

Georgia Department of Behavioral Health and Developmental Disabilities
Office of Adult Mental Health Resource Directory – 2015

DBHDD Vision

Easy access to high-quality care that leads to a life of recovery and independence for the people we serve.

DBHDD Mission

To lead an accountable and effective continuum of care to support Georgians with behavioral health challenges, and intellectual and developmental disabilities in a dynamic health care environment.

Adult Mental Health Services

Recovery-based programs are available and accessible across Georgia. Many individuals approach the state service system looking for help. The Georgia Department of Behavioral Health and Developmental Disabilities (DBHDD) supports services for people with a diagnosed mental illness, whose level of functioning is significantly affected by the mental illness, and who are unable to pay for all of part of the services. The services a person receives depend on both a professional determination of need and the services and other community resources available.

Community-Based Mental Health Services

Community-based services are provided through contracts with private, for-profit, nonprofit, and quasi-public agencies under contract with DBHDD through the department's regional field offices. Consumer choice is a value that is embraced throughout the system and is fostered through the development of different kinds of provider agencies including consumer-operated agencies. These organizations vary in scope of services provided, including those services that address more individualized needs.

Adult mental health services are accessible 24/7 statewide via the free and confidential Georgia Crisis & Access Line (GCAL): **800.715.4225**. Visit www.mygcal.com to find adult community-based mental health service providers in your area. Services include:

- Assertive Community Treatment
- Community Support Team
- Crisis Respite
- Crisis Stabilization Units
- Peer Support Services
- Psychosocial Rehabilitation
- Supported Employment
- Mobile Crisis Services
- Core-outpatient community mental health clinic

To locate a community mental health service near you, visit www.mygcal.com or call GCAL at 800.715.4225.

Office of Adult Mental Health Resource Directory

If you have any questions or need further assistance with accessing services, **please contact the regional field office** in the area where services are desired.

Region 1 706.802.5272

Region 2 706.792.7733

Region 3 770.414.3052

Region 4 229.225.5099

Region 5 912.303.1670

Region 6 706.565.7835

Inpatient Services

Use of inpatient services is closely monitored and every effort is made to prevent hospitalization by first using community-based crisis stabilization programs, 23-hour temporary observation units, and mobile crisis services. To access statewide inpatient services, call GCAL at 800.715.4225. For inpatient contact information, go to Regional Hospitals Listing.

Current Adult Mental Health Special Initiatives

- 1. Disaster Mental Health Services:** In accordance with the Georgia Emergency Operations Plan Emergency Support Function (ESF) 8 Public Health and Medical, DBHDD is responsible for behavioral health and community disaster mental health services during times of emergency, disaster or terrorist strike. Maintenance of continued behavioral health services during emergencies and disasters is essential. Under ESF 8, DBHDD is also required to offer mental health care to disaster survivors, bystanders, responders and their families, and other community caregivers. DBHDD has a comprehensive and coordinated plan for preparation, prevention, response, recovery and mitigation of behavioral health and community disaster mental health services for Georgia. Georgia's disaster mental health website (www.georgiadisaster.info) provides resources that individuals, families, businesses and organizations can use to develop their disaster plans. Please contact Jeannette David at jeannette.david@dbhdd.ga.gov with questions related to disaster mental health services.
- 2. Pre-Admission Screening and Resident Review (PASSR):** Medicaid regulations require states to maintain a PASSR program to screen nursing facility applicants and residents for serious mental illness. The purpose of PASSR is to ensure that nursing facility applicants and residents with mental illness and/or intellectual and developmental disabilities are

Office of Adult Mental Health Resource Directory

identified and admitted, or remain, in a nursing facility only if they can be appropriately served in that facility and provided with needed services including specialized mental health and intellectual or developmental disability services.

3. **Projects for Assistance in Transition from Homelessness Program (PATH)**: Homeless outreach teams in Atlanta, Augusta, Columbus, and Savannah go to the streets and homeless shelters to identify homeless individuals with mental health challenges. The teams engage these individuals in treatment and connect them to mental health services and mainstream resources to help end their homeless cycle. For more information about PATH, visit www.pathprogram.samhsa.gov.
4. **SSI/SSDI Outreach, Access and Recovery (SOAR)**: SOAR is national project funded by the Substance Abuse and Mental Health Services Health Administration (SAMHSA). It is designed to increase access to SSI/SSDI for eligible adults who are homeless or at risk of homelessness and have a mental health challenge and/or co-occurring substance use disorder. The SOAR Technical Assistance Center uses a three-pronged approach to strategic planning, training, and technical assistance to coordinate efforts at the state and community levels.

