# The Georgia Collaborative ASO

- The right service
- In the right amount
- For the right individuals
- At the right time

# Goals of the Collaborative

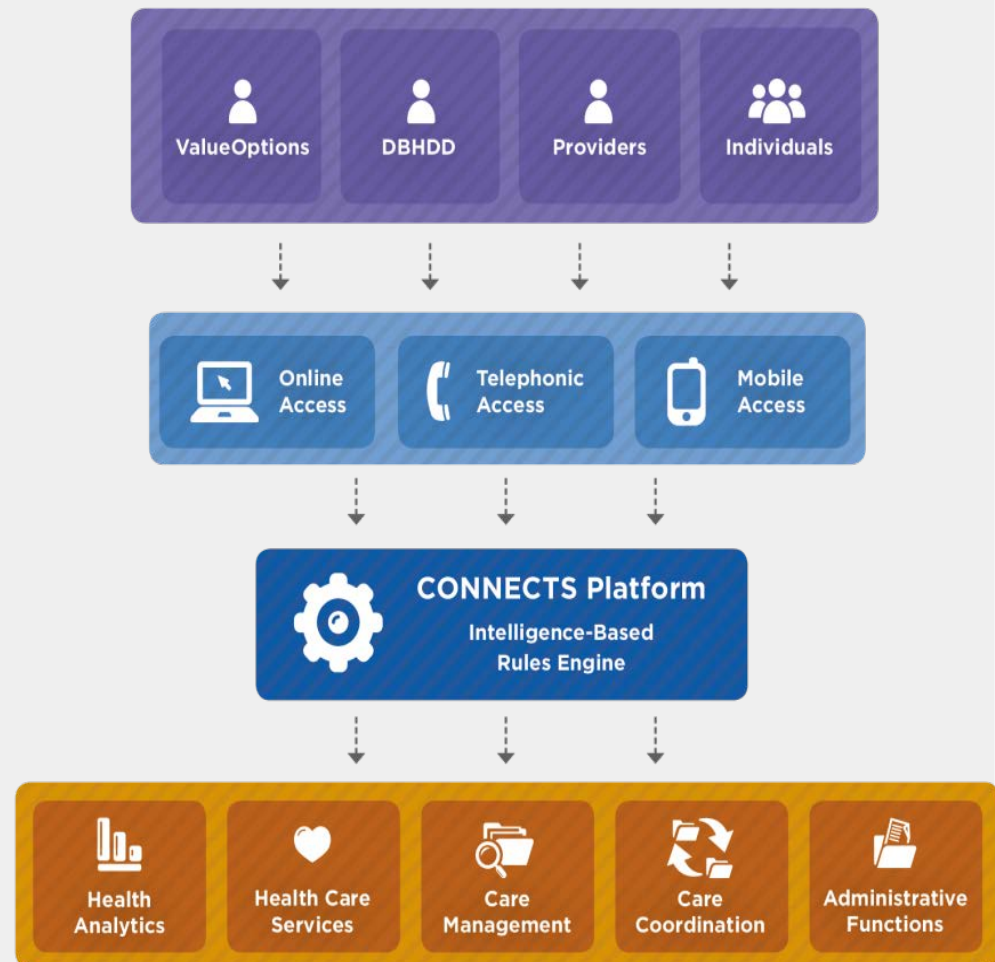

## “Providing Easy Access to High Quality Care”

- Support recovery, resiliency and independence in community based service system
- Leverage technology through an integrated, customizable platform allowing all core functions to “communicate” (The CONNECTS platform)
- Coordination of previously disparate systems
- Improve outcomes and provider performance

# Data Driven Outcomes and Processes

Integrated, customizable platform allowing all core functions to “communicate”

- Eligibility
- Provider demographics & credentialing
- Authorization
- Care coordination
- Health analytics
- Data transfer
- Claims payment
- Reporting

# An Introduction to ProviderConnect<sup>SM</sup>

# ProviderConnect - Services

## An online tool where providers can:

- |  |   |
|--|---|
| • Verify individual eligibility                      | • Register an Individual for funds      |
| • Access and Print forms                             | • Request and View Authorizations       |
| • Download and Print Authorization Letters           | • Submit Claims and View Status         |
| • Access Provider Summary Vouchers (PSVs)            | • Submit Customer Service Inquiries     |
| • Submit Updates to Provider Demographic Information | • Access ProviderConnect Message Center |

## INCREASED CONVENIENCE, DECREASED ADMINISTRATIVE PROCESSES

Disclaimer: Please note that screens used in this presentation are for demonstration purposes only and actual content may vary.

