual no longer meets admission and continued stay criteria;</li> <li>2. Individual requests discharge and individual is not imminently dangerous to self or others;</li> <li>3. Medical and psychiatric conditions have been stabilized at the inpatient level per provider;</li> <li>3. Transfer to another service/level of care is warranted by a change in the individual's condition or stabilization of psychiatric or medical enabling a transfer to a medical or psychiatric unit; or</li> <li>4. Individual requires services not available in this level of care.</li> </ol> |
| Service Exclusions  | <p>This service may not be provided simultaneously with any other service in the DBHDD behavioral health service array except the following:</p> <ol style="list-style-type: none"> <li>1. Any Service that involves withdrawal management or Medication Assisted Treatment; or</li> <li>2. Services that provide continuity of care or support in planning for discharge from this service, such as Community Transition Planning.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Clinical Exclusions | <p>Individuals diagnosed with a Neurocognitive Disorder, Dementia, Traumatic Brain Injury, I/DD, or Autism, <u>in the absence of</u> a co-occurring mental health condition which is the driver of the need for this service and the primary focus of intervention. For individuals with one of the above diagnoses that affects cognition, the severity of cognitive impairment must not preclude provision of services in this level of care.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

## Medical-Psychiatric Inpatient Unit

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| Required Components   | <ol style="list-style-type: none"> <li>1. The MPU must continually monitor the bed inventory platform, regardless of current bed availability. The MPU is expected to review, accept, or decline 100% of all individuals placed on the bed inventory platform over the course of a fiscal year and provide a disposition based on clinical review. A provider-to-provider consultation is required for all appropriate MPU referrals that are denied when the MPU has an open bed. The documented reason for any denial is shared with the referral source. It is the expectation that the MPU accepts the individual who is most in need.</li> <li>2. Care Environment - The facility must be capable of providing secure care, meaning that individuals may be safely supported within a locked environment, with capabilities for providing seclusion and/or restraint if necessary. The facility must provide adequate space, light, ventilation, and privacy. Food services and other personal care needs must be adequately provided.</li> <li>3. MPUs shall be designated by DBHDD as both an emergency receiving facility and an evaluation facility in accordance with DBHDD guidelines.</li> <li>4. Individuals referred to the MPU must be evaluated by a provider within 24 hours of the referral.</li> <li>5. All services provided within the MPU must be delivered under the direction of a provider.</li> <li>6. An initial individualized recovery plan for each individual must be developed within 24 hours of his/her admission depending on the individual's capacity to participate. Further development will occur throughout hospital stay.</li> <li>7. Psychiatric, nursing, and medical services must be provided on site, and available 24 hours a day, seven days a week. Psychiatric/medical evaluation will occur on a daily basis. Treatment will be available, depending upon individual needs and ability to participate, to include individual, group and family therapy,</li> <li>8. Provision of peer support services is a recognized evidence-based practice in behavioral health and is strongly recommended.</li> <li>9. Individuals are assisted and/or supported in participating in activities of daily living such as hygiene, grooming, and maintenance of their immediate environment.</li> <li>10. MPUs must provide services to facilitate and support successful transition back into the community. At the time of admission, the coordination of discharge planning begins, in collaboration with the community behavioral health and medical service providers of the individual's community of choice. The facility shall deliver care coordination, including linkage and referral, which must include: <ol style="list-style-type: none"> <li>a. Linkages and referrals to behavioral health and medical services providers, housing, and other identified psychosocial needs based on social determinants of needs evaluation.</li> <li>b. Initiation of entitlement applications to facilitate access to benefits</li> <li>c. Facilitation of the housing need and choice (Need for Supported Housing) survey for homeless individuals.</li> <li>d. Referral to less intense level of care when clinically appropriate;</li> <li>e. Provision of seven (7) days of medication at the time of discharge using a normed formulary (such as the Medicaid Pharmacy formulary), which will increase the individual's access to these medications post-discharge.</li> <li>f. Communication with the DBHDD regional field office staff regarding: <ol style="list-style-type: none"> <li>i. Out-of-region placements and/or discharges;</li> <li>ii. All homeless individuals admitted, within 24 hours of admission, in order to coordinate access to housing and avoid a shelter discharge.</li> </ol> </li> <li>g. Provide discharge information regarding necessary follow-up appointments or resources.</li> <li>h. Provide individuals with the necessary resources to obtain medical equipment if needed.</li> </ol> </li> <li>11. The following protocols must be used for ensuring follow up and continuity of care once an individual is discharged: <ol style="list-style-type: none"> <li>a. MPU must ensure the individual's safe arrival at discharge placement.</li> <li>b. MPU must contact individual and ensure linkage to behavioral health and primary care providers within 72 hours of discharge .</li> <li>c. MPU must document all follow up efforts and report to GCAL.</li> </ol> </li> </ol> |
| Staffing Requirements | <p>The facility complies with staffing requirements as set forth by HFR in its "Specialty Hospital" licensing process Rule 111-8-40-.37, Psychiatric and Substance Abuse Services. Each treatment program is under the administrative leadership of a skilled behavioral health clinical staff and is staffed by at least one physician, registered and practical nurses, social workers, psychologists, and direct service staff. Staff members are also trained in the use of interventions and offer an array of therapeutic alternatives including; sensory modulation, art, music, craft, and recreation activities.</p> <p>The treatment team will minimally include: medical physicians and providers, psychiatrists and psychiatric providers, nursing staff, social workers, licensed clinicians,</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

## Medical-Psychiatric Inpatient Unit

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Service Description   | This service provides structured activities within a peer support center that promote socialization, recovery, wellness, self-advocacy, development of natural supports, and maintenance of community living skills. Activities are provided between and among individuals who have common issues and needs, are consumer motivated, initiated and/or managed, and assist individuals in living as independently as possible. Activities must promote self-directed recovery by exploring individual purpose beyond the identified mental health condition, by exploring possibilities of recovery, by tapping into individual strengths related to illness self-management (including developing skills and resources and using tools related to communicating recovery strengths, communicating health needs/concerns, self-monitoring progress), by emphasizing hope and wellness, by helping individuals develop and work toward achievement of specific personal recovery goals (which may include attaining meaningful employment if desired by the individual), and by assisting individuals with relapse prevention planning. A Consumer Peer Support Center may be a stand- |       |       |       |       |       |          |                                     |                                                  |       |       |       |       |          |

## MH Peer Support Program

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| Required Components      | <ol style="list-style-type: none"> <li>1. A Peer Supports service may operate as a program within: <ol style="list-style-type: none"> <li>a. A freestanding Peer Support Center.</li> <li>b. A Peer Support Center that is within a clinical service provider.</li> <li>c. A larger clinical or community human service provider administratively, but with complete programmatic autonomy.</li> </ol> </li> <li>2. A Peer Supports service must be operated for no less than 3 days a week, no less than 12 hours a week, no less than 4 hours per day, typically during day, evening and weekend hours. Any agency may offer additional hours on additional days in addition to these minimum requirements.</li> <li>3. The governing board of a freestanding Peer Center must be composed of 75% consumers and represent the cultural diversity of the population of the community being served. The board is encouraged to have either board members or operating relationships with someone with legal and accounting expertise. For programs that are part of a larger organizational structure that is not consumer led and operated, the Peer Supports Program must have an advisory body with the same composition as a freestanding Peer Center's board. The board or advisory committee must have the ability to develop programmatic descriptions and guidelines (consistent with state and federal regulations, accreditation requirements, and sponsoring agency operating policies), review and comment on the Peer Support Program's budgets, review activity offerings, and participate in dispute resolution activities for the program.</li> <li>4. Individuals participating in the service at any given time must have the opportunity to participate in and make decisions about the activities that are conducted or services offered within the Peer Supports program, and about the schedule of those activities and services, as well as other operational issues.</li> <li>5. Regardless of organizational structure, the service must be directed and led by consumers themselves.</li> <li>6. Peer Supports may include meals or other social activities for purpose of building peer relationships, but meals cannot be the central service activity offered (as this is not a medically covered service). The focus of the service must be skill maintenance and enhancement and building individual's capacity to advocate for themselves and other consumers.</li> </ol> |

## MH Peer Support Program

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

|                       | <p>7. Peer Supports cannot operate in isolation from the rest of the programs within the facility or affiliated organization. The Program Leader must be able to call multidisciplinary team meetings regarding a participating individual's needs and desires, and a Certified Peer Specialist providing services for and with a participating individual must be allowed to participate in multidisciplinary team meetings.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Staffing Requirements | <ol style="list-style-type: none"> <li>1. The individual leading and managing the day-to-day operations of the program, the Program Leader, must be a Georgia-certified Peer Specialist, who is a CPRP or can demonstrate activity toward attainment of the CPRP credential.</li> <li>2. The work of the CPS Program leader is under supervision of a Physician, Psychologist, LCSW, LPC, LMFT, RN, APRN, PA, LMSW, APC, or AMFT.</li> <li>3. The Program Leader must be employed by the sponsoring agency at least 0.5 FTE.</li> <li>4. The Program Leader and Georgia-certified Peer Specialists in the Peer Supports program may be shared with other programs as long as the Program Leader is present at least 75% of the hours the Peer Supports program is in operation, and as long as the Program Leader and the Georgia- certified Peer Specialists are available as required for supervision and clinical operations, and as long as they are not counted in individual to staff ratios for 2 different programs operating at the same time.</li> <li>5. Services must be provided and/or activities led by staff who are Georgia-certified Peer Specialists or other consumer paraprofessionals under the supervision of a Georgia-certified Peer Specialist. A specific activity may be led by someone who is not a consumer but is a guest invited by peer leadership.</li> <li>6. There must be at least 2 Georgia-certified Peer Specialists on staff either in the Peer Supports Program or in a combination of Peer Supports and other programs and services operating within the agency.</li> <li>7. The maximum face-to-face ratio cannot be more than 30 individuals to 1 Certified Peer Specialist based on average daily attendance in the past three (3) months of individuals in the program.</li> <li>8. The maximum face-to-face ratio cannot be more than 15 individuals to 1 direct service/program staff, based on the average daily attendance in the past three (3) months of individuals in the program.</li> <li>9. All staff must have an understanding of recovery and psychosocial rehabilitation principles as defined by the Georgia Consumer Council and psychosocial rehabilitation principles published by USPRA and must possess the skills and ability to assist other individuals in their own recovery processes.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                 |
| Clinical Operations   | <ol style="list-style-type: none"> <li>1. This service must operate at an established site approved to bill Medicaid for services. However, individual or group activities may take place offsite in natural community settings as appropriate for the Individualized Recovery Plan (IRP) developed by each individual with assistance from the Program Staff.</li> <li>2. Individuals receiving this service must have a qualifying diagnosis present in the medical record prior to the initiation of services. The diagnosis must be given by persons identified in O.C.G.A Practice Acts as qualified to provide a diagnosis.</li> <li>3. This service may operate in the same building as other day services; however, there must be a distinct separation between services in staffing, program description, and physical space during the hours the Peer Supports program is in operation except as noted above.</li> <li>4. Adequate space, equipment, furnishings, supplies, and other resources must be provided in order to effectively provide services and so that the program environment is clean and in good repair. Space, equipment, furnishings, supplies, transportation, and other resources for individual use within the Peer Supports program must not be substantially different from space provided for other uses for similar numbers of individuals.</li> <li>5. Staff of the Peer Supports Program must be treated as equal to any other staff of the facility or organization and must be provided equivalent opportunities for training (both mandated and offered) and pay and benefits competitive and comparable to other staff based on experience and skill level.</li> <li>6. When this service is used in conjunction with Psychosocial Rehabilitation and ACT, documentation must demonstrate careful planning to maximize the effectiveness of this service as well as appropriate reduction in service amounts. Utilization of this service in conjunction with these services is subject to review by the Administrative Services Organization.</li> <li>7. Individuals should set their own individualized goals and assess their own skills and resources related to goal attainment. Goals are set by exploring strengths and needs in the individual's living, learning, social, and working environments. Goal attainment should be supported through a myriad of approaches (e.g. coaching approaches, assistance via technology, etc.).</li> <li>8. Implementation of services may take place individually or in groups.</li> <li>9. Each individual must be provided the opportunity for peer assistance in the development and acquisition of needed skills and resources necessary to achieve stated goals.</li> </ol> |

