

# Child and Adolescent Mental Health Fidelity Monitoring Report Card Mental Health Clubhouse Providers May 1-31, 2013

Georgia  
Center of Excellence  
in Child and Adolescent Behavioral Health

June 25, 2013

*Georgia State University in Partnership with the Department  
of Behavioral Health and Developmental Disabilities*

*Prepared for the Department of Behavioral Health and Development Disabilities by the Georgia Center of Excellence in Child and Adolescent Behavioral Health (COE), a part of the Georgia Health Policy Center housed within Georgia State University's Andrew Young School of Policy Studies.*

Department of Behavioral Health and Developmental Disabilities (DBHDD), Division of Child and Adolescent (C&A) Mental Health  
Continuous Quality Improvement (CQI) Report Card  
Mental Health Clubhouses  
Aggregate State Level Data  
May 1-31, 2013

	Individual Provider - Report Period	All Clubhouses Report Period	Benchmark Target	Number of Clubhouses That Met Benchmark	Change from Previous Report Period	Interpretation of Change (as compared to previous report period)
<b>Members Served</b>						
1. Members served year to date (YTD)		636			38	Increase in number of members served YTD.
2. Members served during report period		328			17	Increase in number of members served during report period.
3. Members discharged during report period		21			7	Increase in number of members discharged during report period.
<b>Service Utilization (in units)</b>						
1. Peer support		682			80	Increase in services utilized.
2. Education		1114			29	Increase in services utilized.
3. Employment		447			128	Increase in services utilized.
4. On-site social activities		894			115	Increase in services utilized.
5. Off-site social activities		340			-57	Decrease in services utilized.
6. Aftercare		9			0	No change in services utilized.
7. Family involvement		142			81	Increase in services utilized.
8. Transportation		1607			154	Increase in services utilized.
<b>Family-Level Measures</b>						
1. Family engagement (%)		46.9%	50% or more	4	31.0%	Increase in percentage of families involved in Clubhouse events.
<b>Child and Adolescent-Level Measures</b>						
<b>1. Mental health functioning</b>						
a. CAFAS/CANS score improvement (%)		57.1%	50% or more	2*	0.0%	No change in percentage of youth with improved CAFAS/CANS score at discharge compared to intake.
b. Admission to higher LOC (%)		0.3%	35% or less	6	0.0%	No change in percentage of youth served during the previous report period admitted to a higher LOC within 30 days of discharge.
<b>2. Department of Juvenile Justice (DJJ) involvement</b>						
a. Charges (%)		0.6%	35% or less	6	0.3%	No change in percentage of youth with new charges.
b. Arrests (%)		0.6%	35% or less	6	0.3%	No change in percentage of youth arrested.
c. Probation violations (%)		0.0%	35% or less	1**	0.0%	No change in percentage of youth with probation violations.
3. Youth engagement (%)		70.7%	50% or more	5	16.7%	Increase in percentage of youth involved in Clubhouse social activities in the community.
4. Peer support skills (%)		89.9%	35% or more	6	3.9%	No change in percentage of social activities that included youth in the planning process.
5. Home stability (%)		0.0%	20% or less	6	0.0%	No change in percentage of youth who experienced DFCS placement disruptions.
6. Youth satisfaction (%)		N/A	80% or more	N/A***	N/A	Because surveys were either not administered to or completed by discharged members, no youth satisfaction data is available from this report period.

CAFAS - Child and Adolescent Functional Assessment Scale; CANS - Child and Adolescent Needs and Strengths; LOC - Level of care; DFCS - Division of Family and Children Services

