Health Risk Screening Tool (HRST): Protocol Review for DD Providers & Their Nurses *Informational session provided via Conference Call & Internet*

The goal of the Health Risk Screening Tool is to provide the support team with guidance in identifying a person's health risks that may need further assessment and evaluation. It will also guide the team in determining the need for professional services. The intent of the HRST protocol review is to train all DD providers and their nurses on the proper protocols when reviewing the health risk screening tools.

The learning objectives for this hour and a half informational session are for the Managers of DD Services and Nurses working for those providers to learn what is expected of the nurses when they review the HRST. This includes the time frames, what actions nurses are to take if the information is not accurate, and how to log on and make changes. This training is for the Managers of DD Community Provider Organizations and their Nurses. The presenter for this training will be Erin Mathews, BS, DC, a chiropractic physician who has fourteen years experience with the Health Risk Screening Tool.