## MH Peer Support Program

10. A Peer Supports Program must offer a range of skill-building and recovery activities developed and led by consumers. These activities must include those that will most effectively support achievement of the individual's rehabilitation and recovery goals.
11. The program must have a Peer Supports Organizational Plan addressing the following:
  - a. A service philosophy reflecting recovery principles as articulated by the Georgia Consumer Council, August 1, 2001. This philosophy must be actively incorporated into all services and activities and:
    - i. View each individual as the director of his/her rehabilitation and recovery process.
    - ii. Promote the value of self-help, peer support, and personal empowerment to foster recovery.
    - iii. Promote information about mental health conditions and coping skills.
    - iv. Promote peer-to-peer training of individual skills, social skills, community resources, and group and individual advocacy.
    - v. Promote the concepts of employment and education to foster self-determination and career advancement.
    - vi. Support each individual to "get a life" using community resources to replace the resources of the mental health system no longer needed.
    - vii. Support each individual to fully integrate into accepting communities in the least intrusive environment that promote housing of his/her choice.
    - viii. Actively seek ongoing consumer input into program and service content so as to meet each individual's needs and goals and foster the recovery process.
  - b. A description of the particular consumer empowerment models utilized, types of activities offered, and typical daily activities and schedule. If offered, meals must be described as an adjunctive peer relationship building activity rather than as a central activity.
  - c. A description of the staffing pattern, plans for staff who have or will have achieved Certified Peer Specialist and CPRP credentials, and how staff are deployed to assure that the required staff-to-individual ratios are maintained, including how unplanned staff absences, illnesses, and emergencies are accommodated.
  - d. A description of how consumer staff within the agency are given opportunities to meet with or otherwise receive support from other consumers (including Georgia-certified Peer Specialists) both within and outside the agency.
  - e. A description of how individuals are encouraged and supported to seek Georgia certification as a Peer Specialist through participation in training opportunities and peer or other counseling regarding anxiety following certification.
  - f. A description of test-taking skills and strategies, assistance with study skills, information about training and testing opportunities, opportunities to hear from and interact with consumers who are already certified, additional opportunities for consumer staff to participate in clinical team meetings at the request of an individual, and the procedure for the Program Leader to request a team meeting.
  - g. A description of the hours of operation, the staff assigned, and the types of services and activities provided for and by consumers as well as for families, parents, and/or guardians.
  - h. A description of the program's decision-making processes including how consumers direct decision-making about both individual and program-wide activities and about key policies and dispute resolution processes.
  - i. A description of how individuals participating in the service at any given time are given the opportunity to participate in and make decisions about the activities that are conducted or services offered within the Peer Supports program, about the schedule of those activities and services, and other operational issues.
  - j. A description of the space, furnishings, materials, supplies, transportation, and other resources available for individuals participating in the Peer Supports services.
  - k. A description of the governing body and/or advisory structures indicating how this body/structure meets requirements for consumer leadership and cultural diversity.
  - l. A description of how the plan for services and activities is modified or adjusted to meet the needs specified in each IRP.
  - m. A description of how individual requests for discharge and change in services or service intensity are handled.
12. Assistive tools, technologies, worksheets, etc. can be used by the Peer Support staff to work with the served individual to improve his/her communication about treatment, symptoms, improvements, etc. with treating behavioral health and medical practitioners.

## MH Peer Support Program

|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Service Accessibility      | To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Documentation Requirements | <ol style="list-style-type: none"> <li>Providers must document services in accordance with the specifications for documentation requirements specified in Part II, Section III of the Provider Manual.</li> <li>The provider has several alternatives for documenting progress notes: <ol style="list-style-type: none"> <li>Weekly progress notes must document the individual's progress relative to functioning and skills related to the person-centered goals identified in his/her IRP. This progress note aligns the weekly Peer Support-Group activities reported against the stated interventions on the individualized recovery plan, and documents progress toward goals. This progress note may be written by any practitioner who provided services over the course of that week; or</li> <li>If the agency's progress note protocol demands a detailed daily note which documents the progress above, this daily detail note can suffice to demonstrate functioning, skills, and progress related to goals and related to the content of the group intervention; or</li> <li>If the agency's progress note protocol demands a detailed hourly note which documents the progress above, this daily detail note can suffice to demonstrate functioning, skills, and progress related to goals and related to the content of the group intervention.</li> </ol> </li> <li>While billed in increments, the Peer Support service is a program model. Daily time in/time out is tracked for while the person is present in the program, but due to time/in out not being required for each intervention, the time in/out may not correlate with the units billed as the time in/out will include breaks taken during the course of the program. However, the units noted on the log should be consistent with the units billed and, if noted, on the weekly progress note. If the units documented are not consistent, the most conservative number of units will be utilized. Other approaches may result in a billing discrepancy.</li> <li>Rounding is applied to the person's cumulative hours/day at the Peer program (excluding non-programmatic time). The provider shall follow the guidance in the rounding policy included in this Provider Manual, and, specific to this service, the person served must have participated in at least 50% of the hour in order to bill for one unit of this service. For instance, if an individual participates in the program from 9-1:15 excluding a 30-minute break for lunch, his/her participating hours are 3.75 hours. The rounding policy is applied to the .75 hour and the units billed for that day are 4 units. Practitioner type must still be addressed and so that 4 units must be adequately assigned to either a U4 or U5 practitioner type as reflected in the log for that day's activities.</li> <li>A provider shall only record units in which the individual was actively engaged in services. Meals and breaks must not be included in the reporting of units of service delivered. Should an individual leave the program or receive other services during the range of documented time in/time out for Peer Support hours, the absence should be documented on the log.</li> </ol> |

## MH Peer Support Services - Individual

| Service Description   | This service provides interventions which promote socialization, recovery, wellness, self-advocacy, development of natural supports, and maintenance of community living skills. Activities are provided between and among individuals who have common issues and needs, are individual motivated, initiated and/or managed, and assist individuals in living as independently as possible. Activities must promote self-directed recovery by exploring individual purpose beyond the identified mental health condition, by exploring possibilities of recovery, by tapping into individual strengths related to illness self-management (including developing skills and resources and using tools related to communicating recovery strengths, communicating health needs/concerns, self-monitoring progress), by emphasizing hope and wellness, by |       |       |       |       |       |          |                                                                                 |       |                                                  |       |       |       |          |  |  |  |  |

| Service Exclusions       | Crisis Stabilization Unit (however, those utilizing transitional beds within a Crisis Stabilization Unit may access this service).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Clinical Exclusions      | <ol style="list-style-type: none"> <li>1. Individuals diagnosed with a substance use disorder and no other concurrent mental health condition; <b>or</b></li> <li>2. Individuals with the following conditions are excluded from admission unless there is clearly documented evidence of a mental health condition co-occurring with one of the following diagnoses: intellectual/developmental disability, Autism, Neurocognitive Disorder, or Traumatic Brain Injury.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Required Components      | <ol style="list-style-type: none"> <li>1. Peer Supports are provided in 1:1 CPS to person-served ratio.</li> <li>2. Individuals participating in the service at any given time must have the opportunity to participate in and make decisions about the person-centered interactions offered by the Certified Peer Specialist(s).</li> <li>3. Peer Supports cannot operate in isolation from the rest of the programs within the facility or affiliated organization. The CPS shall be empowered to convene multidisciplinary team meetings regarding a participating individual's needs and desires, and the Certified Peer Specialist must be allowed to participate as an equal practitioner partner with all staff in multidisciplinary team meetings. He/she also has the unique role as an advocate to the person-served, encouraging that person to steer goals and objectives in Individualized Recovery Planning.</li> </ol>      |
| Staffing Requirements    | <ol style="list-style-type: none"> <li>1. The providing practitioner is a Georgia-Certified Peer Specialist (CPS).</li> <li>2. The work of the CPS is under supervision of a Physician, Psychologist, LCSW, LPC, LMFT, RN, APRN, PA, LMSW, APC, or AMFT.</li> <li>3. There must be at least 2 Georgia-certified Peer Specialists on staff within an agency either in the Peer Supports Group program or in a combination of Peer Supports-Group, Peer Support-Individual and other programs and services operating within the agency.</li> <li>4. The maximum caseload ratio for CPS to persons-served cannot be more than 1:50.</li> <li>5. All CPSs providing this support must be able to articulate an understanding of recovery as defined by SAMHSA and psychiatric rehabilitation principles published by USFRA and must demonstrate the skills and ability to assist other individuals in their own recovery processes.</li> </ol> |
|                          | <ol style="list-style-type: none"> <li>1. Individuals receiving this service must have a qualifying diagnosis present in the medical record prior to the initiation of services. The diagnosis must be given by persons identified in O.C.G.A Practice Acts as qualified to provide a diagnosis.</li> <li>2. If a CPS serves as staff for a Peer Support Program and provides Peer Support-Individual, the agency has written work plans which establish the CPS's time allocation in a manner that is distinctly attributed to each program.</li> <li>3. CPSs providing this service must be treated as equal to any other staff of the facility or organization and must be provided equivalent opportunities for training (both mandated and offered) and pay and benefits competitive and comparable to other staff based on experience and skill level.</li> </ol>                                                                    |

## MH Peer Support Services - Individual

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Clinical Operations              | <ol style="list-style-type: none"> <li>4. Individuals should set their own individualized goals and assess their own skills and resources related to goal attainment. Goals are set by exploring strengths and needs in the individual's living, learning, social, and working environments. Goal attainment should be supported through a myriad of approaches (e.g. coaching approaches, assistance via technology, etc.).</li> <li>5. Each service intervention is provided only in a 1:1 ratio between a CPS and a person served.</li> <li>6. Each individual must be provided the opportunity for peer assistance in the development and acquisition of needed skills and resources necessary to achieve stated goals.</li> <li>7. The program must have a Peer Supports Organizational Plan addressing the following: <ol style="list-style-type: none"> <li>a. A service philosophy reflecting recovery principles as articulated by the Georgia Consumer Council, August 1, 2001. This philosophy must be actively incorporated into all services and activities and: <ol style="list-style-type: none"> <li>i. View each individual as the director of his/her rehabilitation and recovery process.</li> <li>ii. Promote the value of self-help, peer support, and personal empowerment to foster recovery.</li> <li>iii. Promote information about mental health conditions and coping skills.</li> <li>iv. Promote peer-to-peer training of individual skills, social skills, community resources, and group and individual advocacy.</li> <li>v. Promote the concepts of employment and education to foster self-determination and career advancement.</li> <li>vi. Support each individual to "get a life" using community resources to replace the resources of the mental health system no longer needed.</li> <li>vii. Support each individual to fully integrate into accepting communities in the least intrusive environment that promote housing of his/her choice.</li> <li>viii. Actively seek ongoing consumer input into program and service content so as to meet each individual's needs and goals and foster the recovery process.</li> </ol> </li> <li>b. A description of the particular consumer empowerment models utilized and types of recovery-support activities offered which are reflective of that model.</li> <li>c. A description of the staffing pattern including how caseloads are evaluated to assure that the required staff-to-individual ratios are maintained, including how unplanned staff absences, illnesses, and emergencies are accommodated.</li> <li>d. A description of how CPSs within the agency are given opportunities to meet with or otherwise receive support from other consumers (including Georgia-Certified Peer Specialists) both within and outside the agency.</li> <li>e. A description of how CPSs are encouraged and supported to seek continuing education and/or other certifications through participation in training opportunities.</li> <li>f. A description of the standard by which CPSs participate in, and, if necessary, request clinical team meetings at the request of an individual.</li> <li>g. A description of the program's decision-making processes, including how individuals direct decision-making about both individual and program-wide activities, and about key policies and dispute resolution processes.</li> <li>h. A description of the governing body and/or advisory structures indicating how this body/structure meets requirements for consumer leadership and cultural diversity.</li> <li>i. A description of how the plan for services and activities is modified or adjusted to meet the needs specified in each IRP.</li> <li>j. A description of how individual requests for discharge and change in services or service intensity are handled.</li> </ol> </li> <li>8. Assistive tools, technologies, worksheets, etc. can be used by the CPS to work with the served individual to improve his/her communication about treatment, symptoms, improvements, etc. with treating behavioral health and medical practitioners.</li> </ol> |
| Service Accessibility            | To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Documentation Requirements       | Providers must document services in accordance with the specifications for documentation requirements specified in Part II, Section III of the Provider Manual.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Billing & Reporting Requirements | When Telemedicine technology is utilized for the provision of this service in accordance with the allowance in the Service Accessibility section of this definition, the code cited in the Code Detail above with the appropriate GT modifier shall be utilized in documentation and claims submission.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| Service Description            | <p>The Mobile Crisis Response Service (MCRS) provides community-based face-to-face rapid response to individuals in an active state of crisis. This service operates 24 hours a day, seven days a week. MCRS offers short-term, behavioral health, intellectual/developmental disability, and/or Autism Spectrum Disorder (ASD) crisis response for individuals in need of crisis assessment, intervention, and referral services within their community. This service is unique in that it provides in-person intervention to persons in their community who may be in crisis. MCRS may be provided in community settings including, but not limited to homes, residential settings, other treatment/support settings, schools, hospital emergency departments, jails, and social service settings. Interventions include a brief, situational assessment; verbal and or behavioral interventions to de-escalate the crisis; assistance in immediate crisis resolution; mobilization of natural support systems; and referral to alternate services at the appropriate level.</p> <p>MCRS includes in-field crisis assessment, crisis de-escalation, rapid assessment of strengths, problems and needs; psychoeducation, brief behavioral support and intervention; and referral to appropriate services and supports. MCRS functions to provide a short-term linkage and referral between persons in crisis and the appropriate/additional behavioral health and/or IDD services and supports, while reducing the rate of hospitalization, incarceration, out of home placement and unnecessary emergency room visits. This service includes post crisis follow-up to ensure linkage with recommended services.</p> |      |       |       |       |       |      |             |      |       |       |       |       |      |
| Admission Criteria             | <p>The service is available to individuals with behavioral health diagnoses and/or intellectual and/or developmental disabilities, including Autism Spectrum Disorder (ASD), aged four (4) years and above who meet the following eligibility criteria:</p> <ol style="list-style-type: none"><li>1. The individual is experiencing an acute Behavioral Health, Intellectual/Developmental Disability, ASD, and or Co-occurring crisis (inclusive of two (2) or more of these conditions); and</li><li>2. The individual and/or family/caregiver lacks the skills necessary to cope with the immediate crisis and there exists no other available, appropriate community supports to meet the needs of the person; and</li><li>3. The individual needs immediate care, evaluation, stabilization or treatment due to the crisis as evidenced by:<ul style="list-style-type: none"><li>• A substantial risk of harm to self or others by the individual; and/or</li><li>• The individual is engaging in behaviors presenting with serious potential legal or safety consequences; or</li></ul></li><li>4. Screening provided by the Georgia Crisis and Access Line (GCAL) indicates the presence of a behavioral health, an intellectual/developmental disability, and/or ASD crisis presentation.</li><li>5. The individual served does not have to be a current or past-enrolled recipient of DBHDD services or supports.</li></ol>                                                                                                                                                                                                                                                                                  |      |       |       |       |       |      |             |      |       |       |       |       |      |
| Continuing Stay Criteria       | N/A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |      |       |       |       |       |      |             |      |       |       |       |       |      |
| Discharge Criteria             | <ol style="list-style-type: none"><li>1. The acute presentation of the crisis situation is resolved;</li><li>2. Appropriate referral(s) and service engagement/s to stabilize the crisis situation are completed;</li><li>3. Recommendations for ongoing services, supports or linkages have been documented; and</li><li>4. Post-crisis follow-up has been completed within 1-3 days of crisis contact.</li></ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |      |       |       |       |       |      |             |      |       |       |       |       |      |
| Service Exclusions             | Individuals in the following settings are excluded from MCRS dispatch; Crisis Stabilization Units (CSU), Behavioral Health Crisis Centers (BHCC), CRR-I, psychiatric hospital (state or private); state prisons; youth detention center; and regional youth detention center.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |      |       |       |       |       |      |             |      |       |       |       |       |      |