# ProviderConnect Benefits

## What are the benefits of ProviderConnect?

- Free and secure online application, available 24 / 7
- Reduce the need to call for routine information
- Mobile Device friendly

## You can:

- Access the ProviderConnect message center
- Link to Educational Resources on our website
- View and print forms
- Submit or inquire about claims and view status
- Access Provider Summary Vouchers
- Submit updates to provider demographic information

# Registering an Individual

# Why Register an Individual?

- Request for eligibility - Established individual in CONNECTS system
  - For new individuals creates a Consumer ID # (CID)
  - Robust “best match” logic so duplicate CIDs are not created for one individual
- Assigns funds and benefits to an individual
  - Must have funds and benefits on file in order to submit an authorization and claim
- Collects demographic data for reporting
- Allows provider to update individuals demographic information
- Assists with validation edits allowing for better quality data

# Braided Funding Model Benefits

- Establishes the individual as the nexus for accessing multiple public funding sources.
- More efficient use of limited or constrained funds
- Ensure providers are accessing all available to fund sources to serve the individual holistically
- Leverages all funding sources for which an individual may be eligible (Coordination of benefits future FY 2016)
- Provides a comprehensive service package maximizing the resources available for an individual to lead a life of recovery
- Service utilization and expenditures can be broken out and tacked by funding source

# Registration – Fund Source Assignment

- Registration Fund Source assignment initiates the Beacon Health Options Braided Funding model

# Registration Changes

- Can be submitted two ways
  - One individual at a time through ProviderConnect
  - Multiple individuals at a time via Batch Registration process
- Collects basic demographic information about an individual and generates a Client Identification number (CID) if necessary
- Needs to be submitted separate from the authorization
- Is needed before an authorization can be requested
- Assigns fund sources to an individual based on individual's status and provides availability to access specific fund types

# Diagnosis

## Diagnosis

Documentation in Diagnostic Category 1 is required. Provisional working condition and diagnosis should be documented if necessary. Documentation of **additional co-occurring** conditions that impact or are a focus of treatment (mental health, substance use, personality, intellectual disability) is strongly recommended to support comprehensive care. Authorization (if applicable) does NOT guarantee payment of benefits for these services. Coverage is subject to all limits and exclusions of the benefit.

## Diagnosis

Documentation in **Diagnostic Category 1** is required. Provisional working condition and diagnosis should be documented if necessary. Documentation of **additional co-occurring** conditions that impact or are a focus of treatment (mental health, substance use, personality, intellectual disability) is strongly recommended to support comprehensive care. Authorization (if applicable) does NOT guarantee payment of benefits for these services. Coverage is subject to all limits and exclusions outlined in the individual's plan and/or summary plan description including covered diagnosis.

### Providers Menu

The Georgia Department of Behavioral Health and Developmental Disabilities (DBHDD) has selected ValueOptions, Inc. to serve as the department's administrative services organization (ASO). Under the terms of the contract, ValueOptions will assist in the administration of DBHDD's behavioral health and developmental disability care through a wide range of services. By creating this ASO, this process allowed DBHDD an opportunity to combine functions of existing contracts, modify and add new deliverables that will improve coordination, increase efficiency and support high-quality care for individuals served by the department.

# Process Flows (continued)

## What are the major changes to the process?

Each file type will require separate files and responses.

### Registration:

- Instead of using one file for the Registration / Authorization / Discharge in the MICP system, the functionality will be separated in the new GA Collaborative's system.
- Most registrations will last for 12 months and unless an individual's demographics change or the individual is being enrolled into one of the special programs, providers will not have to continuously submit these demographics.

