

NICOTINE USE AMONG GA TEENS

Cigarettes

90% of daily cigarette smokers start smoking **before age 18**, so preventing teens from smoking is key to reducing the overall burden of cigarette use (CDC).

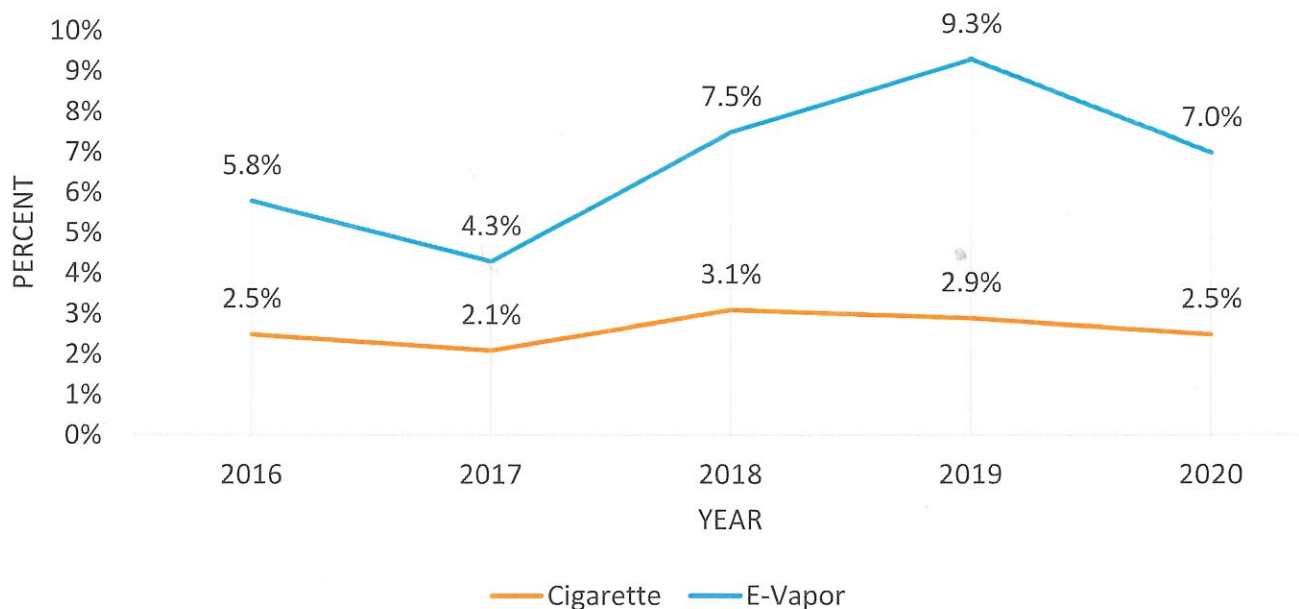

- 2.5% of GA teens have used cigarettes within the last 30 days
- 8.7% of GA teens report smoking a cigarette before age 17
- 26.4% of GA teens perceived no risk of smoking 1 or more packs of cigarettes a day

E-Vapor Products

E-vapor are advertised as “safer” alternatives to cigarettes and are usually marketed towards teens.

- 7% of GA teens have used an e-vapor product in the last 30 days