## Mobile Crisis

### Required Components

3. MCRS shall not be dispatched in response to a medical emergency.
1. A mobile crisis team responder offering any diagnostic impressions must be a person identified in O.C.G.A. Practice Acts as qualified to provide a diagnosis and who possess training and experience in behavioral health and intellectual/developmental disability assessment.
2. The Licensed clinician on the Mobile Crisis Team is to provide oversight and clinical supervision to the operation of the team and is responsible for ensuring that the appropriate team members are dispatched or are available for consultation based on the clinical data provided by the Georgia Crisis and Access Line (GCAL).
3. The Mobile Crisis Team is to:
  - a. Respond and arrive on site within 59 minutes of the dispatch by GCAL; and
  - b. Address the crisis situation to mitigate any risk to the health and safety of the individual and/or others; and
  - c. Consult with medical professionals, when needed, to assess potential medical causes that might be contributing to the crisis prior to recommending any intensive crisis supports involving behavioral interventions.
4. The Mobile Crisis Team members are responsible for completing comprehensive assessment(s) of the current crisis situation. This assessment process shall include interviews with the individual, care providers and/or family members, observation of the current environment, and review of behavior and individual support plans if available. The licensed professional or BCBA on the team is responsible for ensuring that the assessment process is thorough and complete.
5. A crisis plan will be developed to help manage, prevent, or reduce the frequency of future crises occurring. When available, an individual's existing crisis plan should be utilized by the MCRS team when it is appropriate to the presenting situation. When a crisis plan does not exist, MCRS will engage the individual/family/caregivers in a therapeutic plan that fosters a return to pre-crisis level of functioning and connect or reconnect the individual to treatment services and other community resources.
  - a. Also, when available and offered by the individual, a Wellness Recovery Action Plan (WRAP) shall be utilized by MCRS to support the individual's preferences.
  - b. When available, an individual's behavior support plan shall be utilized by MCRS during the assessment process.
6. All interventions shall be offered in a clinically appropriate manner that respects the preferences of the individual in crisis while recognizing the primary need to maintain safety.
7. Reasonable and relatively simple environmental modifications that do not require continuing programmatic efforts are considered before intensive crisis supports and/or a behavior plan is recommended or implemented.
8. When applicable and accessible, community supports, natural supports, and external helping networks should be utilized for crisis planning to assist in crisis prevention.
9. When the Mobile Crisis Team makes a disposition, the licensed clinician or BCBA communicates all recommendations within 24 hours to all applicable parties (e.g., Provider Agencies Families/Caregivers/ Guardians, Support Coordination Agencies, known Care Coordinators and/or Regional Field Office I&E Teams as applicable).
10. The MCRS shall comply with the current GCAL process for dispatch of mobile crisis, including non-refusal of calls or dispatch.
11. When the Mobile Crisis Team completes services, the licensed clinician or BCBA on the team completes a written summary that shall:
  - a. Minimally include:
    - Description of precipitating events
    - Assessment and Interventions provided
    - Diagnosis or diagnostic impressions
    - Response to interventions
    - Crisis plan
    - Recommendations for continued interventions
    - Linkage and Referral for additional supports (if applicable); and
  - b. Be completed and documented within a 24-hour period after a disposition has been determined.
12. Within 24 hours of completion of the MCRS intervention a follow-up phone call is made and documented to individuals served or their

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       | <p>representative/parent/guardian. Within 72 hours, a follow-up is made to ensure appointment with outpatient provider has been scheduled. A minimum of three (3) attempts are made to reach the individual if contact is not made in the initial outpatient and community resources. If contact is not made within 72 hours, a written letter with resources and recommendations will be sent to the individual. Exceptions to this requirement are for persons for whom the mobile crisis intervention results in placement in a hospital, CSU, BHCC, MPU, intensive in-home IDD supports, or an IDD crisis home.</p> <ol style="list-style-type: none"> <li>13. The MCRS provider must develop policies and procedures consistent with DBHDD policies for referral and engagement with Crisis Stabilization Units (CSUs) Behavioral Health Crisis Centers (BHCCs), Crisis Respite Homes and In-Home I/DD Supports; (i.e., staffing, eligibility, service delivery, GCAL interface).</li> <li>14. Additionally, the MCRS provider must develop policies and procedures that include criteria for determination of the need for higher levels of care, indicators for referral to medical/health services and how staff should access support from healthcare professionals; how the staff will be trained to employ positive behavior supports, trauma informed care, and crisis intervention principles in the delivery of mobile services; and how the safety of staff members is maintained.</li> <li>15. MCRS will collaborate with the individual's health and support providers to ensure linkage with follow-up post crisis treatment. This may include Core providers, Specialty Providers, detoxification providers, I/DD service providers, local physicians, BHCCs/CSUs, and other public and social service agencies (such as DFCS, schools, treatment courts, law enforcement, Care Management Organizations [CMOs], etc.). When the MCRS provider determines during a community-based intervention that an individual is enrolled with a CMO, the CMO will receive notification within 72 hours through an identified inbox and provided basic status information (name, date of intervention, written summary, final referral and disposition, for the CMO to follow up on treatment services and other community resources for the member.</li> <li>16. The MCRS must maintain accreditation by the appropriate credentialing body (The Joint Commission, The Commission on Accreditation of Rehabilitation Facilities, The Council on Accreditation).</li> <li>17. All mobile crisis response staff should receive annual telemedicine training appropriate for their scope of practice. Documentation of telemedicine training should be in each mobile crisis staff member's HR file.</li> </ol> |
| Staffing Requirements | <ol style="list-style-type: none"> <li>1. The following training components must be provided during orientation for all new staff:             <ol style="list-style-type: none"> <li>a. Community-based crisis intervention training and TIP 42 training.</li> <li>b. Cross training of BH and IDD MCRS staff.</li> <li>c. DBHDD array of Adult Mental Health, Child and Adolescent Mental Health, Addictive Diseases, Intellectual &amp; Developmental Disabilities crisis services, and community psychiatric hospitals.</li> <li>d. DBHDD Community Behavioral Health and IDD Provider Manual Service Definitions.</li> <li>e. Rapid crisis screening.</li> <li>f. Dispatch decision tree.</li> <li>g. Web-based data access and interface with DBHDD information system.</li> </ol> </li> <li>2. The Mobile Crisis Team includes minimally two staff responding;             <ol style="list-style-type: none"> <li>a. Of those, one (1) is a Licensed Clinical Social Worker/Licensed Professional Counselor/Licensed Marriage and Family Therapist/ Licensed Psychologist (LCSW/ LPC/LMFT/Licensed Psychologist Ph.D./Psy.D.); and</li> <li>b. When the screening indicates that the individual in crisis has I/DD, the two-person team must also include a Behavioral Specialist (BS), BCBA, or BCaBA (dispatch of a licensed clinician is always required along with this practitioner).</li> <li>c. Additional staff who may be dispatched when a behavioral health need is identified include: paraprofessional/direct support staff, a registered nurse, an additional social worker (MSW), safety officer, and/or a Certified Peer Specialist (CPS, CPS-AD, CPS-Y, and CPS-P)].</li> <li>d. In addition, a physician will be available to the MCRS team for consultation, if needed. Other physicians (psychiatric or medical) may consult as necessary.</li> <li>e. Each mobile crisis team must include at least one staff member with specialization in ASD; so, when there is a known or suspected indication of ASD, the following team compositions are allowed:                 <ol style="list-style-type: none"> <li>i. A BCBA or BCBA-D who serves as the lead in a mobile crisis response for individuals with ASD and any second recognized practitioner type named herein; or</li> <li>ii. Licensed practitioner (as named in a. above) along with a BCBA, BCaBA or RBT.</li> </ol> </li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                 |

All team members are required to comply with the DBHDD Policy, Professional Licensing and Certification Requirements of Practice Act, including maintaining valid/current license or certification and compliance with all DBHDD training requirements for paraprofessional, licensed or certified staff.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Service Accessibility      | <ol style="list-style-type: none"> <li>1. MCRS must be available by staff skilled in crisis intervention 24 hours a day, 7 days a week with emergency response coverage, including psychiatric, medical and nursing consultation services as required.</li> <li>2. All mobile crisis service response times for arrival at the site of the crisis must be less than 59 minutes of dispatch by the GCAL.</li> <li>3. Services are available 24-hours a day, 7 days a week, and include face-to-face contact offered in eligible settings (e.g., home/community, school, jail, emergency room).</li> <li>4. MCRS may not be provided in an Institution for Mental Diseases (IMD, e.g., treatment units for state or private psychiatric hospital, psychiatric residential treatment facility or crisis stabilization program), nursing homes, youth development center (YDC), or State Prisons.</li> <li>5. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service and their families/caregivers. The guidelines governing the provision of telemedicine services are outlined below: <ol style="list-style-type: none"> <li>a. Telemedicine Parameters <ol style="list-style-type: none"> <li>i. Telemedicine should only be used as the last resort for individuals that are calling in to Mobile Crisis due to a behavioral health crisis. The use of telemedicine is intended to maximize the use of licensed clinicians (LPC, LCSW, LMFT) and BCBA's while ensuring the safety and appropriate service provision for the individual based on needs and wishes. Telemedicine can be used to assess individuals experiencing a crisis in a safe setting which could include a jail, hospital, school, or other location where there are professionals present to keep the person safe and assist with facilitating the telemedicine assessment. Mobile crisis response teams should use clinical judgement to determine if the individual can properly participate in a telemedicine assessment as well as if the setting is safe and appropriate for telemedicine assessment. Telemedicine is appropriate for post-crisis follow up services.</li> <li>ii. Mobile Crisis teams can use telemedicine to supplement face-to-face response for the purposes of consulting with a licensed clinician, BCBA, and/or physician.</li> </ol> </li> </ol> </li> </ol> |
| Documentation Requirements | <ol style="list-style-type: none"> <li>1. Providers must document services in accordance with the specifications for documentation requirements specified in Part II, Section III of the Provider Manual and in keeping with this section. Documentation will include the following: <ol style="list-style-type: none"> <li>a. Calls received;</li> <li>b. Referring source; individual, agency,</li> <li>c. Time of received call,</li> <li>d. Specific plan of action to address need;</li> <li>e. Composition of responders</li> <li>f. Time of arrival on-site</li> <li>g. Time of completion of assessment</li> <li>h. Description of intervention,</li> <li>i. Diagnosis and or diagnostic impressions</li> <li>j. Documentation of disposition, linkages provided/appointments made</li> <li>k. Behavioral recommendations provided;</li> <li>l. Provision of assessment upon Release of Information</li> <li>m. Contact information for follow-up</li> <li>n. Follow-up contact.</li> </ol> </li> <li>2. Each MCRS shall provide monthly outcomes data as defined by the DBHDD.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