### Request for Services:

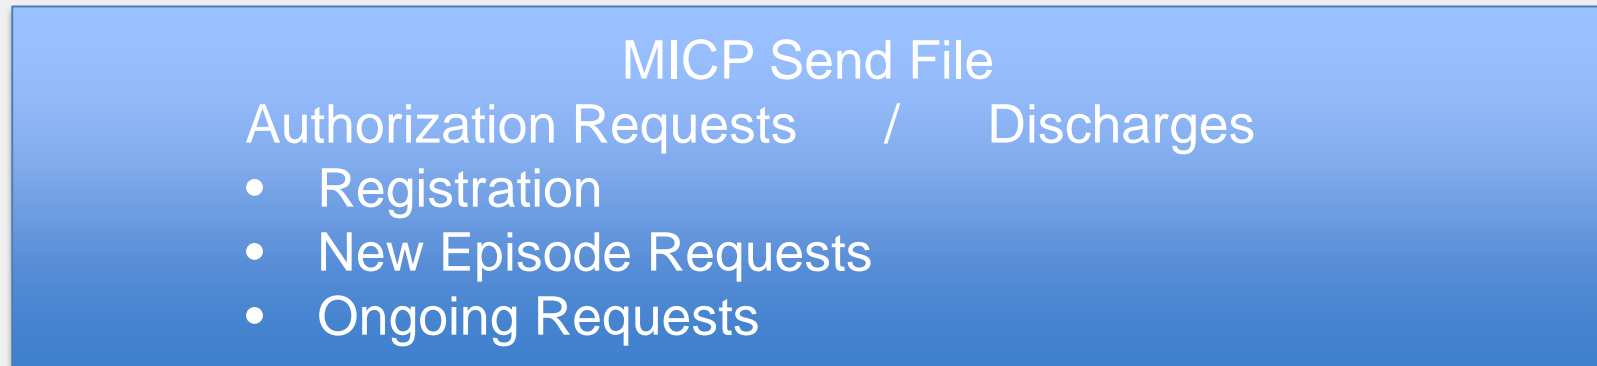

- Instead of using the Service Packages / Service Groups terminology, the ASO system will employ Level of Care and Service Class terms.
- Providers may have multiple open authorizations at the same time for different levels of care (e.g. Supported Employment & Non-Essential)

### Discharges:

- Providers will submit a discharge when individuals leave service.

# Process Flows (continued)

## Process Flow for the MICP System

## Process flow for the ProviderConnect System

# Data Elements

# Data Elements

DBHDD examined existing data elements collected in the MICP system and any new requirements in order to identify what data must be collected from providers.

Reporting Requirement	Data Elements (examples)
ADA Settlement Agreement with U.S. DOJ	ADA Target Population Questions: <ul style="list-style-type: none"> <li>• SPMI</li> <li>• Frequent admissions to ER's</li> <li>• Frequent Admissions to Psychiatric Hospitals</li> <li>• Recently Released from Jail/Prison</li> <li>• Chronically Homeless</li> </ul>
Belton Settlement Agreement (Deaf Services)	Language, Communication, Vision, and Hearing
Support of DBHDD Quality Management, Fidelity, and Outcomes System Reporting	Income, Employment, VocRehab Information, Living Situation, Homeless Days, Jail/Prison Admissions/Days
Support and Enhance Care Coordination of Individuals	Additional Contact Information, Legal Guardian/ Representative, Medical Information, Discharge Planning, After Care Screens
Federal Reporting Requirements	Substance Abuse Treatment Episode Dataset (SA TEDS) Mental Health Treatment Dataset (MH TEDS)

In addition, it is intended that the ProviderConnect System be an integrated system for both Behavioral Health and IDD individuals. Thus for some data elements a coordinated effort was made to be inclusive of the valid values to be reported. Also, options for Unknown/Refused have been added to a number of data elements to improve data validity if value is truly unknown.