Office of Adult Mental Health Resource Directory

How to Access Adult Mental Health Services

Georgia Crisis and Access Line (GCAL) 800.715.4225

DBHDD provides a statewide toll-free call center for consumers to access services. The call center operates 24/7 and has the capacity to screen and assess callers for intensity and service response.

- ❖ **Language Assistance:** Telephone interpreting services are provided to callers with limited English proficiency.
- ❖ **Emergencies:** Individuals determined to be in immediate danger are “warm transferred” to the local 911 service in the area where the consumer is located. Call center staff do not leave the call until they have confirmation that 911 responders are on-site with the caller.
- ❖ **Crisis Assistance:** Individuals in need of crisis management may receive 24/7 mobile response to assess the situation, de-escalate the crisis, and for post-crisis follow-up to assure links with recommended services.
- ❖ **Routine Service Access:** For consumers with less intense needs, the call center staffs are able to offer consumers choice of providers and to schedule appointments for services. Consumers are able to specify the distance they are willing to travel. Call center identifies service providers near the individual.

About Contacting Service Providers Directly: Consumers may choose to contact local providers directly for services. The “no wrong door” philosophy is an important value in Georgia’s system. In addition to GCAL’s call center, www.mygcal.com maintains a database of service providers throughout the state.

To locate a community mental health service near you, visit www.mygcal.com and enter your ZIP code.

Core Services

Core Services are designed for people with a diagnosed mental illness, and/or co-occurring substance use disorder, whose level of functioning is significantly affected by the mental illness, and who are unable to pay for all of part of the services. The services a person receives depend on both a professional determination of need and the services and other community resources available. Community-based services are provided through contracts with private, for-profit, nonprofit, and quasi-public agencies under contract with DBHDD through the department's regional field offices. Agencies that provide core services provide an array of services which include but are not limited to the following:

- Behavioral Health Assessment and Service Plan Development
- Psychological Testing
- Diagnostic Assessment
- Crisis Intervention
- Psychiatric Treatment
- Nursing Assessment and Care
- Medication Administration
- Psychosocial Rehabilitation–Individual
- Case Management
- Individual Counseling Services
- Group Counseling Services
- Family Counseling Services

Assertive Community Treatment

Assertive community treatment (ACT), is a consumer-centered, recovery-oriented, and highly intensive service that offers access to a variety of interventions 24 hours a day, seven days a week. ACT is a community-based alternative to hospitalization for people who have a severe and persistent mental illness (SPMI) which has interrupted their ability to live in the community successfully. In addition to having an SPMI, ACT enrollment **criteria** may include:

- Frequent admission to psychiatric hospitals
- Significant functional impairments due to mental illness
- Homelessness or risk of becoming homeless
- Incarceration for reasons related to mental illness
- Co-occurring substance abuse disorders

ACT is an option for people who have not had success in traditional outpatient behavioral health programs. It is often referred to as a “hospital without walls” because it provides a full range of treatment and supports that enable individuals with SPMI to live in the community. ACT supports recovery through skill-building, advocacy, case management, and psychiatry.

ACT is administered by a multidisciplinary team of behavioral health professionals that consists of a team lead, psychiatrist, registered nurse, certified peer specialist, licensed clinician, vocational specialist, substance abuse counselor, and a paraprofessional. The teams provide intensive, community-based interventions, including: rehabilitation, crisis planning, mental health counseling, substance abuse treatment, medication management, housing and employment assistance, transportation, and other integrated services. ACT is a unique treatment model in which the majority of mental health services are provided directly by the ACT team in the consumer’s natural environment, which may be his or her home. DBHDD supports **22 ACT teams** serving more than **1,700 people** in Georgia. Teams typically serve between 75 and 100 consumers.