## Mobile Crisis

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Billing & Reporting Requirements | 1. All other applicable DBHDD reporting requirements must be followed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|                                  | 2. Where there are individuals covered by Georgia CMOs and the specific CMO is identified, the MCRS provider will report the MCRS intervention to the CMO.                                                                                                                                                                                                                                                                                                                                                                                                                 |
|                                  | 3. Mobile Crisis Response Teams will collect data through a monthly programmatic report which includes information on the total number of mobile crisis responses per month, per region, by disability (BH or DD). This will be further broken down by responses done solely by telemedicine, those that included a hybrid response (in-person and telemedicine) and those that were in-person only responses. This information will be further broken down to include how many of these resulted in diversion to outpatient services, 1013/2013, or inpatient evaluation. |

## Opioid Maintenance Treatment

| Service Description                                                   | An organized, usually ambulatory, substance use disorder treatment service for individuals who have an addiction to opiates. The nature of the services provided (such as dosage, level of care, length of service or frequency of visits) is determined by the individual's clinical needs, but such services always includes scheduled psychosocial treatment sessions and medication visits (often occurring on a daily basis) within a structured program. Services function under a defined set of policies and procedures, including admission, discharge and continued service criteria stipulated by state law and regulation and the federal regulations at FDA 21 CFR Part 291. Length of service varies with the severity of the individual's disorder, as well as his or her response to and desire to continue treatment. Treatment with methadone or LAAM is designed to address the individual's goal to achieve changes in his or her level of functioning, including elimination of illicit opiate and other alcohol or drug use. To accomplish such change, the Individualized Recovery/Resiliency Plan must address major lifestyle, attitudinal and behavioral issues that have the potential to undermine the goals of recovery. The Individualized Recovery/Resiliency Plan should also include individualized treatment, resource coordination, and personal health education specific to addiction recovery (including education about human immunodeficiency virus [HIV], tuberculosis [TB], and sexually transmitted diseases [STD]). |      |       |       |       |       |          |                |                                                  |       |       |       |       |          |
| Admission Criteria                                                    | Must meet criteria established by the Georgia Regulatory body for opioid administration programs (Department of Community Health, Healthcare Facilities Regulation Division) and the Food and Drug Administration's guidelines for this service.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |      |       |       |       |       |          |                |                                                  |       |       |       |       |          |
| Continuing Stay Criteria                                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |      |       |       |       |       |          |                |                                                  |       |       |       |       |          |
| Discharge Criteria                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |      |       |       |       |       |          |                |                                                  |       |       |       |       |          |
| Required Components                                                   | 1. This service must be licensed by DCH/HFR under the Rules and Regulations for Drug Abuse Treatment Programs, 290-4-2.<br>2. Must meet and follow criteria established by the Georgia regulatory body for opioid administration programs (Department of Community Health, Healthcare Facilities Regulation Division) and the Food and Drug Administration's guidelines for this service.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |      |       |       |       |       |          |                |                                                  |       |       |       |       |          |
| Service Accessibility                                                 | To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine <b>[Further guidance TBD]</b> .                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |      |       |       |       |       |          |                |                                                  |       |       |       |       |          |

## Opioid Maintenance Treatment

|                                  |                                                                                                                                                                                                                                                                                                                                                                   |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Documentation Requirements       | If medically necessary for the individual, the Individualized Recovery/Resiliency Plan should also include individualized treatment, resource coordination, and personal health education specific to substance use disorder recovery (including education about human immunodeficiency virus [HIV], tuberculosis [TB], and sexually transmitted diseases [STD]). |
| Additional Medicaid Requirements | Tier I and II providers who are approved to bill Medication Administration may bill H0020 for Medicaid recipients who receive this service.                                                                                                                                                                                                                       |

| Service Description      | Peer Support, Wellness and Respite Center - Respite services are a self-directed, trauma-informed, and recovery-oriented alternative to traditional clinical crisis services; and support peers in seeing crisis as an opportunity for learning and growth. These services are a combination of an overnight stay (up to 7 consecutive nights) with Intentional Peer Support as a key recovery approach during that stay. The PSWRC Respite experience is offered as a safe environment in which an individual can be supported to accomplish the individualized expectations set forth in the proactive interviewing process (cited below).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                     |        |                     |         |  |
| Admission Criteria       | <ol style="list-style-type: none"> <li>1. Individuals with a behavioral health condition who are experiencing an emotional, mental, and/or psychiatric crisis and have previously completed a pre-crisis, proactive interview. A proactive interview is an interactive dialogue between a center peer staff and a peer who may choose this service in the future. The proactive interview is completed when the person is doing well and includes a discussion of the expectations of both parties.</li> <li>2. Individuals must be 18 years or older.</li> <li>3. Individuals must be capable of basic self-care during their stay.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                     |        |                     |         |  |
| Continuing Stay Criteria | The individual continues to articulate a need for the respite up through the 7 <sup>th</sup> night.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                     |        |                     |         |  |
| Discharge Criteria       | <ol style="list-style-type: none"> <li>1. The individual indicates a desire to leave the support;</li> <li>2. | Service Description              | Warm line services afford individuals access to 24/7 peer support and non-urgent crisis support over the telephone. In addition to peer support, callers can receive information about community and natural supports. Warm transfers of calls can be made to GCAL when appropriate.                                                                                                                                                                                                                                              |                     |        |
| Admission Criteria               | Anyone with a behavioral health condition that calls the warm line for the purposes of peer support.                                                                                                                                                                                                                                                                                                                                                                                                                              |                     |        |

| Service Description                                                                                                                                                          | <p><b>Definition of Service:</b> This is a group service in which the Whole Health &amp; Wellness Coach (CPS-WH) assists participants with setting personal expectations, introducing health objectives as an approach to accomplishing overall life goals, helping identify personal and meaningful motivation, and health/wellness self-management. The individuals served should be supported by the CPS-WH and the members of the group to be the director of his/her health through identifying incremental and measurable steps/objectives that make sense to the person, considering these successes as a benchmark for future success.</p> <p>Health engagement and health management for the individual are key objectives of the service. These should be accomplished by facilitating health dialogues; exploring the multiple choices for health engagement; supporting the individual in overcoming fears and anxiety related to engaging with health care providers and</p> |       |       |       |       |       |         |                                            |                                                  |       |       |       |       |         |

## Peer Support Whole Health & Wellness - Group

procedures; promoting engagement with health practitioners including, at a minimum, participating in an annual physical; assisting the individual in the work of finding a compatible primary physician who is trusted; among other engagement activities.

Another major objective is promoting access to health supports. This is accomplished by using technology to support the individual's goals; providing materials which assist in structuring the individual's path to prevention, healthcare, and wellness; partnering with the person to navigate the health care system; assisting the person in developing his/her own natural support network which will promote that individual's wellness goals; creating solutions with the person to overcome barriers which prevent healthcare engagement (e.g. transportation, food stamps, shelter, medications, safe environments in which to practice healthy choices, etc.); and linking the individual with other health and wellness resources (physical activity, fitness, healthy/nutritional food).

The Whole Health & Wellness Coach (CPS-WH) and supporting nurse also provide the following health skill-building and supports:

1. Share basic health information which is pertinent to the individual's personal health;
2. Promote awareness regarding health indicators;
3. Assist in understanding the idea of whole health and the role of health screening;
4. Support behavior changes for health improvement;
5. Make available wellness tools (e.g., relaxation response, positive imaging, education, wellness toolboxes, daily action plans, stress management, etc.) to support the individual's identified health goals;
6. Provide concrete examples of basic health changes and work with the group members in the selection of incremental health goals;
7. Teach/model/demonstrate skills such as nutrition, physical fitness, healthy lifestyle choices;
8. Promote and offer healthy environments and skills-development to assist in modifying own living environments for wellness;
9. Support group members as they practice creating healthy habits, personal self-care, self-advocacy and health communication (including but not limited to disclosing history, discussing prescribed medications, asking questions in health settings, etc.);
10. Support group members to identify and understand how his/her family history, genetics, etc. contribute to their overall health picture;
11. Support group members in understanding medication and related health concerns; and
12. Promote health skills, considering fitness, healthy choices, nutrition, healthy meal preparation, teaching early warning signs/symptoms which indicate need for health intervention, etc.

Specific interventions may also include supporting the individual group members in being able to have conversations with various providers to access health support and treatment and assisting individuals in gaining confidence in asserting their personal health concerns and questions, while also assisting the person in building and maintaining self-management skills. Health should be discussed as a process instead of a destination.

Assistance will be provided to group members to facilitate active participation in the development of Individualized Recovery Plan (IRP) health goals which may include but not be limited to attention to dental health, healthy weight management, cardiac health/hypertension, vision care, substance use disorders (including smoking cessation), vascular health, diabetes, pulmonary, nutrition, sleep disorders, stress management, reproductive health, human sexuality, and other health areas.

These interventions are necessarily collaborative: partnering with health providers and partnering with individuals served in dialogues with other community partners and supporters to reinforce and promote healthy choices. The Whole Health & Wellness Coach (CPS-WH) must also be partnered with the identified supporting nurse and other licensed health practitioners within the organization to access additional health support provided by the organization or to facilitate health referral and access to medical supports external to the organization providing this service.

The interventions are based upon respectful and honest dialogue supported by motivational coaching. The approach is strengths-based: sharing positive perspectives and outcomes about managing one's own health, what health looks like when the person gets there (visioning), assisting a person with re-visioning his/her self-perception (not as "disabled"), assisting the person in recognizing his/her own strengths as a basis for motivation, and identifying capabilities and opportunities upon which to build enhanced health and wellness. The peer-to-peers basis for the service allows the sharing of personal experience, including modeling wellness and mutual respect and support that is also respectful of the individualized process and journey of recovery. This equality partnership between the supported individual and

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          | <p>the Whole Health &amp; Wellness Coach (CPS-WH) should serve as a model for the individual as he/she then engages in other health relationships with health services practitioners. As such the identified nurse member of the team is in a supporting role to the Whole Health &amp; Wellness Coach (CPS).</p> <p>A mind/body/spirit approach is essential to address the person's whole health. Throughout the provision of these services the practitioner addresses and accommodates an individual's unique sense of culture, spirituality, and self-discovery, assisting individuals in understanding shared-decision making, and in building a relationship of mutual trust with health professionals.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Admission Criteria       | <ol style="list-style-type: none"> <li>1. Individual must have two co-existing serious health conditions (hypertension, diabetes, obesity, cardiovascular issues, pulmonary issues, etc.), one of which is either a mental health condition or substance use disorder; <b>and one or more of the following:</b></li> <li>2. Individual requires and will benefit from support of Whole Health &amp; Wellness Coaches (CPS-WHs) and from a group model for the acquisition of skills needed to manage health symptoms and utilize/engage community health resources; <b>or</b></li> <li>3. Individual may need assistance to develop self-advocacy skills in meeting health goals, engaging in health activities, utilizing community-health resources, and accessing health systems of care; <b>or</b></li> <li>4. Individual may need peer modeling to take increased responsibilities for his/her own recovery and wellness.</li> </ol>                                                                                                                                                                                                                                                            |
| Continuing Stay Criteria | <ol style="list-style-type: none"> <li>1. Individual continues to meet admission criteria; and</li> <li>2. Progress notes document progress relative to health goals identified in the Individualized Recovery/Resiliency Plan, but treatment/recovery/wellness goals have not yet been achieved.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Discharge Criteria       | <ol style="list-style-type: none"> <li>1. An adequate continuing care plan has been established; <b>and one or more of the following:</b></li> <li>2. Goals of the Individualized Recovery Plan have been substantially met; <b>or</b></li> <li>3. Individual/family requests discharge.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Service Exclusions       | <ol style="list-style-type: none"> <li>1. Individuals receiving Assertive Community Treatment are excluded from this service. (If an ACT team has a Whole Health &amp; Wellness Coach (CPS), then that Whole Health &amp; Wellness Coach (CPS-WH) can provide this intervention but would bill through that team's existing billing mechanisms).</li> <li>2. When whole health and wellness topics are provided within a MH Peer Support program model, this PSWHW code is not utilized as a billable intervention. In this case, the whole health and wellness content is a subcomponent of the MH Peer Support program model.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Clinical Exclusions      | Individuals with the following conditions are excluded from admission unless there is clearly documented evidence of a psychiatric condition co-existing with one of the following diagnoses: intellectual/developmental disabilities, Autism, Neurocognitive Disorder, substance use disorder, or Traumatic Brain Injury.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Required Components      | <ol style="list-style-type: none"> <li>1. There is documentation available which evidences a minimum monthly team meeting during which the Whole Health &amp; Wellness Coach/s and the agency-designated RN/s convene to: <ol style="list-style-type: none"> <li>a. Promote communication strategies;</li> <li>b. Confer about specific individual health trends;</li> <li>c. Consult on health-related issues and concerns; and</li> <li>d. Brainstorm partnered approaches in supporting the person in achieving his/her whole health goals.</li> </ol> </li> <li>2. Services and interventions must be individually tailored to the needs, goals, preferences and assets of the individual with the goals of wellness and recovery as defined by the individual.</li> <li>3. At least 60% of all service units must involve face-to-face contact with individuals either through an individual or group Peer Support Whole Health and Wellness modality. The remainder of direct billable service includes telephonic intervention directly with the person or is contact alongside the person to navigate and engage in health and wellness systems/activities (billable as PSWHW-I).</li> </ol> |
| Staffing Requirements    | <ol style="list-style-type: none"> <li>1. This service is delivered in a group service model.</li> <li>2. The following practitioners can provide Peer Supported Whole Health &amp; Wellness-Group: <ol style="list-style-type: none"> <li>a. Practitioner Level 3: RN (only when he/she is identified in the agency's organizational chart as being the specific support nurse to the CPS-WH).</li> <li>b. Practitioner Level 4: Whole Health &amp; Wellness Coach (CPS-WH) with Master's or Bachelor's degree in one of the helping professions such as social work, community counseling, counseling, psychology, or criminology, under the supervision of a licensed independent practitioner.</li> </ol> </li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Peer Support Whole Health & Wellness - Group