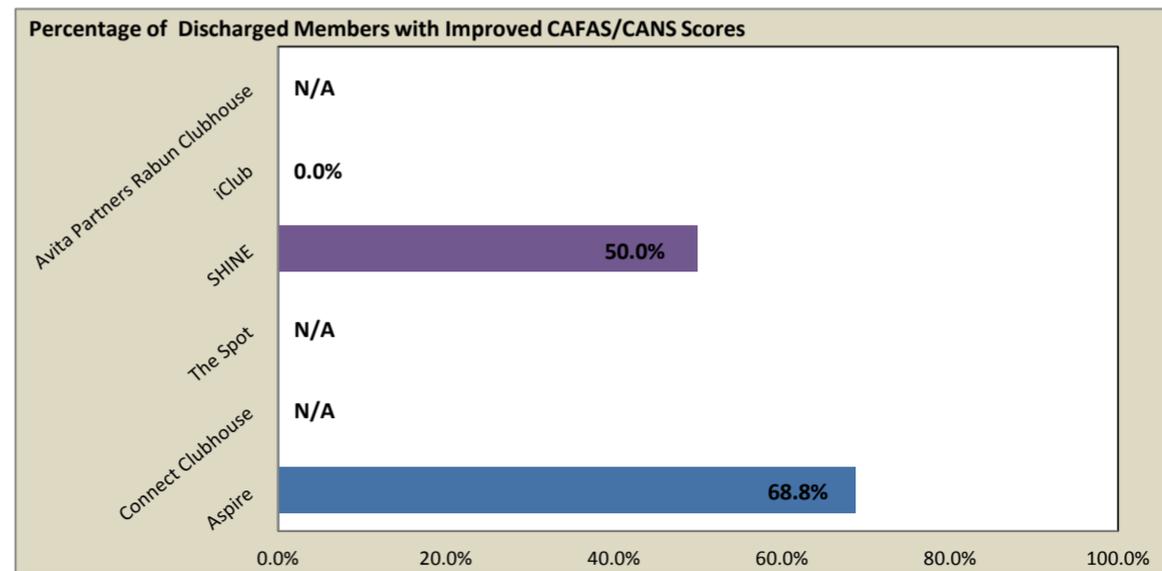

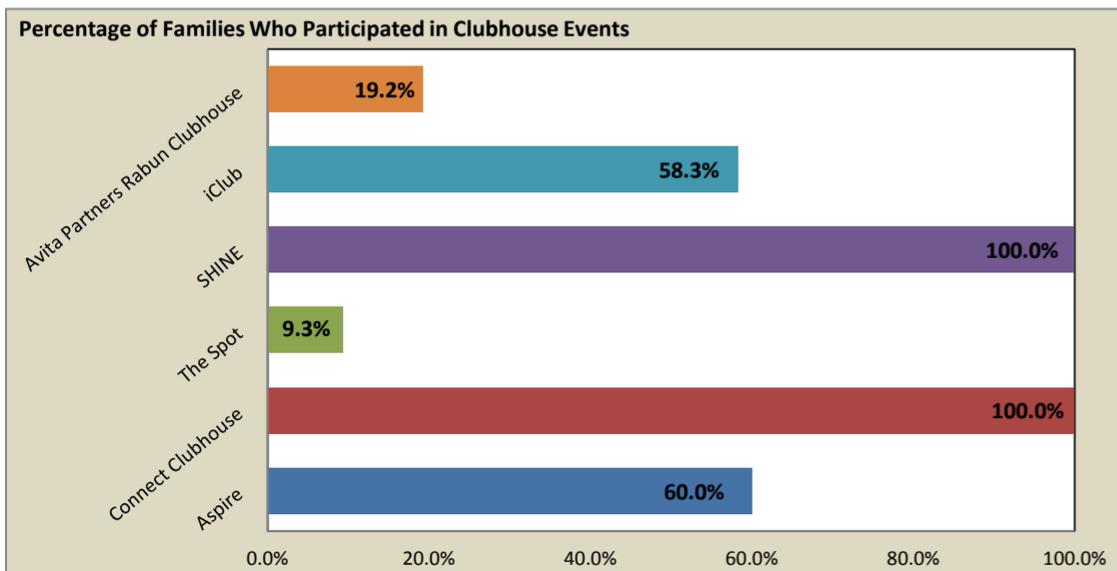

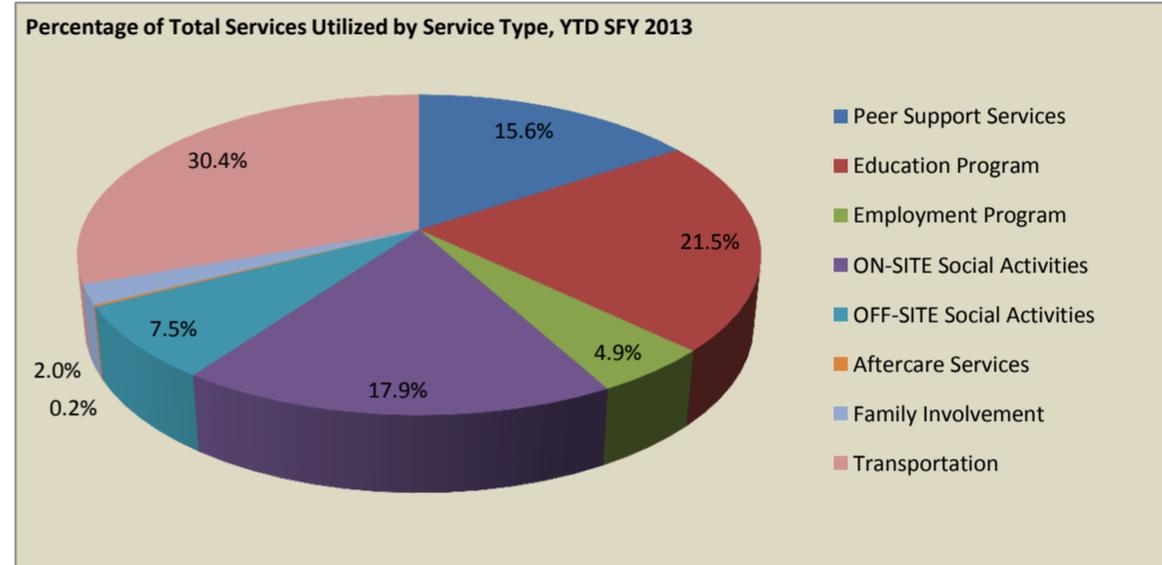

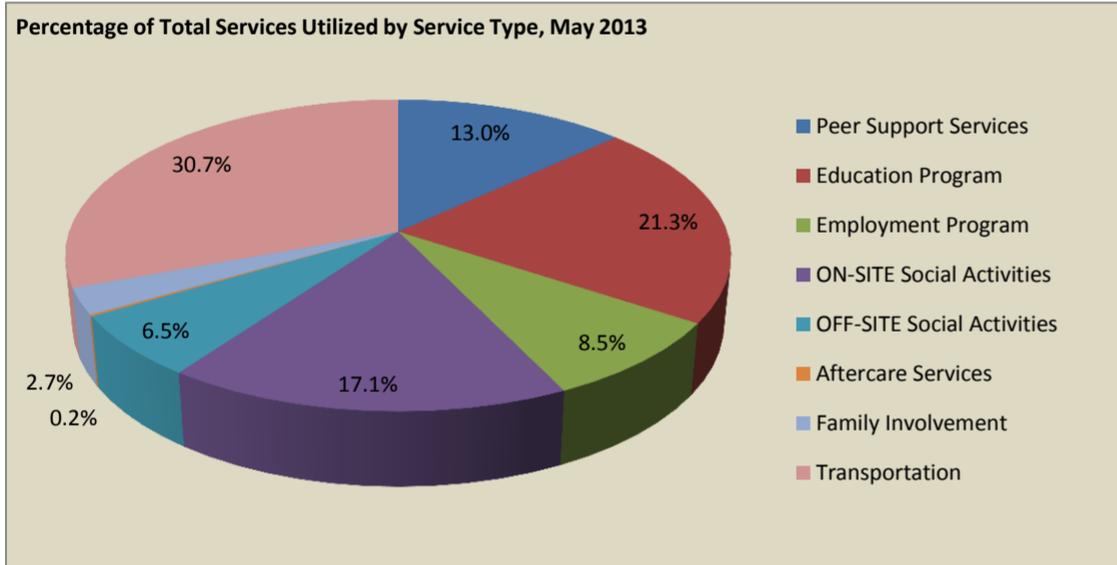

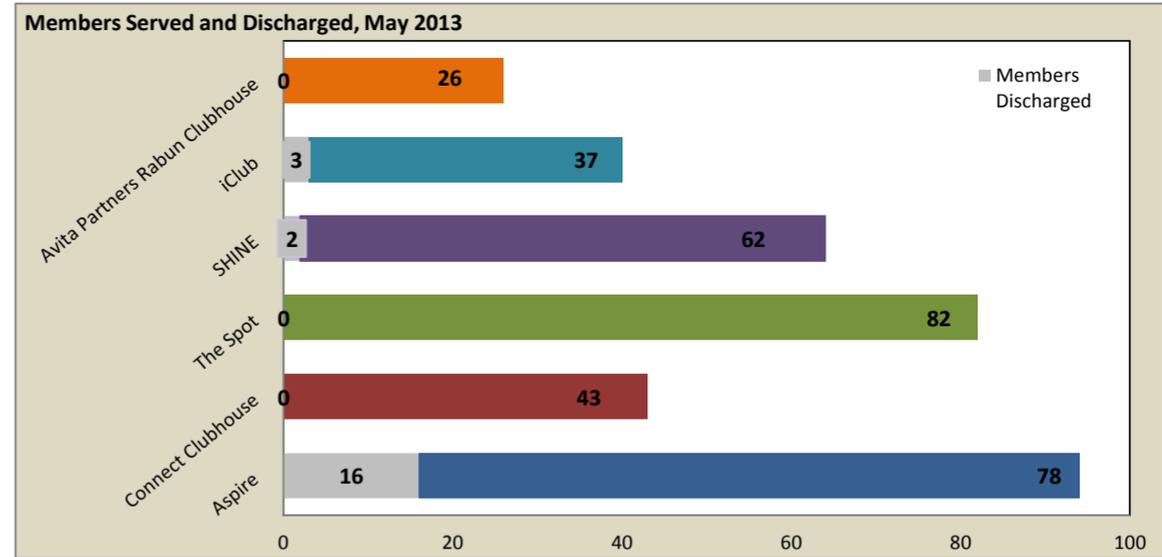

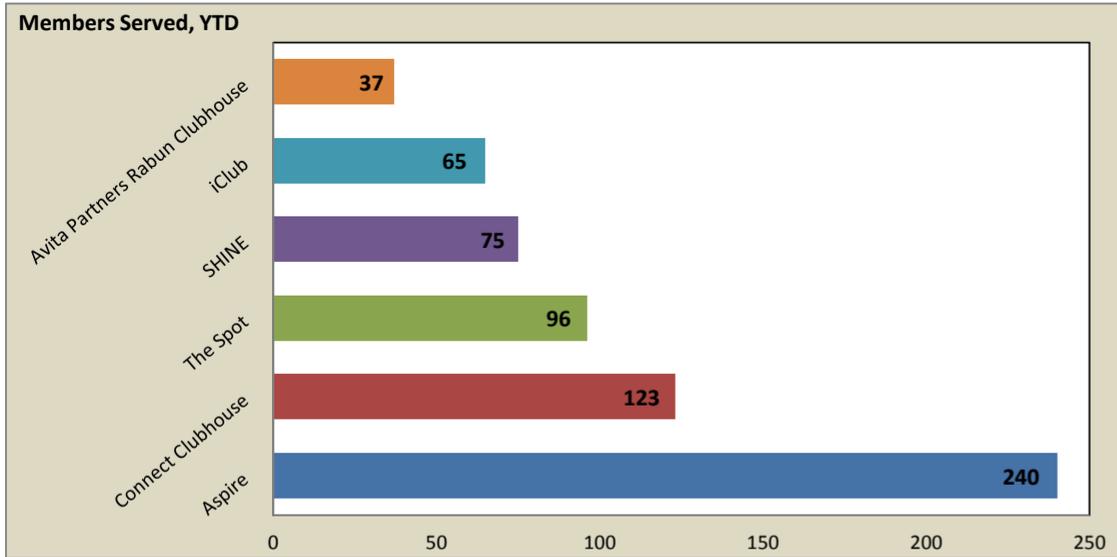

All Clubhouses' Column - Red=Benchmark not met; Green=Benchmark met

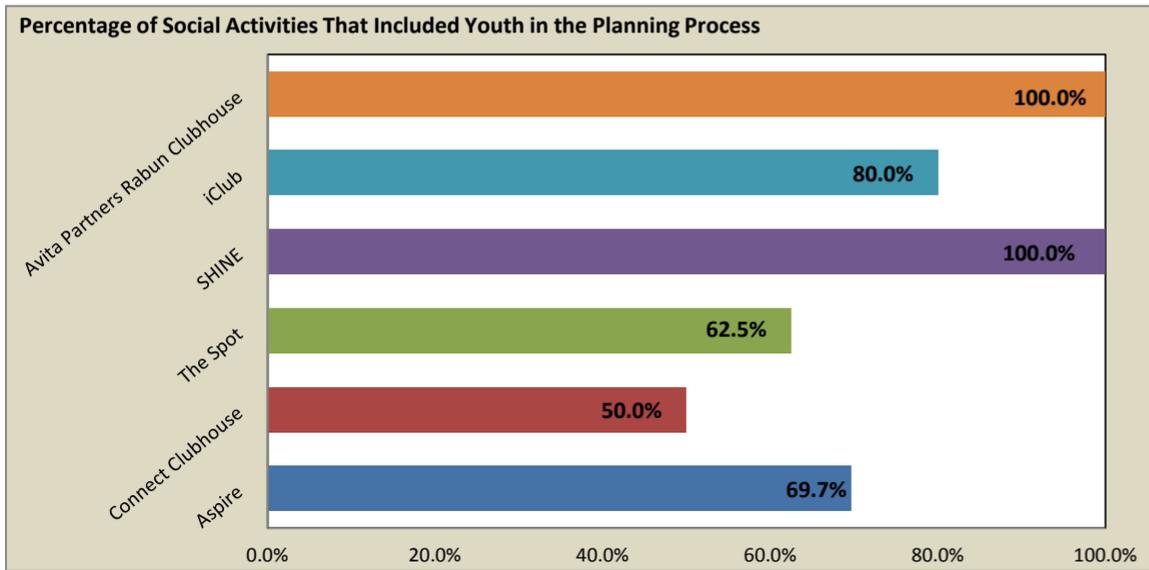

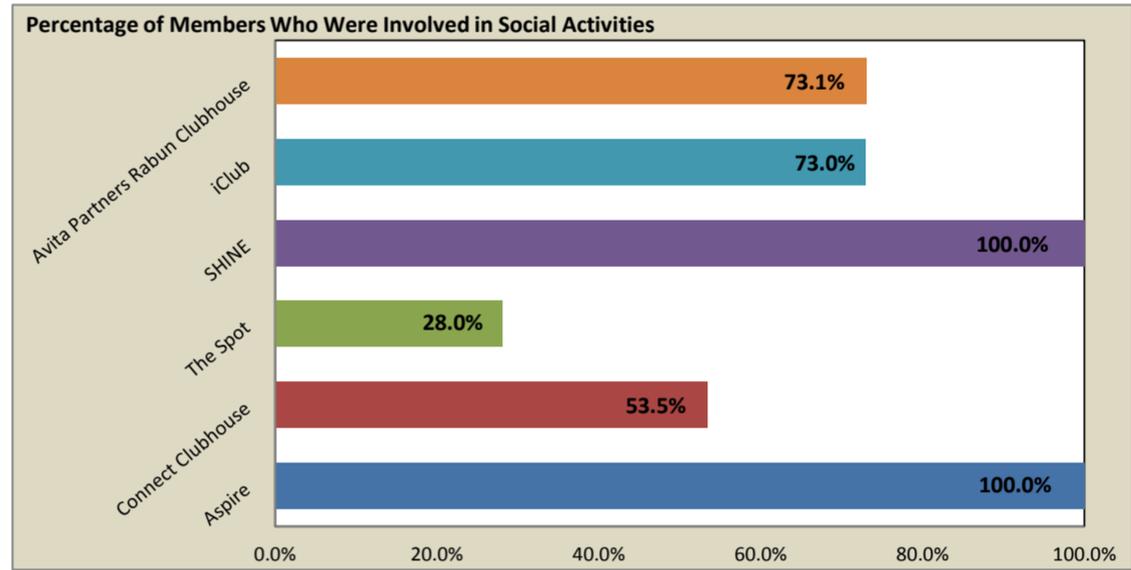

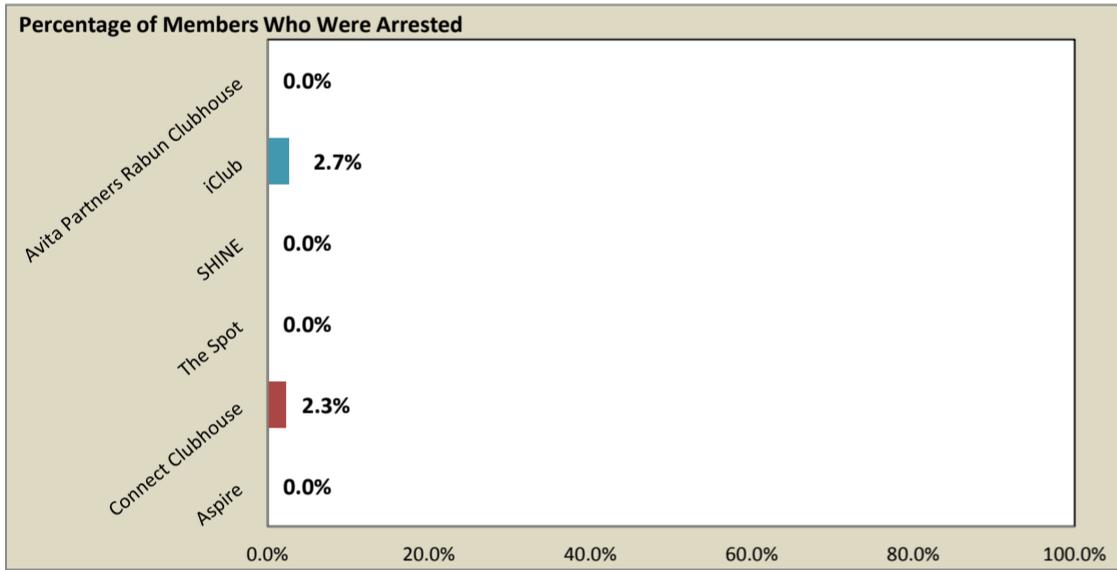

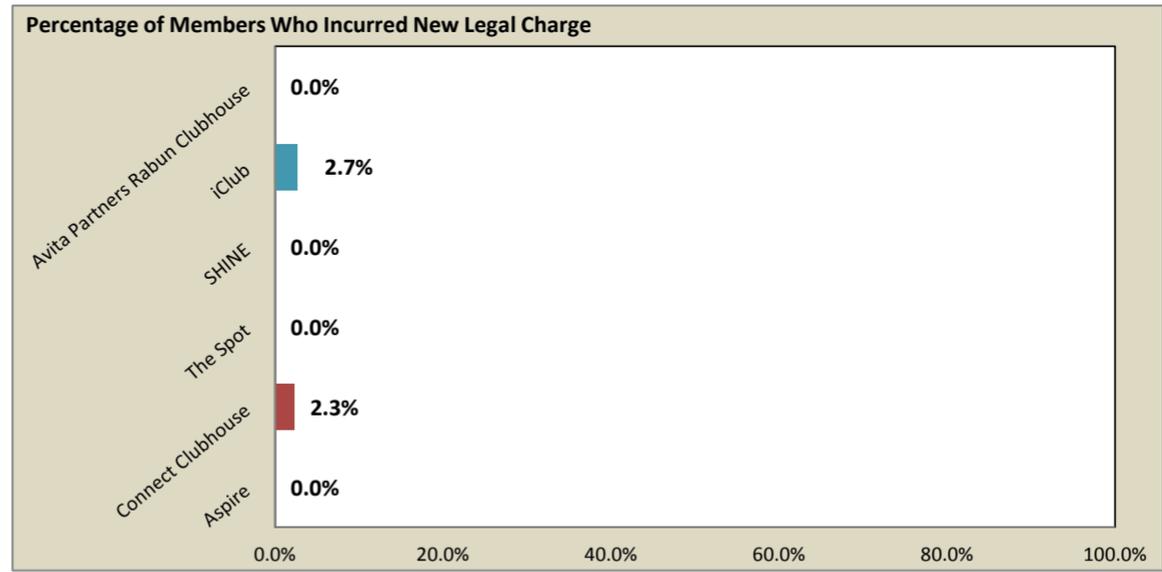

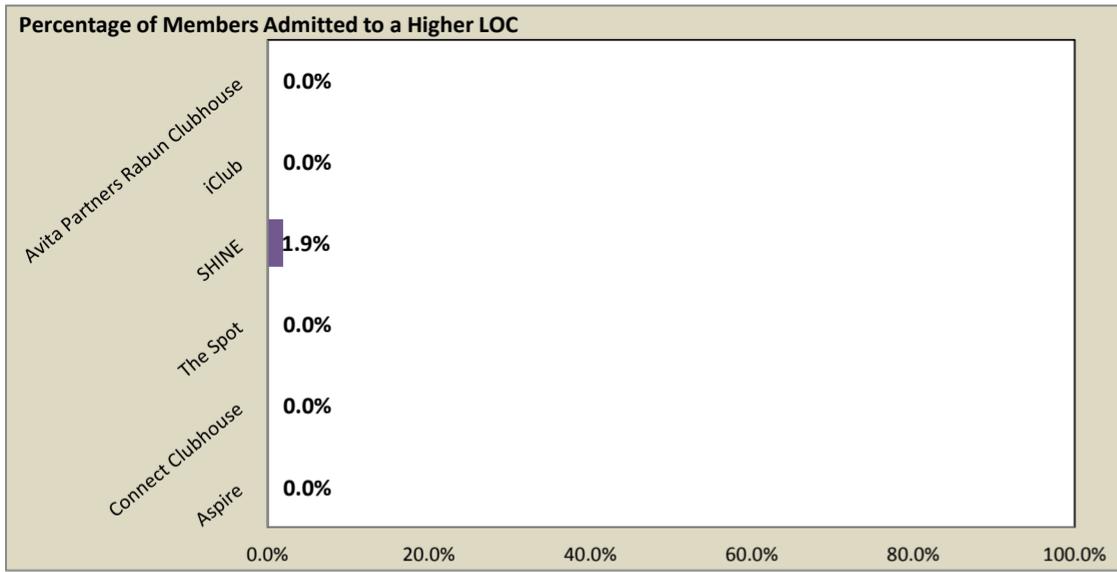