ACT teams receive referrals from providers, clinics, hospitals and jails. ACT teams also coordinate transitions to the community for individuals being discharged from a hospital or jail. A large majority of ACT services are provided in the field, rather than in an office setting. Teams are also on call 24/7 to provide crisis intervention outside of regularly scheduled appointments. Because serious mental illnesses are episodic disorders and many consumers benefit from the availability of long-term treatment and continuity of care, individuals may remain in ACT as long as eligibility is met. This flexibility allows consumers to experience gains and setbacks along the process while continuing on the overall road to recovery.

Case Management

Case management addresses the needs of individuals diagnosed with a mental illness who need help to successfully implement their individual recovery plan (IRP) and maintain their recovery in the community. Case management provides environmental support and care coordination that help the individual improve his or her functioning, gain access to necessary services, and create an environment that promotes recovery as identified in the IRP.

A case manager works closely with the individual, physician and other recovery-supporting service providers in the individual's home and community to help:

1. Develop natural supports to promote community integration
2. Identify service needs
3. Refer and link the individual to services and resources identified through the service planning process
4. Coordinate services identified in the IRP to maximize service integration and minimize service gaps
5. Ensure continued adequacy of the IRP to meet the individual's ongoing and changing needs

Community Support Team

Community support teams (CST) address the intensive needs of individuals with severe and persistent mental illness **living in rural areas** who are difficult to engage in treatment and have a history of

- Multiple inpatient hospital admissions or extended stays,
- Multiple discharges from crisis stabilization units, or
- Discharge from correctional facilities or other institutional settings.

CST is a restorative, recovery-focused intervention that helps individuals access services, self-manage their illness, develop independent community living skills, and achieve stable living arrangements.

A multi-disciplinary team comprised of a licensed clinician, registered nurse, paraprofessional(s), and a certified peer specialist work closely with the individual, physician, and other recovery-supporting service providers to help the individual become as independent as possible, and ensure continuity of care without disruption. Team members deliver the majority of interventions in the individual's home or community. Services include nursing, symptom management, medication administration, referral and linkage, care coordination, individual counseling, skills training, relapse prevention, and crisis planning.

Crisis Respite Apartments

Crisis respite apartments offer a brief period of respite for individuals needing a supportive environment. This service is available:

1. When transitioning back into the community from a psychiatric inpatient facility, crisis stabilization unit (CSU) or 23-hour observation area or;
2. When preventing an admission or readmission into a psychiatric inpatient facility, CSU, or 23-hour observation area for an individual who can be safely served in a voluntary, community-based setting. Crisis respite services include individualized engagement, crisis planning, linkage to treatment, and other community resources necessary for the individual to safely reside in the community. Transportation assistance may be provided when needed to access appropriate levels of care. A typical period of crisis respite is 14 days or fewer, but an individual may stay in crisis respite for up to 30 consecutive days.

Crisis Service Centers

A behavioral health crisis center (BHCC) provides 24/7 walk-in access to psychiatric crisis assessment, intervention, and counseling to support individuals experiencing a crisis, substantial and overwhelming stress, or a change in behavior that severely impairs functioning or causes increased personal distress. Interventions are designed to prevent the need for treatment in a CSU or psychiatric hospital. Interventions include temporary observation; mobilization of natural support systems; and successful linkage to appropriate levels of care for adults experiencing crisis situations (such as CSU or other services deemed necessary to effectively manage the crisis and transportation when needed).

Crisis Stabilization Units

A crisis stabilization unit is a community-based alternative to (or diversion from) psychiatric inpatient hospitalization that offers psychiatric stabilization and detoxification services. CSUs provide medically monitored psychiatric, short-term treatment services for the purpose of psychiatric stabilization and substance detoxification. Services may include:

1. Psychiatric medical assessment
2. Crisis assessment, support, and intervention
3. Medically monitored residential substance detoxification (at ASAM Level III.7-D)
4. Medication administration, management, and monitoring
5. Brief individual, group, and/or family counseling
6. Linkage to other services as needed

Intensive Case Management

Intensive case management (ICM) addresses the needs of individuals with severe and persistent mental illness (SPMI) who have a history of multiple admissions or extended stays in psychiatric hospitals, crisis stabilization units, or other institutional settings. ICM also serves individuals with a history of incarceration as a result of mental illness, and people who are otherwise difficult to engage in treatment. ICM provides environmental supports and care coordination considered essential to help individuals improve functioning, gain access to necessary services, and create an environment that promotes recovery as identified in their individual recovery plans (IRP).