|                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                            | <ul style="list-style-type: none"> <li>c. Practitioner Level 5: Whole Health &amp; Wellness Coach (CPS-WH) with high school diploma/equivalent under supervision of one of the licensed/credentialed professionals above.</li> </ul> <p>3. Partnering team members must include:</p> <ul style="list-style-type: none"> <li>a. A Whole Health &amp; Wellness Coach (CPS-WH) who promotes individual self-determination, whole health goal setting, decision-making and provides essential health coaching and support to promote activities and outcomes specified above.</li> <li>b. An agency-designated Registered Nurse(s) who provides back-up support to the Whole Health &amp; Wellness Coach (CPS-WH) in the monitoring of each individual's health and providing insight to the Whole Health &amp; Wellness Coach (CPS-WH) as they engage in the health coaching activities described above.</li> <li>c. There is no more than a 1:12 CPS-to-individual ratio for each facilitated group.</li> <li>d. The Whole Health &amp; Wellness Coach (CPS-WH) shall be supervised by a licensed independent practitioner (who may also be the RN partner).</li> <li>e. The Whole Health &amp; Wellness Coach (CPS) is the lead practitioner in the service delivery. The RN will be in a health consultation role to the Whole Health &amp; Wellness Coach (CPS) and the individuals served. The nurse should also be prepared to provide clinical consultation to the Whole Health &amp; Wellness Coach (CPS) if there is an emerging health need; however, the individual is in charge of his/her own health process and this self-direction must be acknowledged throughout the practice of this service.</li> <li>f. The agency supports and promotes the participation of Whole Health &amp; Wellness Coaches (CPS-WHs) in statewide technical assistance initiatives which enhance the skills and development of the CPS.</li> </ul> |
| Clinical Operations        | <p>1. The program shall have an Organizational Plan which will describe the following:</p> <ul style="list-style-type: none"> <li>a. How the served individual will access the service;</li> <li>b. How the preferences of the individual will be supported in accomplishing health goals;</li> <li>c. Relationship of this service to other resources of the organization;</li> <li>d. An organizational chart which delineates the relationship between the Whole Health &amp; Wellness Coach (CPS) and the RN;</li> <li>e. Whole Health &amp; Wellness Coach (CPS-WH) engagement expectations with the individuals served (e.g., planned frequency of contact, telephonic access, etc.)</li> <li>f. The consultative relationship between the Whole Health &amp; Wellness Coach (CPS) and the RN.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Service Accessibility      | <p>1. There is a minimum contact expectation with an individual weekly, either face-to-face (one-on-one or within a group) or telephonically to track progress on the identified health goal. Unsuccessful attempts to make contact shall be documented.</p> <p>2. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Documentation Requirements | <p>1. All applicable Medicaid, ASO, and other DBHDD reporting requirements must be met.</p> <p>2. There is documentation available which demonstrates a minimum monthly team meeting during which the Whole Health &amp; Wellness Coach (CPS-WH) and the agency-designated RN/s convene to discuss items identified in Required Components Item 1 in this definition.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| Service Description                                       | <p><b>Definition of Service:</b> This is a one-to-one service in which the Whole Health &amp; Wellness Coach (CPS-WH) assists the individual with setting his/her personal expectations, introducing health objectives as an approach to accomplishing overall life goals, helping identify personal and meaningful motivation, and health/wellness self-management. The individual served should be supported to be the director of his/her health through identifying incremental and measurable steps/objectives that make sense to the person, considering these successes as a benchmark for future success.</p> <p>Health engagement and health management for the individual are key objectives of the service. These should be accomplished by facilitating health dialogues; exploring the multiple choices for health engagement; supporting the individual in overcoming fears and anxiety related to engaging with health care providers and procedures; promoting engagement with health practitioners including, at a minimum, participating in an annual physical; assisting the individual in the work of finding a compatible primary physician who is trusted; among other engagement activities.</p> <p>Another major objective is promoting access to health supports. This is accomplished by using technology to support the individual's goals; providing materials which assist in structuring the individual's path to prevention, healthcare, and wellness; partnering with the person to navigate the health care system; assisting the person in developing his/her own natural support network which will promote that individual's wellness goals; creating solutions with the person to overcome barriers which prevent healthcare engagement (e.g. transportation, food stamps, shelter, medications, safe environments in which to practice healthy choices, etc.); and linking the individual with other health and wellness resources (physical activity, fitness, healthy/nutritional food).</p> <p>The Whole Health &amp; Wellness Coach (CPS-WH) and supporting nurse also provide the following health skill-building and supports:</p> <ol style="list-style-type: none"><li>1. Share basic health information which is pertinent to the individual's personal health;</li><li>2. Promote awareness regarding health indicators;</li><li>3. Assist the individual in understanding the idea of whole health and the role of health screening;</li><li>4. Support behavior changes for health improvement;</li><li>5. Make available wellness tools (e.g. relaxation response, positive imaging, education, wellness toolboxes, daily action plans, stress management, etc.) to support the individual's identified health goals;</li><li>6. Provide concrete examples of basic health changes and work with the individual in his/her selection of incremental health goals;</li><li>7. Teach/model/demonstrate skills such as nutrition, physical fitness, healthy lifestyle choices;</li><li>8. Promote and offer healthy environments and skills-development to assist the individual in modifying his/her own living environments for wellness;</li><li>9. Support the individual as they practice creating healthy habits, personal self-care, self-advocacy and health communication (including but not limited to disclosing history, discussing prescribed medications, asking questions in health settings, etc.);</li><li>10. Support the individual to identify and understand how his/her family history, genetics, etc. contribute to their overall health picture;</li><li>11. Support the individual in understanding medication and related health concerns; and</li><li>12. Promote health skills, considering fitness, healthy choices, nutrition, healthy meal preparation, teaching early warning signs/symptoms which indicate need for health intervention, etc.</li></ol> |       |    |    |          |                                                                                 |                                                  |    |    |          |

## Peer Support Whole Health & Wellness - Individual

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          | <p>Specific interventions may also include supporting the individual in being able to have conversations with various providers to access health support and treatment and assisting individuals in gaining confidence in asserting their personal health concerns and questions, while also assisting the person in building and maintaining self-management skills. Health should be discussed as a process instead of a destination.</p> <p>Assistance will be provided to the individual to facilitate his/her active participation in the development of the Individualized Recovery Plan (IRP) health goals which may include but not be limited to attention to dental health, healthy weight management, cardiac health/hypertension, vision care, substance use disorders (including smoking cessation), vascular health, diabetes, pulmonary, nutrition, sleep disorders, stress management, reproductive health, human sexuality, and other health areas.</p> <p>These interventions are necessarily collaborative: partnering with health providers and partnering with the individual served in dialogues with other community partners and supporters to reinforce and promote healthy choices. The Whole Health &amp; Wellness Coach (CPS-WH) must also be partnered with the identified supporting nurse and other licensed health practitioners within the organization to access additional health support provided by the organization or to facilitate health referral and access to medical supports external to the organization providing this service.</p> <p>The interventions are based upon respectful and honest dialogue supported by motivational coaching. The approach is strengths-based: sharing positive perspectives and outcomes about managing one's own health, what health looks like when the person gets there (visioning), assisting a person with re-visioning his/her self-perception (not as "disabled"), assisting the person in recognizing his/her own strengths as a basis for motivation, and identifying capabilities and opportunities upon which to build enhanced health and wellness. The peer-to-peer basis for the service allows the sharing of personal experience, including modeling wellness and mutual respect and support that is also respectful of the individualized process and journey of recovery. This equality partnership between the supported individual and the Whole Health &amp; Wellness Coach (CPS-WH) should serve as a model for the individual as he/she then engages in other health relationships with health services practitioners. As such the identified nurse member of the team is in a supporting role to the Whole Health &amp; Wellness Coach (CPS-WH).</p> <p>A mind/body/spirit approach is essential to address the person's whole health. Throughout the provision of these services the practitioner addresses and accommodates an individual's unique sense of culture, spirituality, and self-discovery, assisting individuals in understanding shared decision making, and in building a relationship of mutual trust with health professionals.</p> |
| Admission Criteria       | <ol style="list-style-type: none"> <li>1. Individual must have two co-existing serious health conditions (hypertension, diabetes, obesity, cardiovascular issues, pulmonary issues, etc.), one of which is either a mental health condition or substance use disorder; <b>and one or more of the following:</b></li> <li>2. Individual requires and will benefit from support of Whole Health &amp; Wellness Coaches (CPS-WHs) for the acquisition of skills needed to manage health symptoms and utilize/engage community health resources; <b>or</b></li> <li>3. Individual may need assistance to develop self-advocacy skills in meeting health goals, engaging in health activities, utilizing community-health resources, and accessing health systems of care; <b>or</b></li> <li>4. Individual may need peer modeling to take increased responsibilities for his/her own recovery and wellness.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Continuing Stay Criteria | <ol style="list-style-type: none"> <li>1. Individual continues to meet admission criteria; and</li> <li>2. Individual/family requests discharge.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Service Exclusions       | Individuals receiving Assertive Community Treatment are excluded from this service. (If an ACT team has a Whole Health & Wellness Coach (CPS-WH), then that Whole Health & Wellness Coach (CPS) can provide this intervention but would bill through that team's existing billing mechanisms).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Clinical Exclusions      | Individuals with the following conditions are excluded from admission unless there is clearly documented evidence of a psychiatric condition co-existing with one of the following diagnoses: intellectual/developmental disabilities, Autism, Neurocognitive Disorder, substance use disorder, or Traumatic Brain Injury.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|                       | <ul style="list-style-type: none"> <li>a. Promote communication strategies;</li> <li>b. Confer about specific individual health trends;</li> <li>c. Consult on health-related issues and concerns; and</li> <li>d. Brainstorm partnered approaches in supporting the person in achieving his/her whole health goals.</li> </ul> <p>2. Services and interventions must be individually tailored to the needs, goals, preferences and assets of the individual with the goals of wellness and recovery as defined by the individual.</p> <p>3. At least 60% of all service units must involve face-to-face contact with individuals. The remainder of direct billable service includes telephonic intervention directly with the person or is contact alongside the person to navigate and engage in health and wellness systems/activities.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Staffing Requirements | <ul style="list-style-type: none"> <li>1. This service is delivered in a one-to-one service model by a single practitioner to single individual served.</li> <li>2. The following practitioners can provide Peer Supported Whole Health &amp; Wellness: <ul style="list-style-type: none"> <li>a. Practitioner Level 3: RN (only when he/she is identified in the agency's organizational chart as being the specific support nurse to the CPS).</li> <li>b. Practitioner Level 4: Whole Health &amp; Wellness Coach (CPS-WH) with Master's or Bachelor's degree in one of the helping professions such as social work, community counseling, counseling, psychology, or criminology, under the supervision of a licensed independent practitioner.</li> <li>c. Practitioner Level 5: Whole Health &amp; Wellness Coach (CPS-WH) with high school diploma/equivalent under supervision of one of the licensed/credentialed professionals above.</li> </ul> </li> <li>3. Partnering team members must include: <ul style="list-style-type: none"> <li>a. A Whole Health &amp; Wellness Coach (CPS-WH) who promotes individual self-determination, whole health goal setting, decision-making and provides essential health coaching and support to promote activities and outcomes specified above.</li> <li>b. An agency-designated Registered Nurse/s who provides back-up support to the Whole Health &amp; Wellness Coach (CPS-WH) in the monitoring of each individual's health and providing insight to the Whole Health &amp; Wellness Coach (CPS-WH) as they engage in the health coaching activities described above.</li> <li>c. There is no more than a 1:30 CPS-to-individual ratio.</li> <li>d. The Whole Health &amp; Wellness Coach (CPS-WH) shall be supervised by a licensed independent practitioner (who may also be the RN partner).</li> <li>e. The Whole Health &amp; Wellness Coach (CPS-WH) is the lead practitioner in the service delivery. The RN will be in a health consultation role to the Whole Health &amp; Wellness Coach (CPS-WH) and the individual served. The nurse should also be prepared to provide clinical consultation to the Whole Health &amp; Wellness Coach (CPS-WH) if there is an emerging health need; however, the individual is in charge of his/her own health process and this self-direction must be acknowledged throughout the practice of this service.</li> <li>f. The agency supports and promotes the participation of Whole Health &amp; Wellness Coaches (CPS-WHs) in statewide technical assistance initiatives which enhance the skills and development of the CPS.</li> </ul> </li> </ul> |
| Clinical Operations   | <p>The program shall have an Organizational Plan which will describe the following:</p> <ul style="list-style-type: none"> <li>a. How the served individual will access the service;</li> <li>b. How the preferences of the individual will be supported in accomplishing health goals;</li> <li>c. Relationship of this service to other resources of the organization;</li> <li>d. An organizational chart which delineates the relationship between the Whole Health &amp; Wellness Coach (CPS-WH) and the RN;</li> <li>e. Whole Health &amp; Wellness Coach (CPS-WH) engagement expectations with the individuals served (e.g. planned frequency of contact, telephonic access, etc.);</li> <li>f. The consultative relationship between the Whole Health &amp; Wellness Coach (CPS-WH) and the RN.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Service Accessibility | <ul style="list-style-type: none"> <li>1. There is a minimum contact expectation with an individual weekly, either face-to-face or telephonically to track progress on the identified health goal. Unsuccessful attempts to make contact shall be documented.</li> <li>2. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## Peer Support Whole Health & Wellness - Individual