Change from Previous Report Period' Column - Red=Negative change; Yellow=No change; Green=Positive change; Plus or minus 5% change is considered no change.

\*CAFAS score improvement is only assessed on discharged members. Because no members were discharged from three Clubhouses, this measure is not applicable.

\*\*Probation violations are only assessed on members on probation upon admission. Because five Clubhouses reported no members on probation upon admission, this measure is not applicable.

\*\*\*Youth satisfaction surveys are only administered to discharged members. Because no members were discharged from three Clubhouses, this measure is not applicable. Additionally, two Clubhouses did not administer youth satisfaction surveys to any discharged members, and one Clubhouse administered surveys with none completed. Therefore, this precludes the opportunity to assess youth satisfaction, and this measure is not applicable.

Additional Clubhouse Data Collection Considerations  
Per TA Event 06/11/13

**Current measures**

1. Mental health functioning – CAFAS/CANS score improvement
  - a. Remove “CAFAS” from measure – only use CANS.
    - i. How do we ensure CANS scores are being measured the same across providers?
    - ii. Begin using CANS solely to assess “Mental health functioning – CANS score improvement” beginning **July 1, 2013. (This data will be collected and reflected in the Fidelity Monitoring Report that providers will complete in August.)**
  - b. Administer CANS more frequently – six-month basis.
    - i. Adjust measure to compare intake to most recent CANS reassessment score.
2. Mental health functioning – Admitted to higher LOC
  - a. Explore reasons for low admission to higher LOC.
    - i. Kids are not as high needs?
    - ii. Clubhouse is preventative?
3. DJJ involvement
  - a. Potentially change to measure community risk and safety.
    - i. Capture behavioral and conduct episodes, not just DJJ.
    - ii. If DJJ measures remain the same, combine “new legal charge,” “arrest,” and “probation violation” into one question rather than split into three; capture only once the number of youth who had any of these incidents.
4. Family engagement
  - a. Beyond just involvement in Clubhouse events
5. Home stability
  - a. DFCS involvement vs. foster care
  - b. Total number of youth served who are involved in DFCS and/or foster care (to be denominator)
6. Youth satisfaction
  - a. Administer satisfaction survey at intervals – six-month basis.
    - i. Measure would ask for number of youth reporting satisfaction based on the most recent satisfaction survey; would need to know number of youth with a satisfaction survey completed, as this may be different from number of youth served.
  - b. Standardized tool for measuring satisfaction

**Additional measures**

1. Mental health diagnoses
  - a. Can also provide context to higher LOC admissions
2. Education
  - a. Attendance? Achievement?

**Universal considerations**

1. Specific, operational definitions
  - a. Example: “participation,” “social activities,” “legal charge”