Intensive case managers maintain small caseloads and work closely with the individual, physician, and other recovery-supporting service providers to ensure continuity of care without disruption and to enable individuals to become as independent as possible. Intensive case managers deliver the majority of interventions in the individual's home and/or community to help the individual:

1. Develop natural supports to promote community integration
2. Identify service needs
3. Refer and link the individual to services and resources identified through the service planning process
4. Coordinate services identified in the IRP to maximize service integration and minimize service gaps
5. Ensure continued adequacy of the IRP to meet the individual's ongoing and changing needs

Mental Health Courts

DBHDD supports services for some of criminal offenders with mental illness who agree to seek treatment as an alternative to sentencing. Eligibility for mental health court treatment depends on the crime and is offered at the discretion of the presiding judge. Individuals participate in assessment and treatment, along with monitoring and other supervised requirements.

Mobile Crisis

Mobile crisis provides 24/7 community-based, face-to-face crisis response to individuals in an active state of crisis. Mobile crisis response offers short-term behavioral health intervention for people who are experiencing significant psychiatric distress and may be unable to successfully maintain stability. This service provides interventions to people who may be in crisis in their homes, current place of residence, or other community settings (including homes, schools, hospital emergency departments, and social service settings). Interventions include a brief, situational assessment; verbal interaction to de-escalate the crisis; assistance in immediate crisis resolution; mobilization of natural support systems; and referral to alternate services at the appropriate level. Mobile crisis also includes post crisis follow-up to ensure linkage with recommended services.

The Projects for Assistance in Transition from Homelessness (PATH) Program

Projects for Assistance in Transition from Homelessness program (PATH) is funded by SAMHSA to support the delivery of outreach services to individuals with serious mental illness and those with co-occurring substance use disorders who are homeless or at imminent risk of becoming homeless. PATH's homeless outreach teams in Atlanta, Marietta, Columbus, Augusta, and Savannah go to streets and homeless shelters to identify chronically people who are chronically homeless are highly vulnerable to health risks. The teams use assertive engagement strategies to help people access housing and resources needed to end their homeless cycle.

Peer Support Services

Peer support services are structured individual or group interventions which promote socialization, wellness, self-advocacy, developmental or natural supports, and achievement of self-determined life goals. Services are consumer motivated, initiated, and managed, and help individuals live meaningful and independent lives. Services are facilitated by certified peer specialists who have lived experience with recovery from mental health and/or substance use disorders, and have been trained to draw on their experiences to provide hope and encourage others to walk their own path of self-directed recovery.

Psychosocial Rehabilitation

Psychosocial rehabilitation promotes stability in a person's daily environment. Stability is measured by a decreased number of hospitalizations, reduced frequency and duration of crisis episodes, and increased or stable participation in community and work activities. Supports based on each individual's needs are used to promote recovery while helping the individual understand the effects of his or her mental illness and/or substance use disorder.

Psychosocial rehabilitation seeks to:

- Build rehabilitative skills
- Develop environmental and recovery supports that promote self-access to services
- Support the emotional and functional improvement of the individual

Activities include:

- Helping people learn to articulate personal goals and objectives
- Developing skills to self-manage or prevent crisis situations
- Individualized interventions that take place in a person's living, learning, working, or other social environments

Office of Adult Mental Health Resource Directory

Residential Support Services

Residential support provides supported housing to eligible individuals and includes rehabilitative skill-building activities, with varying levels of supervision based on clinical and medical necessity. The intent of this service to provide stable, short-term housing in which individuals may achieve community integration and progress toward recovery.

Supported Employment

Support employment is available to eligible individuals who express a desire for competitive employment in their individual recovery plan and who, due to the effect and severity of their mental illness, have recently lost employment or been underemployed or unemployed on a frequent or long-term basis. Currently, there are 22 supported employment providers throughout the state. Services include supports to access benefits counseling; identifying vocational skills and interests; and developing and implementing a job search plan to obtain competitive employment in an integrated community setting that is based on the individual's strengths, preferences, abilities, and needs.