|                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Service Description         | <p>A therapeutic, rehabilitative, skill building and recovery promoting service for individuals to gain the skills necessary to allow them to remain in or return to naturally occurring community settings and activities. Services include, but are not limited to:</p> <ol style="list-style-type: none"><li>1. Individual or group skill building activities that focus on the development of skills to be used by individuals in their living, learning, social and working environments;</li><li>2. Social, problem solving and coping skill development;</li><li>3. Illness and medication self-management;</li><li>4. Prevocational skills (for example: preparing for the workday; appropriate work attire and personal presentation including hygiene and use of personal effects such as makeup, jewelry, perfume/cologne etc. as appropriate to the work environment; time management; prioritizing tasks; taking direction from supervisors; appropriate use of break times and sick/personal leave; importance of learning and following the policies/rules and procedures of the workplace; workplace safety; problem solving/conflict resolution in the workplace; communication and relationships with coworkers and supervisors; resume and job application development; on-task behavior and task completion skills such as avoiding distraction from work tasks, following a task through to completion, asking for help when needed, making sure deadlines are clarified and adhered to, etc.; learning common work tasks or daily living tasks likely to be utilized in the workplace such as telephone skills, food preparation, organizing/filing, scheduling/participating in/leading meetings, computer skills etc.); and</li><li>5. Recreational activities and/or leisure skills which support a goal on the IRP and improve rehabilitation skills necessary for recovery.</li></ol> <p>The programmatic goals of the service must be clearly articulated by the provider, utilizing a best/evidence-based model for service delivery and support. These best/evidence-based models may include: The Boston University Psychosocial Rehabilitation approach, the Lieberman Model, the International Center for Clubhouse Development approach, or blended models/approaches in accordance with current psychosocial rehabilitation research. Practitioners providing this service are expected to maintain knowledge and skills regarding current research trends in best/evidence-based models and practices for psychosocial rehabilitation.</p> <p>This service is offered in a group setting. Group activities and interventions should be made directly relevant to the needs, desires and IRP goals of the individual participants (i.e. an additional activity/group should be made available as an alternative to a particular group for those individuals who do not need or wish to be in that group, as clinically appropriate).</p> |       |        |        |        |        |          |                                     |                                                  |       |        |        |        |          |
| Admission Criteria          | 1. Individual must have a behavioral health issue (including those with a co-occurring substance use disorder or IID/IDD) and present a low or no risk of danger to themselves or others; and one or more of the following:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |       |        |        |        |        |          |                                     |                                                  |       |        |        |        |          |

## Psychosocial Rehabilitation - Program

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Required Components      | <ol style="list-style-type: none"> <li>This service must operate at an established clinic site approved to bill Medicaid for services. However, individual or group activities should take place offsite in natural community settings as is appropriate to the participating individual's Individualized Recovery Plan.</li> <li>This service may operate in the same building as other day-model services; however, there must be a distinct separation between services in staffing, program description, and physical space during the hours the PSR program is in operation except as described above.</li> <li>Adequate space, equipment, furnishings, supplies and other resources must be provided in order to effectively provide services and so that the program environment is clean and in good repair. Space, equipment, furnishings, supplies, transportation, and other resources for individual use within the PSR program must not be substantially different from that provided for other uses for similar numbers of individuals.</li> <li>The program must be operated for no less than 25 hours/week, typically during day, evening and weekend hrs. No more than 5 hours/day may be billed per individual.</li> <li>A PSR program must operate to assist individuals in attaining, maintaining, and utilizing the skills and resources needed to aid in their own rehabilitation and recovery.</li> </ol>             |
| Staffing Requirements    | <ol style="list-style-type: none"> <li>The program must be under the direct programmatic supervision of a Certified Psychiatric Rehabilitation Practitioner (CPRP), or staff who can demonstrate activity toward attainment of certification (an individual can be working toward attainment of the certification for up to one year under a non-renewable waiver which will be granted by the DBHDD). For purposes of this service "programmatic supervision" consists of the day-to-day oversight of the program as it operates (including elements such as maintaining the required staffing patterns, staff supervision, daily adherence to the program model, etc.).</li> <li>Additionally, the program must be under the clinical oversight of an independently licensed practitioner (this should include meeting with the programmatic leadership on a regular basis to provide direction and support on whether the individuals in the program are clinically improving, whether the design of the program promotes recovery outcomes, etc.).</li> <li>There must be a CPRP with a bachelor's degree present at least 80% of all time the service is in operation regardless of the number of individuals participating.</li> <li>The maximum face-to-face ratio cannot be more than 12 individuals to 1 direct service/program staff (including CPRPS) based on average daily attendance of individuals in the program.</li> </ol> |

## Psychosocial Rehabilitation - Program

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|                     | <ol style="list-style-type: none"> <li>At least one CPRP (or someone demonstrating activity toward attainment of certification) must be onsite face-to-face at all times (either the supervising CPRP or other CPRP staff) while the program operates regardless of the number of individuals participating. All staff are encouraged to seek and obtain the CPRP credential. All staff must have an understanding of recovery and psychosocial rehabilitation principles as defined by USpra and must possess the skills/ability to assist individuals in their own recovery processes.</li> <li>Programs must have documentation that there is one staff person that is "co-occurring capable." This person's knowledge must go beyond basic understanding and must demonstrate actual staff capabilities in using that knowledge for individuals with co-occurring disorders. Personnel documentation should demonstrate that this staff person has received a minimum of 4 hours of training in co-occurring treatment within the past 2 years.</li> <li>If the program does not employ someone who meets the criteria for a MAC, CAADC, GCADC-II or -III, or CAC-II, then the program must have documentation of access to an addictionologist and/or one of the above for consultation on substance use disorders as co-occurring with the identified mental health condition.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Clinical Operations | <ol style="list-style-type: none"> <li>Individuals receiving this service must have a qualifying diagnosis present in the medical record prior to the initiation of services. The diagnosis must be given by persons identified in O.C.G.A Practice Acts as qualified to provide a diagnosis.</li> <li>Rehabilitation services facilitate the development of an individual's skills in the living, learning, social, and working environments, including the ability to make decisions regarding self-care, management of their condition, life work, and community participation. The services promote the use of resources to integrate the individual into the community.</li> <li>Rehabilitation services are individual-driven and are founded on the principles and values of individual choice and active involvement of individuals in their rehabilitation. Through the provision of both formal and informal structures individuals are able to influence and shape service development.</li> <li>Rehabilitation services must include education on self-management of symptoms, medications and side effects; identification of rehabilitation preferences; setting rehabilitation goals; and skills teaching and development.</li> <li>All individuals should participate in setting individualized goals for themselves and in assessing their own skills and resources related to goal attainment. Goals are set by exploring strengths and needs in the individual's living, learning, social, and working environments. Implementation of services may take place individually or in groups.</li> <li>Each individual must be provided assistance in the development and acquisition of needed skills and resources necessary to achieve stated goals.</li> <li>PSR programs must offer a range of skill-building and recovery activities from which individuals choose those that will most effectively support achievement of the individual's rehabilitation and recovery goals. These activities must be developed based on participating individual's input and stated interests. Some of these activities should be taught or led by consumers themselves as part of their recovery process.</li> <li>A PSR program must be capable of serving individuals with co-occurring disorders of mental health condition and substance abuse utilizing integrated methods and approaches that address both disorders at the same time (e.g. groups and occasional individual interventions utilizing approaches to co-occurring disorders such as motivational interviewing/building motivation to reduce or stop substance use, stage based interventions, refusal skill development, cognitive behavioral techniques, psychoeducational approaches, relapse prevention planning and techniques etc.). For those individuals whose substance abuse and dependence makes it difficult to benefit from the PSR program, even with additional or modified methods and approaches, the PSR program must offer co-occurring enhanced services or make appropriate referrals to specialty programs specifically designed for such individuals.</li> <li>The program must have a PSR Organizational Plan addressing the following: <ol style="list-style-type: none"> <li>Philosophical principles of the program must be actively incorporated into all services and activities including (adapted from Hughes/Weinstein): <ol style="list-style-type: none"> <li>View each individual as the director of his/her rehabilitation process.</li> <li>Solicit and incorporate the preferences of the individuals served.</li> <li>Believe in the value of self-help and facilitate an empowerment process.</li> <li>Share information about mental health conditions and teach the skills to manage it.</li> <li>Facilitate the development of recreational pursuits.</li> <li>Value the ability of each individual with a mental h to seek and sustain employment and other meaningful activities in a natural community environment.</li> <li>Help each individual to choose, get, and keep a job (or other meaningful daily activity).</li> </ol> </li> </ol> </li> </ol> |

## Psychosocial Rehabilitation - Program

|                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| Service Access | <ol style="list-style-type: none"> <li>1. A PSR program must be open for no less than 25 hours a week, typically during day, evening and weekend hours. No more than 5 hours per day may be billed per/individual.</li> <li>2. To promote access, providers may use telemedicine as a tool to provide direct interventions to individuals enrolled in this service. See <a href="#">Part II. Community Service Requirements for All Providers, Section I: Policies and Procedures, 1. Guiding Principles, B. Access to Individualized Services, item 16</a> of this Provider Manual for definitions and requirements specific to the provision of telemedicine.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

## Psychosocial Rehabilitation - Program

### Billing and Reporting Requirements

Units of service by practitioner level must be aggregated daily before claim submission.

### Documentation Requirements

1. Providers must document services in accordance with the specifications for documentation requirements specified in Part II, Section III of the Provider Manual.
2. Each hour unit of service provided must be documented within the individual's medical record. Although there is no single prescribed format for documentation (a log may be used), the following elements **MUST** be included for every unit of service provided:
  - a. The specific type of intervention must be documented.
  - b. The date of service must be named.
  - c. The number of unit(s) of service must be named.
  - d. The practitioner level providing the service/unit must be named.

For example, a group led by a Practitioner Level 4 that lasts 1 hour should be documented as 4 units of H0017U4U6 and the intervention type should be noted (such as "Enhancement of Recovery Readiness" group).
3. A weekly log should be present in the record which includes a summary of each day's participation in the programmatic group content.
4. The provider has several alternatives for documenting progress notes:
  - a. Weekly progress notes must document the individual's progress relative to functioning and skills related to the person-centered goals identified in his/her IRP. This progress note aligns the weekly PSR-Group activities reported against the stated interventions on the individualized recovery plan, and documents progress toward goals. This progress note may be written by any practitioner who provided services over the course of that week; or
  - b. If the agency's progress note protocol demands a detailed daily note which documents the progress above, this daily detail note can suffice to demonstrate functioning, skills, and progress related to goals and related to the content of the group intervention; or
  - c. If the agency's progress note protocol demands a detailed hourly note which documents the progress above, this daily detail note can suffice to demonstrate functioning, skills, and progress related to goals and related to the content of the group intervention.
5. While billed in increments, the PSR-Group service is a program model. Daily time in/time out to the program is tracked for while the person is present in the program, but due to time/in out not being required for each hourly intervention, the time in/out may not correlate with the units billed for the day. However, the units noted on the log should be consistent with the units billed and, if noted, on the weekly progress note. If the units documented are not consistent, the most conservative number of units will be utilized.
6. A provider shall only record units in which the individual was actively engaged in services. Any time allocated in the programmatic description for meals typically does not include organized programmatic group content and therefore would not be included in the reporting of units of service delivered. Should an individual leave the program or receive other services during the range of documented time in/time out for PSR-Group hours, the absence should be documented on the log.
7. Rounding is applied to the person's cumulative hours/day at the PSR program (excluding non-programmatic time). The provider shall follow the guidance in the rounding policy included in this Provider Manual, and, specific to this service, the person served must have participated in at least 50% of the hour in order to bill for one unit of this service. For instance, if an individual participates in the program from 9-1:15 excluding a 30-minute break for lunch, his/her participating hours are 3.75 hours. The rounding policy is applied to the .75 hour and the units billed for that day are 4 units. Practitioner type must still be addressed and so that 4 units must be adequately assigned to either a U4 or U5 practitioner type as reflected in the log for that day's activities.
8. When this service is used in conjunction with Crisis Stabilization Units, Peer Supports, and ACT (on a limited basis), documentation must demonstrate careful planning to maximize the effectiveness of this service as well as appropriate reduction in service amounts of PSR-group based upon current medical necessity. Utilization of psychosocial rehabilitation in conjunction with these services is subject to additional review by the Administrative Services Organization.

## Residential: Community Residential Rehabilitation I (Intensive / Level 1)

| Transaction Code                                                           | Code Detail                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Code  | Mod 1          | Mod 2 | Mod 3 | Mod 4 | Rate                                             |

| Service Description                                                        | <p>Community Residential Rehabilitation Level 1 (CRR I) is a service that provides residential rehabilitation interventions to individuals who require an intensive level of structured support to achieve and enhance their recovery and wellness, increase self-sufficiency and independence, while maintaining community integration. Residential rehabilitation provides individualized, goal-directed skills training and support that are used to restore an individual to the highest level of baseline functioning in the least restrictive and appropriate environment. Interventions provided include rehabilitative skills building in a variety of areas (e.g. activities of daily living, health and safety, home and financial management, and personal growth), community integration activities, rehabilitative supervision, and/or personal services. These individualized supportive interventions promote individual initiative, preference, and independence in making life choices (including their services and supports). This level of residential support requires 24/7 on-site awake staff.</p> <p>While the service design is intended to promote increased independence and community integration, it is not always transitional in nature and some individuals may need to continue receiving support while living in the community. Where and when possible, individuals should be supported in transitioning to the least restrictive environment available wherein they are able to maintain stability and housing.</p> <p>Individuals receiving Community Residential Rehabilitation should experience decreased symptomology (or a decrease in debilitating effects of symptoms), improved social integration and functionality, and increased movement toward self-directed recovery as evidenced by:</p> <ol style="list-style-type: none"><li>1. Reduction in hospitalizations;</li><li>2. Reduction in incarcerations;</li><li>3. Maintenance of housing stability;</li><li>4. Participation in education, vocational training or gainful employment, if this is a goal in the Individualized Recovery Plan;</li><li>5. Participation in activities that promote recovery and community integration such as community meetings and other social and recreational activities.</li></ol> |       |                |       |       |       |                                                  |
| Admission Criteria                                                         | <p>Adults aged 18 or older who have a diagnosis of Serious and Persistent Illness (SPMI) with functional limitations that severely impair their ability to live in a community-based setting without a high level of residential support and daily supervision, as evidenced by meeting the required criteria below:</p> <ol style="list-style-type: none"><li>1. There is a need for 24/7 awake staff on site to ensure safety and harm reduction to self and others as evidenced by the following:<ol style="list-style-type: none"><li>a. Within the past sixty (60) days there is demonstrated evidence of clear and consistent behaviors occurring a minimum of one time per week contributing to risk of harm and safety (i.e. wandering, elopement, poor safety judgment, sleep disturbance resulting in night terror or anxiety, agitation, aggression, poor impulse control, nighttime confusion/disorientation that would benefit from 24/7 awake staff support during nighttime hours.<ol style="list-style-type: none"><li>i. (SOURCE CITATIONS: Documentation of these behaviors from courts, acute treatment settings (hospitals, CSUs, PRTFs) prison, jails, other residential providers, etc.).</li><li>ii. Nighttime confusion/disorientation is excluded from the 60-day timeframe;</li></ol></li></ol></li></ol> <p style="text-align: center;"><b>AND</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |       |                |       |       |       |                                                  |

## Residential: Community Residential Rehabilitation I (Intensive / Level 1)

- b. Significant functional impairment requiring assistance in three (3) or more of the following areas:
  - i. maintaining hygiene,
  - ii. meeting nutritional needs,
  - iii. caring for personal business affairs,
  - iv. avoiding common dangers or hazards to self and possessions,
  - v. performing daily tasks without assistance;
  - vi. carrying out household responsibilities.

**AND**

- c. Individual lacks the ability to live in an independent setting without intensive residential supports and services, and demonstrates a need for assistance to care for self in a safe and sanitary manner as evidenced by three (3) or more of the following:
  - i. needs assistance with food and clothing,
  - ii. is unable to maintain hygiene, grooming, nutrition, medical or dental care for primary health care conditions,
  - iii. history of hospitalization or at risk of confinement because of dangerous behavior due to inability to manage illness,
  - iv. lack of medication compliance,
  - v. experiences significant issues such as social isolation, poverty, homelessness, lack of family support, and/or substance use/co-occurring disorders

**AND**

- 2. Individuals who utilize this level of service typically have no other viable means of support.

**AND**

- 3. Within the last 180 days attempts at a lower level of residential care have either been considered or tried but have shown little to no effectiveness.

**AND**

- 4. Individual demonstrates two (2) or more of the following indicators of continual high service needs:
  - i. high use of psychiatric hospital and/or CSU;
  - ii. persistent symptoms that place individual at risk of harm to self or others;
  - iii. co-occurring substance use of significant duration; and/or
  - iv. chronically homelessness.

Priority should be given to those persons discharging or recently discharged from a state psychiatric hospital or CSU.

NOTE: Community Integration Homes (CIHs) are a comparable level of care where individuals are court ordered to this level of care with a referral from the State Office of Forensic Services and cannot be moved without court approval. As a result, CIHs are exempt from utilization review and authorization requests will be automatically approved.

Continuing Stay  
Criteria

- 1. Individual continues to meet admission criteria as described above; **and**
- 2. Individual continues to benefit from and require intensive residential supports, as evidenced by the Comprehensive Needs Assessment, Housing Goal, and Residential Functional Assessment.

## Residential: Community Residential Rehabilitation I (Intensive / Level 1)

|                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| Discharge Criteria  | <p>Discharge can take place when:</p> <ol style="list-style-type: none"> <li>1. An individual or legal representative/guardian withdraws consent or request discharge from this service (refusal to participate in treatment services is not solely a reason for discharge. The Provider must actively engage the individual in the benefit of treatment compliance, thus allowing the individual to make a personal choice to re-engage in services); <b>or</b></li> <li>2. An individual has achieved his/her goals in the IRP and has appropriate living arrangements that are less restrictive; <b>or</b></li> <li>3. An individual has not achieved his/her goals in the IRP and based on current functioning a higher level of care is recommended; <b>or</b></li> <li>4. An individual is experiencing an extended absence from the residential program of thirty (30) days or more.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Service Exclusions  | No other residential services are allowable in conjunction with this service.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Clinical Exclusions | Individuals with the following conditions are excluded from admission unless there is documented evidence of psychiatric condition: Developmental Disability, Autism, Neurocognitive Disorder, or Traumatic Brain Injury. Individual can be effectively and safely supported without 24/7 awake staff.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Required Components | <ol style="list-style-type: none"> <li>1. CRR I length of stay is between 12-18 months and should not typically exceed 18 months. Continued residency in a Level I setting is acceptable when individual needs or circumstance inhibits their ability to transition. <ol style="list-style-type: none"> <li>a. If individuals are expected to overstay the recommended length of stay, written approval must be received from the Regional Field Office with a detailed explanation of why the individual could not be transitioned to another setting.</li> </ol> </li> <li>2. The residential setting should not exceed 16 beds for existing providers in operation as of July 1, 2016.</li> <li>3. For residential settings/properties approved for this service after July 1, 2016, no residential treatment setting shall exceed 4 beds.</li> <li>4. The residential program must provide a structured and supported living environment 24 hours a day, 7 days a week with AWAKE staff on-site at all times.</li> <li>5. All discharges that occur unrelated to the individual's choice or improved rehabilitative progress must be approved by the Regional Field Office to ensure that the individual is being discharged to a positive housing setting/environment.</li> </ol> <p><b><u>Licensing and Accreditation Requirements</u></b></p> <ol style="list-style-type: none"> <li>6. The agency providing this service must be either CARF or Joint Commission accredited.</li> <li>7. The service site must be licensed by the Georgia HFR as a PCH or CLA facility which can provide support to those with behavioral health concerns.</li> <li>8. The Provider and service site must be trained and knowledgeable regarding Protecting the Rights of its individuals as written in the Rules and Regulations set forth by DCH for a PCH or CLA. The home must operate in a manner that respects the personal dignity of the individual.</li> </ol> <p><b><u>Site Requirements</u></b></p> <ol style="list-style-type: none"> <li>9. Each resident facility must comply with all relevant access and safety codes. <ol style="list-style-type: none"> <li>a. Each residential site must be arranged and maintained to provide adequate measures for the health, safety, access and well-being of the residents. <ol style="list-style-type: none"> <li>i. All areas of the residential facility must be clean, safe, appropriately equipped, and furnished for the services delivered.</li> <li>ii. The facility must maintain a written evacuation plan to be used in the case of fire or other disaster. <ol style="list-style-type: none"> <li>1. An appropriate written certification of compliance must be obtained indicating that all applicable fire and safety code requirements have been satisfied.</li> <li>2. Periodic fire and other safety drills must be conducted.</li> <li>3. Evacuation routes must be clearly marked by exit signs.</li> </ol> </li> </ol> </li> <li>b. The facility must comply with the Americans with Disabilities Act. Specifically, the facility must provide access to ground-level units that meet ADA criteria for individuals who have a physical disability. <ol style="list-style-type: none"> <li>i. Providers must ensure readiness to purchase and install accommodation for individuals who are deaf or hard of hearing who are to be served at the site.</li> </ol> </li> </ol> </li> <li>10. The site/facility location is integrated within the community and supports access to the greater community.</li> </ol> |

## Residential: Community Residential Rehabilitation I (Intensive / Level 1)

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| Staffing Requirements | <ol style="list-style-type: none"> <li>Residential sites are required to have an on-site residential manager/supervisor. The Residential Manager/Supervisor is required to be on-site at the CRR I site at least 3x/week to provide oversight and supervision to the staff who provide direct daily services and supports. <ol style="list-style-type: none"> <li>Residential Managers/Supervisors may be persons with at least 2 years' experience providing MH or AD services and at least a high school diploma; however, this person must be directly supervised by a licensed staff member (including LMSW, LMFT, APC, or 4-year RN).</li> </ol> </li> <li>CRR support services at the site may be delivered by trained professionals with at least a high school diploma, GED, or higher, who have completed the paraprofessional training required for DBHDD contracted organizations and who are under the supervision of a Residential Manager.</li> <li>There must be a minimum of at least one (1) awake on-site staff 24/7.</li> <li>Providers should make adjustments for increased staffing as appropriate based on the needs of the individuals within the residential program.</li> </ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Clinical Operations   | <ol style="list-style-type: none"> <li>Individuals must be assisted with the items below within the first seven (7) days of admission and every 90 days thereafter until discharge to determine appropriateness for this level of residential support: <ol style="list-style-type: none"> <li>A Comprehensive Needs Assessment that includes the following activities: <ol style="list-style-type: none"> <li>Applying for and obtaining vital records.</li> <li>Submitting/monitoring appropriate benefit/entitlement applications to assist with the financial demands of independent living.</li> <li>Identification of natural supports (i.e. family, friends, and support groups) and ways to strengthen/utilize them while living in the community.</li> <li>Linkage to adult mental health and/or substance use disorder services, as well as primary care providers and/or specialty services as applicable. Services can be provided by a Core or Private Psychiatrist and individual choice/preference should always be considered. Individuals served shall not lose this residential support as a result of his/her choice to opt out of other behavioral health support/medical treatment services (unless these services are otherwise required by a federal program/fund source supporting a specific individual).</li> </ol> </li> <li>A Housing Goal that clearly states the desire of the individual, identifies available housing opportunities, resources, and supports (i.e. housing types, costs, and locations), and promotes opportunities for continued growth, independence, and community integration.</li> <li>A Primary and Secondary/Contingency Transition Plan that clearly identifies the steps needed to achieve the desired Housing Goal and address any barriers to transition.</li> <li>A Residential Crisis Response Plan that guides the residential provider's response to an individual's crisis episode while receiving residential services that diverts the loss of housing and promotes housing stability. This plan shall be developed in partnership with the individual and offer 24/7 access to a residential services specialist in the event of a crisis.</li> <li>A Residential Functional Assessment</li> </ol> </li> <li>CRR I provides a minimum of (5) hours of weekly residential rehabilitation services to an individual who requires an intensive level of structured support to achieve/enhance their recovery and increase self-sufficiency. These services can be conducted in a group setting; however, no more than half of the required hours can be group. Individuals must have some dedicated hours of individualized services catered especially to their specific needs. Also, these services can only be provided by residential staff and must be focused on independent living skills necessary for the individual to live in a less structured setting. Examples of Residential Rehabilitative Services include: <ol style="list-style-type: none"> <li><b>Rehabilitative Skill Building</b> which includes: <ol style="list-style-type: none"> <li>Activities for daily living, especially those involving maintaining personal hygiene and proper grooming/dress.</li> </ol> </li> </ol> </li> </ol> |

## Residential: Community Residential Rehabilitation I (Intensive / Level 1)

- ii. Health and Safety interventions aimed at assisting individuals with access to behavioral health, substance use, and medical treatment services, as well as continuous engagement and adherence to these services; symptom identification and wellness management that promotes appropriate behaviors and safety in the community, and self-administration of medication.
  - iii. Home Management, to include meal planning, preparation, and cooking, laundry, and housekeeping.
  - iv. Financial Management that promotes the ability to manage personal finances and entitlements.
  - v. Personal Growth that allows an individual to express housing choice and preference, develop better communication and social skills using coping skills and positive peer interactions.
- b. **Community Integration Activities** which allow for opportunities to seek employment and work in competitive integrated settings; attend institutions for higher learning; engage in community life; learn the skills necessary to utilize natural supports in the community. These are meaningful daily activities that are tailored to the needs and preferences of the individual.
- c. **Rehabilitative Supervision** that requires staff to monitor the individual's response to treatment interventions and make adjustments to the IRP as indicated.
- d. **Personal Services**
- i. Monitoring or providing individual assistance with basic daily healthy maintenance activities, meal preparation, and light housekeeping;
  - ii. Limited assistance with bathing, self-grooming, and hygiene
  - iii. Assistance with self-medication; self-administration of medications, medical and health care adherence, symptom identification and management.
3. Attendance of a day treatment program does not satisfy the rehabilitative services requirement. Additionally, attendance of a day treatment program cannot be required as a condition of admission or residence.
4. Attempted contacts to conduct weekly residential rehabilitative services will not be counted towards overall service hours. It is the expectation that these services are the primary purpose/need for admission to CRR services. Staff must make every effort to provide these services to their residents, even if services must be provided during non-traditional hours. If an individual refuses to participate in services, or misses two (2) consecutive weeks, a clinical review of the individual's IRP should be conducted, determining the clinical appropriateness of services, while identifying and accounting for any special or individualized needs/accommodations. If an individual has self-identified that they do not require rehabilitative services and refuses to participate for four (4) consecutive weeks despite education and coaching provided by Residential staff and if necessary, the Regional Field Office, then he/she may be discharged from the residential program.
5. Providers will facilitate Quarterly Team Meetings with the Central Office, Regional Field Office, and individual to report findings of quarterly Residential Functional Assessments, review Housing Goal, and discharge transition plan. Where appropriate, specialty services (such as ACT, CST, ICM, and SE) should also be included in these quarterly meetings. Documentation of this meeting must be entered into the Electronic Medical Record as a non-billable Progress Note.

### Treatment, Transition, and Housing Planning

6. Services must be delivered to individuals in accordance with their Individualized Recovery Plan.
7. CRR I is a transitional residential setting and is not intended to provide a long-term residential placement, nor permanent housing. As such, discharge planning begins upon admission and should reinforce the therapeutic nature of residential supports to ensure individual stability before discharge.
8. Any individual enrolled in this service for whom acute stabilization services are necessary (e.g., inpatient hospitalization, crisis stabilization unit, emergency department intervention, BHCC, etc.), the provider must conduct a clinical review of the individual's relevant clinical information (e.g. discharge plan/summary, risk assessments, treatment recommendations, etc.) and modify the individual's IRP as necessary, in accordance with Part II, Section III: Documentation Requirements of this manual, item # 5. Individualized Recovery/Resiliency Planning, sub-item E.
9. As a part of the planning for when an individual will move to housing of his/her own choice, the Housing Choice and Needs Evaluation <https://dbhddapps.dbhdd.ga.gov/NSH/> must be completed at admission and annually for every individual, as indicated on their IRP. The only exception to this expectation is when an individual chooses to opt out due to stable housing, personal choice, etc.

| Service Description                                                        | <p>Community Residential Rehabilitation Level 2 (CRR II) is a service that provides residential rehabilitation services to an individual who requires an intensive level of structured support to achieve and enhance their recovery and wellness, increase self-sufficiency and independence, while maintaining community integration. Residential rehabilitation services are individualized, goal-directed trainings and supports used to restore an individual to the highest level of baseline functioning in the least restrictive and appropriate environment. Services provided include rehabilitative skills building in a variety of areas (such as activities for daily living, health and safety, home and financial management, and personal growth), community integration activities, rehabilitative supervision, and/or personal services. These individualized supportive services promote individual initiative, preference, and independence in making life choices, including regarding their services and supports.</p> <p>While the service design is intended to promote increased independence and community integration, it is not always transitional in nature and some individuals may have a necessity to continue receiving support while living in the community. Where possible, individuals should be supported in transitioning to the least restrictive environment available where they can maintain stability and housing.</p> <p>Individuals receiving Community Residential Rehabilitation should experience decreased symptomology (or a decrease in debilitating effects of symptoms), improved social integration and functionality, and increased movement toward self-directed recovery as evidenced by:</p> <ol style="list-style-type: none"><li>1. Reduction in hospitalizations;</li><li>2. Reduction in incarcerations;</li><li>3. Maintenance of housing stability;</li><li>4. Participation in education, vocational training or gainful employment, if this is a goal in the Individualized Recovery Plan;</li><li>5. Participation in activities that promote recovery and community integration such as community meetings and other social and recreational activities.</li></ol> |       |                |       |       |       |                                                  |
| Admission Criteria                                                         | <p>Adults aged 18 or older who have a diagnosis of Serious and Persistent Illness (SPMI) with functional limitations that severely impair their ability to live in a community-based setting without a high level of residential support and daily supervision; as evidenced by the required criteria below:</p> <ol style="list-style-type: none"><li>1. There is a need for 24/7 availability of support to ensure safety and harm reduction to self and others as evidenced by the following:<ol style="list-style-type: none"><li>a. Significant functional impairment and needs assistance in 3 or more of the following areas:<ol style="list-style-type: none"><li>i. maintaining hygiene; or</li><li>ii. meeting nutritional needs; or</li><li>iii. caring for personal business affairs; or</li><li>iv. avoiding common dangers or hazards to self and possessions; or</li><li>v. performing daily tasks with minimal assistance; or</li><li>vi. carrying out household responsibilities;</li></ol></li></ol><p style="text-align: center;"><b>AND</b></p><li>b. Lack the ability to live in an independent setting without intensive residential supports and services, demonstrating a need for assistance to care for self in a safe and sanitary manner as evidenced by three (3) or more of the following:</li></li></ol>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |       |                |       |       |       |                                                  |

## Residential: Community Residential Rehabilitation II (Semi-Intensive / Level 2) – EFFECTIVE DATE TBD

|                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                          | <ul style="list-style-type: none"> <li>i. need assistance with food and clothing; or</li> <li>ii. are unable to maintain hygiene, grooming, nutrition, medical or dental care for primary health care conditions; or</li> <li>iii. history of hospitalization or at risk of confinement because of dangerous behavior due to inability to manage illness; or</li> <li>iv. lack of medication compliance; or</li> <li>v. experience significant issues such as social isolation, poverty, homelessness, no family support; or</li> <li>vi. substance use/co-occurring disorders;</li> </ul> <p style="text-align: center;"><b>AND</b></p> <p>2. Individuals who typically have no other viable means of support;</p> <p style="text-align: center;"><b>AND</b></p> <p>3. Within the last 180 days, attempts at a more independent level of residential care have either been considered or tried but have shown little to no effectiveness;</p> <p style="text-align: center;"><b>AND</b></p> <p>4. Individuals with two or more of the following indicators of continuous high service needs:</p> <ul style="list-style-type: none"> <li>a. high use of psychiatric hospital and/or CSU; or</li> <li>b. persistent symptoms that place individual at risk of harm to self or others; or</li> <li>c. co-existing substance use of significant duration; or</li> <li>d. chronic homelessness (as defined by HUD);</li> </ul> <p style="text-align: center;"><b>AND</b></p> <p>5. Individual is clinically assessed as requiring 24/7 support but not 24/7 supervision.</p> <p>Priority shall be given to individuals awaiting discharge or who have been recently discharged from a state psychiatric hospital or CSU.</p> |
| Continuing Stay Criteria | <p>1. Individual continues to meet admission criteria as described above; <b>and</b></p> <p>2. Individual continues to benefit from and require intensive residential supports, as evidenced by the Comprehensive Needs Assessment, Housing Goal, and Residential Functional Assessment.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Discharge Criteria       | <p>Discharge can take place when:</p> <ul style="list-style-type: none"> <li>1. An individual or legal representative/guardian withdraws consent or request discharge from this service (refusal to participate in treatment services is not solely a reason for discharge. The Provider must actively engage the individual in the benefit of treatment compliance, thus allowing the individual to make a personal choice to re-engage in services); <b>or</b></li> <li>2. An individual has achieved his/her goals in the IRP and has appropriate living arrangements that are less restrictive; <b>or</b></li> <li>3. An individual has not achieved his/her goals in the IRP and based on current functioning a higher level of care is recommended; <b>or</b></li> <li>4. An individual is experiencing an extended absence from the residential program of thirty (30) days or more.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Service Exclusions       | No other residential services are allowable in conjunction with this service.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Clinical Exclusions      | Individuals with the following conditions are excluded from admission unless there is documented evidence of psychiatric condition: Developmental Disability, Autism, Neurocognitive Disorder, or Traumatic Brain Injury.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Required Components      | <ul style="list-style-type: none"> <li>1. CRR II length of stay is between 12-18 months and should not typically exceed 18 months. Continued residency in a Level II setting is acceptable when individual needs or circumstance inhibits their ability to transition. <ul style="list-style-type: none"> <li>a. If individuals are expected to overstay the recommended length of stay, written approval must be received from the Regional Field Office with a detailed explanation of why the individual could not be transitioned to another setting.</li> </ul> </li> <li>2. Residential settings may not exceed 16 beds.</li> <li>3. The residential program must provide a structured and supported living environment 24 hours a day, 7 days a week, with at least one staff on-site at all times.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

## Residential: Community Residential Rehabilitation II (Semi-Intensive / Level 2) – EFFECTIVE DATE TBD

4. All discharges that occur unrelated to the individual's choice or improved rehabilitative progress must be approved by the Regional Field Office to ensure that the individual is being discharged to a positive housing setting/environment.

### Licensing and Accreditation Requirements

5. The agency providing this service must be either CARF or Joint Commission accredited.
6. The service site must be licensed by the Georgia HFR as a PCH or CLA facility which can provide support to those with behavioral health concerns.
7. The Provider and service site must be trained and knowledgeable regarding Protecting the Rights of its individuals as written in the Rules and Regulations set forth by DCH. The home must operate in a manner that respects the personal dignity of the individual.

### Site Requirements

8. Each resident facility must comply with all relevant safety codes.
  - a. Each residential site must be arranged and maintained to provide adequate measures for the health, safety, access and well-being of the residents.
    - i. All areas of the residential facility must be clean, safe, appropriately equipped, and furnished for the services delivered.
  - b. The facility must maintain a written evacuation plan to be used in the case of fire or other disaster. An appropriate written certification of compliance must be obtained indicating that all applicable fire and safety code requirements have been satisfied. Periodic fire and other safety drills must be conducted.
    - i. Evacuation routes must be clearly marked by exit signs.
9. The facility must comply with the Americans with Disabilities Act. Specifically, the facility must provide access to ground-level units that meet ADA criteria for individuals who have a physical disability.
  - a. Providers must ensure readiness to purchase and install accommodations for individuals who are deaf or hard of hearing who are to be served at the site.

### Resident Accommodations

10. Each individual has privacy in their sleeping or living unit. The common areas should be available to residents.
11. Units have lockable entrance doors, with the individual-served and appropriate staff having keys to doors as needed.
12. To the greatest extent possible, individuals sharing units have a choice of roommates.
13. For sites in which an individual might have an extended length of stay, individuals have the freedom to decorate their sleeping or living units.
14. Individuals have freedom and support to control their schedules and activities and have access to food any time.
15. To the greatest extent possible and with respect to other participants, individuals may have visitors at any time, with the exception of during late night hours and overnight. To the best extent possible and with respect to other participants, individuals may have visitors at any time, with the exception of during late night hours and overnight.

### Staffing Requirements
